University of Texas, Austin
Austin, Texas 78712

Published semimonthly by Academic Press, Inc., 111 Fifth Avenue, New York, N.Y. 10003.

1983: Volumes 110–117. Price: $472.00 U.S.A. and Canada; $568.00 outside U.S.A. and Canada
1984: Volumes 118–125. Price: $496.00 U.S.A. and Canada; $595.00 outside U.S.A. and Canada
All prices include postage and handling.

Information concerning personal subscription rates may be obtained by writing to the Publisher. All correspondence and subscription orders should be addressed to the office of the Publishers at 111 Fifth Avenue, New York, N.Y. 10003. Send notices of change of address to the office of the Publishers at least 6 to 8 weeks in advance. Please include both old and new addresses. POSTMASTER: Send changes of address to *Biochemical and Biophysical Research Communications*, 111 Fifth Avenue, New York, New York 10003.

Author Indexes 1
Subject Index 29

CUMULATIVE TABLE OF CONTENTS FOR VOLUMES 110-117

Volume 110, Number 1, January 14, 1983

AUTHOR INDEX, Volume 110, Number 1, January 14, 1983 ii

Amino Acid Sequence of an Insect Chymotrypsin from the Larvae of the Hornet, *Vespa orientalis* *K.-D. Jany, K. Bekelar, G. Pfleiderer, and J. Ishay* 1

Amino Acid Sequence of Bovine Heart Cytochrome Oxidase Subunit IV (Albany) *Neil S. Reimer, Kerry T. Yasunobu, Yau-Huei Wei, and Tsoo E. King* 8

Ca^{2+} and pH-Induced Fusion of Small Unilamellar Vesicles Consisting of Phosphatidylethanolamine and Negatively Charged Phospholipids: A Freeze-Fracture Study *M. J. Hope, D. C. Walker, and P. R. Cullis* 15

Evidence for a Cytosolic Precursor of Chick Embryo Liver Mitochondrial δ-Aminolevulinate Synthase *Gopesh Srivastava, Iain A. Borthwick, John D. Brooker, Brian K. May, and William H. Elliott* 23

Biogas (Natural Gas?) Production by Anaerobic Digestion of Oil Cake by a Mixed Culture Isolated from Cow Dung *K. G. Gollakota and B. Jayalakshmi* 32

Immunochemical Evidence for the Enzymatic Difference of Δ^6-Desaturase from Δ^9- and Δ^5-Desaturase in Rat Liver Microsomes *Yutaka Fujiwara, Takako Okayasu, Teruo Ishibashi, and Yoh Imai* 36

Biogenesis of Mitochondrial Proteins: Regulation of Maturation of δ-Aminolevulinate Synthase by Hemin *Ibrahim Z. Ades* 42

Structural Changes Caused by Thyrotropin in Thyroid Cells and in Liposomes Containing Reconstituted Thyrotropin Receptor *Francesco Beguinot, Silvestro Formisano, Carlo M. Rotella, Leonard D. Kohn, and Salvatore M. Aloj* 48

Protein Phosphorylation and the Exocytosis-like Interaction between Isolated Adrenal Medullary Plasma Membranes and Chromaffin Granules *Frank Konings and Werner De Potter* 55

Nuclear Hormone-Mediated Changes in Chromatin Solubility *Richard N. Re, Ronald A. LaBiche, and Sara E. Bryan* 61

Pancreatic Stone Protein, a Phosphoprotein Which Inhibits Calcium Carbonate Precipitation from Human Pancreatic Juice *Luc Multigner, Alain De Caro, Dominique Lombardo, Daniel Campese, and Henri Sarles* 69

Ovomucoid and Ovoinhibitor Isolated from Chicken Egg White Are Immunologically Cross-reactive *Tsukasa Matsuda, Kenji Watanabe, and Ryo Nakamura* 75

Inhibition of Sterol and DNA Synthesis in Peripheral Blood Lymphocytes by AY9944 *Graham Kay and Peter A. Wilce* 82

Evidence for Early Fluidity Changes in the Plasma Membranes of Interferon-Treated L Cells, from Fluorescence Anisotropy Data *Jean-Georges Kuhry, Philippe Poindron, and Gilbert Laustriat* 88

Messenger RNA Populations and Their Nuclear Precursors in Cultured Human Glioma and Fetal Brain Cells *Christine Icard-Liepkalns, Vis A. Liepkalns, and Thomas E. Webb* 96

Effects of Common Radioiodination Procedures on the Binding of Glycoproteins to Immobilized Lectins *R. C. Montelaro, M. West, and M. Ivey* 103

The Rapid Polyphosphoinositide Metabolism May Be a Triggering Event for Thrombin-Mediated Stimulation of Human Platelets *Atsushi Imai, Shigeru Nakashima, and Yoshinori Nozawa* 108

Gonadotropin Releasing Hormone Receptors: Photoaffinity Labeling with an Antagonist *E. Hazum and D. Keinan* 116

Copyright © 1983 by Academic Press, Inc.
All rights of reproduction in any form reserved.

α-D-Galactosyltransferase Activity in Calf Thymus: A High-Resolution ^{1}H-NMR Study
Herman van Halbeek, Johannes F. G. Vliegenthart, Herrie Winterwerp, Willem M. Blanken, and Dirk H. van den Eijnden 124

Synthesis and Intracellular Transport of Cytochrome Oxidase Subunit IV and ADP/ATP Translocator Protein in Intact Hepatoma Cells
Irena Hatalová and Jordan Kolarov 132

Alteration of Liposome Disposition *in Vivo* by Bilayer Situated Carbohydrates
F. C. Szoka, Jr. and E. Mayhew 140

Fast and Slow Chicken Skeletal Muscles Contain Different α and β Tropomyosins
Elissavet Kardami, Didier Montarras, and Marc Fiszman 147

Microinjected Interferon Does Not Promote an Antiviral Response in HeLa Cells
Georges Huez, Michèle Silhol, and Bernard Lebleu 155

Dopamine-β-hydroxylase: Suicide Inhibition by the Novel Olefinic Substrate, 1-Phenyl-1-aminomethylethene
Sheldon W. May, Patricia W. Mueller, Stephen R. Padgette, Heath H. Herman, and Robert S. Phillips 161

Binding of *lac* Repressor Headpiece to Poly[d(A–T)]: A Thermal Denaturation Study
M. Durand, M. Schnarr, and J. C. Maurizot 169

Escherichia coli dnaJ- and dnaK-Gene Products: Synthesis in Minicells and Membrane Affinity *Maciej Zylicz, Józef Nieradko, and Karol Taylor* 176

Structure and Location of Asparagine-Linked Oligosaccharides in the Fc Region of a Human Immunoglobulin D
Hideko Ishihara, Setsuzo Tejima, Noriko Takahashi, Tatsunori Takayasu, and Tomotaka Shinoda 181

Studies on Isoprenoid Biosynthesis with Bacterial Intact Cells
Hiroshi Takatsuji, Tokuzo Nishino, Ichiro Miki, and Hirohiko Katsuki 187

Chitosans and Pectic Polysaccharides both Induce the Accumulation of the Antifungal Phytoalexin Pisatin in Pea Pods and Antinutrient Proteinase Inhibitors in Tomato Leaves *Mary Walker-Simmons, Lee Hadwiger, and Clarence A. Ryan* 194

Dexamethasone Affects Phosphatidylinositol Synthesis and Degradation in Cultured Human Embryonic Cells
Robert I. Grove, William D. Willis, and Robert M. Pratt 200

Demonstration of Adenylate Cyclase-Coupled Adenosine Receptors in Guinea Pig Ventricular Membranes
Edward Leung, Colin I. Johnston, and Elizabeth A. Woodcock 208

The Inhibition of Chromatin Solubilization by Proteolytic Inhibitors
Robert C. Krueger 216

Enzyme-Induced Aziridine Formation by Rat Liver Microsomes
Yoshiteru Hata and Masamichi Watanabe 220

The Inhibitory Effect of Some Lectins on the Differentiation of Friend Erythroleukemia Cells
Gieljan J. C. G. M. Bosman, Pieter Boer, and Elizabeth P. Steyn-Parvé 228

Growth Inhibition of Human Breast Cancer Cells Induced by Calcitonin
Y. Iwasaki, J. Iwasaki, and H. C. Freake 235

The Origin of Sulfur in Biotin *Edward DeMoll and William Shive* 243

Synthesis of Prostaglandin E_2 and Prostaglandin $F_{2\alpha}$ by Toadfish Red Blood Cells
Lauren M. Cagen, Zahir Qureshi, and Hiroko Nishimura 250

Human Plasma α_1- and α_2-Thiol Proteinase Inhibitors Strongly Inhibit Ca-Activated Neutral Protease from Muscle
Makoto Sasaki, Keiko Taniguchi, Koichi Suzuki, and Kazutomo Imahori 256

Subcellular Distribution of γ-Hydroxybutyrate Binding Sites in Rat Brain: Principal Localization in the Synaptosomal Fraction
Michel Maitre, Jean-François Rumigny, Christopher Cash, and Paul Mandel 262

Leukotriene B_4, C_4, D_4, and E_4 Inactivation by Hydroxyl Radicals
William R. Henderson and Seymour J. Klebanoff 266

Mechanisms of Leukotriene Formation: Hemoglobin-Catalyzed Transformation of 15-HPETE into 8,15-DiHETE and 14,15-DiHETE Isomers
Dai-Eun Sok, Taeowan Chung, and Charles J. Sih 273
Molecular Heterogeneity of Ferredoxin-NADP$^+$ Reductase from Spinach Leaves
Hideyo Hasumi, Etsuko Nagata, and Satoshi Nakamura 280
Disassembly of Microtubules by the Action of Calmodulin-Dependent Protein Kinase (Kinase II) Which Occurs Only in the Brain Tissues
Takashi Yamauchi and Hitoshi Fujisawa 287
Mechanism of Depsipeptide Formation Catalyzed by Enniatin Synthetase
Rainer Zocher, Ullrich Keller, and Horst Kleinhauf 292
A Chemoreceptive Bilayer Lipid Membrane Based on an Auxin-Receptor ATPase Electrogenic Pump
Michael Thompson, Ulrich J. Krull, and Michael A. Venis 300
Proton NMR Spectroscopic Studies of Dipeptidase in Human Erythrocytes
Glenn F. King, Michael J. York, Bogdan E. Chapman, and Philip W. Kuchel 305
The Reconstitution Reaction of *Neurospora* Apotyrosinase
Mariano Beltramini and Konrad Lerch 313
A Direct Study of the Cohesion of Lecithin Bilayers: The Effect of Hopanoids and α,ω-Dihydroxycarotenoids
P. Bisseret, G. Wolff, A.-M. Albrecht, T. Tanaka, Y. Nakatani, and G. Ourisson 320
Uncoupling of Oxidative Phosphorylation in Rat Liver Mitochondria following the Administration of Dimethyl Sulfoxide
Shyamal S. Mhatre, K. G. Chetty, and D. S. Pradhan 325
Paradoxical Effect of Leupeptin *in Vivo* on Cathepsin B Activity
J. H. R. Sutherland and L. M. Greenbaum 332
Detection of Antineoplastic Agent-Induced Cardiotoxicity by ^{31}P NMR of Perfused Rat Hearts *Thian C. Ng, J. Patrick Daugherty, William T. Evanochko, Stanley B. Digerness, John R. Durant, and Jerry D. Glickson* 339
Glycosyltransferase Activities and the Differentiation of Human Promyelocytic (HL60) Cells by Retinoic Acid and a Phorbol Ester
John P. Durham, Mike Ruppert, and Joseph A. Fontana 348
ERRATA
Volume 108, Number 3, October 15, 1982: Tatsuji Haneji, Mamiko Maekawa, and Yoshitake Nishimune, "Retinoic Acid (Vitamin A Acid) Induces Spermatogenesis in Adult Mouse Cryptorchid Testes *in Vitro*," pp. 1320–1324 356
Volume 109, Number 2, November 30, 1982: Helen A. Jonas, Robert C. Baxter, and Len C. Harrison, "Structural Differences between Insulin and Somatomedin C/Insulin-Like Growth Factor-1 Receptors Revealed by Autoantibodies to the Insulin Receptor," pp. 463–470 356

Volume 110, Number 2, January 27, 1983

AUTHOR INDEX, Volume 110, Number 2, January 27, 1983 ii
Adrenocortical Response to Corticotropin Is Inhibited by γ_3-MSH Antisera in Normotensive and Spontaneously Hypertensive Rats
Burt Sharp and James R. Sowers 357
Enzyme Induction by Daunorubicin in Neonatal Heart Cells in Culture
Dimitrios Galaris and Jan Rydström 364
Activity of Glycogen Metabolizing Enzymes in Glucose-Deprived HT 29 Adenocarcinoma Cell-Line
H. Pàris, B. Terrain, V. Viallard, M. Rousset, A. Zweibaum, and J. C. Murat 371

Differential Phosphorylation of High Mobility Group Protein HMG 14 from Calf Thymus and Avian Erythrocytes by a Cyclic GMP-Dependent Protein Kinase
Jorma Palvimo, Annikka Linnala-Kankkunen, and Pekka H. Mäenpää 378

Mass Spectrometry of a Human Tumor Glycolipid Antigen Being Defined by Mouse Monoclonal Antibody NS-19-9
Karl-Erik Falk, Karl-Anders Karlsson, Göran Larson, Jan Thurin, Magdalena Blaszczyk, Zenon Steplewski, and Hilary Koprowski 383

Inhibition of Tissue-Type Plasminogen Activator by Conditioned Medium from Cultured Human and Porcine Vascular Endothelial Cells
J. J. Emeis, V. W. M. van Hinsbergh, J. H. Verheijen, and G. Wijngaards 392

1,4-Bis{2-[(2-Hydroxyethyl)Amino]Ethylamino}-9,10-Anthracenedione, an Anthraquinone Antitumour Agent That Does Not Cause Lipid Peroxidation *in Vivo*; Comparison with Daunorubicin
Laurence H. Patterson, Bijukumar M. Gandecha, and Jeffrey R. Brown 399

8-Fluoro-8-Demethylriboflavin as a ^{19}F-Probe for Flavin–Protein Interaction. A ^{19}F NMR Study with Egg White Riboflavin Binding Protein
Retsu Miura, Sabu Kasai, Kihachiro Horiike, Kyoko Sugimoto, Kunio Matsui, Toshio Yamano, and Yoshihiro Miyake 406

Purification of a Bacterial Organophosphate-Hydrolysing Phosphatase by Cibacron 3GA-Sepharose Affinity Chromatography *S. Balakrishna Pai* 412

Nitrobenzylthioinosine-Insensitive Uridine Transport in Human Lymphoblastoid and Murine Leukemia Cells *Judith A. Belt* 417

Evidence for the Occurrence of *O*-Glycosidically Linked Oligosaccharides of Poly-*N*-Acetyllactosamine Type on the Human Leucocyte Common Antigen
Robert A. Childs, Rosemarie Dalchau, Peter Scudder, Elizabeth F. Hounsell, John W. Fabre, and Ten Feizi 424

Cell-Free Synthesis of Rat Brain Myelin Proteolipids and Their Identification by Immunoprecipitation
A. Dautigny, P. M. Alliel, J.-L. Nussbaum, and P. Jollès 432

Calcium and Phosphate Fluxes across the Fetal Membranes of the Guinea Pig: *In Vitro* Measurement *L. O. Derewlany, H. G. McKercher, and I. C. Radde* 438

DNase Inhibition by the Adenovirus DNA-Binding Protein Exhibits Specificity for the Enzyme But Not for the Secondary Structure of the DNA
Gerald D. Frenkel and Kathleen Horan 443

A Heat-Stable Low-Molecular-Weight Inhibitor of Lysosomal Cysteine Proteinases in Human Serum
Francis Gauthier, Maurice Pagano, Frédéric Esnard, Henri Mouray, and Robert Engler 449

Additive Effects of Epinephrine and Corticotropin-Releasing Factor (CRF) on Adrenocorticotropin Release in Rat Anterior Pituitary Cells
Vincent Giguère and Fernand Labrie 456

Microtubule Assembly Affected by the Presence of Denatured Tubulin
Ricardo B. Maccioni 463

Ribonuclease H from Chick Embryos Cleaves Precisely at the Junction between the RNA and DNA Portion of the Hybrid Helix
Yasuko Sawai and Kinji Tsukada 470

Spontaneous Loss of a High-Molecular-Weight Plasmid and the Biocide of *Bacillus thuringiensis* Var. *Israeliensis* *Haresh Kamdar and Kunthala Jayaraman* 477

Repair of Potentially Lethal and Sublethal Damage Induced by Neocarzinostatin in Normal and Ataxia-Telangiectasia Skin Fibroblasts
Yosef Shiloh, Eynat Tabor, and Yechiel Becker 483

Variant Specific Surface Antigens from *Trypanosoma equiperdum*: Chemical and Physical Studies
G. Duvillier, J. P. Aubert, T. Baltz, C. Richet, and P. Degand 491

Transport of the Precursor for Rat Liver Glutamate Dehydrogenase into Mitochondria *in Vitro*
Vincente Miralles, Vincente Felipo, José Hernández-Yago, and Santiago Grisolía 499

Photoaffinity Labelling of Mammalian Beta-Adrenergic Receptors: Metal-Dependent Proteolysis Explains Apparent Heterogeneity
J. L. Benovic, G. L. Stiles, R. J. Lefkowitz, and M. G. Caron 504
Different Tissue Concentrations and Rates of Synthesis of Dolichol, Dolichyl Acyl Esters, and Dolichyl Phosphate in Mouse Testes and Preputial Glands
Jane E. R. Potter and Andrew A. Kandutsch 512
The Observation of Quasi-Molecular Ions from a Protein Neurotoxin (MW 7821) Using ^{127}I-Plasma Desorption Mass Spectroscopy
P. Håkansson, I. Kamensky, J. Kjellberg, B. Sundqvist, J. Fohlman, and P. A. Peterson 519
Determination of Epoxide Hydrolase Activity in Whole Cells (Human Lymphocytes) and Activation by Benzoflavones *H. R. Glatt, T. Wölfel, and F. Oesch* 525
Two Discrete DNA Replication Intermediates Are Formed in Melphalan-Treated Cells
Ulf Lönn and Sigrid Lönn 530
Differential Binding of Human Interferon-α Subtypes to Receptors on Lymphoblastoid Cells
Gregory E. Hannigan, Dirk R. Gewert, Eleanor N. Fish, Stanley E. Read, and Bryan R. G. Williams 537
EDTA-Induced Release of Manganese and Proteins from Inside-Out Thylakoid Vesicles and the Inhibition of Oxygen Evolution
R. W. Mansfield and J. Barber 545
Imidazole Open Ring 7-Methylguanine: An Inhibitor of DNA Synthesis
Serge Boiteux and Jacques Laval 552
The Relationship between NADPH-Dependent Lipid Peroxidation and Degradation of Cytochrome *P*-450 in Adrenal Cortex Mitochondria
Jerzy Klimek, A. Paul Schaap, and Tokuji Kimura 559
Orthovanadate Induces Loss of Muscarinic Cholinergic Binding Sites
Erik Danielsson, Anders Undén, and Tamas Bartfai 567
Induction of Mutations by 5-Fluorodeoxyuridine: A Mechanism of Self-Potentiated Drug Resistance? *A. R. Peterson, Hazel Peterson, and Peter V. Danenberg* 573
Fructose-1,6-bisphosphate Aldolase from Rabbit Muscle: Half of the Sites Reactivity at Low Temperature *Enrico Grazi, Giorgio Trombetta, and Vincenzo Lanzara* 578
Environmental Cadmium Is Not Sequestered by Metallothionein in Rainbow Trout
Dafydd G. Thomas, John F. de L. G. Solbe, John Kay, and Anthony Cryer 584
Polymerization of Vector DNA after Transfection into Hamster Fibroblast Cells
Ming-Ling Janet Wang and Amy Shiu Lee 593
Properties and Regulation of High-Affinity Pituitary Receptors for Corticotropin-Releasing Factor
Peter C. Wynn, Greti Aguilera, John Morell, and Kevin J. Catt 602
The Modulating Influence of the Fluidity of Cell Membrane on Excision Repair of DNA in UV-Irradiated *Escherichia coli* *T. Todo, S. Yonei, and M. Kato* 609
Anion Transport in Red Blood Cells and Arginine Specific Reagents: (1) Effect of Chloride and Sulfate Ions on Phenylglyoxal-Sensitive Sites in the Red Blood Cell Membrane *L. Zaki* 616
Identification of N^5-Methyl-N^5-formyl-2,5,6-triamino-4-hydroxypyrimidine as a Major Adduct in Rat Liver DNA after Treatment with the Carcinogens *N,N*-Dimethylnitrosamine or 1,2-Dimethylhydrazine
D. T. Beranek, C. C. Weis, F. E. Evans, C. J. Chetsanga, and F. F. Kadlubar 625
Molecular Weights of the Major DNA Polymerases in a Higher Plant, *Pisum sativum* L. (Pea) *Hilary J. Chivers and John A. Bryant* 632
Purification of Mixed-Function Amine Oxidase from Rat Liver Microsomes
Teruyuki Kimura, Masahiko Kodama, and Chikayoshi Nagata 640
Cytochrome *P*-450 Mediated Interaction between Hydroperoxide and Molecular Oxygen: A Proposed Method for *P*-450 Kinetic Studies *Edward L. Wheeler* 646

Novel Substrates for Angiotensin I Converting Enzyme
Louis B. Hersh, John T. Gafford, James C. Powers, Takumi Tanaka, and Ervin G. Erdös 654

Are Polyphosphoinositides Involved in Platelet Activation?
Bertrand P. Perret, Monique Plantavid, Hugues Chap, and Louis Douste-Blazy 660

Activation and Deactivation of Aflatoxin B_1 in Isolated Rat Hepatocytes
John J. Ch'ih, Tzu Lin, and Thomas M. Devlin 668

Lung-Selective Impairment of Cytochrome *P*-450-Dependent Monooxygenases and Cellular Injury by 1,1-Dichloroethylene in Mice
Klaas R. Krijgsheld, Michael C. Lowe, Edward G. Mimnaugh, Michael A. Trush, Erika Ginsburg, and Theodore E. Gram 675

Effect of Fructose-1,6-bisphosphate on the Activity of Liver Pyruvate Kinase after Limited Proteolysis with Cathepsin B
Noboru Nakai, Yutaka Fujii, Kyoichi Kobashi, and Jun'ichi Hase 682

Replicon Initiation Frequency and Intracellular Levels of ATP, ADP, AMP, and of Diadenosine 5′,5‴-P^1,P^4-Tetraphosphate in Ehrlich Ascites Cells Cultured Aerobically and Anaerobically
Hans Probst, Klaus Hamprecht, and Volker Gekeler 688

DNA Gyrase (Topoisomerase II) from *Pseudomonas aeruginosa*
Robert V. Miller and Ted R. Scurlock 694

Conversion of a Ca^{2+}-Dependent Myosin Light-Chain Kinase from Skeletal Muscle to a Ca^{2+}-Independent Form *S. Srivastava and D. J. Hartshorne* 701

ERRATA

Volume 109, Number 2, November 30, 1982: John I. Toohey, "Methylthioadenosine Metabolism in Malignant Murine Cells," pp. 313–319 709

Volume 108, Number 3, October 15, 1982: Timothy A. Bird and Charles I. Levene, "Lysyl Oxidase: Evidence That Pyridoxal Phosphate Is a Cofactor," pp. 1172–1180 710

Volume 109, Number 3, December 15, 1982: George R. Dubes, Anthony R. Sambol, Moslih I. Al-Moslih, and Gary L. Bradshaw, "Inactivation of Transforming DNA by a Transient Product of the Interaction of Cu^{2+} and Hydroquinone," pp. 888–894 711

Volume 110, Number 3, February 10, 1983

AUTHOR INDEX, Volume 110, Number 3, February 10, 1983 ii

Stabilization of Estradiol–Receptor Complexes by Elimination of Cytosolic Factors
Jerry H. Fishman 713

Nuclear Localization of a Glucocorticoid Antagonist in Cultured Hepatoma Cells
S. Golaz and G. Beck 719

Localization of the Two Free Thiol Groups in the Porcine Pancreatic α-Amylase I Sequence
Lyda Pasero, Yvette Mazzei, Brigitte Abadie, Danielle Moinier, Michel Fougereau, and Guy Marchis-Mouren 726

Inhibition of Histidine Decarboxylase and Tumour Promoter-Induced Arachidonic Acid Release by Lecanoric Acid Analogues
Kazuo Umezawa, Shigemi Muramatsu, Masaaki Ishizuka, Tsutomu Sawa, Tomio Takeuchi, and Taijiro Matsushima 733

Direct Observation of 6-Fluorodopamine in Guinea Pig Nerve Microsacs by ^{19}F NMR
David M. Diffley, Jonathan L. Costa, E. A. Sokoloski, C. C. Chiueh, K. L. Kirk, and C. R. Creveling 740

Species Difference in the Metabolic Activation of Phenacetin by Rat and Hamster Liver Microsomes
Takehiko Nohmi, Kunie Yoshikawa, Masahiro Nakadate, and Motoi Ishidate Jr. 746

Fast Atom Bombardment Mass Spectrometry of Human Proinsulin
Michael Barber, Robert S. Bordoli, Gerard J. Elliott, Nicholas J. Horoch, and Brian N. Green 753

Stimulation of Phospholipid Hydrolysis and Cell Death by Mercuric Chloride: Evidence for Mercuric Ion Acting as a Calcium-Mimetic Agent
W. T. Shier and D. J. DuBourdieu 758

Rat Kidney Microsomes Convert 25-Hydroxyvitamin D_3 to an Unidentified Metabolite
Myrtle Thierry-Palmer, T. Kenney Gray, Mary E. Williams, and Roy V. Talmage 766

Ganglioside-Dependent Return of TSH Receptor Function in a Rat Thyroid Tumor with a TSH Receptor Defect
Paolo Laccetti, Evelyn F. Grollman, Salvatore M. Aloj, and Leonard D. Kohn 772

Biosynthesis of the Bile Pigment Sarpedobilin from [^{14}C]Pterobilin by *Papilio sarpedon* (Lepidoptera) *Michèle Bois-Choussy and Michel Barbier* 779

Verapamil Enhances the Efficiency of DNA-Mediated Gene Transfer in Mammalian Cells *Shin-ichi Akiyama, Mayumi Ono, and Michihiko Kuwano* 783

Putative Mediators of Insulin Action Regulate Hepatic Acetyl CoA Carboxylase Activity *Alan R. Saltiel, Adam Doble, Steven Jacobs, and Pedro Cuatrecasas* 789

Turpentine-Induced Decrease of α_1-Foetoprotein in the Serum of the Developing Rat: A Novel Parameter of the Inflammatory Response
Lia Savu, Hassen Zouaghi, and Emmanuel A. Nunez 796

Binding of Concanavalin A to Calf Brain Synaptic Vesicles
Paul E. March and Edward R. Thornton 804

Assembly Kinetics of Replicating Chromatin: Isolation and Characterization of Prenucleosomal and Nucleosomal DNA
C. Vaury, C. Gilly, D. Alix, J. J. Lawrence 811

Adriamycin and Daunomycin Induce Interstrand DNA Crosslinks in HeLa S3 Cells
Jerzy Konopa 819

Mössbauer Studies of Iron–Bleomycin Complexes
Bohdan Balko and Gerard W. Liesegang 827

Production of Fibronectin by HUH6 CL5 Cell Line Established from a Human Hepatoblastoma
Masanobu Tanaka, Kenichi Kawamura, Meiqi Fang, Kazuya Higashino, Susumu Kishimoto, Hidekazu Nakabayashi, and Jiro Sato 837

A Reevaluation of the Chemotactic Potency of Leukotriene B_4 (LTB_4)
William Jubiz 842

Induction of Human Leukocyte Interferon by Heat-Treated Poly(I):Poly(C)
Motoko Tamura and Shigeru Sasakawa 851

Continual Presence of Oxygen and Iron Required for Mammalian Ribonucleotide Reduction: Possible Regulation Mechanism
Lars Thelander, Astrid Gräslund, and Margareta Thelander 859

The Effect of Synthetic Fragment 31–44 of Human Growth Hormone on Glucose Uptake by Isolated Adipose Tissue
N. A. Yudaev, Yu. A. Pankov, Yu. M. Keda, E. T. Sazina, T. A. Osipova, Yu. P. Shwachkin, and M. N. Ryabtsev 866

Delineation of the Catalytic Components of the NADPH-Dependent O_2^-- Generating Oxidoreductase of Human Neutrophils
Terrence R. Green, Mary K. Wirtz, and David E. Wu 873

Neighboring Group Migration in Enzyme-Mediated Halohydrin Formation
Terry D. Lee, John Geigert, Demetrios J. Dalietos, and David S. Hirano 880

Photoaffinity Inhibition of Peptide Transport in Yeast
Pierre Sarthou, Martine Gonneau, and François Le Goffic 884

Conversion of ^{3}H-PAF Acether by Rabbit Platelets Is Independent from Aggregation: Evidence for a Novel Metabolite
Lhossein Touqui, Claude Jacquemin, and Bernardo Boris Vargaftig 890

Ontogenic Appearance of Na^+ Channels Characterized as High-Affinity Binding Sites for Tetrodotoxin during Development of the Rat Nervous and Skeletal Muscle Systems
Alain Lombet, T. Kazazoglou, Eric Delpont, Jean-François Renaud, and Michel Lazdunski 894

Inhibition of DNA Polymerases of Sea Urchin by Palmitoyl Coenzyme A.
Hiraku Shimada, Tokuko Haraguchi, Hiroshi Nagano, Akiko Fujiwara, and Ikuo Yasumasu 902

Microbial Reduction of α,β-Unsaturated Carbonyl Compounds: A General Property?
Marguerite Desrut, Alain Kergomard, Michel F. Renard, and Henri Veschambre 908

Native Molecular Weight of Adenovirus Proteins: On the Oligomeric Structure of the Fiber *Pierre Boulanger and Christiane Devaux* 913

Ligand Effects on the Limited Proteolysis of Phenylalanine Hydroxylase: Evidence for Multiple Conformational States
Robert S. Phillips, Masayoshi Iwaki, and Seymour Kaufman 919

Protein-Sugar Interactions: Environmental Effect on the Fluorescence of *O*-(4-Methylumbelliferyl)-glycosides
P. Midoux, F. Delmotte, J.Ph Grivet, and M. Monsigny 926

Phospholipids Activate Cathepsin D *Shoji Watabe and Nagasumi Yago* 934

Abnormal Accumulation of Galactosylceramide in the Kidney of Twitcher Mouse

W. F. Skogen, D. S. Bushong, A. E. Johnson, and A. C. Cox 14

Forskolin: Effects on Mouse Parotid Gland Function
E. L. Watson and F. J. Dowd 21

The Presence of a Keratan Sulfate-like Glycoconjugate in Microsomes of the Cerebral Cortex *Hyman G. Weinstein, Lawrence J. Blacik, Moira Breen, and Paul A. Knepper* 28

Interaction of Human Intestinal and Hepatoma Alkaline Phosphatases with Immobilized Cibacron Blue F3GA *Hideo Yamamoto, Masanobu Tanaka, Toshikazu Okochi, and Susumu Kishimoto* 36

Potentiation of Monovalent Cation Effects on Ligand Binding to Cardiac Muscarinic Receptors in *N*-Ethylmaleimide-Treated Membranes *Kathryn K. McMahon and M. Marlene Hosey* 41

Hypomethylation of *ras* Oncogenes in Primary Human Cancers *Andrew P. Feinberg and Bert Vogelstein* 47

The Effect of pH on the Rate of Dissociation of the Oxygenated β Chain Tetramer of Hb A *Susan M. Turci and Melisenda J. McDonald* 55

The Labelling of an Axonal Membrane Component with 4-(*N*-Maleimido)-benzyltrimethylammonium, a Reagent Capable of Affinity-Labelling the α Subunit of the Nicotinic Acetylcholine Receptor *Henry G. Mautner, James L. Cole, and Margaret A. Belew* 61

Homology between Actin Coding and Its Adjacent Sequences in Widely Divergent Species *Rasheeda S. Zafar and Ann Sodja* 67

Activity State of the Branched Chain α-Ketoacid Dehydrogenase Complex in Heart, Liver, and Kidney of Normal, Fasted, Diabetic, and Protein-Starved Rats *Sarah E. Gillim, Ralph Paxton, George A. Cook, and Robert A. Harris* 74

Search for Ligands of Neuronal α-Bungarotoxin Receptors *Gertraud Polz-Tejera and Jakob Schmidt* 82

Characterization of a Variable Fragment of a Human Immunoglobulin λ Chain Obtained by Peptic Cleavage in Urea *Minoru Imbe and Hideo Matsumoto* 89

Prostaglandin H Synthase-Mediated Reaction of Carcinogenic Arylamines with tRNA and Homopolyribonucleotides *K. C. Morton, C. M. King, J. B. Vaught, C. Y. Wang, M. -S. Lee, and L. J. Marnett* 96

Increased Cell Buoyant Densities of Protein Overproducing *Escherichia coli* Cells *Yih-Shyun E. Cheng* 104

Desensitization of β_2-Adrenergic Receptors and Adrenocorticotropin Release *Seymour Heisler, Terry Reisine, and Julius Axelrod* 112

Aspects of Low Frequency Vibrations (20–350 cm^{-1}) from Watson–Crick Base Pairing in an Aqueous Solution of tRNA *O. Faurskov Nielsen. P. -A. Lund, Lone S. Nielsen, and E. Praestgaard* 120

Evidence for the Existence of Gonadotropin Receptors in the Nuclei Isolated from Rat Ovary *K. G. Rajendran and K. M. J. Menon* 127

Terbium Binding to Neoplastic GH3 Pituitary Cells *Robert G. Canada* 135

Mutants of *Escherichia coli* H^+-ATPase Defective in the δ Subunit of F_1 and the b Subunit of F_0 *Takato Noumi and Hiroshi Kanazawa* 143

The Effect of 5-Azacytidine on Mammary Gland Differentiation *in Vitro* *Franklyn F. Bolander, Jr.* 150

Purification and Characterization of Creatine Kinase, an Estrogen-Induced Uterine Protein (IP) from Immature Rats *S. Anand Kumar, Donna L. O'Connor, James I. Seeger, Thaisa A. Beach, and Herbert W. Dickerman* 156

Dipeptide Mimics: Conformationally Restricted Inhibitors of Angiotensin-Converting Enzyme *E. D. Thorsett, E. E. Harris, S. Aster, E. R. Peterson, D. Taub, A. A. Patchett, E. H. Ulm, and T. C. Vassil* 166

Multiple Forms of the Proline-Rich Polypeptide (PRP) Bound to Rat Prostatic Binding Protein *W. Heyns, B. Peeters, D. Bossyns* 172

Evidence for Ammonia as an Inhibitor of Heterocyst and Nitrogenase Formation in the Cyanobacterium *Anabaena Cycadeae* *H. N. Singh, U. N. Rai, V. V Rao, and S. N. Bagchi* 180

Higher Plants Contain L-Asparate Oxidase, the First Enzyme of the *Escherichia coli* Quinolinate Synthetase System
Yu Hosokawa, E. Mitchell, and R. K. Gholson 188

12-*O*-Tetradecanoylphorbol-13-acetate Stimulates Release of Arachidonic Acid, Prostaglandin E_2, and Prostaglandin $F_{2\alpha}$ from TPA Nonproliferative Variants of 3T3 Cells *Edith Butler-Gralla, Susan Taplitz, and Harvey R. Herschman* 194

Further Study Discounts Role for Singlet Oxygen in Fungal Degradation of Lignin Model Compounds *T. Kent Kirk, Fumiaki Nakatsubo, and Ian D. Reid* 200

Enzymatic Synthesis of the 2′,5′-A_4 Tetramer Analog, 2′,5′-ppp3′dA(p3′dA)$_3$, by Rabbit Reticulocyte Lysates: Binding and Activation of the 2′,5′-A_n Dependent Nuclease, Hydrolysis of mRNA, and Inhibition of Protein Synthesis
R. J. Suhadolnik, Y. Devash, N. L. Reichenbach, M. B. Flick, and J. M. Wu 205

Calcium Effects on Prothrombin and Its Reaction with Bifunctional Alkylating Reagents *Ruth E. Silversmith, G. Jason Wei, and Gary L. Nelsestuen* 213

Ethanol as an Inducer of UDP-Glucuronyltransferase: A Comparison with Phenobarbital and 3-Methylcholanthrene Induction in Rabbit Hepatic Microsomes
Garold S. Yost and Brent L. Finley 219

pH Dependence of Dissociation of the Ovine Prolactin Rabbit Mammary Receptor Complex *Patricia Callaway Necessary and Kurt E. Ebner* 224

Reduction of Cytochrome *c* by Hydrogen Peroxide and Its Inhibition by Superoxide Dismutase *Carl Bernofsky and Soo-Young C. Wanda* 231

Cell-Free Translation of Proline-Rich Protein mRNAs from Human Submandibular Gland *Robert F. Troxler, Heather S. Belford, and Frank G. Oppenheim* 239

Modification of the Sensitivity of CHO Cells to Mitomycin C by Dibutyryl Cyclic AMP
S. Shinohara, Y. Otsu, T. Yamada, H. Kimura, and T. Aoyama 247

Purification of Tubulin from Rat Pancreas
J. F. Launay, M. T. Vanier, and P. Gendry 253

Action of Peptidases in Brain Synaptic Membranes on the NH_2-Terminus of Adrenocorticotropin Using ACTH-(1-16)-NH_2 as a Model Substrate
Xin-Chang Wang, J. Peter H. Burbach, and J. Coos Verhoef 259

The Effect of Luciferase and NaDH:FMN Oxidoreductase Concentrations on the Light Kinetics of Bacterial Bioluminescence
Jukka Lavi, Raimo Raunio, Yuri Malkov, and Timo Lövgren 266

Action of the Mitochondrial ATPase Inhibitor Protein on the Ca^{2+}-ATPase of Sarcoplasmic Reticulum
Leopoldo de Meis, Marietta Tuena de Gómez-Puyou, and Armando Gómez-Puyou 274

Increased Concentration of Thymidine Kinase in Rat Hepatomas
Mei-Huei T. Lai and George Weber 280

Dark–Light Regulation of Pyruvate, P_i Dikinase in C_4 Plants: Evidence That the Same Protein Catalyses Activation and Inactivation
J. N. Burnell and M. D. Hatch 288

Similarity of Activation of Yeast Phosphofructokinase by AMP and Fructose-2,6-bisphosphate
Karl Nissler, Andreas Otto, Wolfgang Schellenberger, and Eberhard Hofmann 294

Temperature-Dependent Conformational Changes in Calmodulin
Preeti Gangola and Harish C. Pant 301

Inhibitory Effects of 4,4′-Diisothiocyanostilbene-2,2′-disulfonate (DIDS) on the ADP-Stimulated Aggregation of Gel-Filtered Bovine Blood Platelets
Shuji Kitagawa, Junko Endo, Rumi Kubo, and Fujio Kametani 306

Structural and Biosynthetic Studies on Linkage Region between Poly(galactosylglycerol phosphate) and Peptidoglycan in *Bacillus Coagulans*
Shunji Kaya, Kohei Yokoyama, Yoshio Araki, and Eiji Ito 312

A Simple and Rapid Method for the Determination of the Number of [^{3}H]Ouabain Binding Sites in Biopsies of Skeletal Muscle
Aage Nørgaard, Keld Kjeldsen, Otto Hansen, and Torben Clausen 319

Partial Purification of a Calcium Ionophore from Human Uremic Plasma and Normal Urine *N. Fournier, A. Crevat, G. Ducet, and A. Murisasco* 326
Kinetics of Interaction between the H^+-Translocating Component of the Mitochondrial ATPase Complex and Oligomycin or Dicyclohexylcarbodiimide *Elzbieta Glaser and Birgitta Norling* 333
Identification of a Calcium- and Phospholipid-Dependent Phorbol Ester Binding Activity in the Soluble Fraction of Mouse Tissues *Curtis L. Ashendel, Jonathan M. Staller, and R. K. Boutwell* 340
Possible Role of DT-Diaphorase in the Bioactivation of Antitumor Quinones *R. E. Talcott, M. Rosenblum, and V. A. Levin* 346

AUTHOR INDEX, Volume 112, Number 1, April 15, 1983 ii
Fluorescence and Photoelectron Studies of the Intercalative Binding of Benz(*a*)-anthracene Metabolite Models to DNA
M. Shahbaz, R. G. Harvey, A. S. Prakash, T. R. Boal, I. S. Zegar, and P. R. LeBreton 1
Comparison of Six Rabbit Liver Cytochrome *P*-450 Isozymes in Formation of a Reactive Metabolite of Acetaminophen
Edward T. Morgan, Dennis R. Koop, and Minor J. Coon 8
Studies on Rat Cytokines as Mediators of the Acute Phase Response
B. M. R. N. J. Woloski, H. A. Kaplan, E. Gospodarek, and J. C. Jamieson 14
Properties of the Increased Glutathione *S*-Transferase. A Form in Rat Preneoplastic Hepatic Lesions Induced by Chemical Carcinogens
Akio Kitahara, Kimihiko Satoh, and Kiyomi Sato 20
Accumulation of Radiolabelled Fatty Acids in the Neutral Lipid Fraction of Measles Virus Persistently Infected BGM Cells
P. Anderton, T. F. Wild, and G. Zwingelstein 29

Insulin Resistance in the Liver in Fasting and Diabetes Mellitus: The Failure of Insulin to Stimulate the Release of a Chemical Modulator of Pyruvate Dehydrogenase
John M. Amatruda and Cecilia L. Chang 35

Failure of 2-Hydroxyestradiol to Interact with Dopamine Inhibition of Human Prolactin Secretion *in Vitro* and with Dopamine Receptors of Prolactin-Secreting Adenomas
F. Peillon, A. M. Brandi, D. Bression, M. Le Dafniet, and J. Racadot 42

Stereochemically Distinct Roles for Sterol in *Saccharomyces cerevisiae*
William J. Pinto, Ruben Lozano, Bernard C. Sekula, and William R. Nes 47

Transport of Glutathione by Renal Basal-Lateral Membrane Vesicles
Lawrence H. Lash and Dean P. Jones 55

Immunoblot Detection of Pyridoxal Phosphate Binding Proteins in Liver and Hepatoma Cytosolic Extracts
Jason M. Kittler, Dace Viceps-Madore, John A. Cidlowski, and John W. Thanassi 61

Origin of the Labile Sulfide in the Iron–Sulfur Proteins of *Escherichia coli*
Robert H. White 66

The Synthesis of the Brain-Specific S100 Protein in Colcemid-Resistant Mutants of Rat Glial Cells *Alexander Marks, John Law, and James Mahony* 73

DNA Replication by Novel Macromolecular Complexes Involving DNA Polymerase III Holoenzyme Activity *Yasuko Kobayashi and Kazuoki Kuratomi* 80

Studies of Oleate Binding to Rat Liver Plasma Membranes
Wolfgang Stremmel, Shaul Kochwa, and Paul D. Berk 88

Role of AMP Deaminase Reaction in the Response of Phosphofructokinase to the Adenylate Energy Charge *Masataka Yoshino and Keiko Murakami* 96

Size and Shape of Poly(ADP-ribose): Examination by Gel Filtration, Gel Electrophoresis, and Electron Microscopy
Kenshi Hayashi, Miyoko Tanaka, Takashi Shimada, Masanao Miwa, and Takashi Sugimura 102

Evidence for the Existence of Protein Inhibitors for *S*-Adenosyl-L-methionine-Mediated Methylation of Phosphatidylethanolamine in Rat Liver Cytosol
Kiyoshi Hashizume, Mutsuhiro Kobayashi, Keishi Yamauchi, Kazuo Ichikawa, Kazutaka Haraguchi, and Takashi Yamada 108

Butyrate Regulates Glycosylation of the Glycoprotein Hormone Alpha Subunit Secreted by "Glucose-Starved" Human Liver Cells
Jay S. Morrow, Bruce D. Weintraub, and Saul W. Rosen 115

Determination of Active Hydrogen Content by Fast Atom Bombardment Mass Spectrometry following Hydrogen–Deuterium Exchange
Satinder K. Sethi, David L. Smith, and James A. McCloskey 126

Initial Evidence for the Modification of Hamster Sperm Na^+, K^+-ATPase Activity by Cyclic Nucleotide-Mediated Processes *Randall J. Mrsny and Stanley Meizel* 132

Polyamine-Like Effects of Cobalt(III) Hexaammine on Various Cyclic Nucleotide-Independent Protein Phosphokinase Reactions
Khalil Ahmed, Said A. Goueli, and H. Guy Williams-Ashman 139

Identification of a Second Synexin-Like Adrenal Medullary and Liver Protein That Enhances Calcium-Induced Membrane Aggregation
Ward F. Odenwald and Stephen J. Morris 147

Demonstration of a New Glycopeptidase, from Jack-Bean Meal, Acting on Aspartylglucosylamine Linkages
Kota Sugiyama, Hideko, Ishihara, Setsuzo Tejima, and Noriko Takahashi 155

Insolubilization of Hydroxyproline-Rich Cell Wall Glycoprotein in Aerated Carrot Root Slices *James B. Cooper and Joseph E. Verner* 161

A New Chromatographic Method for the Fractionation of Hyaluronic Acid
Gerard Armand and Moraima Reyes 168

Induction of Rat Liver Malic Enzyme Messenger RNA Activity by Insulin and by Fructose
Akihiko Katsurada, Nobuko Iritani, Hitomi Fukuda, Tamio Noguchi, and Takehiko Tanaka 176

Ferricyanide Can Replace Pyruvate to Stimulate Growth and Attachment of Serum Restricted Human Melanoma Cells *K. A. O. Ellem and G. F. Kay* 183
Pseudo Arylsulfatase A Deficiency: Evidence for a Structurally Altered Enzyme *Arvan L. Fluharty, William E. Meek, and Hayato Kihara* 191
Synthesis and Maturation of Cross-reactive Glycoprotein in Fibroblasts Deficient in Arylsulfatase A Activity *Gideon Bach and Elizabeth F. Neufeld* 198
Amino Acid Sequence of the Unique 3,5,3′-Triiodothyronine-Containing Sequence from Porcine Thyroglobulin *Claudine Marriq, Marcel Rolland, and Serge Lissitzky* 206
Elution of the Regulatory Subunit of cAMP-Dependent Protein Kinase Type I Isozyme Derived from Epididymal Fat within the Type II Isozyme Chromatographic Peak *Alvin M. Malkinson, Deborah S. Beer, Jeanne M. Wehner, and J. R. Sheppard* 214
Thyroid Hormone Receptors of Developing Chick Brain Are Predominantly in the Neurons *M. A. Haidar, S. Dube, and P. K. Sarkar* 221
Inhibition of Thrombin Binding and Serotonin Secretion from Platelets by a 74,000 Dalton Protein *Pankaj Ganguly and Nancy G. Fossett* 228
Enhancement and Depression by Inosine of the Growth Inhibitory Action of 5-Fluorouracil on Cultured Jensen Tumor Cells *Richard E. Beltz, Robert N. Waters, and Thomas J. Hegarty* 235
Formation of Monohydroxyeicosatetraenoic Acids from Arachidonic Acid by Cultured Rabbit Aortic Smooth Muscle Cells *J. Larrue, M. Rigaud, G. Razaka, D. Daret, J. Demond-Henri, and H. Bricaud* 242
Alteration of Adenylate Cyclase Activity by Phosphorylation and Dephosphorylation *Tetsu Akiyama, Emiko Gotho, and Hiroshi Ogawara* 250
cDNA Cloning of Human apoA-I: Amino Acid Sequence of PreproapoA-I *Simon W. Law, Glenn Gray, and H. Bryan Brewer, Jr.* 257
Depression of Reverse Transcriptase Activity by Hybridoma Supernatants: A Potential Problem in Screening for Retroviral Contamination *Monique Lyon and Joseph Huppert* 265
Photolabelling of Dopamine-β-hydroxylase by Bleomycin *Hiran A. M. Ratwatte and Kenneth T. Douglas* 273
An EXAFS Study of Jack Bean Urease, a Nickel Metalloenzyme *S. S. Hasnain and B. Piggott* 279
Transformation of *Aspergillus nidulans* by the Orotidine-5′-phosphate Decarboxylase Gene of *Neurospora crassa* *D. J. Ballance, F. P. Buxton, and G. Turner* 284
Stimulation of Vascular Prostacyclin Synthesis by Extracellular ADP and ATP *J. M. Boeynaems and N. Galand* 290
Regional Distribution of the M_r 15,000 Somatostatin Precursor, Somatostatin-28, and Somatostatin-14 in the Rat Brain Suggests a Differential Intracellular Processing of the High Molecular Weight Species *Sophie Gomez, Alain Morel, Pierre Nicolas, and Paul Cohen* 297
Copper and Thiol Regulation of Gonadotropin Releasing Hormone Binding and Luteinizing Hormone Release *E. Hazum* 306
Endogenous Induction of Epoxide Hydrolase, Benzo(*a*)pyrene Hydroxylase, and Glutathione-*S*-transferase in "Responsive" C57B1/6 Mice and in "Nonresponsive" DBA/2 Mice during Pregnancy *Patricia Rouet, Patrick Dansette, and Charles Frayssinet* 313
Chemical Synthesis of a Highly Potent and Heat-Stable Analog of an Enterotoxin Produced by a Human Strain of Enterotoxigenic *Escherichia coli* *Saburo Aimoto, Hiroyuki Watanabe, Haruo Ikemura, Yasutsugu Shimonishi, Tae Takeda, Yoshifumi Takeda, and Toshio Miwatani* 320
Effect of Nitrous Oxide-Induced Inactivation of Vitamin B_{12} on Glycinamide Ribonucleotide Transformylase and 5-Amino-4-imidazole Carboxamide Transformylase *Rosemary Deacon, Janet Perry, M. Lumb, and I. Chanarin* 327

Genetic and Biochemical Resolution of the Chromophoric Polypeptide of Halorhodopsin *Elena N. Spudich, Roberto A. Bogomolni, and John L. Spudich* 332
Models for the Conformational Behaviour of Angiotensin-II in Acidic Aqueous Solutions *C. Marchionini, B. Maigret, and S. Práemilat* 339

A Protein Kinase System from Platelet-Rich Plasma *Julien Galabru, Bernard Krust, and Ara G. Hovanessian* 370
δ-Aminolevulinate Synthase Isozymes in the Liver and Erythroid Cells of Chicken *Norimichi Watanabe, Norio Hayashi, and Goro Kikuchi* 377
Charge Effect on the Colchicine Binding Site of Tubulin *Sukla Roychowdhuri, Asok Banerjee, and B. Bhattacharyya* 384
Regulation of Methionine-Enkephalin Precursor Messenger RNA in Rat Striatum by Haloperidol and Lithium *Steven L. Sabol, Kazuaki Yoshikawa, and Jau-Shyong Hong* 391
Postnatal Changes in Lectin Binding to Microvillus Membranes from Rat Intestine *Akhtar Mahmood and Ramon Torres-Pinedo* 400
Isoform Specificity of Monoclonal Hybridoma Antibodies to Quail Skeletal Muscle Myosin Subunits *Peter A. Merrifield, Michael R. Payne, and Irwin R. Konigsberg* 407
Protein Carboxyl Methyltransferase from Cow Eye Lens *Philip N. McFadden, Joseph Horwitz, and Steven Clarke* 418
5′-Deoxy-5′-methylthioadenosine Inhibition of Rat T Lymphocyte Phosphodiesterase: Correlation with Inhibition of Con A-Induced Proliferation *Laurence Christa, Laure Thuillier, and Jean-Louis Perignon* 425
Inhibition of the Microsomal *N*-Hydroxylation of 2-Amino-6-nitrotoluene by a Metabolite of Methimazole *Gregory L. Kedderis and Douglas E. Rickert* 433
The Heat-Labile Phosphatase Modulator (Inhibitor-2) Complex from Rabbit Skeletal Muscle *Shiaw-Der Yang, Jackie R. Vandenheede, and Wilfried Merlevede* 439
Ectoglycosyltransferase Activities at the Surface of Cultured Neurons *Y. Matsui, D. Lombard, B. Hoflack, S. Harth, R. Massarelli, P. Mandel, and H. Dreyfus* 446
Vitamin K-Dependent Carboxylation: Study of Diastereoisomeric γ-Methylglutamic Acid-Containing Peptidic Substrates *M. Gaudry, S. Bory, J. Dubois, R. Azerad, and A. Marquet* 454
Effects of Estradiol on Translation Activity of Poly(A)-Rich RNA from Pituitary Tumor Whose Growth Is Inhibited by Estradiol *Y. Morel, O. Pascal, and J. André* 462
Isolation of Plasma Membrane Fragments from Cultured Murine Melanoma Cells *Douglas D. Taylor, Iih-Nan Chou, and Paul H. Black* 470
Syntheses and Biological Activities of Azido Ubiquinone Derivatives *Lian-Quan Gu, Linda Yu, and Chang-An Yu* 477

ADP-Induced Changes in [^{32}P]Phosphate Labeling of Phosphatidylinositol-4,5-bisphosphate in Washed Rabbit Platelets Made Refractory by Prior ADP Stimulation
N. L. Leung, J. D. Vickers, R. L. Kinlough-Rathbone, H.-J. Reimers, and J. F. Mustard 483

Polyamine Metabolism in Rat Lungs with Oxygen Toxicity
Allen D. Hacker, Donald F. Tierney, and Thomas K. O'Brien 491

Microsomal Benzo(*a*)pyrene Hydroxylase in *Aspergillus ochraceus* TS: Assay and Characterization of the Enzyme System
Dipak K. Ghosh, Debjani Dutta, Timir B. Samanta, and Ajit K. Mishra 497

Prostaglandin E_1 and Prostaglandin I_2 Modulation of Superoxide Production by Human Neutrophils
J. C. Fantone and D. A. Kinnes 506

Hemoglobin-Inulin Conjugate as an Oxygen-Carrying Blood Substitute
Keiji Iwasaki, Katsumi Ajisaka, and Yuji Iwashita 513

Type-Specific Proteins of Single IIM Fibers from Cat Muscle
Anthea Rowlerson, Claus W. Heizmann, and Eduard Jenny 519

Comparative Studies of Monohemic Bacterial *c*-Type Cytochromes: Redox and Optical Properties of *Desulfovibrio desulfuricans* Norway Cytochrome $c_{533[550]}$ and *Pseudomonas aeruginosa* Cytochrome c_{551}
Pierre Bianco, Jean Haladjian, Mohammed Loutfi, and Mireille Bruschi 526

Leukotriene B_4 Augments Human Natural Cytotoxic Cell Activity
Marek Rola-Pleszczynski, Lyne Gagnon, and Pierre Sirois 531

Neocarzinostatin Chromophore: Presence of a Highly Strained Ether Ring and Its Reaction with Mercaptan and Sodium Borohydride
Otto D. Hensens, Ray S. Dewey, Jerrold M. Liesch, Mary A. Napier, Robert A. Reamer, Jack L. Smith, Georg Albers-Schönberg, and Irving H. Goldberg 538

The Role of Fructose 2,6-Bisphosphate in the Long-Term Control of Phosphofructokinase in Rat Liver
Emile Van Schaftingen and Henri-Géry Hers 548

The Pairing of Light and Heavy Chains of Isomeric Anti-lactose Antibodies
John H. Pazur, Kevin L. Dreher, Michael E. Tay, and Beverly A. Pazur 555

Activation of Prophenoloxidase by Bacterial Cell Walls or β-1,3-Glucans in Plasma of the Silkworm, *Bombyx mori*
Masaaki Ashida, Yuhko Ishizaki, and Hidenori Iwahana 562

Findings of Trigonelline Demethylating Enzyme Activity in Various Organisms and Some Properties of the Enzyme from Hog Liver

CUMULATIVE SUBJECT INDEX FOR VOLUMES 110-117*

A

A9145C
  antifungal antibiotic from Streptomyces griseolus, 1-amino-cyclopropan-carboxylic acid synthesis inhibition (tomato fruit extracts), 113, 586
2',5'-A, see Oligoadenylic acid
ppp(A2'p)$_n$A-synthetase, see 2',5'-Oligoadenylate synthetase
(3'dA2'p)$_2$3'dA
  cordycepin analog, cordycepin prodrug (human colon), 115, 137
Acetaldehyde
  aerobic oxidation by xanthine oxidase, leukotriene inactivation by generated hydroxyl radicals, 110, 266
  -exposed erythrocytes from normal individuals, hemoglobin A_I fraction similarity to that in alcoholism, 113, 1004
  metabolism, effect on Ca^{2+} transport (rat liver mitochondria), 117, 169
Acetaminophen
  -glutathione conjugate, cytochrome P-450-dependent formation (ethanol-treated rabbits), 112, 8
Acetic anhydride
  F_1-ATPase subunit labeling, activating and inactivating ligand effects (bovine heart), 113, 273
Acetobacteria
  spermine synthesis by GTP-insensitive ornithine decarboxylase, 114, 779
Acetylcholine
  binding sites, α-subunit receptor, exobilayer portion model, 116, 17
  noncompetitive antagonists, binding sites in α-subunit receptor, exobilayer portion model, 116, 17
Acetylcholine receptor
  α-subunit, exobilayer portion, molecular model and binding sites, 116, 17
  exposure to lipid bilayer membrane (Torpedo californica), 115, 1075
  interaction with monoclonal antibodies to human acetylcholine receptor (human, mouse), 113, 1
  muscarinic
    binding site loss with ATP due to orthovanadate contamination (rat corpus striatum), 110, 567
    cAMP synthesis regulation, adrenocorticotropin secretion, and adenylate cyclase activity (murine pituitary tumor cells), 114, 289
    quinuclidinyl benzilate binding regulation by guanine nucleotide, Tris/choline allosteric site requirement (canine, frog, murine, rat heart), 113, 280
    stimulation by monovalent cations and guanine nucleotides, N-ethyl-maleimide pretreatment effect (chicken heart), 111, 41; erratum, 112, 348
    solubilization
      by 3-[(3-cholamidopropyl)-dimethylammonio]-1-propane sulfonate, glycoprotein nature (bovine cerebral cortex), 115, 814
      in sensitive form for GTP and Na^+ (bovine cerebral cortex), 112, 948
    nicotinic desensitized azidophencyclidine binding with carbamylcholine (Torpedo californica, T. marmorata, T. ocellata, 113, 723
    partial tertiary structure, single group rotation theory, 111, 1022
Acetylcholinesterase
  S-mercuric-N-dansylcysteine binding, stoichiometric reaction and modification (Torpedo californica), 112, 941
Acetyl CoA carboxylase
  phosphorylation by ATP-citrate lyase kinase and cAMP-dependent protein kinase (rat liver), 117, 435
  regulation by
    insulin-induced low-molecular-weight mediators released from plasma membranes (rat liver

cytosol), 110, 789
phosphorylation-dephosphorylation mechanism (chick liver), 116, 633
N-Acetylglucosaminidase
signal-induced release, protein kinase role (rabbit platelets, rat neutrophils), 116, 743
β-N-Acetyl-D-glucosaminidase
binding to brain protein by phosphomannan-Sepharose chromatography (Macaca radiata), 112, 398
inhibition by cytokine injection (rat liver), 112, 14
secretion by
macrophages, zymosan-induced, mannose-glycoprotein receptor role (mouse), 113, 192
platelets, parallel with polyphosphoinositide increase after thrombin stimulation (human), 110, 660
N-Acetyl-L-glutamate
binding to elastase-inactivated carbamoyl-phosphate synthetase (ammonia) (rat liver), 117, 238
β-N-Acetylhexosaminidase, see β-N-Acetyl-D-glucosaminidase
Acetylhydrolase
plasma, platelet-activating factor inactivation (rat), 113, 666
N-Acetyl-D-mannosamine
conversion from N-acetylneuraminic acid by N-acetylneuraminate pyruvate-lyase, configuration (Clostridium perfringens), 111, 668
N-Acetyl-muramyl-L-alanyl-D-isoglutamine
effect on sheep erythrocyte immune response in macrophage-depleted cultures (mouse), 114, 721
N-Acetylneuraminate lyase
N-acetylneuraminic acid α- and β-anomer substrates, kinetics (Clostridium perfringens), 111, 668
N-Acetylneuraminate pyruvate-lyase, see N-Acetylneuraminate lyase
N-Acetylneuraminic acid
α- and β-anomers, substrates for N-acetylneuraminate pyruvate-lyase, kinetics (Clostridium perfringens), 111, 668
N-Acetyl-puromycin
converted from puromycin by enzyme isolated from drug-producing Streptomyces alboniger, biological activity, 113, 772
Acids
secretion, leukotriene stimulated (rabbit gastric parietal cells), 114, 897
4'-(9-Acridinylamino)methanesulfon-m-anisidide
aldehyde oxidase inhibition (rabbit liver), 116, 759
m_β-Acrosin
activity, α_1-proteinase inhibitor and sulphated polysaccharide effects (ovine), 117, 319
ACTH (adrenocorticotrophic hormone), see Adrenocorticotropin
Actin
Ca^{2+}- and Mg^{2+}-, polymerization characteristics, 116, 478
cytoskeleton, change following chemotactic stimulation of Dictyostelium discoideum, 115, 351
G-, crosslinked trimer preparation, purification, and properties (rabbit skeletal muscle), 111, 404
non-polysomal mRNA translation product from sarcoma-180 ascites cells during cell cycle (mouse), 113, 923
polymerization
spectrin-actin complex crosslinking by band 4.1 effect (human erythrocytes), 111, 360
stimulation by protein isolated from bovine thyroid plasma membranes, 111, 415
purification and characterization (rat pancreas), 113, 163
Actinomycin
prevention of insulin stimulatory effect on carbamoyl-phosphate synthetase (rat diabetic liver), 114, 255
Actinomycin D
inhibition of carbon tetrachloride-induced choline kinase (rat hepatic cytosol), 111, 683
Action potentials
production, intracellular pressure change (squid giant axon), 114, 1006
Actomyosin
native, phosphorylation modulation by spontaneously active phosphatase (bovine aorta), 111, 906
Acute phase response
induction by cytokine injection from peritoneal exudate cells (rat), 112, 14
Acyclovir
and 2'-nor-2'-deoxyguanosine, uptake and phosphorylation in tissue culture, in vitro viral and cellular DNA polymerase inhibition kinetics (rabbit kidney), 116, 360
Acyl-carrier protein
isolated from citrate lyase, S-acyl-

ated residue properties (Klebsiella aerogenes), 114, 310
Acyl-CoA:1-acyl-sn-glycero-3-phospholipid acyltransferase, see 1-Acylglycerophosphate acyltransferase
Acyl-CoA dehydrogenase ($NADP^+$)
trans-2-enoyl-CoA reduction, kinetics (rat hepatic microsomes), 113, 659
Acyl-CoA desaturase
Δ^6-, immunochemical differentiation from Δ^9- and Δ^5-types (rat hepatic microsomes), 110, 36
1-Acylglycerophosphate acyltransferase
arachidonic acid transfer to lysophospholipids, relative rates and localization (rat pancreatic acini), 112, 502
Acyl-lyase
citrate lyase subunit activity, single arginine residue at active site (Klebsiella aerogenes), 111, 490
Acyl-transferase
citrate lyase subunit activity, single arginine residue at active site (Klebsiella aerogenes), 111, 490
role in phosphatidylglycerol biosynthesis (canine lung microsomes), 116, 23
Adenine nucleotides
effect on F_1-ATPase activity, mechanism (bovine heart), 113, 273
mitochondrial membrane potential restoration with Mg^{2+}, potentiation by bongkrekate (rat liver), 111, 792
Adenine nucleotide translocase
inhibition by atractyloside, effect on adenosine release from cardiac mitochondria (rat), 113, 990
Adenocorticotropin
NH_2-terminal sequences, brain synaptic membrane peptidase action (rat), 111, 259
Adenosine
release by cardiac mitochondria, adenine nucleotide translocase and ATP/ADP ratio roles (rat), 113, 990
Adenosine receptors
adenylate cyclase-coupled, detection in ventricular membranes (guinea pig heart), 110, 208
S-Adenosylhomocysteine
DNA methylation inhibition (avian sarcoma virus-transformed rat cells), 114, 214
effect on 5'-deoxy-5'-methylthioadenosine (avian sarcoma virus-transformed rat cells), 114, 214
S-Adenosylmethionine
DNA methylation inhibition (avian sarcoma virus-transformed rat cells), 114, 214
effect on
Ca^{2+} permeability in proteoliposomes (chicken erythrocyte membrane proteins), 114, 1126
5'-deoxy-5'-methylthioadenosine (avian sarcoma virus-transformed rat cells), 114, 214
phosphatidylethanolamine methylation mediation
GTP effects (rat hepatic plasma membrane), 114, 425
inhibition by endogenous inhibitors in hepatic cytosol (rat), 112, 108
Adenosylmethionine decarboxylase
hyperoxia-induced delayed stimulation (rat lung), 113, 491
inhibition by 3-deaza-(±)-aristeromycin (Hela cells), 114, 505
Adenovirus type 2
proteins, trimeric nature of penton base and fiber, 110, 913
Adenovirus type 5
DNA synthesis in vitro, inhibition by aphidicolin, 113, 87
Adenylate
energy charge
effect on 6-phosphofructokinase activity, NH_4^+ and AMP deaminase regulatory roles (permeabilized Saccharomyces cerevisiae), 112, 96
pyruvate, orthophosphate dikinase activation/deactivation control, pyruvate, oxamate, and oxalate effects (Zea mays chloroplasts), 115, 673
Adenylate cyclase
basal, inhibition by GTP or guanyl-5'-yl imido-diphosphate, pertussis toxin effect (rat adipocytes), 116, 651
-coupled adenosine receptors, detection in ventricular membranes (guinea pig heart), 110, 208
forskolin-stimulated
enkephalin-mediated inhibition (rabbit corpus luteum), 116, 574
inhibition by GTP or guanyl-5'-yl imido-diphosphate, pertussis toxin effect (rat adipocytes), 116, 651
reversal by carbachol, cholinergic muscarinic receptor role (murine pituitary tumor cells), 114, 289

inhibition
by monoclonal antibodies (Neurospora crassa), 113, 778
sodium fluoride effect (canine, rabbit, rat heart sarcolemma), 115, 583
negative coupling with angiotension II receptors (rat aorta), 117, 420
regulation by catalytic component phosphorylation and dephosphorylation (S49 murine lymphoma cells), 112, 250
stimulation
by L-isoproterenol without affecting membrane phospholipid methylation (myogenic cell lines), 114, 339
in platelets causing prevention of thrombin-induced increase in cytoplasmic Ca^{2+} (human), 113, 598
by serotonin and guanine nucleotides, inhibition by aluminum chloride (Fasciola hepatica), 112, 911
by sodium fluoride, enhancement by aluminum chloride (Fasciola hepatica), 112, 911

Adenylate kinase
inhibition by elemental sulfur, reversal by dithiothreitol (rabbit muscle), 113, 348

Adenylyl cyclase, see Adenylate cyclase

Adipocytes
insulin binding, inhibition by noradrenaline and cAMP due to β-adrenergic receptor stimulation (rat), 112, 972
vanadate insulin-like effect on glycogen synthase and insulin receptors (rat), 113, 80

Adipokinetic hormone
lipid mobilization stimulation in Manduca sexta (locust), 115, 924

ADP (adenosine 5'-diphosphate)
aggregation induction in gel-filtered platelets, inhibition by 4,4'-diisothiocyanostilbene-2,2'-disulfonate (bovine), 111, 306
effect on phosphatidylinositol-4,5-bisphosphate labeling with [^{32}P]phosphate (rabbit platelets), 113, 483
-ribosylation
nonhistone proteins in HeLa cell cycle, 115, 938
nuclear protein phosphorylation suppression (chicken liver), 113, 136
vascular prostacyclin synthesis stimulation (rabbit aorta, pulmonary artery, rat aorta), 112, 284

ADP/ATP translocator protein
synthesis and intracellular transport (rat intact hepatoma cells), 110, 132

Adrenalectomy
effect on lipogenic testicular enzymes (rat), 115, 606

α-Adrenergic receptors
and epinephrine, effect on corticotropin-releasing factor-induced adrenocorticotropin release in vitro (rat pituitary cells), 110, 456

α_1-Adrenergic receptors
covalent labeling by 4-amino-6,7-dimethoxy-2[4-[5(3-[^{125}I]iodo-4-azidophenyl)pentanoyl]-1-piperazinyl]quinazoline (rat cerebral cortex), 115, 946

α_2-Adrenergic receptors
size determination (human platelets), 116, 1070

β-Adrenergic receptors
Ca^{2+}-dependency in endocytosis, hexose, and amino acid transport stimulation (murine renal cortex), 114, 913
heterogeneity in lung membranes, protease inhibitor effect (hamster, rat), 110, 504
stimulation by noradrenalin due to increased cAMP level, inhibitory effect on insulin binding to adipocytes (rat), 112, 972
structure, β-mercaptoethanol effect (mammalian), 116, 777

β_2-Adrenergic receptors
desensitization by pre-exposure to isoproterenol, effect on adrenocorticotropin release (murine pituitary tumor cells), 111, 112

Adrenocorticotrophic hormone (ACTH), see Adrenocortocotropin

Adrenocorticotropin
corticosterone stimulation, 18-hydroxycorticosterone, and aldosterone secretion by adrenals, elimination by antisera to γ_3-melanotropin (normotensive and spontaneously hypertensive rats), 110, 357
and β-endorphin, colocalized in nervous system (rat duodenum), 117, 568
-related peptide, cytotoxic activity, 115, 339
release by pituitary
corticotropin-releasing factor-induced, reduction by cell

pretreatment (rat), 111, 919
epinephrine and corticotropin-releasing factor additive effects (rat), 110, 456
prolonged elevation by isoproterenol pretreatment (murine tumor cells), 111, 112
stimulation by
forskolin, reversal by carbachol, cholinergic muscarinic receptor role (murine tumor cells), 114, 289
corticotropin-releasing factor analog (rat), 110, 602

Adrenodoxin
pH effect on reduction potentials, role in electron transfer mechanism (adrenal mitochondria), 115, 116

Adrenodoxin reductase, see Ferredoxin-$NADP^+$ reductase

Adriamycin, see Doxorubicin

Affinity chromatography
Cibacron 3GA-Sepharose CL 6B, organophosphate-hydrolysing phosphatase purification (Alcaligenes NC_5), 110, 412
colchicine agarose column, tubulin purification (rat pancreas), 111, 253
on heparin cofactor II, dermatan sulfate and heparin fractionation, 112, 663
phosphomannan-Sepharose, lysosomal enzyme-binding protein isolation (Macaca radiata brain), 112, 398
Procion Red-agarose, citrate synthase and succinate thiokinase elution profiles, 112, 1021

Aflatoxin B_1
binding and uptake by hepatocytes, inhibition by metyrapone and glutathione, stimulation by 1,2-epoxy-3,3,3-trichloropropane (rat), 110, 668
conversion from sterigmatocystin in cell-free system (Aspergillus parasiticus mutant), 116, 1114
DNA binding, role of co-oxygenation coupled to arachidonic acid metabolism (murine embryo fibroblasts), 112, 1034
-induced cytotoxicity
metabolic basis (guinea pig, mouse, quail, rat hepatocytes), 114, 813
microsomal enzyme inhibitor effect (rat hepatocytes), 115, 15
-modified DNA: bleomycin and DNase 1 nucleotide sequence cleavage, 117, 916

Agarose
Cibacron blue F3GA, human heart glycerol-3-phosphate dehydrogenase modification, 116, 689

Aging effects
O_2^- induced myelin deterioration in vitro (human brain), 117, 141
synaptosomal membrane lipids and proteins, spin label study (rat brain cortex), 117, 688

AH 22216
gastric histamine H_2 receptor inhibition (HGT-1 cells), 116, 251

D-Alanine
C-terminal peptide, substrate for porcine pituitary amidating enzyme, 117, 289

Alanine aminotransferase
glucagon effect (murine liver), 115, 506

Alanine-4,5-dioxovalerate aminotransferase, see Aminolevulinate aminotransferase

Alanine 2-oxoglutarate aminotransferase, see Alanine aminotransferase

Albumin
amyloid precursor variant, identification (amyloidotic polyneuropathy patient kidney), 116, 880
cytosol, production, 5-azacytidine effects (neonatal rat liver), 116, 939
effect on oleate binding to hepatic sinusoidal membranes in vitro (rat), 112, 88
serum, see Serum albumin

Alcaligenes NC_5
isolated from soil, organophosphate hydrolysing phosphatase purification, 110, 412

Alcoholism
hemoglobin composition changes, abnormal A_I fraction containing aldehyde or ketone formed during ethanol metabolism (human), 113, 1004

Alcohols
aliphatic, prostatic membrane in vitro treatment effect on fluidity and prolactin binding (rat), 113, 220
formation from sugars, isotope fractionation quantitation by ^2H NMR, 111, 890
primary, peroxide oxidation to aldehydes by chloride peroxidase, 114, 1104

Aldehyde oxidase
inhibition by 4'-(9-acridinylamino)-

methanesulfon-m-anisidide (rabbit liver), 116, 759
Aldehydes
peroxide oxidation of primary alcohols by chloride peroxidase, 114, 1104
Aldolase, see Fructose-bisphosphate aldolase
Aldosterone
secretion: angiotension II, 12-O-tetradecanoylphorbol-13-acetate, and ionophore A23187 effects (porcine adrenal gland), 116, 555
Alkaline phosphatase
hepatic, interacton with Cibacron Blue P3GA (human), 111, 36
inhibition of
adenylate cyclase activity by catalytic component dephosphorylation, 112, 250
topoisomerase I isolated from Novikoff hepatoma, 111, 897
intestinal, binding to Cibacron Blue F3GA, chromatographic purification (human), 111, 36
placental
biosynthesis and processing in choriocarcinoma cells and mRNA-directed cell-free system (human), 111, 611
purification and partial sequencing (human) 116, 1076
Alkoxy-aryl-lactams
3':5'-cyclic-nucleotide phosphodiesterase inhibition, tissue and substrate specificity (bovine aorta, human platelets), 113, 954
1-O-Alkyl-2-O-acetyl-sn-glycero-3-phosphocholine, see Platelet-activating factor
Allergic bronchial asthma
leukotriene D_4 synthesis increase in alveolar macrophages (human), 111, 518
Alloxan
reduction by electron transport proteins (porcine liver microsomes), 114, 578
Allyl bromide
chlorination by chloroperoxidase to produce halohydrin isomeres, neighboring group formation, 110, 880
Allylisopropylacetamide
effect on
phenobarbital-inducible cytochrome P-450 forms (rat hepatic microsomes), 111, 926
protein synthesis (rat hepatocytes), 114, 612
Allylisothiocyanate
H^+,K^+-ATPase inhibition, acid secretion (bullfrog, porcine gastric mucosa), 112, 464
Aluminum
binding to calmodulin, structural changes induced in calmodulin (bovine brain), 115, 512
Amaranth, see Red dye No. 2
Amidating enzyme
converting tripeptides to dipeptide amines, substrate specificity assay (porcine pituitary), 112, 372
Amiloride
ethylisopropyl derivative, effect on Na^+/H^+ exchange (various cell types), 116, 86
Amine oxidase
mixed-function, purification and activity with carcinogenic amino-azo dye substrates (rat hepatic microsomes), 110, 640
Amine oxidases (Cu-containing)
and phenylhydrazine, reaction mechanism and stoichiometry (bovine plasma, lentil seedling), 115, 841
Amine oxidase (flavin-containing)
FAD, ESR analysis (bovine liver), 117, 517
Amines
heterocyclic, pyrolysis produced mutagenic and carcinogenic, ultimate forms (Salmonella typhimurium TA98/1.8-DNP_6), 114, 626
Amino acid composition
adrenocorticotropin-(1-16)-NH_2 fragments (rat), 111, 259
laminin from amnion, chorion, and chorionic microvessel basement membranes (human), 112, 1091
neural cell adhesion molecule (N-CAM) (murine brain), 112, 482
polysialolyl glycopeptide brain cell surface protein (BSP-2) (mouse), 112, 482
proline-rich polypeptide bound to prostatic binding protein, multiple forms (rat), 111, 172
T-kinin containing bradykinin sequence (rat plasma), 112, 701
vasoactive peptide formed from plasma kininogen by action of acid protease from Murphy-Sturm lymphosarcoma (rat), 112, 621
D-Amino-acid oxidase
flavin constituent of purple intermediate, resonance Raman study (porcine kidney), 111, 588
Amino acids
branched-chain, enzymatic deficiencies in fibroblasts,

characterization by genetic complementation (human), 114, 175
D-cysteine-related, synthesis by 3-chloro-D-alanine chloride-lyase (Pseudomonas putida CR 1-1), 111, 809
effect on O-(4-methylumbelliferyl)-glycosides fluorescence, 110, 926
stimulation of [^{35}S]methionine-labeled short-lived protein degradation (rat hepatocytes), 117, 509
transport, β-adrenergic stimulation (murine renal cortex), 114, 913
Amino acid sequences
alkaline phosphatase forms (human placenta), 116, 1076
α-amylase, free thiol group localization (porcine pancreas), 110, 726
apolipoprotein A-1
comparison with proapolipoprotein A-I (human plasma), 113, 626
precursor coded by mRNA (human liver), 112, 257
propreprotein (rat lymph, plasma), 116, 704
propreprotein (Tangier disease patient plasma), 113, 934
atrial muscle peptide (rat), 117, 859
cholera toxin subunit A_1, ADP-ribosylation site, 116, 341
high-mobility-group protein HMG 14 (calf thymus and chicken erythrocytes), 110, 378
collagenase-derived tryptic peptide containing active site serine residue (Hypoderma lineatum), 112, 907
cutinase active site region (fungal), 114, 1017
cytochrome b_5 (rabbit erythrocytes, liver microsomes), 115, 807
cytochrome c oxidase, bacterial and mitochondrial, sequence homology, 116, 335
cytochrome c oxidase subunit IV (bovine heart), 110, 8
endopeptidase II from Vespa orientalis larvae, bovine chymotrypsin comparison, 110, 1
growth-hormone releasing factor (porcine hypothalamus), 116, 726
HC-toxin configuration (Helminthosporium carbonum), 111, 398
hypothalamic growth hormone releasing factor (bovine), 117, 772
immunoglobulin λ-light chains
fragments from peptic cleavage in urea (human), 111, 89
human urine, 117, 587
interleukin 2
cDNA (human tonsil), 115, 1040
genes (human), 117, 114
neuromedin B (porcine spinal cord), 114, 541
neuromedin K (porcine spinal cord), 114, 533
N-terminal,
cellulase, homology with hen egg-white lysozyme active site (Schizophyllum commune), 116, 408
in fluorescein isothiocyanate modified cytochrome P-450_{LM_2}, 113, 353
position 3 post-translational modification, 116, 1049
tyrosine residue of thyroglobulin radioiodinated in vivo and in vitro (human), 114, 73
PCD-109, bovine seminal plasma major protein component, 113, 861
prealbumin peptides (human amyloid fibril), 114, 657
prostatic steroid-binding protein and uteroglobin, sequence homology (rabbit, rat), 114, 325
serine hydroxymethyltransferase, homology between prokaryotic and eukaroytic forms (rabbit liver, Escherichia coli), 116, 1007
sperm activating peptides (Anthocidaris crassispina egg jelly), 117, 147
thiol proteinase inhibitor (rat liver), 115, 902
thioredoxins, m- and f-type (spinach chloroplast), 115, 1
T-kinin containing bradykinin sequence (rat plasma), 112, 701
triiodothyronine-containing peptide isolated from thyroglobulin (porcine), 112, 206
9-Aminoacridine
nitroxide spin-labeled, localization in nuclear and mitochondrial DNA (KB cells), 111, 1074
Aminoalkylphosphonofluoridates, see Phosphonofluoridates
Aminoazo dyes
carcinogenic, N-oxidation by mixed-function amine oxidase (rat hepatic microsomes), 110, 640
3-Aminobenzamide
chondrocyte differentiation enhancement (chicken limb bud cell culture), 111, 750
effect on
phytohemmagglutin-induced lymphocyte proliferation (human), 116, 428
X-ray-induced DNA repair during two phases of reconstitution (L1210

cells), 112, 1077
inhibition of
DNA synthesis and thymidylate synthase after methyl methane sulfonate DNA damage (human), 117, 30
nicotinic acid protective effect on ischemic injury-induced DNA damage during kidney storage (mouse), 113, 996
γ-Aminobutyric acid
binding to postsynaptic receptors, stimulation by exogenous sulfatide (murine brain), 112, 827
L-(α-S,5-S)-α-Amino-3-chloro-4,5-dihydro-5-isoxazoleacetic acid
γ-glutamyltransferase inactivation, mechanism (rat kidney), 112, 564
Aminochromes
dihydropteridine reductase inhibition (human brain), 113, 895
1-Aminocyclopropane-carboxylic acid
synthesis, inhibition by antifungal antibiotics Sinefungin, A9145C and synthetic nucleoside Siba (tomato fruit extracts), 113, 586
4-Amino-6,7-dimethoxy-2[4-[5(3-[^{125}I]-iodo-4-azidophenyl)pentanoyl]-1-piperazinyl]-quinazoline
α_1-adrenergic receptor covalent labeling (rat cerebral cortex), 115, 946
5-Amino-4-imidazole carboxamide transformylase, see Phosphoribosyl-aminoimidazolcarboxamide formyltransferase
Aminolevulinate aminotransferase
4,5-dioxovalerate conversion to 5-aminolevulinate in porphyrin synthesis (human, rabbit, rat kidney, liver, spinach leaves), 112, 986
δ-Aminolevulinate synthase, see 5-Aminolaevulinate synthase
5-Aminolaevulinate synthase
cytosolic precursor
hemin-induced accumulation due to inhibited processing into mitochondrial enzyme (chicken embryo hepatocytes), 110, 42
molecular weight 74,000, processing during transport into mitochondria (chicken embryo liver), 110, 23
transfer into mitochondira, inhibition by hemin (chick embryo liver), 117, 344
heme translation inhibition (cell-free system), 115, 225
isozymes in liver and erythroid cells, immunochemical comparison (chicken), 113, 377
translocation in vitro into mitochondria, inhibition by hemin (chicken liver), 115, 700
2-Amino-4-methyl-1-pentanethiol
inhibitory effect on leucine aminopeptidase (porcine kidney), 116, 297
2-Amino-6-methyldipyrido[1,2-a:3',2'-d]-imidazole
DNA modification, base sequence specificity (calf thymus), 116, 1100
2-Amino-6-nitrotoluene
microsomal N-hydroxylation, inhibition by methimazole metabolite (rat liver), 113, 433
Aminopeptidases
action on adenocorticotropin NH_2-terminus (rat brain synaptic membrane), 111, 259
Cu(II) or Ni(II) substitution after Zn, effect on activity (Aeromonas), 114, 646
enzyme-substrate complex, direct detection by stopped-flow fluorescence (Aeromonas), 111, 946
inhibition by 2-amino-4-methyl-1-pentanethiol (porcine kidney), 116, 297
Aminopropylcadaverine
structural specificity in stimulating spermidine auxotroph growth (Escherichia coli), 117, 616
2-Aminopyrimidine
and ribose-5-phosphate aqueous reaction, nucleoside-5'-monophosphate formation, 117, 93
Aminopyrine
H_2O_2-supported N-demethylation catalyzed by cytochrome P-450 and horseradish peroxidase, EPR stopped flow measurements, 113, 332
Ammonium assimilation, see Nitrogen fixation
Ammonium chloride
effect on transferrin recycling (rat reticulocytes), 113, 650
Ammonium ion
heterocyst and nitrogenase formation inhibition in wild and glutamine synthetase-deficient strains (Anabaena cycadeae), 111, 180
muscarinic receptor binding stimulation changes after N-ethylmaleimide pretreatment (chicken heart), 111, 41
regulatory role in 6-phosphofructokinase response to adenylate energy charge (permeabilized Saccharomyces cerevisiae), 112, 96

Amniotic fluid
platelet-activating factor during labor (human), 113, 51
AMP (adenosine 5'-monophosphate)
binding to subtilisin-inactivated phosphorylase a, interaction with glucose binding, 113, 825
inhibition of
pyruvate dehydrogenase α-subunit phosphorylation in isolated mitochondria (rat brain, heart, liver), 111, 1054
succinyl-CoA synthetase phosphorylation in isolated mitochondria (rat brain, heart, liver), 111, 1054
with KCl, effect on phosphorylase phosphatase sensitivity to glycogen inhibition, 114, 148
6-phosphofructokinase activation, comparison with fructose-2,6,-bisphosphate effect, 111, 294
AMP deaminase
regulatory role in 6-phosphofructokinase response to adenylate energy charge (permeabilized Saccharomyces cerevisiae), 112, 96
forms, separation and comparison (chicken liver), 114, 1011
Amylase
release by parotid cells in vitro (mouse)
stimulation by forskolin, 111, 21
stimulation by isoproterenol, augmentation by forskolin, 111, 21
α-Amylase
amino acid sequencing, free thiol group localization (porcine pancreas), 110, 726
synthesis by membrane bound ribosomes (Bacillus licheniformis), 114, 677
Anabaena cycadeae
grown on NH_4^+, heterocyst and nitrogenase formation inhibition in wild and glutamine synthetase-deficient strains, 111, 180
Anaerobiosis
DNA synthesis blockage and diadenosine 5',5'''-P^1,P^4-tetraphosphate decrease in Ehrlich ascites cells with unchanged levels of ATP, ADP, and AMP, 110, 688
Analbuminemia
congenital, serum albumin gene structural integrity (human), 116, 817
Androgen receptors
dihydrotestosterone-binding, detection in neonatal brain (rat), 111, 717
DNA and ribonucleotide binding characteristics (rat prostate), 114, 1147
production, stimulation by androgen, triamcinolone acetonide effect (rat prostate, hamster ductus deferens cloned tumor cells), 116, 1020
Androgens, see also specific androgens
effect on testosterone metabolism (rat granulosa cell culture), 113, 948
-stimulated androgen receptor production, triamcinolone acetonide effect (rat prostate, hamster ductus deferens cloned tumor cells), 116, 1020
Androstenedione
aromatization and 19-hydroxylation, evaluation, 117, 392
Anemia
lack of induction by Cu-chelating drugs causing plasma ferroxidase activity decrease (rat), 113, 127
Anesthetics
local, F_1-ATPase inhibition (mesophilic, thermophilic organisms), 112, 822
Angiotensin converting enzyme, see Dipeptidyl carboxypeptidase
Angiotensin II
chromatin solubility increase (rat hepatic nuclei), 110, 61
conformation models in acidic aqueous solutions, clustering analysis, 112, 339
effect on aldosterone secretion, 12-O-tetradecanoylphorbol-13-acetate and ionophore A23187 comparison (porcine adrenal gland), 116, 555
L-malic acid analogues, molecular weight and amino acid sequence, fast atom bombardment mass spectra, 115, 653
Angiotensin II receptors
negatively coupled to adenylate cyclase (rat aorta), 117, 420
Angle resolved fluorescence depolarization
oriented lipid membrane systems, 116, 462
Anions
effect on F_1-ATPase activity, mechanism (bovine heart), 113, 273
interactions wih Cu,Zn-superoxide dismutase, lysine residue modification effect (bovine erythrocytes), 111, 860
transport, arginine-specific reagent phenylglyoxal effect (human

erythrocytes), 110, 616
Anoxia
effect on glycogenolysis and phosphorylase activity (rat hepatocytes), 115, 1033
Anthocidaris crassispina
sperm activating peptides, purification, action, and amino acid sequence (egg jelly), 117, 147
Anthracene
intercalative binding to DNA, fluorescence and photoelectron study, 112, 1
Antibiotics
active hydrogen content, fast atom bombardment mass spectrometry after H-D exchange, 112, 126
aminoglycoside, RNA synthesis stimulation in absence of protein synthesis and guanosine polyphosphate production (Escherichia coli), 112, 801
anthracycline, cardiotoxicity connected with OH· radical generation in respiring mitochondria (rat heart), 114, 197
antifungal, tomato fruit 1-aminocyclopropane-carboxylic acid synthase inhibition (Streptomyces griseolus), 113, 586
Antibodies
diphtheric, streptococcal, and hepatitis synthetic peptides coupled to tetanus toxoid, immunogenicity and response specificity (mouse), 117, 908
domain-specific, proteolysis and S-cyanylation, fibronectin domain structure identification (human pericellular matrix, plasma), 116, 534
-induced conformation restriction, separation-free enzyme immunoassay (rabbit), 114, 1097
insulin receptor, monovalent Fab component internalization by cultured lymphocytes (human), 114, 230
lactose, polyclonal isomeric, light and heavy chain pairing (rabbit serum), 113, 555
malic enzyme, cross-reactivity for NADPH-binding region, 112, 1007
monoclonal, see Monoclonal antibodies
N-terminal
murine γ-interferon synthetic peptide, production and characterization, 117, 866
natural interferon γ, neutralization of recombinant and natural interferon γ, 111, 626
normal liver glycogen branching enzyme, inhibition of enzyme in skin fibroblasts from normal subjects and patients with Type IV glycogen storage disease, 111, 636
plasma membrane ATPase, relationship (Candida tropicalis, Schizosaccharomyces pombe), 115, 1114
rat liver glycogen synthase, mRNA translation product identification (rabbit), 117, 332
α_1-Antichymotrypsin
in normal and acute rheumatoid arthritis plasma, amino terminal sequence differences (human), 111, 438
Anti-factor Xa
activity in heparin synthetic pentasaccharide, 116, 492
Antigens
carbohydrate α-galactosyl residue (human ovarian germ cell tumor), 115, 268
carcinoembryonic, dimeric structure (human colon adenocarcinoma liver metastases), 115, 206
leukocyte common T200, O-glycosidically linked oligosaccharides of poly-N-acetyllactosamine type, B- and T-cell differences (human), 110, 424
from pancreatic carcinoma, isolation and glycolipid structure characterization (human), 110, 383
RNP, antigenic polypeptides, purification and identification (caprine liver), 114, 564
Sm, antigenic polypeptides, purification and identification (caprine liver), 114, 564
surface, variant-specific from clones of Trypanosoma equiperdum, purification and characterization, 110, 491
synthetic type 24 streptococcal M protein, without carrier or adjuvant, epitope specific immune response (mouse), 117, 359
Antimycin A
inhibitory effect on slow rise of electrochromic absorbance change and initial rise generated by photosystem I (pea chloroplasts), 111, 619
Antiserum
insulin receptor, simulation of insulin effect on casein and α-lactalbumin synthesis (pregnant murine mammary explants), 111, 988
γ_3-melanotropin, inhibition of corticotropin-induced increase in adrenal steroidogenesis (normotensive and spontaneously hyper-

tensive rats), 110, 357
tritin from wheat, cross-reactivity with protein synthesis inhibitors from barley and rye, 114, 190
Antithrombin III
activity in heparin synthetic pentasaccharide, 116, 492
binding sites for dermatan sulfate and heparin, heparin cofactor II comparison, 112, 663
effect on amidolytic activity of thrombin, nerve growth factor, and kallikrein, 113, 108
α1-Antitrypsin
cDNA clone, isolation, detection in mRNA (human leukocytes, liver), 116, 375
Aortic endothelial cells
binding sites for coagulation factors IX, IX_a, and X (bovine), 111, 723
Aortic smooth muscle cells
migration induced by platelet-derived growth factor, mediation by lipoxygenase products of arachidonic acid (rat), 112, 866
Aphidicolin
inhibition of
adenovirus DNA internal region synthesis, 113, 87
DNA synthesis and thymidylate synthase after methyl methane sulfonate DNA damage (human), 117, 30
Aplysiatoxin
inhibition of 12-O-tetradecanoylphorbol-13-acetate binding to sphingomyelin, 112, 709
Apoferritin
Fe(III) incorporation, ferroxidase effect (equine), 116, 244
Apolipoprotein A-I
multiple charge isoforms in plasma, translation in vitro by hepatic and enteric mRNAs from different strains (mouse), 114, 275
precursor protein
coded by mRNA from human liver, amino acid sequencing using cloned cDNA, 112, 257
identification, amino acid sequence, and metabolic conversion (rat lymph, plasma), 116, 704
production in plasma from proapolipoprotein A-I by proteolytic cleavage (human), 113, 626
Apolipoprotein C-II
effect on lipoprotein lipase-catalyzed hydrolysis of dihexanoyl- and diheptanoyl-phosphatidylcholine (bovine milk), 113, 811
Apotyrosinase
isolated from Neurospora crassa, reconstitution with Cu^+ and Cu^{2+}, 110, 313
1-β-D-Arabinofuranosylcytosine-5'-diphosphate-L-1,2-diacylglycerol
interactions with serum lipoproteins (canine, human), 116, 368
9-β-D-Arabinosyl-2-fluoroadenine
conversion to toxic metabolite 2-fluoro-ATP (murine P388 cells), 113, 35
Arachidonic acid
conversion to
leurotriene A, hemoglobin-catalyzed transformation of 15-hydroxyeicosatetraenoic acid into 8,15- and 14,15-isomers (human), 110, 273
leukotriene D_4 by alveolar macrophages, increase in allergic bronchial asthma (human), 111, 518
monohydroxyeicosatetraenoic acids by aortic smooth muscle cells (rabbit), 112, 242
prostaglandins E_2 and $F_{2\alpha}$ by erythrocytes (Opsanus tau), 110, 250
incorporation into various phospholipids, all-trans-retinoic acid effect (guinea pig peritoneal granulocytes), 114, 261
lipoxygenase products
mediation of aortic smooth muscle cell migration induced by platelet-derived growth factor (rat), 112, 866
stereospecific inhibition of prostaglandin H_2-induced platelet aggregation (human), 112, 878
metabolism
coupled to cooxygenation reactions, role in aflatoxin B_1 activation for DNA binding (murine embryo fibroblasts), 112, 1034
docosahexaenoic acid effect (human), 117, 549
via cyclooxygenase, inhibition by anti-inflammatory drugs (rat neutrophils from reverse passive Arthus reaction pleural exudates), 112, 586
via lipoxygenase
inhibition by flavoniods (rat basophilic leukemia cells), 116, 612
stimulation by anti-inflammatory

drugs (rat neurophils from reverse passive Arthus reaction pleural exudates), 112, 586
reactive oxygen and cAMP production (rat peritoneal macrophage), 114, 549
release from
ionophore A23187-stimulated neutrophils, role in platelet-activating factor synthesis (rabbit), 113, 72
platelets, thrombin-stimulated, effect of diglyceride/monoglyceride lipase pathway inhibition (human), 113, 241
stimulation of A23187-induced prostaglandin production by macrophages, mechanism (rat), 114, 248
superoxide radical induction in neutrophils, unaffected by prostaglandins E_1 and I_2 (human), 113, 506
12-O-tetradecanoylphorbol-13-acetate-induced release from
C3H10T1/2 cells, inhibition by lecanoric acid analogs, 111, 733
3T3 rat cell variants with loss of mitogenic response to tumor promoter, 111, 194
transfer to various lysophospholipids catalyzed by acyltransferases, relative rates and localization (rat pancreatic acini), 112, 502
Arginine
essential residues in citrate lyase subunits (Klebsiella aerogenes), 111, 490
Arginine vasopressin
-stimulated intracellular pH increase (Swiss 3T3 cells), 116, 931
Arginine vasopressin receptors
characterization (rat anterior pituitary gland), 115, 492
Arginyl-tRNA synthetase
and lysyl-tRNA synthetase complex, 12-S, hydrodynamic properties and structure (rat liver), 117, 464
Aromatic hydrocarbons
polycyclic, degradation dependence on plasmid pKG2 (Beijerinckia sp.), 111, 939
Arsenazo III
-Ca^{2+} interactions, temperature-jump relaxation, kinetics, 111, 1027
Arylamines
carcinogenic, prostaglandin H synthase-mediated reaction with tRNA and homopolyribonucleotides, mechanism, 111, 96
3'-Arylazido-8-azido ATP
oligomycin-sensitive ATPase photoaffinity crosslinking (bovine cardiac mitochondria), 111, 732
Aryl hydrocarbon hydroxylase, see Flavoprotein-linked monooxygenase
Arylsulfatase A
subunit structure alteration in fibroblasts from patients with pseudodeficiency, 112, 191
synthesis and maturation in fibroblasts from metachromatic leukodystrophy and pseudodeficiency, 112, 198
Arylsulfatase A pseudodeficiency
structurally altered enzyme detection in fibroblasts (human), 112, 191, 198
Ascorbate
effect on Ca,Zn superoxide dismutase electrophoretic variants (bovine), 117, 677
Ascorbic acid
autooxidation, bicyclic ring formation role, 115, 531
-methemoglobin interaction, activated oxygen species production, mechanism, 111, 980
L-Ascorbic acid
inhibition of hydroxyproline-rich glycoprotein insolubilization in cell wall (carrot root slices), 112, 161
reduction of benzo[a]pyrene mutagenic activity, comparison with chalcone antimutagenic activity (Salmonella typhimurium), 112, 833; erratum, 115, 406
singlet $^1\Delta_g$ molecular oxygen quenching in aqueous media, 115, 932
Asialoorosomucoid
-hepatocyte binding, diabetes-induced variation (rat), 115, 82
Aspartate aminotransferase
activation by pyridoxamine 5'-phosphate, inhibition by phosphates and anionic compounds (porcine heart), 112, 629
mitochondrial precursor maturation, cytoskeleton inhibitor effects (chicken embryo fibroblast), 115, 144
Aspartate chemoreceptor
-methyl-accepting chemotaxis protein, ion channel element selection (Salmonella typhimurium), 115, 648
L-Aspartate oxidase
in cotton callus cells, requirement for unidentified dialyzable co-

factor, 111, 188
Aspartyl-tRNA synthetase
large scale purification, structural properties (yeast), 117, 259
Aspergillus nidulans
transformation to phototrophy by orotidine-5'-phosphate decarboxylase gene segment from Neurospora crassa, 112, 284
Aspergillus ochraceus
microsomal benzo[a]pyrene hydroxylase characterization, 113, 497
Aspergillus parasiticus
mutant-derived cell-free system, sterigmatocystin conversion to O-methylsterigmatocystin and aflatoxin B_1, 116, 1114
Ataxia-telangiectasia
neocarzinostatin-treated fibroblasts, defective DNA repair (human skin), 110, 483
ATP (adenosine 5'-triphosphate)
binding to elastase-inactivated carbamoyl-phosphate synthetase (ammonia) (rat liver), 117, 238
cellular pool, evolution after uv-mediated SOS system induction (Escherichia coli), 117, 556
and creatine kinase: kinetic properties, functional roles, and compartmentation (rabbit glycerinated muscle fiber), 114, 785
decrease in adenocarcinoma cells during glucose starvation (human), 110, 371
-dependent proteolysis, role in methemoglobin reductase solubilization during reticulocyte maturation (rabbit), 116, 357
enzyme-bound, synthesis by F1-ATPase in dimethylsulfoxide, 114, 907
Mg-, see Mg-ATP
millimolar levels, Mg-ATP dissociation constant, ^{31}P NMR and optical absorbance spectroscopy (perfused, ischemic heart muscle) 117, 210
oligomycin-sensitive synthesis, inhibition by tribenzylphosphate, mechanism (yeast mitochondria), 113, 751
-phosphoenolpyruvate counter-transport system in C_3 and C_4 chloroplasts (maize pea), 116, 945
prevention of adenylate cyclase inactivation at 0° (S49 murine lymphoma cells), 112, 250
-stimulated
Ca^{2+} accumulation by chromaffin granules and mitochondria (adrenal medulla), 117, 245
muscarinic binding site loss due to orthovanadate contamination (rat corpus striatum), 110, 567
vascular prostacyclin synthesis (rabbit aorta, pulmonary artery; rat aorta), 112, 284
ATP/ADP ratio
in adenosine release by isolated cardiac mitochondria (rat), 113, 990
ATPase
activity, effect of linoleic acid incorporation into membrane phospholipids (rat liver), 117, 809
Ca^{2+}-
calmodulin antagonist effects (porcine sperm), 114, 28
stimulation by ATPase inhibitor protein from bovine cardiac mitochondria (rabbit sarcoplasmic reticulum), 111, 274
transport, phosphoprotein intermediate (rabbit sarcoplasmic, rat endoplasmic reticulum), 114, 584
Ca^{2+},Mg^{2+}-, molecular weight, determination by radiation inactivation (human erythrocyte membrane), 116, 895
F_1-
cell-free synthesis directed by mRNA from aged slices of sweet potato roots, 113, 235
enzyme-bound ATP synthesis in dimethylsulfoxide, 114, 907
-N-ethoxycarbonyl-2-ethoxy-1,2-dihydroquinoline, binding and kinetics (Escherichia coli), 114, 684
subunit accessibility to acetic anhydride and diazonium benzenesulfonic acid, activating and inactivating ligand effects (bovine heart), 113, 273
thermophilic, resistance to specific F_1-ATPase inhibitors including local anesthetics (bacterium PS3), 112, 822
H^+,K^+-, inhibition by allylisothiocyanate (porcine gastric mucosa), 112, 464
MF_1, NBD-labeled tyrosine residue, identification (bovine heart), 116, 599
Na^+,K^+-
activity increase after treatment with phosphatidylserine vesicles (cultured BHK 21 cells), 115, 470
in dodecyloctaethyleneglycolether solution, monomeric and trimeric structures (equine kidney), 113, 361

and electrogenic (Na^+, K^+) pump, V^+ inhibition and bleomycin effects (rat brain, skeletal muscle), 116, 783
modification by cyclic nucleotide-mediated processes (hamster sperm homogenate), 112, 132; erratum, 114, 431
sensitivity to Ca^{2+} inhibition, increase with hemolysate (human erythrocytes), 111, 970
vanadate-facilitated binding of [^{3}H]ouabain, determination of ouabain binding site number in small muscle biopsies (rat), 111, 319
oligomycin-sensitive
photoaffinity crosslinking by 3'-arylazido-8-azido ATP (bovine cardiac mitochondria), 111, 732
temperature-dependent intrinsic tryptophan fluorescence (bovine cardiac submitochondrial particles), 111, 366
plasma membrane, antigenic relationships (Candida tropicalis, Schizosaccharomyces pombe), 115, 1114
proton-translocating
defective in δ subunit of F_1 and b subunit of F_0 (Escherichia coli mutants), 111, 143
interaction with oligomycin or dicyclohexycarbodiimide, kinetics (bovine cardiac mitochondria), 111, 333
role in Golgi apparatus function (rat liver), 114, 620
ATPase inhibitor protein
from bovine cardiac mitochondria, stimulation of Ca^{2+}-ATPase from rabbit sarcoplasmic reticulum, 111, 274
ATP citrate (pro-3S)-lyase
adrenalectomy and dexamethasone effects in vivo (rat testes), 115, 606
protein kinase, acetyl CoA carboxylase phosphorylation (rat liver), 117, 435
Atractyloside
adenosine release inhibition, adenine nucleotide translocase role (rat cardiac mitochondria), 113, 990
prevention of mitochondrial membrane potential restoration by ADP or ATP with Mg^{2+} (rat liver), 111, 792
Atrial natriuretic factor
purification and vasorelaxant activity (rat), 116, 696
Atropine
reversal of carbachol inhibitory effect on (-)isoproterenol-stimulated cAMP synthesis and adrenocorticotropin secretion (murine pituitary tumor cells), 114, 289
Auxin receptor
reconstituted in bilayer lipid membranes, electrochemical response to naphthalene-1-acetic acid (maize leaves), 110, 300
Axons
crustacean, membrane vesicle interaction with 4-(N-maleimido) benzyltrimethylammonium specific for nicotinic acetylcholine receptor (lobster), 111, 61
AY9944
inhibition of cholesterol and DNA synthesis in lymphocytes (human peripheral blood), 110, 82
5-Azacytidine
effect on α-fetoprotein and albumin production in cytosol and serum (neonatal rat), 116, 939
endogenous retrovirus induction with proviral DNA hypomethylation (rat embryonic fibroblasts), 112, 571
inhibition of casein synthesis and lactose synthase activity in differentiating mammary gland in vitro (mouse), 111, 150
tyrosine aminotransferase stimulation in fetal liver (rat), 113, 645
4-Azidobenzoyltrimethionine
competitive inhibition of trimethionine uptake (Candida albicans), 110, 884
p-Azido-m-[^{125}I]-iodobenzylcarbazolol
photoaffinity labeling of β-adrenergic receptors in lung membranes (hamster, rat), 110, 504
Aziridine
formation from 2-chloroethylaminobenzoquinone derivatives by microsomal enzymes (rat liver), 110, 220
12-(4-Azido-2-nitrophenoxy)stearoyl-(1-^{14}C)-glucosamine
erythrocyte membrane photolabeling, staphylococcal α-toxin detection (rabbit), 111, 444
p-Azidophenacyl bromide
as photoaffinity reagent for use with pepsin and other carboxyl proteases, 111, 630
Azido-phencyclidine
binding to acetylcholine receptors with carbamylcholine, species differences (Torpedo californica,

T. marmorata, T. ocellata), 113, 723
Azidosemimethemerythrin
binuclear Fe site, oxidation state EPR study, 112, 954
Aziridinylnaphthoquinone
formation from 2-bromoethylamino-naphthoquinone (rat hepatocytes), 112, 356

B

Bacillus coagulans
lysozyme digest, linkage region between poly(galactosyl glycerol phosphate) and peptidoglycan, identification, 111, 312
Bacillus megaterium
soluble cytochrome P-450 induction by pheobarbital, spectral changes by membrane-bound respiratory cytochromes, 112, 927
uv-induced DNA photoproducts in isolated and nonisolated developing forespores, 113, 618
Bacillus stearothermophilus
$tRNA^{Leu}$ primary structure, 112, 578
Bacillus subtilis
α-amylase gene cloned in pUB110, nucleotide sequence of promoter and NH_2-terminal signal peptide region, 112, 678
ATCC 6633, subtilin precursor protein detection in vivo and conversion in vitro, 116, 751
uv-induced DNA photoproducts in isolated and nonisolated developing forespores, 113, 618
Bacillus licheniformis
α-amylase and α-glucosidase synthesis by membrane bound ribosomes, 114, 677
Bacillus megaterium
cytochrome P-450-dependent fatty acid monooxygenase induction by barbiturates, 116, 843, 851
Bacillus thuringiensis var. israeliensis
spontaneous loss of high-molecular-weight plasmid and biocide, correlation with acrystalliferous variant appearance, 110, 477
Bacteria, see also specific bacteria
cell walls, pre-phenoloxidase activation (silkworm hemolymph plasma), 113, 562
mixed culture, natural gas production by anaerobic digestion of castor cake (cow dung), 110, 32
soil, grown on mevalonate, isoprenoid biosynthesis, 110, 187
Bacteriophages
λ, -infected minicells, Escherichia coli dna-J- and dnaK-gene product synthesis and membrane affinity, 110, 176
M13, B protein conformation, different in filaments, I-forms, and spheroids, circular dichroism study, 112, 349
T4, λ hypothetical and tail-fiber proteins, sequence homology, 115, 1061
T4D gene 29-infected Escherichia coli B, folylpolyglutamate synthetase identification, 116, 1119
Bacteriorhopsin
carboxyl group localization in retinal chromophore vicinity, 114, 872; erratum, 115, 407
incorporation into large unilamellar liposomes by reverse phase evaporation, photochemical activity, 111, 373
Barbiturates
-induced cytochrome P-450-dependent fatty acid monooxygenase characterization (Bacillus megaterium), 116, 851
structure and inducer activity relationship (Bacillus megaterium), 116, 843
Basement membranes
laminin components, isolation without prior protease digestion (human amnion, chorion, chorionic microvessels), 112, 1091
lens epithelium, in vivo glycosylation (normal, diabetic human), 117, 51
Beijerinckia sp.
plasmid pKG2, role in polycyclic aromatic hydrocarbon degradation, 111, 939
Benzamide
chondrocyte differentiation enhancement in limb bud cell culture (chicken), 111, 750
Benz[a]anthracene
derivatives, intercalative binding to DNA, fluorescence and photoelectron study, 112, 1
Benzoflavones
epoxide hydrolase activation (human lymphocytes), 110, 525
Benzolactams
dipeptidyl carboxypeptidase inhibitor, synthesis and characterization, 117, 108
Benzo[a]pyrene
epidermal metabolism and DNA binding,

inhibition by ellagic acid (rat), 114, 388
microcrystalline, liposomal uptake, synchronous fluorescence study, 112, 1069
mutagenic activity, reduction by chalcone derivatives (Salmonella typhimurium), 112, 833; erratum, 115, 406
Benzo[a]pyrene hydroxylase
induction
during pregnancy in liver and lung (C57B1 and DBA/2 mice), 112, 313
effect of cytochrome P-450 types (Aspergillus ochraceus TS), 115, 692
microsomal, characterization (Aspergillus ochraceus), 113, 497
Benzo[a]pyrene 4,5-oxide
epoxide hydrolase substrate in intact lymphocytes (human), 110, 525
Benzodiazepine receptors
developmental changes, protein carboxylmethylation role (rat brain), 116, 1056
N-α-Benzoyl-L-arginine amide
effect on urokinase specific SS bond reduction, 112, 754
Bethanecol
-stimulated pancreas, effect on phospholipid synthesis (human, rat), 115, 771
Bialaphos
biosynthesis, role of phosphinic acid derivatives MP-103, MP-104, and MP-105 (Streptomyces hygroscopicus SF-1293 mutant), 111, 1008
Bile acids
hydroxylation, regulation by microsomal and cytosolic protein fractions (rabbit liver), 113, 212
secretion patterns during isolated liver perfusion (rat), 115, 518
Bile pigments
insect, sarpedobilin biosynthesis from pterobilin (Papilio sarpedon), 110, 779
Bilirubin diglucuronide
formation by microsomes, intact tetrapyrrole affinity and thin layer chromatography (rat liver), 117, 406
Biocide
rapid loss and spontaneous loss of high-molecular-weight plasmid, acrystalliferous variant appearance (Bacillus thuringiensis var. israeliensis), 110, 477
Biogas
production from castor cake during anaerobic digestion by mixed culture (cow dung), 110, 32
Bioluminescence
production by luciferase and oxidoreductase isolated from Vibrio harveyi, enzyme concentration effect, 111, 266
Biotin
sulfur incorporation from cystine, methionine, and thiocystine (Escherichia coli), 110, 243
Biphenyl
oxidation, dependence on plasmid pKG2 (Beijerinckia sp.), 111, 939
1,3-Bis-(2-chloroethyl)-1-nitrosourea
DNA-chromosomal protein crosslinking (HeLa cells), 114, 767
Bis(5'-guanosyl) tetraphosphatase
inhibition by Zn^{2+}, reversal by EDTA, kinetics (rat liver), 113, 717
1,4-Bis[2-[(2-hydroxyethyl)amino]ethylamino]-9,10-anthracenedione
antitumor activity with low cardiotoxicity, effect on lipid peroxidation induction in heart and liver (mouse), 110, 399
Bisulfite
reduction by Desulfotomaculum nigrificans cell extracts, trithionate and thiosulfate intermediates, 117, 530
Bleomycin
complexes with
Co^{3+}, hydroperoxide bound to Co, fast atom bombardment spectra, 110, 959
Fe^{3+} and Fe^{2+}, Mossbauer spectra, 110, 827
DNA break induction, detection by nick translation (human fibroblasts), 111, 383
effect on V^{+} inhibition and activity of Na^{+}, K^{+}-ATPase and electrogenic (Na^{+}, K^{+}) pump (rat brain, skeletal muscle), 116, 783
-Fe^{2+} interaction resulting in chemiluminescence, prevention by DNA, 112, 378
-monoclonal antibody conjugate, production using dextran T-40, antigen-targeting cytotoxicity, 115, 1009
nucleotide sequence cleavage, guanine-modified DNA, 117, 916
photolabeling of dopamine-β-hydroxylase (bovine adrenals), 112, 273
Blood
radioreceptor assay, epidermal growth factor interference (human blood

serum), 114, 1036
substitution by human hemoglobin-inulin conjugate with high oxygen carrying capacity (rat), 113, 513
Blood-brain barrier
breakdown, mediation by microvascular polyamine synthesis (rat cerebral cortex), 116, 1039
Bombesin
absence in guinea pig and rat brain, 112, 528
Bone formation
endochondral, prostaglandin concentration changes (rat tissue), 117, 746
Bone marrow
transplantation in Niemann-Pick mice, decrease in sphingomyelin and cholesterol accumulation in spleen, 113, 605
Bongkrekate
potentiation of mitochondrial membrane potential restoration by ADP or ATP with Mg^{2+} (rat liver), 111, 792
Bordetella pertussis
islet-activating protein isolated from culture medium, action on neonatal rat pancreatic islets, 112, 684
Bradykinin
amino acid sequence in T-kinin (rat plasma), 112, 701
Brain cell surface protein (BSP-2)
structural similarity to neural cell adhesion molecule (N-CAM) (murine brain), 112, 482
Branched chain α-ketoacid dehydrogenase, see 2-Oxoisovalerate dehydrogenase (lipoamide)
Bromelain
active site substrate conformation, resonance Raman spectra comparison with chymopapain, ficin, and papain, 117, 725
Bromide
-stimulated chloroperoxidase activity, free hypohalous acid formation, 116, 873
Bromoacetyl-D-arginine
enkephalin convertase inhibition, kinetics, 111, 994
5-Bromodeoxyuridine
endogenous retrovirus induction without proviral DNA hypomethylation (rat embryonic fibroblasts), 112, 571
2-Bromoethylaminonaphthoquinone
conversion to aziridinylnaphthoquinone (rat hepatocytes), 112, 356
8-Bromoguanylic acids
binding to ribonuclease T_1, absorption and circular dichroism spectroscopy, 114, 88
3-Bromomethylmenadione
reduction by DT-diaphorase and mutagenicity to Salmonella typhimurium, inhibition by dicoumarol, 111, 346
4-Bromomethyl-7-methoxycoumarin
pseudouridine modification in 5-S RNA from yeast in melting study, 114, 81
Bromosulfophthalein
in glutathione transferase isozyme discrimination (rat liver), 114, 829
α-Bungarotoxin
binding to chicken brain membrane, inhibition by choline from calf brain extract, 111, 82
Buoyant density
Escherichia coli, increase in cells producing high level of β-galactosidase promoters, 111, 104
Buthiobate
inhibition of lanosterol 14α-demethylation by cytochrome P-450 (Saccharomyces cerevisiae), 115, 642
Butyrate
effect on glycosylation of glycoprotein hormone α-subunit secreted by glucose-starved Chang human hepatic cells, 112, 115

C

C kinase, see Protein kinase
Cadmium
environmental and hepatic non-metal lothionein proteins (rainbow trout), 110, 548
injected intraperitoneally, detoxication by hepatic metallothionein (rainbow trout), 110, 584
Calcineurin
activation by Ni^{2+} (bovine brain), 114, 955
Calcitonin
inhibition of human breast cancer cell growth in dose-related manner, 110, 235
Calcium
accumulation
ATP-stimulation (adrenal medulla chromaffin granules, mitochondria), 117, 245
norepinephrine-induced, leucine enkephalin antagonism (rat atria), 117, 536

-actin, polymerization characteristics, 116, 478
Calcium ion
action potential spike, tetanus toxin effect (neuroglastoma clone N1E-115), 115, 788
-activated proteases, effect on spectrin and band 3 protein (rat erythrocyte membrane), 117, 372
and antagonists, effect on felodipine binding to calmodulin, fluorescence study, 112, 787
-arsenazo III interactions, temperature-jump relaxation kinetics, 111, 1027
binding
activity in 100,000 x g supernatant (bovine brain, heart), 116, 435
to fibronectin, equilibrium dialysis (human), 111, 1045
to troponin C, effect on enthalpy, entropy, and heat capacity (bovine heart), 114, 162
-calmodulin, 3',5'-cyclic-nucleotide phosphodiesterase isozyme activation in larval brain (Drosophila melanogaster wild-type and dunce mutant), 111, 652
-concanavalin A solutions, ^{43}Ca NMR, 115, 22
cytoplasmic
conncentration in platelets, 9,11-epithio-11,12-methano-thromboxane A_2 effect (human), 117, 663
thrombin-induced increase, prevention by adenylate cyclase stimulators (human), 113, 598
-dependent
glutathione transferase-erythrocyte membrane association (human), 114, 488
protein kinase, inhibition by quercetin (murine brain cytosal), 117, 444
stimulation of hexose transport by ionophore A23187, 12-O-tetradecanoylphorbol-13-acetate, and epidermal growth factor (murine 3T3 fibroblasts), 117, 637
effect on
fatty acid oxidation and ketogenesis (rat liver mitochondria), 116, 173
insulin and insulin-like growth factor-1 receptor affinity (human placental microsomal membrane), 116, 63
photoactivation of water-oxidation system and photosystem II electron transport (dark-grown Picea abies chloroplasts), 116, 803
prothrombin molecular states and reaction with bifunctional alkylating reagents, 111, 213
free intracellular
concentration, carbachol and cholecystokinin effects (murine pancreatic acini), 117, 122
phorbol 12-myristate 13-acetate neutrophil activation effect (rabbit peritoneum), 114, 638
fructose-1,6-bisphosphatase activation inhibition by spermidine and spermine (spinach chloroplasts), 115, 707
fusion induction in small unilamellar phospholipid vesicles, freeze-fracture study, 110, 15
inhibition of
Na^+,K^+-ATPase in erythrocyte membranes, enhancement by hemolysate (human), 111, 970
Tb^{3+} binding to high-affinity, not to low-affinity terbium binding sites (GH3 pituitary tumor cells), 111, 135
-ionomycin complex, conformational change, mediation by lipid-water interface, 114, 632
and ionophore A23187, phospholipid hydrolysis and cell death stimulation, activation by mercuric chloride (murine fibroblasts), 110, 758
lipid-associated ionophoretic activity, stimulation by islet-activating protein from Bordetella pertussis (neonatal rat pancreatic islets), 112, 684
low concentration, stimulation of synexin binding to chromaffin granules, pH sensitivity (bovine liver), 114, 355
Na^+-induced release (Ehrlich ascites tumor mitochondria), 115, 430
in neutrophils, increase after stimulation with chemotactic factors (human, rabbit), 113, 44
permeabiltiy, S-adenosylmethionine effect in proteolipsomes (chicken erythroycyte membrane proteins), 113, 1126
and phosphate, induction of mitochondrial membrane potential collapse, prevention by ADP or ATP with Mg^{2+} (rat liver), 111, 792
and phospholipid-activated protein kinase, isolation and characteri-

zation (murine lymphosarcoma cells), 116, 675
regulation of somatostatin binding to pancreatic membranes (guinea pig), 115, 827
troponin-tropomyosin binding regulation (reconstituted thin filament), 114, 447
Calcium-binding proteins
identification in 100,000 x g supernatant (bovine brain, heart), 116, 435
Zn^{2+} binding (human brain), 114, 1138
Calcium carbonate
supersaturated solutions, precipitation inhibition by human pancreatic stone protein, 110, 69
Calcium channel
nitrendipine-sensitive, molecular size determination (rat brain synaptic membranes, rabbit skeletal muscle transferse tubule membranes), 111, 878
Calcium transport
across amnion and visceral yolk sac in maternal-to-fetal direction, in vitro study (guinea pig), 110 438
ATPase, phosphoprotein intermediate (rabbit sarcoplasmic, rat endoplasmic reticulum), 114, 584
efflux from quiescent fibroblast cell line, stimulation by fetal calf serum (rat), 114, 240
influx
antigen-stimulated, phosphatidylinositol turnover role (rat mast cells), 117, 710
in pancreatic islet B cells, induction by dibutyryl cAMP (mouse), 112, 614
across plasma membrane of wheat protoplasts, stimulation by ATPase inhibitors and ionophore A23187, unaffected by plant hormones and red-far red light, 113, 171
uptake by
mast cells, ionophore A23187-induced, role of phospholipid metabolism and histamine release (rat), 111, 581
mitochondria
chronic ethanol feeding and cetaldehyde metabolism effects liver), 117, 169
phosphate-dependent ruthenium red-insensitive (mung bean), 114, 1176
photosensitization effects on energy coupling (rat liver), 115, 76
platelets, thrombin-induced, inhibition by cAMP (human), 112, 693
sperm, stimulation by calmodulin antagonists (porcine), 114, 28
Calmidazolium
stimulation of Ca^{2+} uptake by sperm, calmodulin involvement (porcine), 114, 28
Calmodulin
aluminum binding-induced structural changes (bovine brain), 115, 512
binding activity in 100,000 x g supernatant (bovine brain, heart), 116, 435
-Ca^{2+}, activation of 3':5'-cyclic-nucleotide phosphodiesterase isozymes in larval brain (Drosophila melanogaster wild-type and dunce mutant), 111, 652
Ca^{2+}-dependent high affinity binding to mastoparans from wasp and hornet venoms, kinetics, 114, 50
in cell lines sensitive to interferon antiproliferative effect, interferon-induced decrease during cell cycle (canine, human), 111, 430
during cell transformation induced by Rous sarcoma virus temperature-sensitive mutant, 112, 647
-dependent protein kinase, glycogen synthase phosphorylation, substrate specificity (rabbit liver), 116, 412
effect on Ca^{2+}-dependent 3':5'-cyclic-nucleotide phosphodiesterase activation and inactivation (bovine retinal rod outer segment), 113, 317
felodipine binding, calmodulin and Ca antagonist effects, fluorescence study, 112, 787
hydrophobic site localization with tryptic fragments (bovine brain), 115, 87
inhibition, metal toxicity correlation (bovine brain), 115, 106
-NADH semidehydroascorbate reductase, interactions in clathrin coated vesicles (rat liver), 115, 952
phospholipase A_2 modulation (snake venom), 115, 94
regulation of Ca^{2+} uptake by sperm, mechanism (porcine), 114, 28

role in renal cell carcinoma (human), 114, 843
-stimulated 3',5'-cyclic-nucleotide phosphodiesterase
danylcadaverine effect (bovine heart), 117, 562
prevention by calmodulin-binding protein from bovine cardiac mitochondrial matrix, 113, 633
Zn^{2+} binding (human brain), 114, 1138
Calmodulin-binding proteins
heat-stable, isolation and characterization (bovine cardiac mitochondrial matrix), 113, 633
Calmodulin receptors
during cell tansformation induced by Rous sarcoma virus temperature-sensitive mutant, 112, 647
Cancer
breast, cell growth inhibition by calcitonin, dibutyryl cAMP, and 1,25-dihydroxyvitamin D_3 (human), 110, 235
cellular oncogenes c-Ha-ras and c-Ki-ras, hypomethylation in primary tumors (human), 111, 47
ganglioside, detection by monoclonal antibody to sialosylα2$\rightarrow$6-galactoysl residue, 113, 791
pancreatic, glycolipid antigen isolation by monoclonal antibody binding, characterization by mass spectrometry and NMR (human), 110, 383
Candicidin D
and lipid vesicle interactions, circular dichroism spectroscopy, 116, 520
Candida albicans
trimethionine uptake, irreversible inhibition by photoaffinity label upon uv irradiation, 110, 884
Candida boidinii
carbon monoxide-sensitive monooxygenase in cell-free extracts, di- and trimethylamine oxidation, 113, 900
Candida tropicalis
and Schizosaccharomyces pombe, plasma membrane ATPase, antigenic relationship, 115, 1114
Captopril
binding to membrane-associated angiotensin-binding enzyme (rat tissues), 112, 1027
Carbachol
effect on intracellular free Ca^{2+} concentration (murine pancreatic acini), 117, 122
inhibition of
forskolin-stimulated cAMP production, adrenocorticotropin secretion, and adenylate cyclase activity (murine pituitary tumor cells), 114, 289
(-)isoproterenol-stimulated cAMP synthesis and adrenocorticotropin secretion, reversal by atropine (murine pituitary tumor cells), 114, 289
Carbamoyl-phosphate synthetase (ammonia)
inactivation by elastase, effect on substrate binding (rat liver), 117, 238
Carbamoyl-phosphate synthetase (glutamine-hydrolyzing)
decrease in diabetic liver, insulin stimulatory effect, prevention by actinomycin (rat), 114, 255
Carbamylcholine
acetylcholine receptor photoaffinity labeling by azido-phencyclidine, species differences (Torpedo californica, T. marmorata, T. ocellata), 113, 723
inositol phosphate production stimulation (rat pancreatic islets), 116, 9
Carbohydrates
chain in vitamin D-binding proteins, isolation and characterization (human), 117, 324
dietary, high level, inhibition of hydroxymethylglutaryl-CoA reductase and cholesterol synthesis (rat liver), 113, 888
α-galactosyl residue, antigenic determinant (human ovarian germ cell tumor), 115, 268
Carbon
inorganic, accumulation during photosynthesis in protein carbamate form (Euglena gracilis), 111, 544
Carbon monoxide
binding to
hemocyanin, positive cooperativity (Scylla serrata), 116, 291
hemoglobin A subunits in solution and red cells, infrared spectroscopy (human), 116, 719
Carbon monoxide dehydrogenase
Ni(III) containing, Ni(III)-carbon species formation, EPR spectra (Acetobacterium woodii, Clostridium thermoaceticum), 115, 658
Carbon tetrachloride
-exposed hepatocytes, ultrastructural changes (rat), 114, 511

metabolism to dichloromethyl carbene (rat liver microsome), 117, 367
single intraperitoneal injection, choline kinase induction, inhibition by actinomycin D (rat hepatic cytosol), 111, 683
Carbonyl cyanide m-chlorophenylhydrazone
effect on oxygen and nitrite electron flow distribution (Paracoccus denitrificans), 117, 252
growth inhibition of mutants defective in respiration-coupled Na^+ pump (Vibrio alginolyticus), 114, 113
γ-Carboxyglutamic acid
-containing protein, purification from demineralized organic bone matrix (bovine), 117, 765
decreased content in femoral bone and renal cortex in vitamin D deficiency (rat), 113, 294
removal from bovine factor X, effect on activation by snake venom protein XCP, 111, 14
Carboxyl groups
localization in retinal chromophore vicinity (bacteriorhopsin), 114, 872; erratum, 115, 407
Carboxylmethylation
protein, developmental changes, role in benzodiazepine receptor protein maturation (rat brain), 116, 1056
Carcinoembryonic antigens, see Antigens, carcinoembryonic
Carcinogenesis
7,12-dimethylbenz[a]anthracene- or 12-O-tetradecanoylphorbol-13-acetate-dependent inhibition by 1α,25-dihydroxyvitamin D_3 (murine skin), 116, 605
hepatocyte nodule cytosolic polypeptides, electrophoretic pattern (rat liver), 117, 740
-linked aryl hydrocarbon hydroxylase and guanylate cyclase, stimulation by food coloring, amaranth, and carmine (rat liver), 111, 409
Carcinogens
aminoazo dyes, N-oxidation by mixed-function amine oxidase purified from rat hepatic microsomes, 110, 640
arylamines, prostaglandin H synthase-mediated reaction with tRNA and homopolyribonucleotides, 111, 96
dietary, free radical production decrease (Drosophila melanogaster), 112, 602
-DNA adduct, identification in rat liver as N^5-methyl-N^5-formyl-2,5,6-triamino-4-hydroxypyrimidine, 110, 625
preneoplastic hepatic lesion induction, properties of increased glutathione transferase A form (rat), 112, 20
Carcinoma
differentiation, induction by ornithine decarboxylase inhibition (murine embryo), 114, 410
renal cell, calmodulin role (human), 114, 843
Cardiocytes, see Myocytes, cardiac
Cardiolipin
strong activation of lysosomal cathepsin D (porcine adrenal cortex), 110, 934
Cardiotoxicity
adriamycin, detection by ^{31}P NMR (rat perfused heart), 110, 339
anthraquinone antitumor agent, role of lipid peroxidation induction in heart (mouse), 110, 399
daunorubicin-induced stimulation of DT-diaphorase and glutathione transferase in neonatal beating cells culture (rat), 110, 364
Carmine
stimulation of carcinogenesis-linked aryl hydrocarbon hydroxylase and guanylate cyclase (rat liver), 111, 409
β-Carotene
intrinsic fluorescence in solution and in lipid/water mixtures, 113, 102
Casein
mRNA accumulation, insulin and prolactin requirement (rat), 116, 994
synthesis in mammary explants
inhibition by 5-azacytidine (mouse), 111, 150
with insulin and prolactin, inhibition by cortisol, prostaglandin effects (mouse), 111, 1059
insulin-induced, simulation by anti-insulin receptor serum (pregnant mouse), 111, 988
Casein kinase 1
human fibrinogen phosphorylation (rat liver cytosol), 117, 631
Castor cake
anaerobic digestion by bovine dung mixed culture, biogas production, 110, 32
Castration
inhibitory effect on prostate-specific mRNA levels (rat), 111, 624

Catalase
and H_2O_2 production, riboflavin deficiency and repletion effects (mammalian), 117, 788
probe for OH· radicals, superoxide-dependent lipoperoxidation (bovine, human), 117, 901
Cataract
crystallin crosslinking, induction in vitro by heme-undecapeptide from cytochrome c with H_2O_2 (human lens), 113, 592
low-molecular-weight polypeptides in nuclei during development (human lens), 113, 65
Catecholamines
and aminochromes, effect on dihydropteridine reductase inhibition (human brain), 113, 895
oxidation products, see Aminochromes
storage complex, divalent cation-dependent (chromaffin granules), 116, 663
Cathepsin B
inhibition by low-molecular-weight inhibitor for lysosomal cysteine proteinases (human serum), 110, 449
myelin basic protein degradation, suppression by cerebrocystatin (rat brain), 112, 1000
pyruvate kinase limited proteolysis causing enhanced requirement for fructose 1,6-bisphosphate (rat liver), 110, 682
stimulation in vivo by leupeptin (murine heart, kidney, liver, striated muscle), 110, 332; erratum, 112, 347
Cathepsin D
lysosomal, activation by phospholipids extracted from mitochondrial-lysosomal fraction (porcine adrenal cortex), 110, 934
Cathepsin H
inhibition by low-molecular-weight inhibitor for lysosomal cysteine proteinase (human serum), 110, 449
Cations
divalent
-dependent catecholamine storage complex (chromaffin granules), 116, 663
effect on cyanobacterial glutamine synthetase (Anabaena cylindrica), 114, 206
effect on F_1-ATPase activity, mechanism (bovine heart), 113, 273
CDPdiacylglycerol-inositol 3-phosphatidyltransferase
Mn^{2+}-dependent activity in synaptosomes (rat brain), 112, 817
Cell culture
conditions, effect on glutathione content (human A549 cells), 114, 737
synchronized, of cell lines sensitive to interferon antiproliferative effect, calmodulin decrease by interferon in media (canine, human), 111, 430
Cell cycle
G_1 phase, histone mRNA increase induced by protein synthesis inhibition (HeLa cells), 114, 131
high-mobility-group protein 17 phosphorylation (HeLa cells), 111, 1001; erratum, 113, 730
initiation signals, and rRNA accumulation (Swiss 3T3 cells), 117, 223
nonhistone protein ADP-ribosylation (HeLa cells), 115, 938
nonpolysomal mRNAs (mouse sarcoma-180 ascites cells), 113, 923
Cell killing
Ca-dependent, induction by mercuric chloride (murine fibroblasts), 110, 758
Cell pressure
intra-, changes associated with action potential production (giant squid axon), 114, 1106
Cell proliferation
Ca^{2+}-deficient medium, correlation with Ca^{2+}/phospholipid-dependent protein kinase activity (rat liver), 115, 383
Cell wall
hydroxyprolin-rich glycoprotein insolubilization controlled by peroxidase/ascorbate oxidase system (carrot root slices), 112, 161
Cellulase
N-terminal sequence, homology with hen egg-white lysozyme active site (Schizophyllum commune), 116, 408
Cerebrocystatin
suppression of myelin basic protein degradation by cathepsin B (rat brain), 112, 1000
Ceruloplasmin, see Ferroxidase
CGS 13080, see Imidazo[1,5-a]pyridine-5-hexanoic acid
Chalcone
derivatives, reduction of benzo[a]pyrene mutagenic activity (Salmonella typhimurium), 112, 833; erratum, 115, 406
Charcoal
dextran-coated, uterine cytosolic factor elimination, effect on

estradiol receptor stabilization (rat), 110, 713
Chemiluminescence
bleomycin activated by Fe^{2+} interaction, prevention by DNA, 112, 378
Chemotactic activity
leukotrine B_4, increase after improved purification (human lymphocytes), 110, 842
Chemotactic factors
neutrophil stimulation, effect on intracellular free Ca^{2+} increase (human, rabbit), 113, 44
Chemotactic peptides
synthetic f-Met-Leu-Phe, induction of rapid decrease in phosphatidylinositol 4,5-bisphosphate and phosphatidylinositol 4-monophosphate (rabbit neutrophils), 112, 957
Chemotaxis
methyl-accepting proteins, serine and aspartate chemoreceptors, ion channel selection (Escherichia coli, Salmonella typhimurium), 115, 648
Chitosans
stimulation of
pisatin synthesis in pea pods, 110, 194
proteinase inhibitor synthesis in tomato leaves, 110, 194
Chloramphenicol
prevention of furazolidone-induced prophage and filament formation (Vibrio cholera), 112, 1106
Chloride ion
effect on phenylglyoxal-sensitive sites in erythrocyte membrane (human), 110, 616
-stimulated chloroperoxidase activity, free hypohalous acid formation, 116, 873
Chloride peroxidase
dimethyl sulfoxide substrate properties (Caldariomyces fumago), 116, 82
halide-stimulated activity, free hypohalous acid formation, 116, 873
halohydrin isomer formation from allyl bromide or chloride (Caldariomyces fumago), 110, 880
primary alcohol peroxide oxidation to aldehydes (Caldariomyces fumago), 114, 1104
3-Chloro-D-alanine chloride-lyase
synthesis of D-cysteine-related amino acids (Pseudomonas putida CR 1-1), 111, 809
4-Chlorobutylaminonaphthoquinone
conversion to pyrrolidinylnaphthoquinone (rat hepatocytes), 112, 356
2-Chloroethylaminobenzoquinone
derivatives, conversion to aziridine by microsomal enzymes (rat liver), 110, 220
p-Chloromercuribenzenesulfonate
inhibition of nitrobenzyl-thioinosine-insensitive uridine transport (human lymphoblastoid, murine leukemia cells), 110, 417
Chloromethyl ketones
inhibition of neutrophil sulfhydryl groups and superoxide radical production (human), 112, 671
4-Chloro-7-nitro-2,1,3-benzoxadiazole
-labeled tyrosine residue in MF_1-ATPase, identification (bovine heart), 116, 599
Chloroperoxidase, see Chloride peroxidase
2[5(4-Chlorophenyl)pentyl]oxirane-2-carboxylate
effect on fatty acid and glucose metabolism (perfused rat heart), 117, 653
Chlorophyll
synthesis in etioplasts after illumination in vitro and in vivo (cucumber cotyledon), 111, 740
Chloroplasts
antimycin A inhibitory effect on electrochromic absorbance and photosystem I (pea), 111, 619
C_3 and C_4, ATP-phospho-enol-pyruvate counter-transport system (maize, pea), 116, 945
3-[(3-Cholamidopropyl)-dimethylammonio]-1-propane sulfonate
-solubilized muscarinic acetylcholine receptors, glycoprotein nature (bovine cerebral cortex), 115, 814
Chloroquine
protection of cytosolic glucocorticoid receptors from thermal and salt-induced inactivation (rat liver), 112, 488
Cholecystokinin
in brain and gastrointestinal tract during postnatal development (rat), 112, 891
effect on intracellular free Ca^{2+} concentration (murine pancreatic acini), 117, 122
fragment CCK_{27-33}, ^1H NMR, 114, 705
Cholera toxin
subunit A_1, location and amino acid sequence around ADP-ribosylation site, 116, 341

Cholera toxin receptor
defective in 1-8 rat thyroid tumor line, function restoration by higher order gangliosides, 110, 772
5β-Cholestane-3α,7α-diol 12α-hydroxylase
activity of cytochrome P-450$_{LM_4}$, regulation by microsomal and cytosolic protein fractions from rabbit liver, 113, 212
Cholesterol
accumulation
in estradiol-deprived luteal cells, connection with progestin production decrease (pseudopregnant rabbit), 113, 1026
in spleen of Niemann-Pick mice, decrease after bone marrow transplantation, 113, 605
composition, ethanol effect (bovine HeLa cells), 114, 985
and derivatives, interactions with lipid bilayers, 113, 799
displacement of phenothiazines from phospholipid binding sites, 114, 1001
effect on mechanical properties of phospholipid unilamellar vesicles, 110, 320
ergosterol sparing in growth of oxygen-deprived Saccharomyces cerevisiae, 112, 47
20-hydroperoxy derivatives, transient species during cytochrome P-450$_{scc}$-mediated peroxidative hydroxylation, 112, 655
inhibition of sphingomyelin degradation by fibroblasts with slight decrease in sphingomyelinase activity (human), 112, 860
synthesis
from acetate, decrease by cAMP, theophylline, and isoproterenol, increase by propranolol (human fibroblasts), 112, 795
in inherited diabetes (murine intestine and liver), 113, 638
inhibition by
AY9944, DNA synthesis reduction in lymphocytes(human peripheral blood), 110, 82
high carbohydrate low fat diet (rat liver), 113, 888
Cholesterol esters
accumulation in estradiol-deprived luteal cells, effect on progestin production (pseudopregnant rabbit), 113, 1026
synthesis from oleate, inhibition by cAMP, theophylline, isoproterenol, and propranolol (human fibroblasts), 112, 795
Cholesterol 7 α-hydroxylase, see Phenol 2 monooxygenase
Choline
from calf brain extract, inhibition of α-bungarotoxin binding to brain membrane (chicken), 111, 82
dietary deficiency, effect on UDPglucuronosyltransferase stimulation (rat hepatic microsomes), 114, 418
effect on guanine nucleotide regulation of quinuclidinyl benzilate binding to muscarinic acetylcholine receptors (canine, frog, murine, rat heart), 113, 280
Choline kinase
induction by carbon tetrachloride intoxication, inhibition by actinomycin D (rat hepatic cytosol), 111, 683
Cholinergic receptors, see Acetylcholine receptors
Chondrocytes
differentiation in limb bud cell culture, enhancement by poly(ADP-ribose) synthesis inhibitors (chicken), 111, 750
Chondroitin sulfates
synthesis in ovarian follicular and luteal tissues during estrous cycle (guinea pig), 111, 574
Choriocarcinoma cells
placental akaline phosphatase biosynthesis and processing (human), 111, 611
Chromaffin granules
Ca^{2+} accumulation
ATP-stimulated (adrenal medulla), 117, 245
enhancement by synexin-like protein from adrenal medullary or liver (bovine), 112, 147
catecholamine storage complex, divalent cation-dependence, 116, 663
exocytosis-like interaction with adrenal medullary plasma membranes, role of protein phosphorylation (bovine), 110, 55
synexin binding, Ca^{2+} concentration dependence, pH sensitivity (bovine liver), 114, 355
synexin-induced aggregation and synexin secretion, inhibition by phenothiazine drugs (bovine adrenal medulla), 113, 908
Chromatin
HMG14 and HMB17 proteins, interaction with histone H1, crosslinking

kinetics, 117, 817
organization with trypsin immobilized on collagen membrane, 114, 1169
promegestone localization in cultured hepatoma cells, 110, 719
replicating, assembly kinetics, prenucleosomal and nucleosomal DNA characterization (CHO cells), 110, 811
solubility increase by in vitro or in vivo treatment with triiodothyronine and angiotensin (rat hepatic nuclei), 110, 61
solubilization, inhibition by tosyl-lysine chloromethyl ketone and tosylamino-phenylethyl sulfonyl fluoride (rabbit thymus nuclei), 110, 216

Chromatography
affinity, see Affinity chromatography
hyaluronic acid fractionation on DEAE-Sephacel, 112, 168

Chromatophores
antimycin A-insensitive ubiquinol-cytochrome c reductase, purification and properties (Rhodopseudomonas sphaeroides), 112, 450

Chromophore 450-455 reductase
catalytic component of NADPH dependent oxidoreductase in phorbol myristic acetate-stimulated neutrophils (human), 110, 873
endoreduplication, induction by cytosine (Chinese hamster V79 cells), 113, 142

Chronic granulomatous disease
chromophore 450-455 reductase, absence in NADPH-dependent O_2^- generating oxidoreductase in stimulated neutrophils (human), 110, 873

Chymopapain
active-site substrate conformation, resonance Raman spectra comparison with papain, ficin, and bromelain, 117, 725

Chymotrypsin
bovine, amino acid sequence, comparison with insect endopeptidase II, 110, 1
complex with α_2-macroglobulin, free thiol group release and localization, 111, 964
limited proteolysis of phenylalanine hydroxylase, effects of phenylalanine and tetrahydrobiopterin, 110, 919

α-Chymotrypsin
limited proteolysis of Ca^{2+}-dependent myosin light chain kinase, Ca^{2+}-independent form conversion, 110, 701
strong inhibition by phosphonofluoridates (bovine), 1085

Cibacron Blue P3GA
alkaline phosphatase binding (human intestine, liver), 111, 36

Cigarette smoke
effect on lipoxygenase and cyclooxygenase pathways (rat platelets), 115, 499
impairment of high-density lipoprotein uptake (pigeon), 112, 843

Cilostamide
and AAL 05 analog, inhibition of 3':5'-cyclic-nucleotide phosphodiesterase, tissue and substrate specificity (bovine aorta, human platelets), 113, 954

Circular dichroism
magnetic spectra in Soret region of methemoglobin complexes and subunits, correlation with spin state of ferric heme (human), 114, 318

Cisplatin, see Diamminedichloroplatinum

Citrate
protective mechanism against Ca^{2+} and phosphate flux damage in liver mitochondria (rat), 115, 749

Citrate lyase
acyl-carrier protein subunit, properties of S-acylated residues (Klebsiella aerogenes), 114, 310
essential arginine residues in transferase and lyase subunits (Klebsiella aerogenes), 111, 490

Citrate (si)-synthase
affinity chromatography on Procion Red-agarose (cell-free extracts from bacteria, yeast, and porcine liver), 112, 1021

Clathrin
-coated vesicles, calmodulin-NADH semihydroascorbate reductase interactions (rat liver), 115, 952

Clostridium perfringens
enterotoxin, binding to 50,000 M_r protein from brush-border membranes (rabbit), 112, 1099

Cluster analysis
enzyme-substrate interactions in nucleosidediphosphatase of Golgi membranes (rat hepatocytes), 113, 178; erratum, 114, 1200

Coagulation factors
IX, IX_a, and X, binding to aortic endothelial cells in culture (bovine), 111, 723
X, activation by snake venom protein XPC, role of γ-carboxyglutamic

acid domain (bovine), 111, 14
Cobalt(III)
complexes with bleomycin, hydroperoxide bound to cobalt, fast atom bombardment spectra, 110, 959
Cobalt(III) hexaamine
polyamine-like effect on cAMP-independent protein kinases (rat liver, prostate), 112, 139
Cobalt ion
uptake by crustacean nerve fiber in resting state and during potassium depolarization, radioisotope and NMR, (Collinectes sapidus), 111, 560
Colcemid
inhibition of brain-specific S100 protein synthesis in colcemid-resistant mutant sublines of glial cells (rat), 112, 73
Colchicine
-tubulin binding
dapsone effect (bovine brain), 116, 128
enhancement by poly(L-lysine), 113, 384
at 5°C (bovine renal medulla), 116, 866
derivatives coupled to CNBr-Sepharose 4B, use for tubulin purification by affinity chromatography (rat pancreas), 111, 253
inhibition of glucose-stimulated phosphatidylinositol turnover and insulin secretion (rat pancreatic islets), 112, 419
uptake by glial cells, decrease in colcemid-resistant mutant sublines (rat), 112, 73
Colicin A
-doped planar lipid bilayers, time- and voltage-dependent conductance classes, 113, 765
Collagen
endothelial cell, identification in Descemet's membranes (bovine), 116, 619
membranes, chromatin organization with immobilized trypsin, 114, 1169
from placenta of diabetic vs normal subjects, nonenzymatic glycosylation and platelet-aggregating activity, 111, 602
production, modulation by Na^+ (human fibroblast cell culture), 117, 313
synthesis in corneal endothelial cell culture, stimulation by vitamin A (rabbit), 114, 395
tryptic peptides from nonmineralized and mineralized compartments of bone, pyridinoline in crosslinks (chicken), 113, 975
type I
c-terminal crosslinking region, neutral proteinase effect (human gingival fibroblasts), 114, 1064
target for drug delivery in injured blood vessel wall (human aortal denuded intima), 116, 99
type III, increased proportion in dystrophic skeletal muscle (chicken), 111, 933
target for drug delivery in injured blood vessel wall (human aortal denuded intima), 116, 99
type IV, identification in Descemet's membranes (bovine), 116, 619
Collagenase
tryptic peptide with active site serine residue, isolation and amino acid sequence (Hypoderma lineatum), 112, 907
Colony stimulating factor
isolation in milk (human), 114, 797
Compactin
-resistant mutants, insulin receptor level alteration and endocytosis activity (Chinese hamster), 117, 13
Complementation tests
between fibroblast strains with known defects in branched-chain amino acid catabolism and cell lines with studied defects (human), 114, 175
Complements
iC3b-forming thiol protease, isolation (guinea pig peritoneal polymorphonuclear leukocytes), 117, 413
SC5-9 complex, specific β-endorphin binding sites in endotoxin-treated human serum, 113, 839
Concanavalin A
binding by synaptosomes, increase after Triton X-100 treatment (calf brain intact vesicles), 110, 804
Ca^{2+}, Zn^{2+} solutions, ^{43}Ca and ^{67}Zn NMR, 115, 22
demetalized, conformational transition kinetics, 112, 595
inhibition of Friend erythroleukemia cell differentiation induced by dimethyl sulfoxide, 110, 228
T-cell proliferation induction, inhibition by 5'-deoxy-5'-methylthioadenosine, mechanism (rat), 113, 425
Conformation
angiotensin II in acidic aqueous

solutions, clustering analysis, 112, 339
bacteriophage M13 protein B, in filaments, I-forms, and spheroids, circular dichroism, 112, 349
β-turn fused with oxy-analog of α-turn, detection in protected analog of gramicidin A C-terminal dipeptide, X-ray diffraction, 112, 1056
Ca^{2+}-calmodulin temperature-dependence, intrinsic fluorescence, 111, 301
demetalized concanavalin A transitions, kinetics, 112, 595
enkephalin cyclic analogs in aqueous solution, fluorescence study, 114, 268
HC-toxin, NMR (Helminthosporium carbonum), 111, 398; 113, 10
narasin acid, solvent polarity-dependent equilibrium, NMR, 113, 832
Conjugated dienes
production by 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced lipoperoxidation, spectrophotometry (rat liver), 111, 854
Copper ion
apotyrosinase reconstitution after isolation from Neurospora crassa, reactions with Cu^{+} and Ca^{2+}, 110, 313
binuclear site in T2D laccase
Cu(I) determination by X-ray absorption edge spectroscopy (Rhus vernicifera), 112, 737
EXAFS analysis in met laccase and azide-bound derivatives (Rhus vernicifera), 112, 746
nitrite reactivity, EPR (Rhus vernicifera), 112, 729
-induced hemolysis, O_2 requirement (rabbit erythrocytes), 115, 680
inhibition of gonadotropin-releasing hormone binding to pituitary membrane preparations (rat), 112, 306
plasma, decrease by copper-chelating drugs, effect on ferroxidase activity, anemia induction (rat), 113, 127
stimulation of luteinizing hormone release from immature female pituitaries (rat), 112, 306
substitution after Zn, effect on aminopeptidase activity (Aeromonas), 114, 646
surrounding in plantacyanin, NMR spectra (cucumber), 117, 385
in T2D laccase, function of different types, ^{1}H NMR (Rhus vernicifera), 111, 824
Coprinus cinereus
5-S ribosomal RNA nucleotide sequence, 116, 148
Cordycepin
$(A2'p)_2A$ analog as prodrug (human colon), 115, 137
Cordycepin 5'-triphosphate
conversion to 2',5'-A_4 tetramer analog in rabbit reticulocyte lysate, protein synthesis inhibition, 111, 205; erratum, 114, 1200
Corticosteroids
-binding protein, intracellular, ketoconazole binding (Candida albicans), 117, 43
Corticosterone
plasma, corticotropin-induced increase, elimination by antisera to γ_3-melanotropin (normotensive, spontaneously hypertensive rats), 110, 357
Corticotropin, see Adrenocorticotropin
Corticotropin-releasing factor
adrenocorticotropin release induction in pituitary cells in vitro, epinephrine effect (rat), 110, 456
pituitary cell pretreatment, effect on reduction of factor ability to restimulate cAMP formation and adrenocorticotropin release (rat), 111, 919
radioiodinated analog, high-affinity binding to receptors (rat anterior pituitary gland), 110, 602
Corticotropin-releasing factor receptors
desensitization in anterior pituitary cells by pretreatment with corticotropin-releasing factor (rat), 111, 919
properties, hormonal regulation, role in adrenocorticotropin release (rat anterior pituitary gland), 110, 602
Cortisol
inhibition of α-lactalbumin synthesis and mRNA accumulation, reversal by prostaglandins E_2 or F_2 (murine mammary explants), 111, 1059
serum, increase by cytokine preparation injection (rat), 112, 14
Cow dung
mixed bacterial culture isolation for anaerobic digestion of castor cake to produce biogas, 110, 32
C-peptidase
immunoreactivity in plasma, in vitro increase by trypsin (human), 111, 785

Creatine kinase
and ATP: kinetic properties, functional roles, and compartmentation (rabbit glycerinated muscle fiber), 114, 785
Creatine kinase
estrogen-induced in uterine cytosol, purification and properties (immature rat), 111, 156; erratum, 112, 1112
inhibition by 2,4-dinitrofluorobenzene, correlation with muscle protein and lipid synthesis inhibition (rat quarter diaphragm), 111, 884
mitochondrial and M-subunit, translation in vitro from myocardial mRNA (canine), 110, 967
Creatine phosphokinase, see Creatine kinase
Crosslinking
Ca-binding phosphoproteins by naturally occurring N - and N^{7} -histidinoalanine (Rangia cuneata extrapallial fluid), 114, 304
hydroxyprolin-rich glycoprotein during insolubilization in cell wall (carrot root slices), 112, 161
nonmineralized collagen by pyridinoline (chicken), 113, 975
oligomycin-sensitive ATPase by 3'-arylazido-8-azido ATP (bovine cardiac mitochondria), 111, 732
prothrombin by bifunctional alkaline reagents, Ca effect, 111, 213
Crysrallins
H_2O_2-mediated crosslinking by heme-undecapeptide from cytochrome c, cataractogenesis implications (human lens), 113, 592
Cu-amine oxidases, see Amine oxidases (copper-containing)
Cumene hydroperoxide
stimulation of microsomal oxygen consumption, role of cytochrome P-450 (rat liver), 110, 646
Cutinase
active site region primary structure (fungal), 114, 1017
Cyanide
effect on glycogenolysis and phosphorylase activity (rat hepatocytes), 115, 1033
Cyanobacteria
sym-homospermidine accumulation in nitrogen-fixing species, 112, 606
Cyanogen sulfide
effect on lactoperoxidase activity, 116, 568
S-Cyanylation
proteolysis and domain-specific antibodies, fibronectin domain structure identification (human pericellular matrix, plasma), 116, 534
Cyclic AMP
accumulation in
anterior pituitary cells, corticotropin-releasing factor-induced reduction (rat), 111, 919
anterior pituitary tumor cells, forskolin- and isoproterenol-stimulated, inhibition by somatostatin, pertussis toxin effect (murine), 115, 794
pancreatic adenocarcinoma cells, response to secretin and vasoactive intestinal peptide, increase during differentiation in culture (human), 111, 958
parotid cells in vitro
stimulation by forskolin (mouse), 111, 21
stimulation by isoproterenol, augmentation by forskolin (mouse), 111, 21
pituitary cells, corticotropin-releasing factor-induced, epinephrine effect (rat), 110, 456
analogs, inhibition of tumor promoter-induced interleukin 2 production by thymocytes (mouse), 114, 93
binding activity of type 1 cAMP-dependent protein kinase regulatory subunit, streptozotocin-induced diabetes effect (rat liver), 117, 794
during cardiac cycle, oscillation with highest level at systole (isolated rat heart model), 111, 450
-dependent protein kinase, acetyl CoA carboxylase phosphorylation (rat liver), 117, 435
effect on
insulin binding, post-receptor insulin resistance of glucose transport (rat adipocytes), 115, 398
intestinal folate transport (rat jejunum), 115, 756
-independent protein kinase, tightly bound to DNA, characterization (rat liver nuclei), 117, 610
inhibition of
insulin binding to adipocytes due to β-adrenergic receptor stimulation (rat), 112, 972
low-density lipoprotein binding and internalization, synthesis of cholesterol and cholesteryl es-

ters (human fibroblasts), 112, 795
serotonin release, Ca^{2+} uptake, and phospholipase activity in thrombin-stimulated platelets (human), 112, 693
-mediated cGMP response and folic acid adaptation (Dictyostelium), 115, 130
secretin and epinephrine effects (isolated perfused rat liver), 115, 743
production
by A23187-stimulated macrophages, inhibition by trifluoperazine and verapamil, role in prostaglandin formation (rat), 114, 248
arachidonic acid metabolism (rat peritoneal macrophage), 114, 549
in pituitary tumor cells, stimulation by forskolin, reversal by carbachol, role of cholinergic muscarinic receptors (mouse), 114, 289
stimulation in platelets, effect on thrombin-induced increase in cytoplasmic Ca^{2+} (human), 113, 598
in T cells, 5'-deoxy-5'-methylthioadenosine effect (rat), 113, 425

Cyclic AMP phosphodiesterase, see 3',5'-Cyclic-nucleotide phosphodiesterase

Cyclic-2,3,-diphospho-D-glycerate
levels in Methanobacterium thermoautotrophicum, inorganic phosphate role, 116, 1125

Cyclic GMP (cGMP)
cAMP-mediated response and folic acid adaptation (Dictyostelium), 115, 130
light-induced hydrolysis by 3':5'-cyclic-nucleotide phosphodiesterase, Ca^{2+} dependence (bovine retinal rod outer segment), 113, 317
stimulation of Na^+,K^+-ATPase (hamster sperm homogenate), 112, 132; erratum, 114, 431

3':5'-Cyclic-nucleotide phosphodiesterase
Ca^{2+}-dependent activation and dectivation (bovine retinal rod outer segment), 113, 317
calmodulin-stimulation, dancylcadaverine effect (bovine heart), 117, 562
inhibition by
alkoxy-aryl-lactams, tissue and substrate specificity (bovine aorta, human platelets), 113, 954
5'-deoxy-5'-methylthioadenosine in T cells, correlation with concanavalin A-induced proliferation inhibition (rat), 113, 425
insulin-activated, regulation by pertussis toxin (3T32-L1 adipocytes), 116, 593
isozymes, activation by Ca^{2+}-calmodulin in larval brain (Drosophila melanogaster wild-type and dunce mutant), 111, 652
stimulation by calmodulin, prevention by calmodulin-binding protein from bovine cardiac mitochondrial matrix, 113, 633

Cyclic nucleotides
phospholipase A_2 modulation (snake venom), 115, 94

Cyclohexenone
double bond reduction by microorganisms (Clostridium sp., Streptomyces strains), 110, 908

Cycloheximide
protein synthesis inhibition, effect on histone mRNA in exponentially growing and synchronous G_1 HeLa cells, 114, 131

Cyclo(histidyl-proline)
identification and characterization (rat pancreatic islet), 115, 281

Cyclooxygenase
and arachidonic acid metabolism, inhibition by anti-inflammatory drugs (rat neutrophils from reverse passive Arthus reaction plural exudates), 112, 586
pathway, cigarette smoke effect (rat platelets), 115, 499

Cysteamine
effect on intralysosomal pH (normal, cystinotic human fibroblasts), 116, 154

Cysteine
as origin of sulfide sulfure for iron-sulfur proteins (Escherichia coli), 112, 66
substrate-protected residues and heme binding in cytochrome $P\text{-}450_{cam}$ (Pseudomonas putida), 116, 30

Cysteine proteinase
Ca^{2+}-dependent, 34,000-dalton inhibitor, phenylhydrazine hydrochloride effect (rat liver cytosol), 115, 715

L-Cysteinylglycine
hydrolysis by erythrocytes, proton NMR study (human), 110, 305

Cystic fibrosis
gastric mucus glycoprotein acetylation increase (human), 113, 286

Cystine
accumulation, and intralysosomal pH (normal, cystinotic human fibroblasts), 116, 154
^{35}S-labeled, sulfur incorporation into biotin (Escherichia coli), 110, 243
Cystinosis
intralysosomal pH, relation to cystine accumulation (human skin fibroblasts), 116, 154
Cytochrome b_5
effect on cytochrome P-450 activity in arylhydrocarbon hydroxylase system of fetal hepatic microsomes (rat), 113, 59
purification and amino acid sequence (rabbit erythrocytes, liver microsomes), 115, 807
Cytochrome b-c_1 complex
comparison with mitochondrial inner membrane 30K hydrophobic protein (yeast), 110, 945
Cytochrome c
heme-undecapeptide from
H_2O_2-mediated crosslinking of crystallins (human lens), 113, 592
H_2O_2-mediated NADPH oxidation to $NADP^+$, 113, 710
reduction by hydrogen peroxide, inhibition by superoxide dismutase, 111, 231
-ubiquinol-cytochrome c reductase interaction, role of carboxyl groups (bovine heart), 116, 272
Cytochrome c_{551}
redox and optical properties (Pseudomonas aeruginosa), 113, 519
Cytochrome $c_{553(550)}$
redox and optical properties (Desulfovibrio desulfuricans), 113, 519
Cytochrome c oxidase
monomeric, preparation and kinetics (bovine heart), 114, 822
proteolysis by various proteases, effects on proton-pumping and oxidase activity (thermophilic bacterium PS3), 113, 575
sequence homology of bacterial and mitochondrial forms, 116, 335
subunit IV
amino acid sequence (bovine heart), 110, 8
synthesis and intracellular transport in intact hepatoma cells (rat), 110, 132
Cytochrome c reductase
catalytic component of NADPH-dependent oxidoreductase in phorbol myristic acetate-stimulated neutrophils (human), 110, 873
Cytochrome f
-plastocyanin covalently linked adduct, preparation with water-soluble carbodiimide (spinach, turnip), 116, 1000
Cytochrome o
membrane-bound, in 2-octaprenylphenol hydroxylation to ubiquinone 8 (Escherichia coli), 111, 830
Cytochrome oxidase, see Cytochrome c oxidase
Cytochrome P-450
in arylhydrocarbon hydroxylase system, dependence on cytochrome b_5 system (rat fetal hepatic microsomes), 113, 59
benzo[a]pyrene hydroxylation, effect of different inducer forms (Aspergillus ochraceus TS), 115, 692
C_{21} side-chain cleavage system, comparison in adrenal and testicular microsomes (porcine), 111, 512
catalysis of organic hydroperoxides and molecular oxygen (rat liver), 110, 646
-catalyzed conversion, 5-hydroperoxyeicosatetraenoic acid to leukotriene B_4, leukotriene A_4 intermediate (rabbit liver), 115, 995
Co and Fe tetraphenylporphyrin-thiolate complex model system, superoxide generation, α-tocopherol and γ-oryzanol reaction kinetics, 115, 1002
degradation correlated with NADPH-dependent lipid peroxidation (bovine adrenal cortex mitochondria), 110, 559
-dependent monooxygenase, neonatal phenobarbital administration effect (adult rat liver), 114, 1132
1,1-dichloroethylene-induced decrease in content and in monooxygenase activities (murine lung microsomes), 110, 675
immunochemical specificity (tulip bulb microsomes), 115, 46
isozymes
detection and purification, monoclonal antibody-based immunoadsorption (rat liver microsomes), 116, 859
ethanol-induced, role in acetaminophen activation (rabbit hepatic microsomes), 112, 8
lanosterol 14α-demethylation, inhibition by buthiobate (Saccharo-

myces cerevisiae), 115, 642
leukotriene B_4 metabolism (rat liver), 114, 850
3-methylcholanthrene-induced, high spin form, isolation and characterization (rat liver), 111, 504
microsome-bound, heme reversible transfer between different molecular species (rat liver), 116, 1013
molecular species, two forms in ergosterol biosynthesis (Saccharomyces cerevisiae), 116, 162
multiple forms, separation by HPLC (phenobarbital-pretreated rat), 117, 268
phenobarbital-inducible
allylisopropylacetamide effects on total chromophore and P-450 2 form (rat hepatic microsomes), 111, 926
in soluble extract, spectral changes by membrane-bound respiratory cytochromes (Bacillus megaterium), 112, 927
testicular, human choriogonadotropin-induced decrease in microsomes and mitochondria (mouse), 111, 424
thiol-containing peptide-hemin complex model (bovine), 115, 590
Cytochrome $P\text{-}450_{cam}$
heme binding and substrate-protected cysteine residues (Pseudomonas putida), 116, 30
Cytochrome $P\text{-}450_{14\text{-}DM}$
in ergosterol biosynthesis (Saccharomyces cerevisiae), 116, 162
Cytochrome $P\text{-}450_{22\text{-}DS}$
in ergosterol biosynthesis (Saccharomyces cerevisiae), 116, 162
Cytochrome $P\text{-}450_{LM_2}$
fluorescein isothiocyanate-modified, heme iron-N-terminus distance estimate (rabbit), 113, 353
H_2O_2-supported N-demethylation of aminopyrine, comparison with horseradish peroxidase action, 113, 332
Cytochrome $P\text{-}450_{LM_4}$
5β-cholestane-3α,7α-diol 12α-hydroxylase activity, regulation by microsomal and cytosolic protein fractions (rabbit liver), 113, 212
Cytochrome $P\text{-}450_{scc}$
peroxidative hydroxylation of 20-hydroperoxy derivatives of cholesterol, transient species formation (bovine adrenocortical), 112, 655
Cytochromes
membrane-bound respiratory, effects on soluble phenobarbital-inducible cytochrome P-450 spectrum (Bacillus megaterium), 112, 927
Cytokeratin
synthesis, hormonal stimulation effect (rat cultured hepatocytes), 114, 556
Cytokines
from peritoneal exudate cells, acute phase response induction (rat), 112, 14
Cytosine
endoreduplication induction in cell culture (Chinese hamster V79 cells), 113, 142
Cytosine arabinoside
effect on deoxynucleoside triphosphate pools (Chinese hamster V79 cells), 114, 458
Cytotoxicity
adrenocorticotropin-related peptide, 115, 339
aflatoxin B_1-induced, metabolic basis (guinea pig, mouse, quail, rat), 114, 813
antigen-targeting, bleomycin-monoclonal antibody conjugate, 115, 1009
7β-hydroxycholesterol, serum lipoprotein role (rat cultured hepatoma cells), 117, 851
2-β-D-ribofuranosylthiazole-4-carboxamide and 2-β-D-ribofuranosylselenazole-4-carboxamide (murine tumor cell culture), 115, 544
sensitivity to glucocorticoids and oxidized polyamines (human lymphoid cells), 115, 737
tumor cells, induction by liposomes containing plant phosphatidylinositol (human, mouse), 114, 863

D

Dancylcadaverine
effect on calmodulin-stimulated 3',5'-cyclic-nucleotide phosphodiesterase (bovine heart), 117, 562
Nε-Dansyl-L-lysine
fluorescent staining of leukemic lymphocytes, role of cholesterol-free phospholipid domains in membranes (human, mouse), 111, 768
Dapsone
effect on tubuline assembly (bovine brain), 116, 128
Daunomycin
interstrand DNA crosslink formation, mechanism (HeLa cells), 110, 819

Daunorubicin
cardiotoxicity, connection with lipid peroxidation induction in heart and liver (mouse), 110, 399
stimulation of DT-diaphorase and glutathione transferase in neonatal beating heart cells in culture (rat), 110, 364
dCTP, see Deoxycytidine triphosphate
Decaprenyl pyrophosphate synthetase
purification and characterization (porcine liver mitochondria), 116, 500
Decarboxylation
pyruvate (rat perfused skeletal muscle), 116, 456
Delayed hypersensitivity
to sheep erythrocytes, inhibition by lecanoric acid analogs (mouse), 110, 733
DDP, see Diamminedichloroplatinum
3-Deaza-(±)aristeromycin
adenosylmethionine decarboxylase inhibition, putrescine accumulation (HeLa cells), 114, 505
7-Dehydrocholesterol
strong inhibition of sphingomyelin degradation by fibroblasts, effect on sphingomyelinase activity (human), 112, 860
Dehydrogenases
with NADPH-binding region, similar antigenic determinant detection by malic enzyme antibodies, 112, 1007
Deinococcus radiodurans
uv-induced mutation, DNA crosslink increase, 112, 458
Deltakephalin
synthetic peptide with high affinity to opiate δ-receptors (rat brain membranes), 111, 390
N-Demethylation
aminopyrine, H_2O_2-supported, catalysis by cytochrome P-450 and horseradish peroxidase, detection by EPR, 113, 332
Deoxycytidine
requirement for drug-resistant mutation induction by 5-fluorodeoxyuridine (Chinese hamster cells), 110, 573
Deoxycytidine triphosphate (dCTP)
uv- and dimethyl sulfate-induced decrease, replication inhibition role (Chinese hamster ovary cells), 114, 34
5'-Deoxy-5'-methylthioadenosine
inhibition of
S-adenosylmethionine consumption, S-adenosylhomocysteine decrease (avian sarcoma virus-transformed rat cells), 114, 214
3':5'-cyclic-nucleotide phosphodiesterase in T cells, correlation with concanavalin A-induced proliferation inhibition (rat), 113, 425
DNA methylation (avian sarcoma virus-transformed rat cells), 114, 214
Deoxynucleoside triphosphate (dNTP)
pools
mutagen effects (Chinese hamster V79 cells), 114, 458
uv-induced change kinetics, effect on DNA synthesis measurements (Chinese hamster ovary), 116, 1064
Deoxyribonuclease I
hydrolysis of dsDNA and ssDNA, effect on inhibition by adenovirus-specific DNA-binding protein, 110, 443
inhibition by adenovirus-specific DNA-binding protein (KB cells), 110, 443
nucleotide sequence cleavage, guanine-modified DNA, 117, 916
solubilization of Triton X-100-resistant nuclear glucocorticoid receptors, comparison with deoxyribonuclease II (rat thymocytes), 111, 760
Deoxyribonuclease II
inhibition by adenovirus-specific DNA-binding protein, 110, 443
Deoxyribonucleoside diphosphates
substrate for nucleosidediphosphatase, cluster analysis (rat hepatocyte Golgi fraction), 113, 178; erratum, 114, 1200
Deoxythymidine triphosphate (dTTP)
uv irradiation-induced increase, role in replication inhibition (Chinese hamster ovary cells), 114, 34
Depsipeptides
formation catalyzed by enniatin synthetase (Fusarium oxysporum), 110, 292
Dermatan sulfate
fractionation by affinity for heparin cofactor II, 112, 663
Desulfotomaculum nigrificans
cell extracts, bisulfate reduction, trithionate and thiosulfate intermediates, 117, 530
Desulfovibrio desulfuricans
cytochrome c comparison with Pseudomonas aeruginosa, 113, 519
Detergents
electrophoresis assay in agarose gels with red blood cells, 114, 699
Deuterium
-H exchange reaction of thiamin,

indole ring and thiazolium ring stacking-interaction effect, 116, 486
-induced phosphocreatine signal splitting, ^{31}P NMR, 114, 1117
Deuteroporphyrin 6(7)methylester,7(6)-(histidine methylester)
fast atom bombardment mass spectrometry, disproportionation and recombination in thioglycerol matrix, 111, 478
Dexamethasone
differentiation induction in histiocytic lymphoma cell line U937, lipomodulin synthesis induction role (human), 111, 551
effect on
cytokeratin synthesis (rat cultured hepatocytes), 114, 556
insulin generation of pyruvate dehydrogenase inhibitor (rat liver), 117, 456
lipogenic testicular enzymes (rat), 115, 606
inhibition of phosphatidylinositol synthesis and degradation in embryonic cell line, role in cell proliferation inhibition (human fibroblasts), 110, 200
Dexamethasone-receptor complex
extracted from HeLa cell nuclei, association with RNA, 113, 876
Dextrans
branch formation in sucrose absence (Streptococcus mutans), 115, 287
T-40, bleomycin-monoclonal antibody conjugate production, 115, 1009
Diabetes
alloxan-induced, carbamoyl-phosphate synthetase decrease restoration by insulin injections (rat liver), 114, 255
collagen from placenta, higher platelet aggregating potency, role in nonenzymatic glycosylation increase (human), 111, 602
inherited, hydroxymethylglutaryl-CoA reductase activity changes (murine intestine, liver), 113, 638
lens epithelium basement membrane in vivo glycosylation (human), 117, 51
streptozotocin-induced
effect on
active unphosphorylated form of branched chain α-ketoacid dehydrogenase (rat heart, kidney, liver), 111, 74
hepatic binding (rat), 115, 82
regulatory subunit type 1 cAMP-dependent protein kinase cAMP binding activity (rat liver), 117, 794
failure of insulin to stimulate pyruvate dehydrogenase activator release (rat liver), 112, 35
malic enzyme mRNA induction by fructose and insulin (rat liver), 112, 176
Diacylglycerols
stimulation of phosphatidylcholine or phosphatidylinositol bilayer hydrolysis by phospholipase A or C, cell stimulation role (human, rat), 117, 196
Diadenosine 5',5'''-P^1,P^4-tetraphosphate
anaerobiosis-induced decrease in Ehrlich ascites cells, role in DNA synthesis blockage, 110, 688
Diadenosine 5',5'''-P^1,P^3-triphosphate
human platelets, 115, 253
2,6-Diamino-4-hydroxy-5N-methyl-formamidopyrimidine
inhibition of DNA synthesis catalyzed by DNA polymerase I from Escherichia coli, 110, 552
Diamminedichloroplatinum (DDP)
cis isomer, antitumor activity, adriamycin effect (Escherichia coli), 115, 577
cis and trans isomers
DNA-chromosomal protein cross-linking (HeLa cells), 114, 767
DNA synthesis inhibition in leukemia cells, comparative efficacy (L1210 cells), 112, 555
Diazonium benzenesulfonic acid
F_1-ATPase subunit labeling, activating and inactivating ligand effects (bovine heart), 113, 273
Dibutyryl cAMP
effect on CHO cell sensitivity to mitomycin C, 111, 247
growth inhibition of human breast cancer cells, 110, 235
induction of Ca^{2+} influx and Ca^{2+}-dependent electrical activity (murine pancreatic islet B cells), 112, 614
(1,6-Di(O-carbamoyl)cyclohexanone-oxime)hexane
effect on diglyceride lipase activity (intact human platelets), 116, 68
Dicarboxylate carrier
mitochondrial, reconstitution by inner membrane Triton extract incorporation into liposomes (rat liver), 113, 205
Dichloroacetate
inhibition of
pyruvate dehydrogenase α-subunit phosphorylation in isolated mito-

chondria (rat brain, heart, liver), 111, 1054
succinyl-CoA synthetase phosphorylation in isolated mitochondria (rat brain, heart, liver), 111, 1054

1,1-Dichloroethylene
toxic effect on lung, cellular injury and impairment of cytochrome P-450-dependent monooxygenases (mouse), 110, 675

Dichloromethyl carbene
carbon tetrachloride metabolite (rat liver microsome), 117, 367

Dichlorophenolindophenol reductase
NADPH-dependent oxidoreductase catalytic component in phorbol myristic acetate-stimulated neutrophils (human), 110, 873

Dicoumarol
effect on daunorubicin cardiotoxicity (neonatal rat beating cells in culture), 110, 364
inhibition of 3-bromomethylmenadione reduction by DT-diaphorase, mutagenicity, 111, 346

Dictyostelium discoideum
chemotactic stimulation, cytoskeleton actin change, 115, 351
α-mannosidase, and bovine liver phosphomannosyl receptors, interactions, 116, 541

Dicyclohexylcarbodiimide
inhibition of Golgi apparatus function (rat liver), 114, 620
interaction with proton-translocating ATPase, kinetics (bovine cardiac mitochondria), 111, 333

Diet
high carbohydrate, low fat: decrease in hydroxymethylglutaryl-CoA reductase and cholesterol synthesis (rat liver), 113, 888
choline-deficient, UDPglucuronosyltransferase stimulation (rat hepatic microsomes), 114, 418
eicosapentaenoic acid ingestion, effect on thromboxane A_3 formation (human platelets), 116, 1091
ethanol, prolonged feeding, effect on Ca^{2+} transport (rat liver mitochondria), 117, 169
high fat, effect on insulin generation of pyruvate dehydrogenase inhibitor (rat liver), 117, 456
low protein, effect on active unphosphorylated form of branched chain α-ketoacid dehydrogenase (rat heart, kidney, liver), 111, 74

Diethylpyrocarbonate
ferredoxin modification, essential hystidyl residue detection (spinach), 112, 508

Diethylstilbestrol
Ca transport stimulation in plasma membrane (wheat protoplasts), 113, 171
effect on oxytocin binding to myoepithelial cell membranes from mammary tissue (rat), 112, 717
primary and secondary treatment, differential effects on vitellogenins I and II (chicken liver, plasma), 112, 1049

α-Difluoromethylornithine
inhibition of
ornithine decarboxylase, role in embryonal carcinoma cell differentiation (mouse), 114, 410
polyamine biosynthesis, role in melanoma cell differentiation (murine Cloudman S91), 113, 18

Diglyceride lipase, see Lipoprotein lipase

Diheptanoyl-phosphatidylcholine
lipoprotein lipase-catalyzed hydrolysis, apolipoprotein C-II effect (bovine milk), 113, 811

Dihexanoyl-phosphatidylcholine
lipoprotein lipase-catalyzed hydrolysis, apolipoprotein C-II effect (bovine milk), 113, 811

Dihomo-γ-linolenic acid
-incubated neutrophils, leukotriene production (human), 114, 855

7,8,9,10-Dihydrodiol-epoxide
vicinal, 1-nitrobenzo(a)pyrene metabolite (rat liver microsomes), 117, 541

Dihydropteridine reductase (NADH)
inhibition by aminochromes (human brain), 113, 895

Dihydrotestosterone
binding by neonatal androgen receptors (rat), 111, 717
metabolism in granulosa cell culture, androgen effects (rat), 113, 948

α,ω-Dihydroxycarotenoids
effect on mechanical properties of phospholipid unilamellar vesicles, 110, 320

1,25-Dihydroxycholecalciferol, see 1,25-Dihydroxyvitamin D_3

(±)-7r,8t-Dihydroxy-9t,10t-epoxy-7,8,9,10-tetrahydrobenzo[a]pyrene
interaction with relaxed circular pBR322 DNA, positive supercoiling induction, 114, 14

2,3-Dihydroxy-2-phenylpropylamine
conversion from 1-phenyl-1-

aminomethylene by dopamine β-hydroxylase, 110, 161
(±)-7r,8t-Dihydroxy-7,8,9,10-tetrahydrobenzo[a]pyrene
intercalation into calf thymus DNA and synthetic polynucleotides, base sequence selectivity, spectroscopy, 114, 8
1,25-Dihydroxyvitamin D_3
biphasic effect on growth of human breast cancer cells, calcitonin effect, 110, 235
determination by high affinity monoclonal antibodies, 112, 431
1,25-Dihydroxyvitamin D_3 receptors
regulation, effect on hormonal responsiveness (LLC-PK_1 kidney cells), 116, 121
1α,25-Dihydroxyvitamin D_3
-induced differentiation of promyelocytic leukemia cells into monocyte macrophages (human), 117, 86
inhibition of 7,12-dimethylbenz[a]anthracene- or 12-O-tetradecanoylphorbol-13-acetate-dependent carcinogenesis (murine skin), 116, 605
serum concentrations (human, marmoset, rhesus monkey), 114, 452
1α,25-Dihydroxyvitamin D_3 receptors
second peak detection by polyacrylamide gel electrophoresis with dithiothreitol (chicken intestine), 113, 687
24,25-Dihydroxyvitamin D_3
conversion from vitamin D_3, accumulation in cauda epididymus (rat), 113, 982
25,26-Dihydroxyvitamin D_3
conversion from 25-hydroxyvitamin D_3 by renal microsomes (rat), 110, 766
4,4'-Diisothiocyanostilbene-2,2'-disulfonate
inhibition of ADP-stimulated aggregation of gel-filtered platelets (bovine), 111, 306
Dileoyl phosphatidic acid
polymorphic preferences with Ca^{2+} Mg^{2+}, ^{31}P, and ^{2}H NMR, 111, 675
Diltiazem
enhancement of
nimodipine negative inotropic action (canine, rat heart), 114, 922
plasmid DNA-mediated transformation of murine cells by herpes simplex virus thymidine kinase gene, 110, 783
Dimannosyldiglyceride
effect on liposome circulation levels and uptake into liver (mouse), 110, 140
Dimethadione
uptake: phorbol esters, platelet-derived growth factor, vasopressin, and serum effects (Swiss 3T3 cells), 116, 931
Dimethylamine
oxidation by microsomal carbon monoxide-sensitive monooxygenase (Candida biodinii cell-free extracts), 113, 900
Dimethylaniline monooxygenase
and iodide peroxidase, role in 1-methyl-2-thioimidazole metabolism (porcine thyroid), 116, 449
7,12-Dimethylbenz[a]anthracene
-dependent carcinogenesis, inhibition by 1α,25-dihydroxyvitamin D_3 (murine skin), 116, 605
1,2-Dimethylhydrazine
induction of N^5-methyl-N^5-formyl-2,5,6-tri-amino-4-hydroxy-pyrimidine as major DNA adduct (rat liver), 110, 625
2-6-Dimethyl-9-hydroxyellipticinium
inhibition of supercoiled DNA relaxation by Trypanosoma cruzi topoisomerase I, 117, 1
N,N-Dimethylnitrosamine
induction of N^5-methyl-N^5-formyl-2,5,6-tri-amino-4-hydroxy-pyrimidine as major DNA adduct (rat liver), 110, 625
5,5-Dimethyloxazolidine-2-4-dione, see Dimethadione
Dimethyl sulfate
-modified DNA: bleomycin and DNase 1 nucleotide sequence cleavage, 117, 916
replication inhibition, role in dCTP decrease (Chinese hamster ovary cells), 114, 34
Dimethyl sulfide
alkylation of DNA and poly(dG-dC)·poly(dG-dC) in B and Z forms, 116, 682
uncoupling of oxidative phosphorylation in vitro (rat hepatic mitochondria), 110, 325
Dimethyl sulfoxide
effect on diphenylhexatriene fluorescence polarization in intracytoplasmic and plasma membranes (murine Friend leukemia cells), 117, 294
oxidation by microsomes, EDTA and Fe effects (rat liver), 116, 765

stimulation of
differentiation in Friend erythroleukemia cells, inhibition by lectins, 110, 228
tyrosine residue phosphorylation in membranes from erythroleukemia cells (mouse), 112, 413
substrate for chloride peroxidase (Caldariomyces fumago), 116, 82
synthesis of ATP by F_1-ATPase, 114, 907
uncoupling of oxidative phosphorylation (rat hepatic mitochondria), 110, 325
2,4-Dinitrofluorobenzene
inhibition of creatine phosphokinase and protein and lipid synthesis in muscle (rat quarter diaphragm), 111, 884
Dinucleosidetetreaphosphatase, see Bis(5'-guanosyl) tetraphosphatase
4,5-Dioxovalerate
produced by 4-oxo-5-hydroxyvalerate dehydrogenation, conversion to 5-aminolevulinate by aminolevulinate aminotransferase, 112, 986
Dipeptidase
glycylglycine and L-cysteinylglycine hydrolysis, proton NMR (human intact erythrocytes, lysates), 110, 305
Dipeptide-hydroxamates
dipeptidyl carboxypeptidase inhibition (bovine lung), 116, 394
Dipeptides
-2-methoxy-2,4-diphenyl-3(2H)-furanone chromophoric reaction, chiro-optical properties, 114, 433
Dipeptidyl carboxypeptidase
active in enkephalin containing peptide metabolism (rat brain synaptic membrane), 114, 804
hydrolysis of peptides containing C-terminal nitrobenzylamine (human kidney), 110, 654
inhibition by
benzolactams, synthesis and characterization, 117, 108
dipeptide-hydroxamates (bovine lung), 116, 394
mercaptomethyl lactams, conformational aspects of interactions, 111, 166
membrane-associated, captopril binding (rat tissues), 112, 1027
seminal fluid, pulmonary and testicular isoenzyme comparison (rabbit), 115, 1096
substance P hydrolysis (rat brain), 116, 735
1,6-Diphenyl-1,3,5-hexatriene
fluorescence
anisotropy in L cells, increase by interferon β (mouse), 110, 88
polarization in intracytoplasmic and plasma membranes, differentiation inducer effects (murine Friend leukemia cells), 117, 294
incorporated into rat thyroid cells, fluorescence polarization increase by thyrotropin, 110, 48
Diphosphoinositides
thrombin-induced increase in platelets, time course (human), 110, 660
Diphtheria toxin
synthetic peptides coupled to tetanus toxoid, antibody immunogenicity and response specificity (murine), 117, 908
Disaccharides
units in heparan sulfate, relative proportions in tissues (mammals), 111, 865
Disuccinylamidyl suberate
crosslinking of tetrodotoxin-binding component from electroplax, covalent labeling of 270,000-dalton protein (Electrophorus electricus), 114, 126
Dithiobis-(succinimidyl propionate)
prothrombin crosslinking, Ca effect, 111, 213
Dithiothreitol
1α,25-dihydroxyvitamin D_3 receptor molecular weight analysis by polyacrylamide gel electrophoresis, 113, 687
fructose-1,6-bisphosphatase activation, inhibition by spermidine and spermine (spinach chloroplasts), 115, 707
inhibition of gonadotropin-releasing hormone-induced luteinizing hormone release from pituitaries (immature female rat), 112, 306
reversal of adenylate kinase inhibition by elemental sulfur, 113, 348
DNA
actin gene from Drosphila melanogaster, hybridization with genes from widely divergent species, sequence homology, 111, 67
-adriamycin interaction, Fourier transform infrared spectra (human erythroleukemia K562 cells), 116, 321
Alu sequences, specific binding by HeLa nuclear extracts (human), 117, 378
B and Z forms
alkylation by dimethylsulfate or methylnitrosourea, methylation by DNA (cytosine-5-)-methyltrans-

ferase (chicken erythrocytes), 116, 682
thermally driven interconversion, 115, 100
binding to
aflatoxin B_1 after co-oxygenation coupled to arachidonic acid metabolism (murine embryo fibroblasts), 112, 1034
androgen receptors, characteristics (rat prostate), 114, 1147
benz[a]anthracene derivatives, anthracene, and phenanthrene, fluorescence and photoelectron study, 112, 1
benzo[a]pyrene, inhibition by ellagic acid (calf thymus, rat epidermis), 114, 388
cAMP-independent protein kinase, characterization (rat liver nuclei), 117, 610
meso-tetra(4-N-methylpyridyl)porphine and Zn^{2+} and Ni^{2+} derivatives, NMR and viscometric studies, 113, 148
metabolically activated carcinogen (±)-7r,8t-dihydroxy-7,8,9,10-tetrahydrobenzo[a]pyrene, mechanism (calf thymus), 114, 8
carcinogen-induced breaks, detection by nick-translation reaction with Escherichia coli DNA polymerase I (human fibroblasts), 111, 383
-chromosomal protein crosslinking by uv-, γ-radiation, and antitumor drugs (HeLa cells), 114, 767
circular relaxed of pBR322 plasmid, interaction with (±)-7r,8t-di-hydroxy-9t,10t-epoxy-7,8,9,10-tetrahydrobenzo[a]pyrene, 114, 14
complementary (cDNA)
clones
aldolase B, nucleotide sequence (human), 117, 601
α1-antitrypsin, isolation (human leukocytes, liver), 116, 375
interferon-induction-specific sequences, resemblance to mitochondrial rRNA genes (human placenta), 114, 670
interleukin 2 mRNA, amino acid sequence (human tonsils), 115, 1040
opsin, isolation and nucleotide sequence (bovine), 116, 563
prostate poly(A)RNA, coding for androgen-dependent polypeptides (rat), 111, 624
cytoplasmic mRNA from glioma cells, excess RNA hybridization technique for comparison of mRNAs in glioma and fetal brain cells (human), 110, 96
double-stranded, synthesis by M1 dsRNA reverse transcription (Saccharomyces cerevisiae), 114, 518
human hepatic apolipoprotein A-I^+ mRNA, cloning in recombinant plasmids (Escherichia coli), 112, 257
damage by ischemic injury, protection by nicotinic acid eliminated by 3-aminobenzamide (murine kidney), 113, 996
dGMP-rich, synthesis by terminal deoxynucleotidyl transferase (calf thymus chromatin), 111, 1105; erratum, 112, 794
double-stranded (dsDNA)
hydrolysis by various deoxyribonucleases, enzyme-specific inhibition by andenovirus DNA-binding protein, 110, 443
unit-length product of ssDNA replication by DNA polymerase γ (bovine parvovirus), 117, 580
endodeoxyribonuclease effect (bovine intestinal mucosa nuclei), 116, 952
endogenous
retrovirus, induction by 5-bromodeoxyuridine and 5-azacytidine (rat embryo fibroblasts), 112, 571
exogenous
effect on site-specific recombination (murine L cells), 116, 959
guanine-modified
with aflatoxin B_1: bleomycin and DNase 1 nucleotide sequence cleavage, 117, 916
with dimethyl sulfate: bleomycin and DNase 1 nucleotide sequence cleavage, 117, 916
with mitocycin C: bleomycin and DNase 1 nucleotide sequence cleavage, 117, 916
intercalator-induced restriction-endonuclease selective inhibition (hamster), 115, 484
interstrand crosslinks, formation by adriamycin and daunomycin (HeLa cells), 110, 819
major adduct identification as N^5-methyl-N^5-formyl-2,5,6-triamino-4-hydroxypyrimidine (rat liver), 110, 625
methylation, inhibition by 5'-deoxy-5'-methylthioadenosine, S-adenosylmethionine, and S-adenosylhomocysteine (avian sarcoma virus-transformed rat

cells), 114, 214
methyl methane sulfonate-damaged, DNA synthesis and thymidylate synthase inhibition by 3-aminobenzamide, 8-lapachone, and aphidicolin (human), 117, 30
mitochondrial (mtDNA), target for nitroxide spin-labeled 9-aminoacridine (KB cells), 111, 1074
nuclear
chromatin, transcription effect on digestion by micrococcal nuclease (HeLa cell nuclei), 116, 312
target for nitroxide spin-labeled 9-aminoacridine (KB cells), 111, 1074
transcripts in preblastoderm embryo synthesized RNA (Drosophila melanogaster), 112, 851
plasmids pSV2gpt and pNEO3, polymerization after transfection into Chinese hamster cells, 110, 593
polymerase 1, inhibition by o-phenanthroline (Escherichia coli), 115, 567
prenucleosomal and nucleosomal in replicating chromatin, isolation and characterization (CHO cells), 110, 811
prevention of bleomycin chemiluminescence induced by Fe^{2+}, 112, 378
recombinant
protein products, primary structure, fast atom bombardment high field magnetic mass spectrometry, 117, 229
synthesized growth hormone, effect on mRNA sequences in hepatocyte culture (human), 115, 882
ribonucleotide incorporation (permeabilized CHEF/18 cells), 115, 1022
satellite, undermethylation in sperm (bovine, murine), 113, 695
sequence selective modification with 2-amino-6-methyldipyrido[1,2-a:3',2'-d]imidazole (calf thymus), 116, 1100
single-stranded (ssDNA)
hydrolysis by various deoxyribonucleases, enzyme-specific inhibition by adenovirus DNA-binding protein, 110, 443
replication to unit-length dsDNA product by DNA polymerase γ (bovine parvovirus), 117, 580
strand breaks, induction by purine and pyrimidine analogs (mouse), 115, 834
supercoiled
with D-loop region, DNA-binding protein binding (Xenopus laevis mtDNA), 117, 99
relaxation by Trypanosoma cruzi topoisomerase I, inhibition by 2,6-dimethyl-9-hydroxyellipticinium (bacteriophage), 117, 1
8-thalassemic mutation, detection in Algerian patients by restriction endonuclease analysis, 113, 269
unwinding, Mg^{2+}- and Ca^{2+}-dependent, poly-L-glutamic acid participation (porcine thymus), 116, 217
uv irradiation
crosslinks in mutants (Deinococcus radiodurans), 112, 458
photoproducts from developing forespores (Bacillus megaterium, B. subtilis), 113, 618
Z form, formation potential of purine-pyrimidine residue alternating sequences (radish, wheat nuclear genomes), 116, 113
DNA-binding proteins
adenovirus-specific, inhibition of deoxyribonuclease, effect on deoxyribonuclease I, 110, 443
binding to supercoiled DNA with D-loop region (Xenopus laevis mtDNA), 117, 99
resistance to dissociation by sodium dodecyl sulfate, nucleosome determination (chicken erythrocyte nuclei), 114, 99
DNA (cytosine-5-)methyltransferase
methylation of DNA and poly(dG-dC)·poly(dG-dC) in B and Z forms, 116, 682
DNA gyrase, see Topoisomerase II
DNA ligase, see Polydeoxyribonucleotide synthetase
DNA nucleotidylexotransferase
co-purifying endonuclease, characterization (calf thymus), 115, 909
detection in nuclei and cytoplasm (Japanese quail embryo), 116, 303
synthesis of
high-molecular-weight products, degradation by nuclease in hybridoma supernatants (mouse), 112, 265
uniquely dGMP-rich DNA (calf thymus chromatin), 111, 1105; erratum, 112, 794
DNA nucleotidyltransferase, see DNA polymerase
DNA polymerase
activity and plasma membrane skeletal framework (rat hepatoma), 114, 571

cellular and viral, inhibition by 2'-nor-2'-deoxyguanosine and acyclovir, kinetics (rabbit kidney), 116, 360
inhibition by polyoxotungstates (Escherichia coli), 116, 222
molecular weights in higher plants (pea seedlings), 110, 632
stimulation by helix-destabilizing protein from herpes simplex virus type 1-infected cells (hamster kidney), 116, 327
DNA polymerase I
inhibition in vitro by 2,6-diamino-4-hydroxy-5N-methyl-formamidopyrimidine (Escherichia coli), 110, 552
metal content and enzymatic activity (Escherichia coli overproducing, wild types), 112, 723
nick-translation reaction, carcinogen-induced DNA break detection in human fibroblasts (Escherichia coli), 111, 383
DNA polymerase III
holoenzyme preparation, isolation and characterization (Escherichia coli), 112, 80
DNA polymerases α
inhibition by palmitoyl-CoA and myristoyl-CoA (sea urchin eggs), 110, 902
sensitive to aphidicolin, role in synthesis of adenovirus DNA internal region, 113, 87
DNA polymerase γ
inhibition by palmitoyl-CoA and myristoyl-CoA (sea urchin eggs), 110, 902
parvovirus ssDNA replication to unit-length dsDNA product (bovine), 117, 580
DNA repair endonucleases
and isolated simian virus 40 minichromosomes, uv-irradiated minichromosome substrates, 113, 309
DNase 1, see Deoxyribonuclease 1
DNA synthesis
adenovirus type 5 in vitro, inhibition by aphidicolin, mechanism, 113, 87
inhibition by
3-aminobenzamide, β-lapachone, and aphidicolin after methyl methane sulfonate DNA damage (human), 117, 30
anaerobiosis, role in decreased level of diadenosine 5',5'''-P^1,P^4-tetraphosphate (Ehrlich ascites cells), 110, 688
AY9944-induced cholesterol synthesis reduction (human peripheral blood lymphocytes), 110, 82
interferon, role in calmodulin decrease in cell lines (canine, human), 111, 430
8-methoxypsoralen and uv irradiation (L1210 cells), 112, 965
platinum-containing compounds (L1210 cells), 112, 555
macromolecular complexes with DNA polymerase III holoenzyme activity (Escherichia coli), 112, 80
measurements, effects of uv-induced changes in deoxynucleoside triphosphate pools (Chinese hamster ovary), 116, 1064
in melphalan-treated melanoma cells with slow replication, (human), 110, 530
repair
following neocarzinostatin treatment, defective in ataxia-telangiectasia fibroblasts (human skin), 110, 483
in uv-irradiated Escherichia coli, cell membrane fluidity change effect, 110, 609
X-ray-induced, phase detection (L1210 cells), 112, 1077
stimulation by
dCTP excess, inhibition by dTTP excess (Chinese hamster ovary cells), 114, 34
DNA polymerase I from Escherichia coli, inhibition by 2,6-diamino-4-hydroxy-5N-methyl-formamidopyrimidine, 110, 552
phytohemagglutinin, inhibition by nicotinamide or 3-aminobenzamide (human lymphocytes), 116, 428
thrombin, role in protein phosphorylation (hamster fibroblasts), 111, 1034
Dodecyloctaethyleneglycolether
Na^+,K^+-ATPase solubilization, monomeric and trimeric structure detection (equine kidney), 113, 361
Docosahexaenoic acid
effect on arachidonic acid metabolism and platelet function (human), 117, 549
Dolichol
content and synthesis rate in preputial glands and testes (mouse), 110, 512
injected and in vivo synthesized, distribution in microsomes and lysosomes (rat hepatocytes), 115, 917

Dolichyl acyl esters
content and synthesis rate in preputial glands and testes (mouse), 110, 512
Dolichyl phosphate
content and synthesis in testes and preputial glands (mouse), 110, 512
Dopamine
inhibition of prolactin secretion by pituitary adenomatous cells, 2-hydroxyestradiol and 17β-estradiol effects (human), 112, 42
Dopamine-β-hydroxylase, see Dopamine β-monooxygenase
Dopamine β-monooxygenase
photolabeling by bleomycin (bovine adrenals), 112, 273
suicide inhibition by olefinic substrate 1-phenyl-1-aminomethylene during oxygenation (bovine adrenals), 110, 161
Dopamine receptors
D2
affinity states and target size (bovine striatum), 117, 65
selective agonist affinity decrease induced by pertussis toxin (bovine brain), 115, 325
Double quantum filtering
in two-dimensional correlated ^{1}H NMR spectroscopy, improved resonance, 117, 479
Doxorubicin
cardiotoxicity induction, ^{31}P NMR (rat perfused heart), 110, 339
effect on
cisplatin antitumor activity (Escherichia coli), 115, 577
transplasma membrane redox activity (simian virus-transformed liver, hepatoma cells), 116, 210
interaction with DNA and cells, Fourier transform infrared spectra (human erythroleukemia cells), 116, 321
interstrand DNA crosslink formation, mechanism (HeLa cells), 110, 819
OH· radical generation via semiquinone reaction with H_2O_2, role in cardiotoxicity (rat cardiac mitochondria), 114, 197
resistance, regulation by plasma membrane glycoprotein phosphorylation (Chinese hamster lung cells), 115, 159
Drosophila melanogaster
on carcinogenic diet, free radical production decrease, ESP, 112, 602
Drugs
nonsteroidal anti-inflammatory, proton exchange acceleration between octanol and water, 113, 745
resistance in Chinese hamster cell mutants induced by 5-fluorodeoxyuridine with deoxycytidine, 110, 573
DT-diaphorase, see NAD(P)H dehydrogenase (quinone)
dTTP, see Deoxythymidine triphosphate
Dwarfism
pituitary deficiency in Snell dwarf mice, myocyte elemental content comparison, 114, 234
Dynorphin A
detection with rimorphin and α-neo-endorphin (human hypothalamus), 113, 30
Dynorphin B, see Rimorphin
Dystrophy
ribosomal 60-S subunit alteration (hamster skeletal muscle), 115, 153

E

EDTA (ethylenediaminetetraacetate)
effect on
Ca,Zn superoxide dismutase electrophoretic variants (bovine), 117, 677
microsome oxidation of hydroxyl radical scavenging agents and ethanol (rat liver), 116, 765
inhibition of NADPH-dependent oxidoreductase O_2^- generating activity (human neutrophils), 110, 973
reversal of Zn^{2+}-induced dinucleosidetetraphosphatase inhibition 113, 717
washing of inside-out thylakoid vesicles to remove Mn^{2+} and surface proteins, oxygen evolution inhibition (pea chloroplasts), 110, 545
Egg white
ovomucoid and ovoinhibitor isolation and immunological cross-reactivity (chicken), 110, 75
Ehrlich ascites cells
anaerobiosis-induced DNA synthesis blockage and diadenosine 5',5'''-P^1,P^4-tetraphosphate decrease with unchanged levels of ATP, ADP, and AMP, 110, 688
Eicosanoids
salivary, circadian variation (human), 115, 201
Eicosapentaenoic acid
dietary ingestion, effect on thromboxane A_3 formation (human

platelets), 116, 1091
-derived leukotriene B_5, chemotactic and degranulating activities for human neutrophils, 117, 282
Elastase
carbamoyl-phosphate synthetase (ammonia) inactivation, effect on substrate binding (rat liver), 117, 238
inhibition by
phosphonofluoridates (porcine pancreas), 112, 1085
polyethylene glycol-induced amino group modification, anti-elastase serum decreased binding (porcine pancreas), 111, 659
Electrical conductance
time- and voltage-dependent, two classes in planar lipid bilayers doped with colicin A, 113, 765
Electrochemistry
auxin/ATP-dependent response of auxin receptor isolated from maize leaves and reconstituted in bilayer lipid membranes, 110, 300
Electrofusion
homokaryon production, viable fused cell generation (Chinese hamster ovary cells), 114, 663
Electron microscopy
freeze-fracture, small unilamellar phospholipid vesicle fusion, induction by Ca^{2+} and low pH, 110, 15
Electron paramagnetic resonance (EPR), see also Electron spin resonance (ESR)
oxidation state of binuclear Fe site in azidosemimethemerythrin, 112, 954
stopped flow measurements in peroxide-dependent N-demethylation reaction catalyzed by cytochrome P-450 and horseradish peroxidase, 113, 332
T2D laccase and half met-NO_2^- derivatives, binuclear Cu site role (Rhus vernicifera), 112, 729
type 2 Cu-depleted laccase, reductively decoupled type 3 site detection, 114, 57
Electron spin resonance (ESR), see also Electron paramagnetic resonance (EPR)
Drosophila melanogaster on normal and carcinogenic diet, 112, 602
nitrogen-centered free radical generated by indolic compounds catalyzed chemically and enzymatically, 114, 168
Electron transfer flavoprotein dehydrogenase
Fe-S flavoprotein structure, Raman spectroscopy (porcine hepatic mitochondria), 113, 784
Electron transport
plasma membrane, sensitivity to adriamycin (simian virus-transformed liver, hepatoma cells), 116, 210
Electrophoresis
in agarose gels with red blood cells, detergent assay, 114, 699
Ellagic acid
inhibition of benzo[a]pyrene epidermal metabolism and DNA binding (rat), 114, 388
Endocytosis
β-adrenergic stimulation (murine renal cortex), 114, 913
insulin, activity in compactin-resistant mutants (Chinese hamster), 117, 13
Endodeoxyribonuclease
intranuclear localization and cleavage mechanism (bovine intestinal mucosa), 116, 952
Endo-8-galactosidase
degradation of O-glycosidically linked sialylated carbohydrate chains in leukocyte common antigen from B cells (human), 110, 424
Endo-β-1,4-glucanase, see Cellulase
Endogenous retrovirus
induction by 5-bromodeoxyuridine and 5-azacytidine, proviral DNA hypomethylation role (rat embryo fibroblasts), 112, 571
Endonucleases
DNA nucleotidylexotransferase copurifying, characterization (calf thymus), 115, 909
restriction, selective inhibition by DNA intercalators (hamster), 115, 484
Endo-oligopeptidase A
neurotensin degradation (rabbit brain), 116, 1151
Endo-oligopeptidase B, see Proline endopeptidase
Endopeptidase II
chymotrypsin-like from insect larvae, amino acid sequence (Vespa orientalis), 110, 1
Endoreduplication
cytosine-induced diplochromosome production (Chinese hamster V79 cells), 113, 142
β-Endorphin
and adrenocorticotropin, colocalized

in nervous system (rat duodenum), 117, 568
specific binding to
cerebellar and brain membranes, comparative kinetics (rabbit), 111, 1096
SC5b-9 complement complex in endotoxin-treated human serum, 113, 839
opiate receptors, comparison with peptide E (rat brain membrane), 114, 1084
Endothelial cells
membrane lipids, composition (rat), 113, 845
secretion of inhibitor of tissue-type plasminogen activator in culture (human, porcine), 110, 392
Endotoxin, see also Lipopolysaccharide
from Escherichia coli, specific β-endorphin binding site induction in human serum, 113, 839
Enkephalinamides
cyclic and acyclic partial retro-inverso, biological properties, 115, 864
Enkephalinase A
purification and characterization (calf brain), 115, 632
Enkephalinase B
purification and characterization (calf brain), 115, 632
Enkephalin convertase
inhibition by guanidinopropylsuccinic acid, guanidinoethylmercapto-succinin acid, and bromoacetyl-D-arginine (bovine pituitary), 111, 994
Enkephalins
analogs
containing D-Ala^2, $^{\nu E}$Phe, Leu^5, synthesis, bioactivity, and enzyme stability, 115, 112
cyclic, conformation in aqueous solution, fluorescence study, 114, 268
-containing peptides, metabolism by dipeptidyl carboxypeptidase (rat brain synaptic membrane), 114, 804
-degrading peptidases, distribution (murine brain neuronal, glial cells), 115, 423
-mediated inhibition of forskolin-stimulated adenylate cyclase (rabbit corpus luteum), 116, 574
Enniatin B
enzymatic synthesis, intermediate isolation and identification as D-2-hydroxyisovaleryl-N-methyl-valine, 110, 292
Enniatin synthetase
performic acid-induced separation of enniatin B synthesis intermediates (Fusarium oxysporum), 110, 292
Enoyl-CoA reductase, see Acyl-CoA dehydrogenase (NADP$^+$)
Enterotoxin
of Clostridium perfringens, binding to 50,000 M_r protein from brush-border membranes (rabbit), 112, 1099
of Escherichia coli, shorter analog chemical synthesis and biological activity, 112, 320
Enzymes
amidating, specificity for peptide substrate with C-terminal D-alanine (porcine pituitary), 117, 289
microsomal, see Microsomal enzymes
Enzyme-substrate complexes
aminopeptidase, direct detection by stopped-flow fluorescence (Aeromonas), 111, 946
Epidermal growth factor
effect on cytokeratin synthesis (rat cultured hepatocytes), 114, 556
radioreceptor assay interference (human blood serum), 114, 1036
reduced binding by Rous sarcoma virus-transformed rat cells, 113, 678
stimulation of
hexose transport, Ca^{2+}-dependence (murine 3T3 fibroblasts), 117, 637
α-lactalbumin induction by insulin, hydrocortisone, and prolactin (rat mammary explant), 117, 524
Epidermal growth factor receptors
high-affinity in pancreatic acinar cells (rat), 111, 1066
proteolysis by endogenous Ca^{2+}-activated neutral protease (rat liver), 113, 255
Epididymus
cauda region, accumulation of 24,25-dihydroxyvitamin D_3 converted from vitamin D_3 (rat), 113, 982
Epinephrine
additive effect on corticotropin-releasing factor-induced adrenocorticotropin release by pituitary cells in vitro (rat), 110, 456
effects on glucose output and cAMP (isolated perfused rat liver), 115, 743
inhibitory effect on insulin secretion, prevention by pretreatment with islet-activating

protein with Ca^{2+} (neonatal rat pancreatic islets), 112, 684
9,11-Epithio-11, 12-methano-thromboxane A_2
effect on cytoplasmic free Ca^{2+} concentration in platelets (human), 117, 663
Epoxide hydrolases
cytosolic and microsomal activities in hepatocyte and hepatoma cell lines (rat), 116, 587
endogenous induction during pregnancy in liver and lung (C57B1, DBA/2 mice), 112, 313
in lymphocytes with benzo[a]pyrene 4,5-oxide substrate, activation by benzoflavones (human), 110, 525
purification and properties (murine hepatic cytosol), 112, 763
1,2-Epoxy-3-(4'-azido-2'-nitrophenoxy)-propane
photoaffinity reagent for pepsin and other carboxyl proteases, 111, 630
Epoxyeicosatrienoic acids
stimulation of glucagon and insulin release (rat pancreatic islet), 114, 743
1,2-Epoxy-3,3,3-trichloropropane
stimulation of aflatoxin B_1 uptake and binding by isolated hepatocytes (rat), 110, 668
Ergosterol
biosynthesis, cytochrome P-450_{14}-DM and P-450_{22}-DS involvement (Saccharomyces cerevisiae), 116, 162
sparing by cholesterol and other sterols lacking 24ß-methyl group in growth of oxygen-deprived Saccharomyces cerevisiae, 112, 47
stimulation of microsomal palmitoyl-CoA desaturase, especially after temperature decrease from 34° to 15°C (Tetrahymena pyriformis), 113, 96
Erythrocyte membranes
fluidity, metabolic depletion effects (human), 116, 547
glutathione transferase association, Ca-dependence (human), 114, 488
glyceraldehyde-phosphate dehydrogenase binding, lysine residue role (human), 116, 423
phenothiazine solubility, photoaffinity labeling (human), 116, 469
Erythrocytes
arachidonic acid conversion to prostaglandins E_2 and $F_{2\alpha}$ (Opsanus tau), 110, 250
hemolysate, enhancement of Ca^{2+} inhibitory effect on membrane-bound Na^+,K^+-ATPase (human), 111, 970
intact and lysates, dipeptidase activity assay by proton NMR (human), 110, 305
membrane
Mg^{2+}-activated 5'-nucleotidase on exterior side (rat), 112, 407
Mg-ATP-induced shape changes, two steps connected with phosphorylation and ATP binding (human), 112, 384
phenylglyoxal-sensitive sites, effect of chloride and sulfate ions at various pH (human), 110, 616
staphylococcal α-toxin insertion from within, detection by photolabeling (rabbit), 111, 444
neuraminidase-treated, hemagglutination by various Escherichia coli strains (human), 111, 456
from normal individuals, acetaldehyde-induced formation of abnormal hemoglobin A_I fraction similar to that in alcoholism, 113, 1004
senescent and in vitro aged, selective phagocytosis by macrophages, receptor identification (rat liver), 115, 551
sheep, immune response in macrophage-depleted cultures: interleukin 1, monokine, and N-acetyl-muramyl-L-alanyl-D-isoglutamine effects (mice), 114, 721
in sickle cell disease, hemoglobin fiber formation inhibition by Stanleyville II mutation (human), 111, 8
Erythrosine
effect on carcinogenesis-linked aryl hydrocarbon hydroxylase and guanylate cyclase stimulation (rat liver), 111, 409
Erythrotropins
I and II, isolation (fetal calf intestine), 115, 477
Escherichia coli
aerobically grown, acidification-induced hydrogen sulfide release from Fe-S proteins, 112, 66
binding of neuraminyl α2-3 galactosides by various tested strains, 111, 456
biotin synthesis, sulfur incorporation from cystine, methionine, and thiocystine, 110, 243
F_1-ATPase-N-ethoxycarbonyl-2-ethoxy-1,2-dihydroquinoline, binding and kinetic, 114, 684

fatty acid synthesis, inhibition by thiolactomycin, mechanism, 115, 1108
gene products
dnaJ and dnaK, synthesis in bacteriophage λ-infected minicells and membrane affinity, 110, 176
recB and recC, properties, 116, 1144
L factor, mRNA β-subunit synthesis stimulation, 113, 1018
mutants
defective in proton-translocating ATPase δ-subunit of F_1 and b subunit of F_0, genetic and biochemical study, 111, 143
RNA processing, isolation, effect on RNase P, 114, 690
producing high level β-galactosidase promoters, increase of cell buoyant densities, 111, 104
serine chemoreceptor-methyl-accepting chemotaxis protein, ion channel element selection, 115, 648
uncoupling of protein and RNA synthesis, induction by aminoglycoside antibiotics, 112, 801
unsaturated fatty acid content in membrane, effect on toxicity of active oxygen species, 113, 301
uv-irradiated
inhibition of DNA excision repair and cell membrane fluidity changes, 110, 609
SOS system induction, cellular ATP pool evolution, 117, 556
wild-type and overproducing strains, DNA polymerase I activity, 112, 723
Escherichia coli B
bacteriophage T4D gene 29-infected, folylpolyglutamate synthetase identification, 116, 1119
Estradiol
effects on progestin production and cholesterol and cholesterol ester content in luteal cells (pseudopregnant rabbit), 113, 1026
17β-Estradiol
binding by neonate serum, decrease during turpentine-induced inflammation (rat), 110, 796
effect on
dopamine inhibition of prolactin secretion by pituitary adenomatous cells (human), 112, 42
oxytocin binding to myoepithelial cell membranes (rat mammary tissue), 112, 717
translational activity of poly(A)-rich RNAs from pituitary tumor (rat), 113, 462
induction of
creatine kinase in uterine cytosol (immature rat), 111, 156; erratum, 112, 1112
vitellogenin mRNA synthesis, inhibition by tamoxifen (chicken liver), 112, 425
inhibitory effect on expression of pituitary mRNA encoding precursors to lutropin and follitropin subunits (rat), 114, 65
Estradiol benzoate
-induced pituitary protein synthesis and lysosomal hydrolase activity changes (male rat), 116, 230
Estradiol receptors, see Estrogen receptors
Estrogen receptors
activation mechanisms, molybdate effects (rabbit, rat uterine tissue), 115, 685
characterization by size-exculsion and ion-exchange HPLC (rabbit uterus), 115, 988
conservation during prolonged progesterone administration (immature rabbit uterus), 115, 1015
nuclear, binding of monoclonal antibodies to calf uterus cytoplasmic (murine uterine receptor), 114, 107
uterine cytosol, stabilization at 37°C by treatment with dextran-coated charcoal (rat), 110, 713
Estrogens, see also specific estrogens
superoxide dismutase stimulation in mammary tumors to level in normal mammary tissue (rat), 113, 883
Estrous cycle
sulfated glycosaminoglycan synthesis in ovarian follicular and luteal tissue (guinea pig), 111, 574
Ethanol
chronic consumption
effect on Ca^{2+} transport (rat liver mitochondria), 117, 169
phosphatidylserine increase in synaptosomes (guinea pig), 113, 262
phospholipid methylation increase causing phosphatidylcholine synthesis (rat myocardium), 111, 710
effect on cholesterol and phospholipid composition (bovine HeLa cells), 114, 985
induction of UDPglucuronyl transferase activity, comparison with phenobarbital and 3-methylcholanthrene induction (rabbit hepatic microsomes), 111, 219
inhibition of protein synthesis,

potentiation by D-galactosamine (mouse hepatocytes), 112, 361
metabolism in alcoholism, effect on hemoglobin composition (human), 113, 1004
oxidation by microsomes, EDTA and Fe effects (rat liver), 116, 765
1,N^6-Ethenoadenosine triphosphate
fluorescence increase with heavy meromyosin (rabbit), 115, 312
N-Ethoxycarbonyl-2-ethoxy-1,2-dihydroquinoline
-F_1-ATPase, binding and kinetics (Escherichia coli), 114, 684
7-Ethoxycoumarin O-deethylase
cytochrome P-450-mediated induction by 2,3,7,8-tetrachlorodibenzo-p-dioxin (tumor-derived human epithelial cells), 115, 611
1-Ethyl-3-(3-dimethylaminopropyl)-carbodiimide
plastocyanin-cytochrome f covalently linked adduct, preparation (spinach, turnip), 116, 1000
Ethylisopropyl-amiloride
Na^+/H^+ exchange inhibition (various cell types), 116, 86
N-Ethylmaleimide
effect on
high-affinity agonist binding sites of muscarinic receptor subtypes (rat cerebellum, cerebral cortex, heart), 116, 284
muscarinic receptors stimulated by monovalent cations and guanine nucleotides (chicken heart), 111, 41; erratum, 112, 348
inactivation of lymphocyte regulatory volume decrease (human peripheral blood), 117, 154
Euglena gracilis
photosynthesizing, intracellular inorganic carbon accumulation in protein carbamate form, 111, 544
Exocytosis
-like interaction between adrenal medullary plasma membranes and chromaffin granules, protein phosphorylation role (bovine), 110, 55

F

Factor VIII
biological and immunological activities, relationship (plasma, serum), 115, 981
Factor X coagulant protein (XCP)
activation of bovine coagulation factor X after γ-carboxyglutamic acid residue removal (Vipera russelli venom), 111, 14
FAD (flavin adenine mononucleotide)
in monoamine oxidase, ESR analysis (bovine liver), 117, 517
FAD-containing monooxygenase, see Dimethylaniline monooxygenase
Familial amyloidotic polyneuropathy
amyloid prealbumin variant, identification (amyloidotic polyneuropathy patient kidney), 116, 880
Fast atom bombardment spectrometry
angiotension II L-malic acid analogues, molecular weight and amino acid sequence, 115, 653
cobalt(III)-bleomycin complexes, hydroperoxide bound to cobalt, 110, 959
following H-D exchange in [hydroxy-$^2H_3$]glycerol and ^2H_2O, active H content determination, 112, 1261
insulin and recombinant-DNA protein products, primary structure, 117, 229
proinsulin protonated molecular species (human), 110, 753
synthetic porphyrin disproportionation and recombination in matrix, 111, 478
Fasting
effect on active unphosphorylated form of branched chain a-ketoacid dehydrogenase (rat heart, kidney, liver), 111, 74
insulin effect on pyruvate dehydrogenase activator release from liver particulate fraction (rat), 112, 35
6-phosphofructokinase activity decrease, and fructose 2,6-bisphosphate disappearance (rat liver), 113, 548
Fatty acids
composition of cell membranes in uv-irradiated Escherichia coli, effect on liquid holding recovery, 110, 609
covalently bound to gastric mucus glycoprotein, composition changes in cystic fibrosis (human), 113, 286
surface glycoprotein in C-terminal (Trypanosoma equiperdum), 114, 119
ergosterol-induced changes at 34°C and 15°C (Tetrahymena pyriformis), 113, 96
α-fetoprotein interaction (human), 115, 38
incorporation into neutral lipid fraction, increase in measles virus-infected BGM cells, 112, 29

ketogenesis, Ca^{2+} concentration effects (rat liver mitochondria), 116, 173
long chain, metabolism, effect of 2[5(4-chlorophenyl)pentyl]oxirane-2-carboxylate with [^{125}I]16-iodohexadecanoic acid substrate (perfused rat heart), 117, 653
oxidation
Ca^{2+} concentration effects (rat liver mitochondria), 116, 173
valproic acid effect (isolated rat hepatocytes), 115, 730
polyunsaturated, S-containing, as lipoxygenase inhibitor (soybean), 114, 937
synthesis, inhibition by thiolactomycin, mechanism (Escherichia coli), 115, 1108
unsaturated in cell membrane, effect on toxicity of active oxygen species (Escherichia coli), 113, 301
Fatty acid synthetase
antigenic determinant at NADPH-binding region, recognition by antibodies to malic enzyme, 112, 1007
Felodipine
binding to calmodulin, effects of calmodulin, Ca antagonists, 112, 787
Fenitrothion
organophosphorous pesticide, degradation by phosphatase from Alcaligenes NC_5, 110, 412
Ferredoxin
modification with diethylpyrocarbonate, essential nature of histidyl residue (spinach), 112, 508
photoreduction by photosystem II, enhanced sensitivity to plastoquinone inhibitors (inside-out spinach chloroplast vesicles), 115, 722
Ferredoxin-$NADP^+$ reductase
adrenodoxin complex, electron transfer mechanism, pH effects (adrenal mitochondria), 115, 116
molecular heterogeneity in spinach leaves, role of contaminating protease activity, 110, 280
Ferric citrate
reduction, nitrate reductase (NADPH) catalysis (squash cotyledon), 114, 1182
Ferric ion
ADP-chelated, stimulation of peroxidation initiated by ferrous ion, 111, 777
-bleomycin interaction, Mossbauer spectra of complexes, 110, 827
Ferricyanide
stimulation of growth and attachment of melanoma cells, pyruvate replacement in serum-free media (human), 112, 183
Ferritin
translatable mRNA, levels in leaves with various Fe contents (Phaseolus vulgaris), 115, 463
Ferrous-dioxygen-ferric chelate complex
initiating species in lipoperoxidation, 111, 777
Ferrous ion
ADP-chelated, lipoperoxidation induction, stimulation by ferric ion, 111, 777
-bleomycin interaction
chemiluminescence prevention by DNA, 112, 378
Mossbauer spectra of complexes, 110, 827
effect on Fe(III) incorporation into apoferritin (human), 116, 244
plasma, decrease by copper chelating drug treatment (rat), 113, 127
Fetal calf serum
stimulation of
Ca^{2+} efflux from quiescent rat fibroblast cell line, 114, 240
thiol:protein disulfide oxidoreductase activity in cultured fibroblasts (human skin), 111, 872
α-Fetoprotein
-fatty acid interaction (human), 115, 38
production in cytosol and serum, 5-azacytidine effects (neonatal rat liver), 116, 939
turpentine-induced decrease in neonate serum during acute inflammation (rat), 110, 796
Fetus
Ca and phosphate fluxes across visceral yolk sac and amnion (guinea pig), 110, 438
Fibrinogen
α-chain phosphorylation, interferon enhancement (human platelets), 117, 350
phosphorylation by rat liver cytosol casein kinase 1 (human), 117, 631
Fibroblast growth factor
effect on $tRNA^{lys}$ modifications (BALB/C 3T3 cells), 115, 598
neurite-promoting effect (rat PC12 cells), 114, 1189
Fibroblasts
branched-chain amino acid catabolism, enzymatic deficiency characterization by genetic complementation tests (human), 114, 175

collagen degradation (human gingiva), 114, 1064
in Huntington disease, glycoprotein M_r 200,000 release in culture (human skin), 111, 690
low-density lipoprotein binding and internalization, inhibition by cAMP, effects on cholesterol and cholesteryl ester synthesis decrease (human), 112, 795
neocarzinostatin-treated, DNA repair defective in ataxia-telangiectasia (human skin), 110, 483
normal and mannosidosis, lysosomal α-D-mannosidase synthesis (human), 115, 1083
quiescent culture, Ca^{2+} efflux stimulation by fetal calf serum (rat), 114, 240
sphingomyelin degradation, inhibition by cholesterol and 7-dehydrocholesterol (human), 112, 860
thiol:protein disulfide oxidoreductase activity dependence on fetal calf serum and insulin (human skin), 111, 872
vitamin D_3 production in vitro (human), 115, 444
Fibroin
synthesis, translational pauses (Nephila clavipes), 116, 1033
Fibronectin
binding of
Ca, equilibrium analysis (human), 111, 1045
lactosaminoglycans and heparan sulfate (human teratocarcinoma cell line), 111, 952
domain structure, identification by domain-specific antibodies, proteolysis and S-cyanylation (human pericellular matrix, plasma), 116, 534
inhibition of platelet aggregation (human), 116, 135
production by cell line from hepatoblastoma (human), 110, 837
Ficin
active site substrate conformation, resonance Raman spectra comparison with bromelain, chymopapain, and papain, 117, 725
Flavin
in purple intermediate of D-amino-acid oxidase (porcine kidney), 111, 588
Flavin-containing monooxygenase
activity measurement by guanethidine N-oxide formation (porcine, rat liver), 112, 437
Flavonoids
inhibition of arachidonic acid catalysis by lipoxygenase, 116, 612
Flavoprotein-linked monooxygenase
with benzo[a]pyrene substrate, inhibition by ellagic acid (rat epidermal microsomes), 114, 388
induced by 3-methylcholanthrene in fetal hepatic microsomes, comparison with offspring enzyme (rat), 113, 59
stimulation by food coloring amaranth and carmine (rat liver), 111, 409
Fluorescein isothiocyanate
cytochrome $P\text{-}450_{LM_2}$ modification, heme iron-N-terminus distance, energy transfer assay, 113, 353
Fluorescence
detection of hemoglobin dimers (human), 116, 712
1,6-diphenyl-1,3,5-hexatriene
anisotropy in L cells, increase by interferon β (mouse), 110, 88
polarization in thyroid cells, increase by thyrotropin (rat), 110, 48
intrinsic
β-carotene in solution and in lipid/water mixtures, 113, 102
tryptophan in oligomycin-sensitive ATPase, temperature effects (bovine cardiac submitochondrial particles), 111, 366
synchronous, liposomal uptake of microcrystalline benzo[a]pyrene, 112, 1069
tyrosine-tryptophan distance in enkephalin cyclic analogs in aqueous solution, 114, 268
Fluorescence-activated cell sorting
purification of insulin-containing B cells (rat pancreatic islet), 114, 835
Fluorescence anisotropy
steady-state and time-resolved with diphenylhexatriene probe, steroid-lipid interactions in phospholipid vesicles, 113, 799
Fluorescence lifetimes
hydrated bovine serum albumin powders, 114, 901
Fluoride ion
adenylate cyclase activation, enhancement by aluminum chloride (Fasciola hepatica), 112, 911
2-Fluoro-ATP
toxic metabolite of 9-β-D-arabinosyl-2-fluoroadenine (murine p388 cells), 113, 35
8-Fluoro-8-demethylriboflavin
interaction with riboflavin-binding protein, ^{19}F NMR (hen egg

white), 110, 406
5-Fluorodeoxyuridine
drug resistant mutation induction with deoxycytidine (Chinese hamster cells), 110, 573
6-Fluorodopamine
disposition in striata-region nerve microsacs, ^{19}F NMR (guinea pig brain), 110, 740
5-Fluoro-L-histidine
conversion to 5-fluoroimidazole analog of thyrotropin-releasing hormone, 113, 581
6-Fluoronorepinephrine
disposition in striata-region nerve microsacs, ^{19}F NMR (guinea pig brain), 110, 740
5-Fluorouracil
growth inhibition, inosine effect (Jensen tumor cells), 112, 235
Folic acid
adaptation and cAMP-mediated cGMP response (Dictyostelium), 115, 130
Follicle-stimulating hormone
subunit β precursor, anterior pituitary mRNA translation product, effect of estradiol treatment in vivo (rat), 114, 65
Follicular cells
testosterone metabolism, effects of androgens in cell culture (rat), 113, 948
Follitropin, see Follicle-stimulating hormone
Folylpolyglutamate synthetase
identification in bacteriophage T4D gene 29-infected Escherichia coli B, 116, 1119
Forespores
isolated and nonisolated developing, uv-induced DNA photoproducts (Bacillus megaterium, Bacillus subtilis), 113, 618
Formate dehydrogenase ($NADP^+$)
reduced Mo and W, characterization and spectroscopy (Clostridium thermoaceticum), 115, 61
Formyl-methionyl-leucyl-phenylalanine
superoxide radical induction in neutrophils, inhibition by prostaglandins E_1 and I_2 (human), 113, 506
Forskolin
stimulation of
adenylate cyclase
cytoplasmic Ca^{2+} decrease in thrombin-activated platelets (human), 113, 598
enkephalin-mediated inhibition (rabbit corpus luteum), 116, 574
inhibition by GTP or guanyl-5'-yl imido-diphosphate, pertussis toxin effect (rat adipocytes), 116, 651
in pituitary tumor cells, reversal by carbachol, role of cholinergic muscarinic receptors (mouse), 114, 289
adrenocorticotropin secretion by pituitary tumor cells, reversal by carbachol, role of cholinergic muscarinic receptors (mouse), 114, 289
cAMP accumulation
cAMP-dependent protein kinase activation, amylase release by parotid cells in vitro (mouse), 111, 21
inhibition by somatostatin, pertussis toxin effect (murine anterior pituitary tumor cells), 115, 794
by pituitary tumor cells, reversal by carbachol, role of cholinergic muscarinic receptors (mouse), 114, 289
Fortuitin
linear lipopeptide from Mycobacterium fortuitum, 400 MHz ^1H NMR, 113, 121
Free radicals
N-centered, generation by indolic compounds catalyzed chemically and enzymatically, 114, 168
production by Drosophila melanogaster on normal and carcinogenic diet, 112, 602
Friend erythroleukemia cells
dimethyl sulfoxide-induced differentiation, inhibition by lectins, 110, 228
intracytoplasmic and plasma membranes, diphenylhexatriene fluorescence polarization, differentiation inducer effects (murine), 117, 294
Fructose
stimulation of malic enzyme mRNA activity in diabetic liver (rat), 112, 176
Fructose-1,6-bisphosphatase
activation by fructose-1,6-bisphosphate, Ca^{2+}, dithiothreitol, and thioredoxin-f, inhibition by spermidine and spermine (spinach chloroplasts), 115, 707
forms, characterization (rat liver), 117, 751
fructose-bisphosphatase activation inhibition by spermidine and spermine (spinach chloroplasts), 115, 707
phosphorylation stimulation by cAMP

protein kinase and fructose-2,6-bisphosphatase *in vitro* (yeast), 115, 317
restoration of pyruvate kinase activity inhibited by limited proteolysis with cathepsin B (rat liver), 110, 682
Fructose 2,6-bisphosphate
activation of 6-phosphofructokinase, comparison with AMP effect, 111, 294
contaminant in commercial fructose 6-phosphate, effect on pyrophosphate-fructose-6-phosphate 1-phosphotransferase, 117, 37
detection in fetal liver, increase during postnatal development (rat), 113, 672
6-phosphofructokinase stabilization, disappearance during fasting and diabetes (rat liver), 113, 548
phosphorylation stimulation of fructose-1,6-bisphosphatase *in vitro* (yeast), 115, 317
Fructose-bisphosphate aldolase
dihydroxyacetone phosphate binding sites, activity only two out of four sites at low temperature (rabbit muscle), 110, 578
liver type (B), cDNA clone, nucleotide sequence (human), 117, 601
Fructose 6-phosphate
commercial, fructose 2,6-bisphosphate contaminant, effect on pyrophosphate-fructose-6-phosphate 1-phosphotransferase, 117, 37
α-L-Fucosidase
binding to protein isolated by phosphomannan-Sepharose chromatography (*Macaca radiata* brain), 112, 398
Fucosyl-globoside
glycolipid from teratocarcinoma cells (human), 112, 935
Fumarase, *see* Fumarate hydratase
Fumarate
conversion to malate by fumarate hydratase, absolute stereochemistry monitored by neutron diffraction, 115, 1048
Fumarate hydratase
-catalyzed fumarate to malate conversion, absolute stereochemistry monitored by neutron diffraction, 115, 1048
Furazolidone
induction of prophage and filament formation in *Vibrio cholera*, 112, 1106

G

Galactolipids
structural organization, conformational analysis, 115, 666
Galactosialidosis
4-methylumbelliferyl-α-D-N-acetylneuraminic acid neuramindases, genetically different forms (human leukocytes), 117, 470
D-Galactosamine
protein synthesis inhibition, potentiation by ethanol (murine hepatocytes), 112, 361
β-Galactosidases
high level in *Escherichia coli* with recombinant plasmids, cell buoyant density increase, 111, 104
inhibition by cytokine injection (rat liver), 112, 14
α-Galactosyl
residue, antigenic determinant in teratocarcinoma carbohydrates (human ovarian germ cell tumor), 115, 268
Galactosylceramide
abnormal accumulation in kidney with galactosylceramidase deficiency (twitcher mouse), 110, 940
Galactosylceramidase
deficiency, abnormal accumulation of galactosylceramide in kidney (twitcher mouse), 110, 940
α-D-Galactosyltransferase
activity in calf thymus, ^{1}H NMR, 110, 124
Gamma rays
DNA-chromosomal protein crosslinking (HeLa cells), 114, 767
Gangliosides
cancer-associated, detection by monoclonal antibody to sialosyl α2→6galactosyl residue (human), 113, 791
ganglio-N-tetraose series, occurrence, characterization (bovine nasal cartilage), 115, 295
higher order membrane, thyrotropin and cholera toxin receptor function reconstitution (1-8 rat thyroid tumor line), 110, 772
monoclonal antibody A2B5 binding (bovine brain, human erythrocytes), 116, 836
neurite outgrowth stimulation, tubulin mRNA accumulation induction (neurohybrid clone SB21B1 cells), 116, 974
Gastric inhibitory polypeptide
inhibition of plasma growth hormone increase induced by human pancreatic growth hormone-releasing

factor during anesthesia (rat), 112, 469
Gastrin-releasing peptide
-related substance, identification in mammalian brain (guinea pig, rat), 112, 528
GDP (guanosine 5'-diphosphate)
specific noncovalent binding to vesicular stomatitis virus NS protein, inhibition by ATP, 114, 138
Genes
actin from Drosophila melanogaster, sequence homology with divergent species, hybridization study, 111, 67
α-amylase, cloned in pUB110, promoter and NH_2-terminal signal peptide region nucleotide sequence (Bacillus subtilis), 112, 678
apolipoprotein A-I isoforms in plasma, liver, and intestine, mRNA translation in vitro (mouse), 114, 275
Escherichia coli dnaJ and dnaK products, synthesis in bacteriophage λ-infected minicells and membrane affinity, 110, 176
β-globin
5' end transcripts, long mRNA molecule detection (human bone marrow), 112, 1041
5' portion and flanking sequences in supercoiled plasmid, nuclease S1 sensitivity and protection by high-mobility-group proteins HMG1 and HMG2 (human), 112, 547
herpes simplex virus thymidine kinase, cloned in Escherichia coli plasmid, verapamil- and diltiazem-enhanced cell transformation (mouse), 110, 783
hygromycin B phosphotransferase, molecular cloning and expression in Streptomyces lividans (Streptomyces hygroscopicus), 117, 6
interferon α subtypes cloned in Escherichia coli, relative antiviral and antiproliferative activities (human), 112, 537
interleukin 2, isolation and amino acid sequence (human), 117, 114
norpA, mutations connected with reduced phosphorylation of photoreceptor phospholipids in retinular cell membrane (Drosophila melanogaster), 111, 567
oncogenes c-Ha-ras and c-Ki-ras, hypomethylation in primary carcinomas (human), 111, 47
orotidine-5'-phosphate decarboxylase, transfer from Neurospora crassa to Aspergillus nidulans, transformation induction, 112, 284
proton-translocating ATPase, location of mutations defective in δ subunit of F_1 and b subunit of F_0 (Escherichia coli), 111, 143
rec B products, properties (Escherichia coli), 116, 1144
recC products, properties (Escherichia coli), 116, 1144
5-S rDNA cloned in plasmids, lack of site-specific recombination in murine L cells (Xenopus borealis), 116, 959
serum albumin, structural integrity in congenital analbuminemia (human), 116, 817
Glial cells
colcemid-resistant sublines, brain-specific S100 protein synthesis (rat), 112, 73
Glioma cells
cytoplasmic mRNAs and nuclear precursors, higher specialization in comparison with fetal brain cells (human), 110, 96
platelet-derived growth factor-like growth factor, synthesis, homology with simian sarcoma virus transforming protein (human), 117, 176
Glucagon
effect on alanine 2-oxoglutarate aminotransferase (murine liver), 115, 506
inhibition of plasma growth hormone increase induced by human pancreatic growth hormone-releasing factor during anesthesia (rat), 112, 469
insulin secretion stimulation, effect on glucose-stimulated phosphatidylinositol turnover (rat pancreatic islets), 112, 419
release, stimulated by epoxyeicosatrienoic acids (rat pancreatic islet), 114, 743
from salivary gland, fictitious substance due to tracer-degrading activity resistant to protease inhibitors, radioimmunoassay (rat), 113, 340
1-,4-α-Glucan branching enzyme
activity and sensitivity to anti-enzyme IgG antibodies, comparison in skin fibroblasts from normal subjects and Type IV glycogen storage disease patients, 111, 636

α-Glucan phosphorylases
orthophosphate-dependent direct transfer of glucosyl residue from α-D-glucosyl fluoride to oligosaccharide (Escherichia coli, potato, rabbit skeletal muscle), 111, 530
β-1,3-Glucans
pre-phenoloxidase activation (silkworm hemolymph plasma), 113, 562
Glucocorticoid receptors
cytosolic, protection by chloroquine from thermal and salt-induced inactivation (rat liver), 112, 488
nuclear, Triton X-100-resistant, preferential solubilization by deoxyribonuclease I and deoxyribonuclease II (rat thymocytes), 111, 760
Glucocorticoids, see also specific glucocorticoids
-induced
antiphospholipase protein, characterization (rat), 117, 878
cytostatic and cytolethal responses, role in oxidized polyamine sensitivities (human lymphoid cells), 115, 737
phenylalanine 4-monooxygenase regulation in vivo (rat liver), 115, 965
Glucokinase
and hexokinase, activity in parenchymal and nonparenchymal cells after methapyrilene intoxication (rat liver), 115, 1090
Glucose
adenocarcinoma deprivation, effect on glycogen metabolizing enzyme activities (human), 110, 371
binding to subtilisin-inactivated phosphorylase a, interaction with AMP binding, 113, 825
blood, in fetus and during postnatal development (rat), 113, 672
effect on
glycosylation of glycoprotein hormone α-subunit secreted by glucose-starved Chang human hepatic cells, 112, 115
insulin secretion, comparison with ionophore A23187 and 12-O-tetradecanoylphorbol-13-acetate (rat islet), 117, 448
insulinotropic concentration, 6-ketoprostaglandin $F_{1\alpha}$ release stimulation (rat pancreatic islet), 114, 1023
metabolism, effect of 2[5(4-chlorophenyl)pentyl]oxirane-2-carboxylate with [^{125}I]16-iodohexadecanoic acid substrate (perfused rat heart), 117, 653
output, secretin and epinephrine effects (isolated perfused rat liver), 115, 743
stimulation of
inositol phosphate production (rat pancreatic islets), 116, 9
phosphatidylinositol turnover by mechanism independent from insulin secretion (rat pancreatic islets), 112, 419
transport, cAMP induction of post-receptor insulin resistance (rat adipocytes), 115, 398
uptake by adipose tissues, stimulation by growth hormone and synthetic fragment 31-44 (rat), 110, 866
Glucose-6-phosphate
decrease in adenocarcinoma cells during glucose starvation (human), 110, 371
Glucose transporter
solubilization by Triton X-100 for reconstitution experiments, Na^+ effect (porcine renal brush border), 112, 444
α-Glucosidase
synthesis by membrane bound ribosomes (Bacillus licheniformis), 114, 677
Glucosylβ(1→4)N-acetylglucosamine
linkage unit between poly(galactosylglycerol phosphate) and peptidoglycan (Bacillus coagulans cell wall), 111, 312
α-D-Glucosyl fluoride
glucosyl residue, transfer to oligosaccharides catalyzed by α-glucan phosphorylases, 111, 520
D-Glucuronic acid
binding by soybean agglutinin, 111, 789
β-D-Glucuronidase
binding to brain protein isolated by phosphomannan-Sepharose chromachromatography (Macaca radiata), 112, 398
testosterone-induced increase in kidney, unaffected by polyamine synthesis inhibition (mouse), 112, 770
urinary secretion, blockage by polyamine synthesis inhibition (mouse), 112, 770
Glutamate
^{15}N-labeled, [^{15}N]leucine as source in cerebellar explants (mouse), 115, 174
Glutamate dehydrogenase
precursor synthesized in cell-free system, transport into isolated

mitochondria (rat liver), 110, 499
Glutamine synthetase
deficiency in Anabaena cycadeae mutant, effect on heterocyst and nitrogenase inhibition by NH_4^+, 111, 180
equilibrium exchange kinetics and reaction mechanisms (ovine brain), 115, 220
isoforms (light-grown soybeans), 114, 604
regulation by divalent cations (Anabaena cylindrica), 114, 206
γ-Glutamyltransferase
binding of glutathione and L-(αS,5S)-α-amino-3-chloro-4,5-dihydro-5-isoxazoleacetic acid via arginyl residue (rat kidney), 112, 564
conversion of precursor to subunit form in brush border membrane (rat kidney), 114, 889
γ-Glutamyltranspeptidase, see γ-Glutamyltransferase
Glutathione
binding to γ-glutamyltransferase via arginyl residue, phenylglyoxal assay (rat kidney), 112, 564
conjugate formation with
acetaminophen, cytochrome P-450-dependent (ethanol-treated rabbits), 112, 8
reduced misonidazole, identification, 112, 1013
content, culture condition effects (human A549 cells), 114, 737
inhibition of aflatoxin B_1 uptake and binding by isolated hepatocytes (rat), 110, 668
Na^{2+}-dependent transport in renal basal-lateral membrane vesicles (rat), 112, 55
Glutathione disulfide
-induced protein synthesis inhibition, role in high O_2 partial pressure-activated inhibitor and (~) 23,000-M_r sulfhydryl protein (rabbit reticulocytes), 117, 135
Glutathione-insulin transhydrogenase, see Protein-disulphide reductase (glutathione)
Glutathione peroxidase
and lipoxygenase pathway coupling, 12-hydroperoxytetraenoic acid formation (selenium-deficient rat platelets), 117, 183
Glutathione transferase
A form, increase in preneoplastic hepatic lesions induced by chemical carcinogens (rat), 112, 20
daunorubicin-induced activity increase in neonatal beating heart cells in culture (rat), 110, 364
endogenous induction during pregnancy in liver and lung (C57B1, DBA/2 mice), 112, 313
erythrocyte membrane association, Ca dependence (human), 114, 488
inhibition by indomethacin, kinetics (rat liver), 112, 980
isozymes
anionic, isolation and characterization (rat hepatic cytosol), 111, 840
discrimination by inhibitors (rat liver), 114, 829
Glutathione S-transferase, see Glutathione transferase
Glycans
nonviable streptococcal cells, immunization causing polyclonal isomeric anti-lactose antibody production (rabbit), 113, 555
Glyceraldehyde-3-phosphate dehydrogenase, see Glyceraldehyde-phosphate dehydrogenase
Glyceraldehyde-phosphate dehydrogenase
binding to erythrocyte membranes, lysine residue role (human), 116, 423
Glycerol
in C-terminal end of surface glycoprotein (Trypanosoma equiperdum), 114, 119
Glycerol-3-phosphate dehydrogenase
modification by blue agarose (human heart), 116, 689
Glycinamide ribonucleotide transformylase, see Phosphoribosylglycinamide formyltransferase
Glycine receptors
in crude synaptic membranes from spinal cord, increase by Triton X-100 treatment (rat), 112, 809
Glycoconjugates
fluorescence labeling with Lucifer yellow CH on oxidized thymocyte surface (mouse), 112, 872
keratan sulfate-like in cerebral cortex, localization in microsomes (rat), 111, 28
Glycogen
fast mobilization in glucose-deprived adenocarcinoma cells (human), 110, 371
inhibition of phosphorylase phosphatase purified catalytic unit, 114, 148
synthesis
changes during postnatal development (rat fetal liver), 113, 672

regulation by pyrophosphate (Escherichia coli), 115, 820
Glycogen branching enzyme, see 1-α-Glucan branching enzyme
Glycogen phosphorylase
activation in glucose-deprived adenocarcinoma cells (human), 110, 371
Glycogen synthase
in adenocarcinoma cells during glucose starvation (human), 110, 371
indicating enzyme in glycogen branching enzyme coupled assay (human skin fibroblasts), 111, 636
insulin-like stimulation by vanadate (rat adipocytes), 113, 80
phosphorylation by calmodulin-dependent protein kinase, substrate specificity (rabbit liver), 116, 412
rabbit antibodies, mRNA translation product identification (rat liver), 117, 332
Glycogenolysis
anoxia and cyanide effects (rat hepatocytes), 115, 1033
Glycolipids
antigen, isolation by monoclonal antibody binding, characterization by mass spectrometry and NMR (human pancreatic carcinoma), 110, 383
-lectin interaction, detection (Bandeiraea simplicifolia, Helix pompatia, soybean), 115, 360
from teratocarcinoma cells, isolation of fucosyl-globoside and sialosyl-globoside (human), 112, 935
Glycopeptides
polysialosyl, from nerve tissue glycoproteins, distribution and characterization (rat brain), 116, 889
Glycopeptidases
hydrolyzing β-aspartylglucosylamine linkages, isolation and characterization (jack bean meal), 112, 155
Glycoprotein hormones
α-subunit secretion by glucose-starved Chang human hepatic cells, butyrate effect on glycosylation, 112, 115
Glycoproteins
α_1-acid, increase in serum after cytokine preparation injection (rat), 112, 14
deficiency, role in low infectivity of vesicular stomatitis virus released from interferon-treated cells (human, murine), 117, 161
gastric mucus
covalently bound fatty acids, composition changes in cystic fibrosis (human), 113, 286
role in hydrogen ion diffusion (canine), 115, 1053
hydroxyproline-rich secreted from cytoplasm, insolubilization in cell wall, mechanism (carrot root slices), 112, 161
M_r 200,000 release in culture media by skin fibroblasts from Huntington disease patients, 111, 690
nature of 3-[(3-cholamidopropyl)-dimethylammonio]-1-propane sulfonate-solubilized muscarinic acetylcholine receptors (bovine cerebral cortex), 115, 814
nerve tissue, -derived large polysialosyl glycopeptides, distribution and characterization (rat brain), 116, 889
plasma membrane
-bound, possible role in dimethyl sulfoxide-induced differentiation of Friend erythroleukemia cells, 110, 228
phosphorylation, adriamycin resistance regulation (Chinese hamster lung cells), 115, 159
radioiodination, inhibitory effect on binding to immobilized lectins, 110, 103
surface from Trypanosoma equiperdum, glycerol and fatty acids in C-terminal end, 114, 119
Tamm-Horsfall urinary, see Tamm-Horsfall urinary glycoprotein
in thyrotropin receptor, interaction with thyrotropin, fluorescence study (rat thyroid cells), 110, 48
Glycosaminoglycans
solid and ascites, characterization (P1798 murine lymphosarcoma), 114, 976
sulfated, synthesis in ovarian follicular and luteal tissues during estrous cycle (guinea pig), 111, 574
synthesis in thyroid cell culture, thyrotropin effect (porcine), 111, 353
Glycosylation
lens epithelium basement membrane (normal, diabetic human), 117, 51
Glycosyltransferases
activity increase following HL60 cell differentiation induction by retinoic acid and phorbol ester (human), 110, 348; erratum, 111, 775
at neuronal cell surface in culture, activities and kinetics (chicken

embryo), 113, 446
Glycylglycine
hydrolysis by erythrocytes, proton NMR (human), 110, 305
Golgi apparatus
bioenergetics, ATPase role (rat liver), 114, 620
Gonadotropin receptors
in isolated ovarian nuclei, distinction from plasma membrane receptors (rat), 111, 127
Gonadotropin-releasing hormones
binding to pituitary membrane preparations, inhibition by Ca^{2+} (rat), 112, 306
degradation, lack (rat intact pituitary tissue), 114, 1028
mRNA polyadenylation inhibition (rat prostate), 115, 451
Gonadotropin-releasing hormone receptors
photoaffinity labeling with hormone antagonist (rat pituitary membrane), 110, 116
Gossypol
lactate dehydrogenase inhibition, kinetics (bovine), 115, 180
Gramicidin A
C-terminal dipeptide, protected analog molecular structure, X-ray diffraction analysis, 112, 1056
incorporated into phospholipid suspensions as channel structure, ir spectra showing single-stranded-β^6-helical conformation, 114, 373
Granulocytes
peritoneal, retinoic acid effect on phospholipid acylation (guinea pig), 114, 261
Granulosa cells, see Follicular cells
Growth factors, see also specific growth factor
competence and progression, effects on $tRNA^{lys}$ modification reactions (BALB/C 3T3 cells), 115, 598
platelet-derived growth factor-like, synthesis, homology with simian sarcoma virus transforming protein (human glioma, sarcoma cells), 117, 176
Growth hormone
human
infusion, prolactin receptor down-regulation (female virgin rat liver, mammary gland, kidney), 116, 644
and ovine, recombinant DNA synthesized, effect on mRNA sequences (hepatocyte culture), 115, 882
plasma, increased by human pancreatic growth hormone-releasing factor, decrease by secretin, gastric inhibitory polypeptide, and glucagon (rat), 112, 469
and synthetic fragment 31-44, stimulation of glucose uptake by adipose tissues (rat), 110, 866
Growth-hormone releasing factors, see also Somatocrinin
44-amino-acid peptide, isolation and characterization (bovine hypothalamus), 117, 772
and fragments, biological potency in vivo (human, rat), 115, 525
human hypothalamic, comparison of tumor-derived forms, 114, 930
isolation and amino acid sequence (porcine hypothalamus), 116, 726
synthetic, identical to human pancreatic, plasma growth hormone increase in pentobarbital- and urethane-anesthetized rats: secretin, gastric inhibitory polypeptide, and glucagon effects, 112, 469
GTP (guanosine 5'-triphosphate)
basal and forskolin-stimulated adenylate cyclase inhibition, pertussis toxin effect (rat adipocytes), 116, 651
effect on muscarinic acetylcholine receptor properties (bovine cerebral cortex), 112, 948
-insensitive ornithine decarboxylase, spermine synthesis (Acetobacteria), 114, 779
regulation of phospholipid methylation by inactivation of methyltransferase I and activation of methyltransferase II (rat hepatic plasma membrane), 114, 425
requirement for UTP stimulatory effect on initiation complex formation with initiation factor (Streptomyces aurefaciens), 114, 222
Guanethidine N-oxide
formation as measure of cellular flavin-containing monooxygenase activity (porcine, rat liver), 112, 437
Guanidinoethylmercaptosuccinic acid
enkephalin convertase inhibition, kinetics, 111, 994
Guanidinopropylsuccinic acid
enkephalin convertase inhibition, kinetics, 111, 994
Guanine nucleotides
activation of
adenylate cyclase, inhibition by aluminum chloride (Fasciola hepatica), 112, 911

muscarinic receptors, mimicking by N-ethylmaleimide pretreatment (chicken heart), 111, 41; erratum, 112, 348
effect on high-affinity agonist binding sites of muscarinic receptor subtypes (rat cerebellum, cerebral cortex, heart), 116, 284
-modified DNA, bleomycin and DNase 1 nucleotide sequence cleavage, 117, 916
regulation of quinuclidinyl benzilate binding to muscarinic acetylcholine receptors, effects of Tris and choline (canine, frog, mouse, rat heart), 113, 280
Guanosine polyphosphates
lack of induction by aminoglycoside antibiotics (Escherichia coli), 112, 801
Guanylate cyclase
Mg-dependent, activation by protoporphyrin IX (rat liver plasma membranes), 116, 47
stimulation in vitro by
food coloring amaranth and carmine (rat liver), 111, 409
low insulin concentration (rat liver), 114, 282
Guanyl-5'-yl imido-diphosphate
basal and forskolin-stimulated adenylate cyclase inhibition, pertussis toxin effect (rat adipocytes), 116, 651

H

Halobacterium halobium
bacteriorhodopsin-deficient mutant, resolution of halorhodopsin chromophoric polypeptide in membranes, 112, 332
purple membrane mobility characteristics, ^{13}C, ^{31}P, and ^{2}H NMR, 114, 713
Halohydrin
chloroperoxidase-mediated isomer formation, neighboring group migration in allyl bromide chlorination, 110, 880
Haloperidol
methionine-enkephalin synthesis stimulation by increasing precursor mRNA content (rat striatum), 113, 391
Halorhodopsin
retinal-binding chromophoric polypeptide, detection in bacteriorhodopsin-deficient membranes (Halobacterium halobium), 112, 332
Haptoglobin
biosynthesis, intracellular processing, and secretion (rat hepatocytes), 114, 729
turpentine-induced increase in neonate serum during acute inflammation (rat), 110, 796
Heart
cAMP oscillation during cardiac cycle with highest level during systole, stimulator-triggered rapid freeze-clamp assay (rat), 111, 450
HeLa cells
dexamethasone-receptor complex and RNA, isolation from nuclei and properties, 113, 876
directly injected with human interferon β, effect on antiviral response induction, 110, 155
Helminthosporium carbonum
HC-toxin from culture filtrate, structure and conformation, 111, 398; 113, 10
Hemagglutination
by Escherichia coli strains, effect of erythrocyte treatment with neuraminidase (human), 111, 456
Hematin
in glutathione transferase isozyme discrimination (rat liver), 114, 829
Hematoporphyrin
photosensitization effects on Ca^{2+} uptake (rat liver mitochondria), 115, 76
Heme
binding in cytochrome P-450_{cam} (Pseudomonas putida), 116, 30
reversible transfer between different microsome-bound cytochrome P-450 molecular species (rat liver), 116, 1013
translation inhibition of δ-aminolaevulinate synthesis (cell-free system), 115, 225
Hemin
5-aminolaevulinate synthase
synthesis inhibition by blocking precursor processing (chicken embryo fibroblasts), 110, 42
in vitro translocation inhibition (chicken liver mitochondria), 115, 700
effect on protein synthesis (rat hepatocytes), 114, 612
inhibition of pre-5-aminolaevulinate synthase transfer into mitochondria (chick embryo liver), 117, 344
-peptide complexes, thiol-containing, cytochrome P-450 models (bovine), 115, 590

Hemocyanins
-carbon monoxide binding, positive cooperativity (Scylla serrata), 116, 291
Hemoglobin
in alcoholism, abnormal A_I fraction produced by addition of aldehyde or ketone to A_0 fraction (human), 113, 1004
dimers, detection by intrinsic fluorescence (human), 116, 712
15-hydroxy-eicosatetraenoic acid transformation into 8,15- and 14,15-isomers (human), 110, 273
-inulin conjugate, oxygen carrying capacity (human), 113, 513
second derivative Fourier transform infrared spectra (bovine), 115, 391
Stanleyville II mutation, fiber formation inhibition in sickle cells (human), 111, 8
Hemoglobin A
oxygenated β-chain tetramer, pH effect on dissociation (human), 111, 55
subunits, in solution and red cells, carbon monoxide binding, infrared spectroscopy (human), 116, 719
Hemolymph
pre-phenoloxidase in plasma, activation by bacterial cell walls or β-1,3-glucans (Bombyx mori), 113, 562
Hemolysis
Cu(II)-induced, O_2 requirement (rabbit erythrocytes), 115, 680
Heparan sulfate
covalent binding to fibronectin synthesized by human teratocarcinoma cell line, 111, 952
relative proportions of four disaccharides from mammalian tissue, 111, 865
Heparin
fractionation by affinity for heparin cofactor II, 112, 663
inhibition of thrombin amidolytic activity, 113, 108
synthetic pentasaccharide, high antithrombin III activity and anti-factor Xa activity, 116, 492
Heparin cofactor II
binding sites for dermatan sulfate and heparin, comparison with antithrombin III, affinity chromatograph, 112, 663
Heparitinases
I and II combined action, heparan sulfate degradation into four disaccharides (Flavobacterium heparinum), 111, 865
Hepatitis
synthetic peptides coupled to tetanus toxoid, antibody immunogenicity and response specificity (murine), 117, 908
Hepatocytes
aflatoxin B_1 uptake and binding, inhibition by metyrapone and glutathione, stimulation by 1,2-epoxy-3,3,3-trichloropropane (rat), 110, 668
antitumor aziridine derivative formation from 2-bromoethylaminonaphoquinone in buffer solution (rat), 112, 356
CCl_4-exposed, ultrastructural changes (rat), 114, 511
cultured, hormonal stimulation effect on cytokeratin synthesis (rat), 114, 556
cytosolic and microsomal epoxide hydrolase activities (rat), 116, 587
electrolyte content, experimental hyperthroidism (rat), 115, 232
membrane lipids, composition (rat), 113, 845
nodules, liver carcinogenesis, cytosolic polypeptide electrophoretic pattern (rat), 117, 740
and nonparenchymal cells, methapyrilene intoxication, effect on hexokinase and glucokinase activity (rat liver), 115, 1090
Hepatomas
AH-66 cells, cAMP-independent protein kinases, purification and partial characterization (rat), 113, 1010
cytosolic and microsomal epoxide hydrolase activities (rat), 116, 587
intact cells, synthesis and intracellular transport of cytochrome oxidase subunit IV and ADP/ATP translocator protein (rat), 110, 132
plasma membrane skeletal framework, DNA polymerase activity association (rat), 114, 571
thymidine kinase concentration increase in comparison with liver (rat), 111, 280
Heptitol
and octitol components, identification in lens (human, Octodon degu), 116, 988
(2R,5R)-6-Heptyne-2,5-diamine
ornithine decarboxylase inhibition (rat), 116, 237
Herpes simplex virus type 1
helix-destabilizing protein, isola-

tion (infected hamster kidney cells), 116, 327
-infected cells, target for natural killer cell activity increased by leukotriene B_4 (human), 113, 531
trans-2-Hexadecanoyl-CoA
conversion to palmitate by two forms of enoyl-CoA reductase (rat hepatic microsomes), 113, 659
Hexamethylenbisacetamide
effect on diphenylhexatriene fluorescence polarization in intracytoplasmic and plasma membranes (murine Friend leukemia cells), 117, 294
Hexokinase
and glucokinase, activity in parenchymal and nonparenchymal cells after methapyrilene intoxication (rat liver), 115, 1090
mitochondria-bindable and non-bindable, hydrophobicity difference (rat brain), 115, 1101
Hexosaminidase, see β-N-Acetyl-D-glucosaminidase
Hexose
transport
β-adrenergic stimulation (murine renal cortex), 114, 913
Ca^{2+}-dependent stimulation by ionophore A23187, 12-O-tetradecanoylphorbol-13-acetate, and epidermal growth factor (murine 3T3 fibroblasts), 117, 637
High-density lipoproteins
uptake by liver in vitro, impairment by cigarette smoke (pigeon), 112, 843
High-mobility-group proteins
high acidic amino acid region, role in Mg^{2+},Ca^{2+}-dependent DNA unwinding (porcine thymus), 116, 217
HMG 14
from calf thymus, phosphorylation by cGMP-dependent protein kinase from bovine lung, 110, 378
from chicken erythrocytes, lack of phosphorylation by cGMP-dependent protein kinase from bovine lung, 110, 378
HMG 17 phosphorylation during HeLa cell cycle, reexamination, 111, 1001; erratum, 113, 730
protective action of HMG1 and HMG2 on nuclease S1-sensitive site of supercoiled plasmid near human β-globin gene, 112, 547
High-pressure liquid chromatography
size-exclusion and ion-exchange, estrogen receptor characterization (rabbit uterus), 115, 988
Histamine
release, antigen-stimulated, phosphatidylinositol turnover role (rat mast cells), 117, 710
Histamine receptors
H_2, irreversible and specific inactivation by AH 22216 antagonist (HGT-1 cells), 116, 251
Histidine
residues, see Histidyl residues
Histidine decarboxylase
inhibition by lecanoric acid analogs (rat embryo), 110, 733
Histidinoalanine
N - and N^7-forms, detection in Ca-binding phosphoproteins as crosslinks (estuarine clam Rangia cuneata extrapallial fluid), 114, 304
Histidyl-proline diketopiperazine, see Cyclo(histidyl-proline)
Histidyl residues
in cAMP-independent protein kinase SPK 380, reversible self-phosphorylation (bovine adrenal cortex), 112, 884
essential in ferredoxin, detection by diethylpyrocarbonate modification (spinach), 112, 508
Histone H1
interaction with HMG14 and HMG17 nonhistones, crosslinking kinetics, 117, 817
latent phosphoprotein phosphatase activity modulation (bovine aortic smooth muscle), 117, 493
phosphorylase phosphatase
heat stable protein activator (calf thymus, swine renal cortex), 116, 581
stimulation (rabbit skeletal muscle), 117, 501
substrate for lysyl oxidase, sodium borotritide-reducible residues (calf thymus, rat liver), 115, 186
Histone H3
protein kinase C inhibition, 115, 1027
Histone H4
protein kinase C inhibition, 115, 1027
Histones, see specific histones
Homokaryon
production by electrofusion, viable fused cell generation (Chinese hamster ovary cells), 114, 663
Homopolyribonucleotides
reaction with carcinogenic arylamines, mediation by prostaglandin H synthase, 111, 96
sym-Homospermidine
major polyamine in nitrogen-fixing cyanobacteria species, 112, 606

structural specificity in stimulating spermidine auxotroph growth (Escherichia coli), 117, 616
Hopanoids
effects on phospholipid unilamellar vesicle mechanical properties, 110, 320
Hormones, see specific hormones
Horseradish peroxidase
compound I, temperature dependence of magnetic circular dichroism spectrum, 112, 515
H_2O_2-supported N-demethylation of aminopyrine, comparison with cytochrome P-450 action, EPR, 113, 332
Human chorionic gonadotropin
binding to isolated ovarian nuclei, comparison with binding to plasma membrane receptors (rat), 111, 127
in desensitizing doses, microsomal and mitochondrial cytochrome P-450 decrease induction in testes (mouse), 111, 424
Human T-cell growth factor, see Interleukin 2
Huntington disease
glycoprotein M_r 200,000 release by skin fibroblasts in culture (human), 111, 690
Hyaluronic acid
chromatographic fractionation on DEAE-Sephacel, 112, 168
degradation, singlet oxygen role (human), 115, 894
Hyaluronidase
activity changes during lung growth, injury, and repair (rat), 117, 71
Hydrocarbons
polycyclic aromatic, phenol-epoxide metabolites, chemical rearrangement to quinone-methides, 117, 129
Hydrochloric acid
secretion by gastric mucosa in vitro, inhibition by allylisothiocyanate (bullfrog), 112, 464
Hydrocortisone
α-lactalbumin induction, selective enhancement by epidermal growth factor (rat mammary explant), 117, 524
stimulation of casein mRNA accumulation in mammary tissues (adrenalectomized virgin rats), 114, 380
Hydrogen
active, content in various compounds, fast atom bombardment spectrometry following hydrogen-deuterium exchange, 112, 126
-D exchange reaction of thiamin, indole ring and thiazolium ring stacking-interaction effect, 116, 486
diffusion by gastric mucus: mucus glycoprotein, serum albumin, and IgA roles (canine), 115, 1053
$-Na^+$ exchange inhibition by ethylisopropyl-amiloride (various cell types), 116, 86
Hydrogen peroxide
anion, Cu,Zn superoxide dismutase affinity inactivation (bovine liver), 116, 1107
cytochrome c reduction, inhibition by superoxide dismutase, 111, 231
effect on Cu,Zn superoxide dismutase electrophoretic variants (bovine), 117, 677
mediation of
human lens crystallin crosslinking by heme-undecapeptide from cytochrome c, 113, 592
NADPH oxidation to $NADP^+$ catalyzed by heme-undecapeptide from cytochrome c, 113, 710
production
and catalase biosynthesis, riboflavin deficiency and repletion effects (mammalian), 117, 788
induction by lignin substrates (Phanerochaete chrysosporium), 117, 275
by methemoglobin interaction with ascorbic acid, 111, 980
-requiring extracellular enzyme preparation, lignin biodegradation (Phanerochaete chrysosporium), 114, 1077
Hydrogen sulfide
release from Fe-S proteins, induction by acidification (Escherichia coli), 112, 66
Hydrogenases
Ni(III) chromophore and sulfhydral-containing peptide-Ni(III) complexes, ESR, 115, 878
Hydrolases
lysomal, estradiol benzoate-induced changes (male rat pituitary), 116, 230
Hydroperoxides
organic, stimulation of oxygen consumption by microsomes, cytochrome P-450 role (rat liver), 110, 646
5-Hydroperoxyeicosatetraenoic acid
cytochrome P-450 catalyzed conversion to leukotriene B_4, leukotriene A_4 intermediate (rabbit liver), 115, 995
12-Hydroperoxytetraenoic acid

formation, glutathione peroxidase and lipoxygenase pathway coupling (selenium-deficient rat platelets), 117, 183
Hydroxamic acids
substrate for peroxidase reactions, 116, 916
β-Hydroxyaspartic acid
residue, vitamin K-dependent plasma zymogens (bovine, human), 115, 8
γ-Hydroxybutyrate
binding by brain subcellular fractions (rat), 110, 262
7β-Hydroxycholesterol
cytotoxicity, serum lipoprotein role (rat cultured hepatoma cells), 117, 851
18-Hydroxycorticosterone
plasma, corticotropin-induced increase, elimination by antisera to γ_3-melanotropin (normotensive and spontaneously hypertensive rats), 110, 357
5-L-Hydroxy-6,8,11,14-eicosatetraenoic acid
potentiation of neutrophil degranulation by platelet-activating factor (human), 111, 1
15-Hydroxy-eicosatetraenoic acid
hemoglobin-catalyzed transformation into 8,15- and 14,15-isomers (human), 110, 273
Hydroxyeicosatetraenoic acids
conversion from arachidonic acid by aortic smooth muscle cells (rabbit), 112, 242
2-Hydroxyestradiol
failure to reverse dopamine inhibitory effect on prolactin secretion by pituitary adenomatous cells (human), 112, 42
D-2-Hydroxyisovaleryl-N-methylvaline
intermediate in enniatin B enzymatic synthesis, 110, 292
17α-Hydroxylase, see Steroid 17 α-monooxygenase
Hydroxyl radicals
catalase probe, superoxide-dependent lipoperoxidation (bovine, human), 117, 901
generation by
acetaldehyde-xanthine oxidase systems, leukotrienes B_4, C_4, D_4, and E_4 inactivation, 110, 266
adriamycin semiquinone and H_2O_2, role in cardiotoxicity (rat cardiac mitochondria), 114, 197
methemoglobin interaction with ascorbic acid, mechanism, 111, 980
N^6-(4-Hydroxy-3-methyl-but-2-enyl)-adenosine
tRNA, monoclonal antibodies, characterization (bovine, murine), 114, 791
3-Hydroxy-3-methylglutaryl-CoA reductase (NADPH)
in inherited diabetes
hepatic, loss of circadian rhythm (mouse), 113, 638
intestinal, increased activity causing cholesterol synthesis stimulation (mouse), 113, 638
inhibition by dietary carbohydrates, role in cholesterol synthesis depression and triglyceride formation increase (rat liver), 113, 888
reversible phosphorylation (rat hepatoma), 114, 473
17 α-Hydroxyprogesterone
metabolism in adrenal microsomes (porcine), 111, 512
25-Hydroxyvitamin D_3
conversion by renal microsomes to unidentified metabolite and 25,26-dihydroxyvitamin D_3 (rat), 110, 766
Hygromycin B
phosphotransferase encoding gene, molecular cloning and expression in Streptomyces lividans (Streptomyces hygroscopicus), 117, 6
Hypertension
essential, additional plasma protein isolation and purification (human), 111, 1015
spontaneous, increased activity of plasma acetylhydrolase, effect on platelet-activating factor (rat), 113, 666
Hyperthyroidism
experimental, hepatocyte electrolyte content (rat), 115, 232
Hypochlorous acid
free, formation with halide-stimulated chloroperoxidase activity, 116, 873
Hypohalous acid
generation by chloroperoxidase during halohydrin isomer formation, 110, 880
Hypoiodous acid
peroxidase-activated, in tyrosine iodination, 116, 639
Hypothalamus
rimorphin existence with dynorphin A and α-neo-endorphin (human), 113, 30

I

Ibuprofen
differential effects on arachidonic acid metabolism via lipoxygenase and cyclooxygenase pathways (rat neutrophils from reverse passive Arthus reaction pleural exudates), 112, 586
Imidazo[1,5-a]pyridine-5-hexanoic acid (CGS 138080)
selective inhibition of thromboxane synthetase in platelets in vitro (human) and in vivo (rat), 112, 899
Immune response
epitope specific, by synthetic streptococcal antigen without carrier or adjuvant (mouse), 117, 359
Immunoassays
enzyme, separation-free, antibody-induced conformational restriction (rabbit), 114, 1097
Immunoglobulins
IgA, role in hydrogen ion diffusion by gastric mucus (canine), 115, 1053
IgD, Fc region, structure and location of asparagine-linked oligosaccharides (human), 110, 181; erratum, 112, 794
IgG
λ chain, amino acid sequences of fragment from peptic cleavage in urea (human), 111, 89
tuftsin-containing peptide fragments, synthesis and biological activity (mouse), 115, 193
IgM, ASN 563 glycosylation (mouse), 116, 771
λ-light chains, amino acid sequence (human urine), 117, 587
Immunoprecipitation
nitrate reductase from roots and leaves, properties (spinach), 113, 733
Indole ring
-thiazolium ring stacking interaction, effect on thiamin H-D exchange reaction, 116, 486
Indolic compounds
superoxide-catalyzed oxidation, spin-trapping of nitrogen-centered free radical, ESP, 114, 168
Indomethacin
acceleration of proton exchange between octanol and water, correlation with anti-inflammatory activity, 113, 745
differential effects on arachidonic acid metabolism via lipoxygenase and cyclooxygenase pathways (rat neutrophils from reverse passive Arthus reaction pleural exudates), 112, 586
inhibition of
ADP-stimulated vascular prostacyclin synthesis (rabbit aorta, pulmonary artery; rat aorta), 112, 284
glutathione transferase, kinetics (rat liver), 112, 980
Inhibitors, see specific inhibitors
Inflammation
turpentine-induced, serum α-fetoprotein and haptoglobulin changes (rat neonate), 110, 796
Infrared spectroscopy
Gramicidin A incorporated into phospholipid suspensions as channel structure, single-stranded-β^6-helical conformation, 114, 373
Initiation factor
from Streptomyces aurefaciens, initiation complex formation induction, GTP-dependent stimulation by UTP, 114, 222
Inosine
effect on growth inhibitory action of 5-fluorouracil (Jensen tumor cells), 112, 235
myo-Inositol
incorporation in phosphatidylinositol in CMP presence, Mn^{2+}-dependent activity (rat brain synaptosomes), 112, 817
Inositol hexaphosphate
effect on Soret magnetic circular dichroism spectra of methemoglobin complexes and subunits, ferric heme spin state dependence (human), 114, 318
Inositol phosphate
formation, stimulation by glucose, 2-ketoisocaproate, and carbamylcholine (rat pancreatic islets), 116, 9
Insulin
-activated cAMP phosphodiesterase, regulation by pertussis toxin (3T3-L1 adipocytes), 116, 593
antagonists, receptor kinase activity regulation (porcine), 115, 245
binding
to adipocytes, reduction by noradrenalin (rat), 112, 972
and endocytosis activity in compactin-resistant mutants (Chinese hamster), 117, 13
to erythroleukemia cell line K-562, characterization (human), 117, 823

to liposome outer surface (bovine), 117, 399
carbamoyl-phosphate synthetase activity restoration in diabetic liver, prevention by actinomycin (rat), 114, 255
chemical mediator, lipid synthesis stimulation, insulin receptor down regulation (rat hepatocytes), 115, 375
degradation
cell-mediated, by protease: Ca and endogenous inhibitor effects (rat skeletal muscle cytosol), 116, 195
hepatic protein-disulphide reductase (glutathione) latent and nonlatent activity during perinatal development and liver regeneration (rat), 116, 909
effect on
cytokeratin synthesis (rat cultured hepatocytes), 114, 556
α-lactalbumin induction, selective enhancement by epidermal growth factor (rat mammary explant), 117, 524
$tRNA^{lys}$ modifications (BALB/C 3T3 cells), 115, 598
generation of pyruvate dehydrogenase inhibitor, high fat diet and dexamethasone effects (rat liver), 117, 456
internalization by cultured lymphocytes, similarity with Fab component from insulin receptor antibodies (human), 114, 230
mimickers, receptor kinase activity regulation (porcine), 115, 245
primary structure, fast atom bombardment high field magnetic mass spectrometry, 117, 299
regulation of cytosolic acetyl-CoA carboxylase by induction of low-molecular-weight mediator release from plasma membranes (rat liver), 110, 789
release, stimulation by epoxyeicosatrienoic acids (rat pancreatic islet), 114, 743
requirement for casein mRNA accumulation (rat), 116, 994
secretion
ionophore A23187 and 12-O-tetradecanoyl-phorbol-13-acetate combined effects, comparison with glucose (rat islet), 117, 448
by isolated pancreatic islets, glucose-induced, stimulation by islet-activating protein from Bordetella pertussis (neonatal rat), 112, 684
teleocidin and 12-O-tetradecanoyl-phorbol-13-acetate effects (rat pancreatic islet), 117, 78
-stimulated phosphorylation
of insulin receptor precursor (rat liver), 116, 417
of insulin receptor β-subunit (human monocyte, monocyte-like cell lines), 115, 560
of phosphoprotein m (rat adipose tissue), 117, 758
of serine residues on insulin receptors (human hepatoma cells), 116, 1129
stimulation of
casein and α-lactalbumin synthesis in mammary explants, simulation by anti-insulin receptor serum (pregnant mouse), 111, 988
malic enzyme mRNA activity in diabetic liver (rat), 112, 176
protein synthesis, prostaglandin F_2 effect (rabbit muscle), 116, 1084
pyruvate dehydrogenase activator release from liver particulate fraction (rat), 112, 35
soluble guanylate cyclase in vitro (rat liver), 114, 282
thiol:protein disulfide oxidoreductase in cultured fibroblasts (human skin), 111, 872
Insulin-like growth factor-1 receptors
binding affinity, Ca effect (human placental microsomal membrane), 116, 63
Insulin protease
Ca-dependent, endogenous inhibitor characterization (rat skeletal muscle cytosol), 116, 195
Insulin receptors
binding affinity, Ca effect (human placenta microsomal membrane), 116, 63
binding properties (rat liver), 114, 1042
cAMP binding modulation, insulin resistance induction of glucose transport (rat adipocytes), 115, 398
down regulation by insulin chemical mediator (rat hepatocytes), 115, 375
insulin-stimulated phosphorylation
of precursor (rat liver), 116, 417
of β-subunit (human monocyte, monocyte-like cell lines), 115, 560
K 562 cell line, characterization (human), 117, 823
kinase activity regulation by insulin

mimickers and antagonists (porcine), 115, 245
levels in compactin-resistant mutants (Chinese hamster), 117, 13
95,000-dalton subunit, insulin-like phosphorylation stimulation by vanadate (rat adipocytes), 113, 80
phosphorylation reversibility, protein phosphatase activity (rat liver), 117, 885
serine residues, phosphorylation, insulin effect (human hepatoma cells), 116, 1129
in skeletal muscle plasma membranes during purification (rabbit), 112, 521
Interferon
calmodulin decrease induction in synchronized cell lines sensitive to antiproliferative effect, 111, 430
-induction-specific sequences, cDNA clones, mitochondrial rRNA gene resemblance (human placenta), 114, 670
inhibition of ornithine decarboxylase (human fibroblast cells), 114, 950
N-terminal synthetic peptide, antibody production and characterization (mouse), 117, 866
and prostaglandins, antiviral action (virus-infected murine cells), 116, 442
subtypes obtained by gene cloning in Escherichia coli, antiproliferative and antiviral effects (human), 112, 537
-treated vesicular stomatitis virus-released cells, low infectivity, glycoprotein deficiency role (human, murine), 117, 161
Interferon α
induction by synthetic heat-treated dsRNA (poly I:poly C) (human lymphocytes), 110, 851
subtypes A, C, D, and hybrid molecules, differential binding to receptors on lymphoblastoid cells (human), 110, 537
Interferon α receptor
differential affinity for interferon α subtypes A, C, D, and hybrid molecules (human Daudi cells), 110, 537
Interferon β
-injected HeLa cells, antiviral state induction failure (human), 110, 155
plasma membrane fluidity increase in L cells, fluorescence assay (mouse), 110, 88
Interferon γ
and interferon δ production by lymphocytes treated with phytohemagglutinin and teleocidin (human blood), 111, 498
recombinant, enhancement of natural killer cell activity, similarity to natural interferon γ (human), 111, 525
Interferon δ
antigenic distinction, production by peripheral blood lymphocytes treated with phytohemagglutinin and teleocidin (human), 111, 498
Interleukin 1
effect on sheep erythrocyte immune response in macrophage-depleted cultures (mice), 114, 721
Interleukin 2
gene, isolation and amino acid sequence (human), 117, 114
mitogenesis induction in phytohemagglutinin-treated thymocytes (mouse), 114, 93
mRNA cloning, cDNA amino acid sequence (human tonsils), 115, 1040
post-translational modification of position 3 amino acid, 116, 1049
production by tumor promoter-treated thymocytes, inhibition by cellular cAMP-increasing agents (mouse), 114, 93
Intrinsic factor
^{125}I-labeled, binding to ileal brush border membrane (rat), 115, 238
Inulin
-hemoglobin conjugate, oxygen carrying blood substitute, 113, 513
Iodide
stimulation of
lactoperoxidase catalytic activity, 112, 475
thyroid peroxidase catalytic activity (porcine), 112, 475
Iodide peroxidase
and dimethylaniline monooxygenase, role in 1-methyl-2-thioimidazole metabolism (porcine thyroid), 116, 449
Ionomycin
-Ca^{2+} complex, conformational change, mediation by lipid-water interface, 114, 632
Ionophore A23187
Ca^{2+}-dependent stimulation of hexose transport (murine 3T3 fibroblasts), 117, 637
effect on
aldosterone secretion, angiotension

II, and 12-O-tetradecanoyl-phorbol-13-acetate (porcine adrenal gland), 116, 555
phospholipid metabolism in mast cells, connection with Ca^{2+} uptake and histamine release (rat), 111, 581
stimulation of
Ca transport in plasma membrane of wheat protoplasts, 113, 171
neutrophils, arachidonic acid release from platelet-activating factor (rabbit), 113, 72
prostaglandin and cAMP production in macrophages, inhibition by trifluoperazine and verapamil (rat), 114, 248
serotonin release and phosphorylation of 20K and 40K proteins (human platelets), 112, 778
and 12-O-tetradecanoyl-phorbol-13-acetate, combined effects on glucose secretion, comparison with glucose (rat islet), 117, 448
Ionophores
in fraction isolated from uremic plasma and normal urine (human), 111, 326
15-O_5 macrocyclic polyether derivatives, Na^+ permeability induction in large unilamellar vesicles, 116, 981
silicate, isolation from organic extract of apochlorotic diatom (Nitzschia alba), 114, 365
synthetic crown ether carboxylic acid and lasalocid, synergism in Pr^{3+} transport, 117, 340
Iron
binuclear, at functional site of azidosemimethemerythrin, oxidation state EPR, 112, 954
effect on microsome oxidation of hydroxyl radical scavenging agents and ethanol (rat liver), 116, 765
hepatic, effect of Cu-chelating drug treatment (rat), 113, 127
ions, see Ferrous ion (Fe^{2+}) and Ferric ion (Fe^{3+})
uptake by reticulocytes, NH_4Cl effect (rat), 113, 650
Iron(III)
effect on Ca,Zn superoxide dismutase electrophoretic variants (bovine), 117, 677
incorporation into apoferritin, effect of ferroxidase, 116, 244
Iron-sulfur proteins
cysteine role in sulfide sulfur supply (Escherichia coli), 112, 66
Ischemic injury
kidney, during storage
DNA damage protection by nicotinic acid, elimination by 3-aminobenzamide (mouse), 113, 996
NAD decrease, nicotinic acid role in DNA damage (mouse), 113, 996
Islet-activating protein
from Bordetella pertussis, stimulation of glucose-induced insulin secretion and lipid-associated Ca^{2+} ionophoretic activity (neonatal rat pancreatic islets), 112, 684
Islets of Langerhans, see Pancreatic islets
Isocitrate
protective mechanism against Ca^{2+} and phosphate flux damage in liver mitochondria (rat), 115, 749
Isocitrate dehydrogenase (NADP+)
adrenalectomy and dexamethasone effects in vivo (rat testes), 115, 606
N^6-(Δ^2-Isopentenyl)adenosine
tRNA, monoclonal antibodies to, characterization (bovine, murine), 114, 791
Isoprenoids
biosynthesis by soil bacteria grown on mevalonate, 110, 187
Isoproterenol
inhibition of low-density lipoprotein binding and internalization, synthesis of cholesterol and cholesteryl esters (human fibroblasts), 112, 795
pretreatment of pituitary tumor cells, time- and dose-dependent desensitization of β_2-adrenergic receptors, effect on adrenocorticotropin release (mouse), 111, 112
stimulation of
adenylate cyclase activity without affecting membrane phospholipid methylation (myogenic cell lines), 114, 339
cAMP accumulation, inhibition by somatostatin, pertussis toxin effect (murine anterior pituitary tumor cells), 115, 794
cAMP synthesis and adrenocorticotropin secretion by pituitary tumor cells, inhibition by carbachol, restimulation by atropine (mouse), 114, 289
Isotope fractionation
in conversion of mono- and disaccharides to alcohols, ^2H NMR quantitation, 111, 890

Isotyrosine
formation in cell wall during insolubilization of hydroxyproline-rich glycoprotein (carrot root slices), 112, 161
Isovaleric acid
inhibition of enniatin enzymatic synthesis by N-isovaleryl-N-methyl valine formation, 110, 292

J

Jasmonic acid
formation from 12-oxo-phytodienoic acid (Vicia faba pericarp), 111, 470
Juvenile hormone
role in microvitellogenin appearance and uptake (Manduca sexta), 117, 643

K

Kallikrein
amydolytic activity, effects of antithrombin III, α_1-proteinase inhibitor, and heparin, 113, 108
cleavage of methionine-enkephaline-containing peptide BAM 22P, kinetic constants (equine urine, porcine pancreas), 112, 366
Keratan sulfate
-like glycoconjugates in cerebral cortex, localization in microsomes (rat), 111, 28
Keratinocytes
vitamin D_3 production in vitro (human), 115, 444
Ketoconazole
binding to intracellular corticosteroid-binding protein (Candida albicans), 117, 43
Ketogenesis
fatty acid, Ca concentration effect (rat liver mitochondria), 116, 173
2-Ketoisocaproate
stimulation of inositol phosphate production (rat pancreatic islets), 116, 9
6-Keto-prostaglandin $F_{1\alpha}$
release, stimulation by insulinotropic glucose concentration (rat pancreatic islet), 114, 1023
2-Keto-4-thiomethylbutyric acid
oxidation by microsomes, EDTA and Fe effects (rat liver), 116, 765
Kinase II, see Protein kinase, calmodulin-dependent
Kininogen
vasoactive peptide production by acid protease from rodent Murphy-Sturm lymphosarcoma (rat plasma), 112, 621
Kinins
T-, bradykinin-containing: isolation, purification, and composition (rat plasma), 112, 701
Kupffer cells
membrane lipids, composition (rat), 113, 845

L

Lac repressor
headpiece binding to poly[d(A-T)], thermal denaturation study (Escherichia coli), 110, 169
Laccase
function of different Cu types, ^1H NMR relaxation study (Rhus vernicifera), 111, 824
type 2 Cu-depleted (T2D), binuclear Cu site
Cu(I) determination by X-ray absorption edge spectroscopy (Rhus vernicifera), 112, 737
in met laccase and azide-bound derivatives, EXAFS investigation (Rhus vernicifera), 112, 746
nitrite reactivity, EPR study of met-NO_2^- derivatives (Rhus vernicifera), 112, 729
reductively decoupled type 3 site, EPR study (Rhus vernicifera), 114, 57
α-Lactalbumin
and homologous mRNA in epididymis (rat), 117, 306
induction by insulin, hydrocortisone, and prolactin, selective enhancement by epidermal growth factor (rat mammary explant), 117, 524
synthesis in mammary explants
insulin-stimulated, simulation by anti-insulin receptor serum (pregnant mouse), 111, 988
with insulin and prolactin, inhibition by cortisol, reversal by prostaglandin E_2 or $F_{2\alpha}$ (mouse), 111, 1059
Lactate
blood, in fetus and during postnatal development (rat), 113, 672
Lactate dehydrogenase
isozyme X, inhibition by gossybol, kinetics (bovine), 115, 180
Lactogenic receptors
^{125}I-labeled somatotropin binding specificity (rat liver), 115, 29
β-Lactoglobulin
effect on oleate binding to hepatic

sinusoidal membranes in vitro (rat), 112, 88
β-Lactoglobulin A
second derivative Fourier transform infrared spectra (bovine), 115, 391
Lactoperoxidase
activity with SCN^-, 116, 568
iodide-dependent catalytic activity, 112, 475
Lactosaminoglycans
covalent binding to fibronectin synthesized by human teratocarcinoma cell line, 111, 952
Lactose synthase
inhibition by 5-azacytidine in differentiating in vitro mammary gland (mouse), 111, 150
Lactosylcerebroside
included in liposomes, stimulation of liposome removal from circulation and uptake into liver (mouse), 110, 140
Laminin
isolation of components from basement membranes without prior protease digestion (human amnion, chorion, chorionic microvessels), 112, 1091
Laminin receptor
isolation from tumor cells (BL6 murine melanoma), 111, 804
Lanosterol
14α-demethylation by cytochrome P-450, inhibition by buthiobate (Saccharomyces cerevisiae), 115, 642
β-Lapachone
inhibition of DNA synthesis and thymidylate synthase after methyl methane sulfonate DNA damage (human), 117, 30
Lasalocid
and synthetic crown ether carboxylic acid, synergism in Pr^{3+} transport, 117, 340
Lecanoric acid
analogs, inhibition of
arachidonic acid release induced by tumor promoter (C3H10T1/2 cells), 110, 733
delayed hypersensitivity (mouse), 110, 733
histidine decarboxylase (rat embryo), 110, 733
prostaglandin synthase (ovine seminal vesicles), 110, 733
Lectins
from different plants, binding to rat intestinal microvillus membranes during postnatal development, 113, 391
-glycolipid interaction, detection (Bandeiraea simplicifolia, Helix pompatia, soybean), 115, 360
from horseshoe crab serum, see Polyphemin
immobilized, glycoprotein binding decrease after radioiodination, 110, 103
metal ion content, effect on binding activity, 115, 1069
Lens
capsule, in vivo glycosylation (normal, diabetic human), 117, 51
heptitol and octitol components, identification (human, Octodon degu), 116, 988
Leucine
^{15}N-labeled, [^{15}N]glutamate source in cerebellar explants (mouse), 115, 174
Leucine aminopeptidase, see Aminopeptidase (cytosol)
Leucine-enkephalin (Leu-enkephalin)
antagonist in norepinephrine-induced Ca^{2+} accumulation (rat atria), 117, 536
immunoassay with specific monoclonal antibodies, 113, 757
L-Leucinthiol, see 2-Amino-4-methyl-1-pentanethiol
Leukemia
erythrocyte K562 cell line, insulin binding, characterization (human), 117, 823
Jurkat T-cell, growth factor, isolation and characterization (human), 117, 623
promyelocytic, see Promyelocytic leukemia cells
Leukocytes
common antigen T200, O-glycosidically linked oligosaccharides of poly-N-acetyllactosamine type, differences in B and T cells (human), 110, 424
intact, 15-hydroxy-eicosatetraenoic acid transformation into 8,15- and 14,15-isomers, comparison with hemoglobin catalytic activity (human), 110, 273
polymorphonuclear, see Neutrophils
Leukotriene A
formation from arachidonic acid, hemoglobin-catalyzed transformation of 15-hydroxy-eicosatetraenoic acid to 8,15- and 14,15-isomers (human), 110, 273
Leukotriene A_4
intermediate in cytochrome P-450-catalyzed conversion of 5-hydroperoxyeicosatetraenoic acid to

leukotriene B_4 (rabbit liver), 115, 995
Leukotriene B_4
chemotactic and degranulating activities for human neutrophils (guinea pig leukocytes), 117, 282
generation, selectivity (canine tracheal epithelial cells), 114, 1071
highly purified, chemotactic potency reevaluation (human lymphocytes), 110, 842
5-hydroperoxyeicosatetraenoic acid cytochrome P-450-catalyzed conversion, leukotriene A_4 intermediate (rabbit liver), 115, 995
inactivation by hydroxyl radicals generated by two acetaldehyde-xanthine oxidase systems, 110, 266
metabolism by hepatic cytochrome P-450 (rat), 114, 850
stimulation of
natural killer cell activity toward target cells infected with herpes simplex virus (human), 113, 531
neutrophils, intracellular free Ca^{2+} increase (human, rabbit), 113, 44
Leukotriene B_5
eicosapentaenoic acid-derived, chemotactic and degranulating activities for human neutrophils (guinea pig leukocytes), 117, 282
Leukotriene C_4
inactivation by hydroxyl radicals generated by two acetaldehyde-xanthine oxidase systems, 110, 266
LTD_4 analog effect (guinea pig), 117, 732
-stimulated prostacyclin biosynthesis, agonist-specific desensitization (human endothelial cells), 117, 780
Leukotriene C_4 receptors
identification in lung (guinea pig), 116, 1136
Leukotriene D_4
analog effect (guinea pig), 117, 732
conversion from arachidonic acid by alveolar macrophages, increase in allergic bronchial asthma (human), 111, 518
inactivation by hydroxyl radicals generated by two acetaldehyde-xanthine oxidase systems, 110, 266
Leukotriene D_4 receptors
identification in lung (guinea pig), 116, 1136
Leukotriene E_4
inactivation by hydroxyl radicals generated by two acetaldehyde-xanthine oxidase systems, 110, 266
LTD_4 analog effect (guinea pig), 117, 732
Leukotrienes, see also specific leukotrienes
acid secretion stimulation (rabbit gastric parietal cells), 114, 897
production by neutrophils incubated with dihomo-γ-linolenic acid (human), 114, 855
radioimmunoassay (guinea pig lung), 117, 574
Leumorphin
preproenkephalin B-derived endogenous opioid peptide, characterization (porcine pituitary), 117, 695
Leupeptin
cathepsin B strong stimulation in vivo (mouse heart, kidney, liver, striated muscle), 110, 332; erratum, 112, 347
Leydig cells
tyrosine-specific protein kinase activity (rat), 116, 400
LH-RH, see Luteinizing hormone-releasing hormone
Ligand
internalization by low density and scavenger lipoprotein receptors (human monocyte macrophages), 116, 626
Light
activation of water-oxidation system and photosystem II electron transport, Ca^{2+} effect (dark-grown Picea abies chloroplasts), 116, 803
cGMP hydrolysis induction by 3':5'-cyclic-nucleotide phosphodiesterase, dependence on Ca^{2+} (bovine retinal rod outer segment), 113, 317
Lignin
biodegradation, extracellular H_2O_2-requiring enzyme preparation (Phanerochaete chrysosporium), 114, 1077
model compound, degradation by Phanerochaete chrysosporium culture or in photochemical system, 111, 200
substrates, H_2O_2 production induction (Phanerochaete chrysosporium), 117, 275
Linoleate hydroperoxide
stimulation of oxygen consumption by microsomes, cytochrome P-450 role (rat liver), 110, 646
Linoleic acid
lipoxygenase-catalyzed conversion to 12-oxo-phytodienoic acid (Vicia

faba pericarp), 111, 470
incorporation into plasma membrane phospholipids, effect on ATPase activities and physical properties (rat liver), 117, 809
oxygenation to vicinal dihydroxy acids with NADPH (rabbit hepatic microsomes), 111, 644
Lipids
bilayer membrane
acetylcholine receptor exposure (Torpedo californica), 115, 1075
dynamics, rhodopsin-lipid interactions, high-resolution solid-state ^{13}C NMR (bovine retina), 114, 1048
membrane, composition in hepatocytes, Kupffer cells, and endothelial cells (rat), 113, 845
mobilization, stimulation by locust adipokinetic hormone (Manduca sexta), 115, 924
neutral fraction, fatty acid incorporation increase in measles virus persistently-infected BGM cells, 112, 29
peroxidation, see Lipoperoxidation
planar bilayers doped with colicin A, two classes of time- and voltage-dependent conductance, 113, 765
-steroid interactions in phospholipid vesicles, fluorescence anisotropy study, 113, 799
synaptosome membrane, developmental spin label study (rat brain cortex), 117, 688
synthesis
inhibition by 2,4-dinitrofluorobenzene parallel with creatine phosphokinase inhibition (rat quarter diaphragm), 111, 884
stimulation by insulin chemical mediator (rat hepatocytes), 115, 375
vesicles, and vacidin or candicidin D interactions, circular dichroism spectroscopy, 116, 520
-water interface, ionophore conformational change mediation, 114, 632
Lipomodulin
dexamethasone-induced synthesis in histiocytic lymphoma cell line U937, differentiation induction (human), 111, 551
Lipoperoxidation
initiation by
chelated ferrous ion, requirement for ferric ion, 111, 777
daunorubicin (mouse heart), 110, 399
2,3,7,8-tetrachlorodibenzo-p-dioxin, detection by thiobarbituric acid and conjugated diene methods (rat liver), 111, 854
NADPH-dependent, correlation with cytochrome P-450 degradation (bovine adrenal cortex mitochondria), 110, 559
superoxide-dependent, OH· probes, catalase inhibition mechanisms (bovine, human), 117, 901
Lipophorin
denaturated, pre-phenoloxidase activation (silkworm hemolymph plasma), 113, 562
Lipoprotein lipase
hydrolysis of dihexanoyl- and diheptanoyl-phosphatidylcholine, unaffected by apolipoprotein C-II (bovine milk), 113, 811
inhibition by RHC 80267
intact platelets (human), 116, 68
in thrombin-activated platelets, effect on arachidonic acid release induction (human), 113, 241
Lipoprotein receptors
low density and scavenger, ligand internalization (human monocyte macrophages), 116, 626
Lipoproteins
high-density, see High-density lipoproteins
interaction with 1-β-D-arabinofuranoysIcytosine-5'-diphosphate-L-1,2-diacylglycerol (canine, human serum), 116, 368
low-density, see Low-density lipoproteins
serum, effect on 7β-hydroxycholesterol cytotoxicity (rat cultured hepatoma cells), 117, 851
Liposomes
cholesterol-free phospholipid domains, selectivity for staining by merocyanain 540 and N-ε-dansyl-L-lysine, 111, 768
containing plant phosphatidylinositol, tumor cell cytotoxicity induction (human, mouse), 114, 863
dicarboxylate exchange system reconstitution by incorporation of Triton extract of mitochondrial inner membrane from rat liver, 113, 205
large unilamellar
bacteriorhodopsin incorporation by reverse phase evaporation, 111, 373
elastic properties, effects of cholesterol, hopanoids, and α-, ω-dihydroxycarotinoids, 110, 320
Na^+ permeability induced by 15-O_5 macrocyclic polyether

carriers, 116, 981
outer surface, insulin covalent binding, 117, 399
small unilamellar
fusion induction by Ca^{2+} and low pH, freeze-fracture study, 110, 15
removal from circulation and uptake into liver, increase by inclusion of lactosylcerebroside or dimannosylglyceride (mouse), 110, 140
sonicated of dipalmitoyl phosphatidyl choline, steroid-lipid interactions, fluorescence anisotropy study, 113, 799
uptake of microcrystalline benzo[a]pyrene, synchronous fluorescence study, 112, 1069
β-Lipotropin
monoclonal antibodies, antigenic determinant (mouse), 116, 527
Lipoxygenase
arachidonic acid
catalysis, inhibition by flavonoids (rat basophilic leukemia cells), 116, 612
metabolism, stimulation by anti-inflammatory drugs (rat neutrophils from reverse passive Arthus reaction pleural exudates), 112, 586
inhibitor, S-containing polyunsaturated fatty acids (soybean), 114, 937
6,9,12-octadecatrienoic acid ω6-oxygenation (human platelets), 117, 593
pathway
cigarette smoke effect (rat platelets), 115, 499
and glutathione peroxidase coupling, 12-hydroperoxytetraenoic acid formation (selenium-deficient rat platelets), 117, 183
Lithium chloride
partial stimulation of methionine-enkephalin synthesis by increasing precursor mRNA content (rat striatum), 113, 391
Low-density lipoproteins
binding and internalization by fibroblasts, decrease by cAMP (human), 112, 795
Luciferase
coupled with oxidoreductase, concentration effect on bioluminescence (Vibrio harveyi), 111, 266
Lucifer yellow CH
fluorescence labeling of glycoconjugates on oxidized thymocyte surfaces (mouse), 112, 872
Lung
1,1-dichloroethylene selective toxic effect: cellular injury and impairment in cytochrome P-450-dependent monooxygenases (mouse), 110, 675
Luteinizing hormone
release by
ovine and chicken pituitary cells in vitro, mammalian and chicken luteinizing hormone-releasing hormone activities, comparison 111, 1082
pituitary cells from immature rat, regulation by Cu and thiols, 112, 306
stimulation of ornithine decarboxylase activity and testosterone production (rat testicular cells), 112, 496
subunit β precursor, pituitary mRNA translation product, effect of estradiol treatment in vivo (rat), 114, 65
Luteinizing hormone-releasing hormone (LH-RH)
comparative structure-activity studies of mammalian [Arg^8]LH-avian [Gln^8]LH-RH, and analog [Lys^8]LH-RH, 111, 1082
specific binding to luteal tissue (human), 114, 750
synthesis, precursor peptide characterization (human, murine, rat hypothalami), 117, 872
synthetic analogs containing pyridylalanines, ovulation inhibition at nanogram dosage (rat), 111, 1089
Lutropin, see Luteinizing hormone
Lymphoblastoid cells
differential binding of interferon α subtypes A, C, D, and hybrid molecules to receptors (human Daudi cells), 110, 537
Lymphocytes
AY9944-induced inhibition of cholesterol and DNA synthesis (human peripheral blood), 110, 82
internalization of Fab component from anti-insulin receptor antibodies, comparison with insulin internalization (human), 114, 230
phytohemmagglutin-induced proliferation, nicotinamide or 3-aminobenzamide effect (human), 116, 428
proteases, strain-related activity (murine cell surface), 114, 600
regulatory volume decrease, inactivation by N-ethylmaleimide (human peripheral blood), 117, 154

T cells
concanavalin A-induced proliferation, inhibition by 5'-deoxy-5'-methylthioadenosine, mechanism (rat), 113, 425
growth factor, isolation and characterization (human Jurkat leukemia cell line), 116, 623
Lymphoma
cell lines, tyrosine phosphorylation (human), 117, 843
Lymphosarcoma
P1798 murine, solid and ascites glycosaminoglycans, 114, 976
protein kinase activated by Ca/phospholipid or H4 protease, isolation and characterization (murine), 116, 675
Lysine
modification in Ca,Zn-superoxide dismutase, effect on anion affinity and anion inhibition (bovine erythrocytes), 111, 860
residues, role in glyceraldehyde-phosphate dehydrogenase binding to erythrocyte membrane (human), 116, 423
Lysine decarboxylase
inhibition by putrescine and spermidine (Escherichia coli-induced, -noninduced cells), 114, 882; erratum, 116, 355
Lysophosphatidylcholine
thrombin-stimulated production, inhibition by cAMP (human platelets), 112, 693
Lysophosphatidylethanolamine
thrombin-stimulated production, inhibition by cAMP (human platelets), 112, 693
Lsyophospholipids
acylation by arachidonic acid, relative rates with various molecules (rat pancreatic acini), 112, 502
Lysosomal enzymes
binding by brain protein isolated by phosphomannan-Sepharose chromatograph (Macaca radiata), 112, 398
Lysosomal protease
cathepsin D, translocation across microsomal membranes, signal recognition particle requirement (canine, porcine), 115, 275
Lysosomes
hepatic, injected and in vivo synthesized dolichol distribution (rat), 115, 917
intra pH, relation to cystine accumulation (human normal, cystinotic fibroblasts), 116, 154
Lysozyme
active region, homology with Schizophyllum commune cellulase (hen egg-white), 116, 408
Lysyl oxidase
histone H1 substrate in vitro (bovine aorata), 115, 186
Lysyl-tRNA synthetase
and arginyl-tRNA synthetase complex, 12-S, hydrodynamic properties and structure (rat liver), 117, 464

M

α_2-Macroglobulin
-protease complex, binding and clearance (murine peritoneal macrophages), 114, 757
proteinase-induced thiol groups, localization on complex surface (human), 111, 964
Macrophage receptors
-mediated mannosyl-oligosaccharide uptake and degradation, swainsonine effect (rat lung), 116, 922
Macrophages
alveolar, leukotriene D_4 synthesis increase in allergic bronchial asthma (human), 111, 518
depleted cultures, immune response to sheep erythrocytes, interleukine 1, monokine, and N-acetyl-muramyl-L-alanyl-D-isoglutamine effects (mouse), 114, 721
monocyte, from 1α-25-dihydroxy-vitamin D_3-induced promyelocytic leukemia-cell differentiation (human), 117, 86
peritoneal
arachidonic acid metabolism, reactive oxygen and cAMP production (rat), 114, 549
ionophore A32187-stimulated production of prostaglandins and cAMP, inhibition by trifluoperazine and verapamil (rat), 114, 248
prostaglandins E_2 and I_2 binding to different receptors, assay with Millipore filter system (rat), 114, 155
zymosan-induced lysosomal hexosaminidase secretion, mannose-glycoprotein receptor role (mouse), 113, 102
selective phagocytosis of senescent and in vitro aged erythrocytes, receptor identification (rat liver), 115, 551
Magnesium ion
-actin, polymerization characteristics, 116, 478

binding to elastase-inactivated carbamoyl-phosphate synthetase (ammonia) (rat liver), 117, 238
effect on high-affinity agonist binding sites of muscarinic receptor subtypes (rat cerebellum, cerebral cortex, heart), 116, 284
requirement for NADPH oxidase activity in polymorphonuclear leukocytes (guinea pig), 115, 261
Magnetic circular dichroism
horseradish peroxidase compound I, temperature dependence, 112, 515
Malate
conversion from fumarate by fumarate hydratase, absolute stereochemistry monitored by neutron diffraction, 115, 1048
Malate dehydrogenase
adrenalectomy and dexamethasone effects in vivo (rat testes), 115, 606
Malate dehydrogenase (oxaloacetate-decarboxylating) ($NADP^+$)
adrenalectomy and dexamethasone effects in vivo (rat testes), 115, 606
induction by fructose and insulin in diabetic liver by translatable mRNA increase (rat), 112, 176
4-(N-Maleimido) benzyltrimethylammonium
specific for nicotinic acetylcholine receptor, interaction with axonal membrane (lobster), 111, 61
L-Malic acid
angiotensin II analogs, molecular weight and amino acid sequence, fast atom bombardment mass spectra, 115, 653
Malic enzyme, see Malate dehydrogenase (oxaloacetate-decarboxylating) ($NADP^+$)
Malonate
external, exchange with internal malonate or phosphate, mitochondrial transport system reconstitution in liposomes, 113, 205
Malondialdehyde
production by 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced lipoperoxidation, detection by thiobarbituric (rat hepatic microsomes), 111, 854
Mammary gland
differentiation in vitro, inhibition by 5-azacytidine, mechanism (mouse), 111, 150
Mammary tumors
induced by 7,12-dimethylbenz[a]anthracene, superoxide dismutase isozymes and activities, estrogen effect (rat), 113, 883
Manganese(II) dioxygenase
extradiol-cleaving, penicillamine-Mg(II) complex model, 115, 618
Manganese ion
in photosystem II of inside-out thylakoid vesicles, removal by EDTA causing oxygen evolution inhibition (pea chloroplasts), 110, 545
uptake by crustacean nerve fiber in resting state and during potassium depolarization, radioisotope and NMR studies (Collinectes sapidus), 111, 560
Manganese ion (II)
-penicillamine complex, extradiol-cleaving manganese(II) dioxygenase model, 115, 618
Mannose-glycoprotein receptors
in initiation of zymosan-induced secretion of lysosomal hexosaminidase by macrophages (mouse), 113, 192
α-D-Mannosidase
binding to protein isolated from monkey brain by phosphomannan-Sepharose chromatography (Macaca radiata), 112, 398
and bovine liver phosphomannosyl receptors, interactions (Dictyostelium discoideum), 116, 541
lysosomal, synthesis in normal and mannosidosis fibroblasts (human), 115, 1083
Mannosidosis
fibroblasts, lysosomal α-D-mannosidase synthesis (human), 115, 1083
Mannosyl-oligosaccharide
macrophage receptor-mediated uptake and degradation, swainsonine effect (rat lung), 116, 922
Maple syrup urine disease
metabolites, myelin degradation initiation (rat brain), 114, 440
Mass spectrometry
derivatives of glycolipid antigen from human pancreatic carcinoma, 110, 383
fast atom bombardment, see Fast atom bombardment mass spectrometry
^{127}I-plasma desorption, quasi-molecular ions from neurotoxin (cobra venom), 110, 519
Mast cells
activated by ionophore A23187 and compound 48/80, phosphatidylinositol de novo synthesis, role in Ca^{2+} uptake and histamine release (rat), 111, 581
Mastoparans
Ca^{2+}-dependent high affinity bind-

ing to calmodulin, kinetics (hornet, wasp venoms), 114, 50
Measles virus
persistent infection, stimulation of fatty acid incorporation into neutral lipid fraction (BGM cells), 112, 29
Mefenamic acid
acceleration of proton exchange between octanol and water, role in anti-inflammatory activity, 113, 745
Megamodulins
isolated from rabbit brain, bakers' yeast, wheat germ, and Escherichia coli, mammalian and yeast phosphoprotein phosphatase stimulation, 114, 403
Melanocyte-stimulating hormone (MSH), see Melanotropin
Melanoma
differentiation induction by polyamine antimetabolites (murine Cloudman S91), 113, 18
laminin receptor isolation (murine BL6), 111, 804
plasma membrane fragment isolation by various methods, comparative study (mouse), 113, 462
γ3-Melanotropin
elimination by antisera, inhibition of corticotropin-induced increase in adrenal steroidogenesis (normotensive and spontaneously hypertensive rats), 110, 357
Melezitose
active hydrogen content, fast atom bombardment mass spectrometry following H-D exchange, 112, 126
Melibiose
active hydrogen content, fast atom bombardment mass spectrometry following H-D exchange, 112, 126
Melphalan
DNA replication partial reduction in melanoma cells, detection of replication intermediates (human), 110, 530
resistance, membrane sulfhydryl group role (murine L1210 leukemia cells), 117, 670
Membrane potential
Ca^{2+}-dependent, induction by dibutyryl cAMP (murine pancreatic islet B cells), 112, 614
collapsed by Ca^{2+} and phosphate, restoration by ADP or ATP with Mg^{2+} (rat hepatic mitochondria), 111, 792
photogenerated, measured by tetraphenylphosphonium ion redistribution
effect on respiratory electron transport (Rhodopseudomonas capsulata), 113, 155
inhibition of endogenous oxygen consumption (Rhodopseudomonas capsulata), 113, 155
Membranes
adrenal medullary, exocytosis-like interaction with chromaffin granules, protein phosphorylation role (bovine), 110, 55
axonal crustacean, interaction with 4-(N-maleimido) benzyltrimethylammonium specific for nicotinic acetylcholine receptor (lobster), 111, 61
bacteriorhodopsin-deficient, resolution of halorhodopsin chromophoric polypeptides (Halobacterium halobium), 112, 332
basement, see Basement membranes
brain
α-bungarotoxin binding inhibition by cholin from calf brain extract (chicken), 111, 82
β-endorphin binding sites, comparative kinetics (rabbit), 111, 1096
opiate δ-receptor affinity to synthetic peptide deltakephalin (rat), 111, 390
brush-border
glucose transporter solubilization by Triton X-100, stimulation by Na^+ (porcine kidney), 112, 444
γ-glutamyltransferase conversion of precursor to subunit forms (rat kidney), 114, 889
protein binding Clostridium perfringens enterotoxin, isolation and identification (rabbit), 112, 1099
collagen, see Collagen membranes
Descemet's, endothelial cell and type IV collagen identification (bovine), 116, 619
epidermal, sphingomyelin binding site constituent for tumor promoting phorbol esters, indole alkaloids, and polyacetates (mouse), 112, 709
erythrocyte, see Erythrocyte membranes
erythroleukemia cells, tyrosine phosphorylation stimulated by dimethyl sulfoxide (mouse), 112, 413
fetal, Ca and phosphate fluxes (guinea pig), 110, 438
gastric mucosa, acid secretory mechanism suppression by allyl-isothiocyanate (porcine, bullfrog), 112, 464

hepatic
epidermal growth factor receptor proteolysis by endogenous Ca^{2+}-activated neutral protease (rat), 113, 255
insulin-induced release of low-molecular-weight stimulator and inhibitor of cytosolic acetyl-CoA carboxylase (rat), 110, 789
sinusoidal, oleate binding in vitro, albumin and β-lactoglobulin effects (rat), 112, 88
ileal brush border, [^{125}I]intrinsic factor binding (rat), 115, 238
intestinal microvilli, plant lectin binding changes during postnatal development (rat), 113, 400; erratum, 116, 355
intracytoplasmic, diphenylhexatriene fluorescence polarization, differentiation inducer effects (murine Friend leukemia cells), 117, 294
L cell, interferon β-induced fluidity increase, fluorescence assay (mouse), 110, 88
lipid bilayers
acetylcholine receptor exposure (Torpedo californica), 115, 1075
containing auxin-binding protein from maize leaves, generation of auxin/ATP-dependent electrochemical response, 110, 300
oriented, angle resolved fluorescence depolarization, 116, 462
lipid composition in hepatocytes, Kupffer cells, and endothelial cells (rat), 113, 845
mammary, binding of ovine prolactin, pH-dependent dissociation of complex (rabbit), 111, 224
melanoma cells, fragment isolation from culture, comparative study (mouse), 113, 462
microsomal, lysosomal protease cathepsin D translocation, signal recognition particle requirement (canine, porcine), 115, 275
multilamellar planar containing pancreatic islet extracts, Ca^{2+} ionophoretic activity increase by extracts from islet-activating protein-pretreated islets, 112, 684
myoepithelial from mammary tissue, oxytocin binding unaffected by estrogenic compounds (rat), 112, 717
negatively charged, Ca^{2+}-induced aggregation, enhancement by synexin-like protein from adrenal medullary or liver (bovine), 112, 147
pancreatic, somatostatin binding, regulation by Ca and Na ions (guinea pig), 115, 827
pituitary, gonadotropin-releasing hormone receptor photoaffinity labeling with hormone antagonist (rat), 110, 116
plasma, see Plasma membranes
pulmonary, β-adrenergic receptor heterogeneity, proteinase inhibitor effects (hamster, rat), 110, 504
purple, see Purple membranes
renal basal-lateral vesicles, Na^{2+}-dependent glutathione transport (rat), 112, 55
retinal cell, photoreceptor phospholipid reduced phosphorylation in visual norpA mutants (Drosophila melanogaster), 111, 567
Rous sarcoma virus-transformed rat cells, absence of epidermal growth factor-dependent protein phosphorylation, 113, 678
skeletal muscle, purification monitoring by tetrodotoxin, ouabain, and insulin receptor determination (rabbit), 112, 521
synaptic, see Synaptic membranes
synaptosomal, see Synaptosomal membranes
transverse tubule, irradiation inactivation, nitrendi pine receptor molecular size determination (rabbit skeletal muscle), 111, 878
uv-irradiated Escherichia coli, fatty acid composition effect on liquid holding recovery, 110, 609
ventral prostatic, in vitro fluidization by aliphatic alcohols causing prolactin receptor activation (rat), 113, 220
ventricular, adenylate cyclase-coupled adenosine receptor detection (guinea pig heart), 110, 208
wheat protoplasts, Ca transport not affected by phytochrome, 113, 171
Mercaptan
reaction with highly strained ether ring in neocarzinostatin chromophore, NMR, 113, 538
β-Mercaptoethanol
effect on β-adrenergic receptor structures (mammalian), 116, 777
β-Mercaptoethylamine, see Cysteamine
Mercaptomethyl lactams
conformationally restricted inhibition of angiotensin converting

enzyme, mechanism, 111, 166
Mercuric chloride
stimulation of phospholipid hydrolysis and cell death, Hg^{2+} acting as Ca-mimetic agent (murine fibroblasts), 110, 758
S-Mercuric-N-dansylcysteine
acetylcholinesterase modification, fluorescence study (Torpedo californica), 112, 941
Mercuric reductase
and NADPH, reaction kinetics, stopped-flow study (Pseudomonas aeruginosa), 117, 231
Merocyanine 540
fluorescent staining of leukemic lymphocytes, role of cholesterol-free phospholipid domains in membranes (human, mouse), 111, 768
Meromyosin
heavy, active site binding to nucleotide (rabbit), 115, 312
Metachromatic leukodystrophy
arylsulfatase A synthesis as cross-reactive protein with altered properties (human fibroblasts), 112, 198
Metal ions, see also specific metal ions
content in lectins, effect on binding activity, 115, 1069
Metallothionein
Cd detoxication after intraperitoneal injection (rainbow trout), 110, 584
Hg- and Cu-containing, spectroscopic characterization (rat kidney), 115, 167
Zn effect on Stokes radius (rat liver), 114, 998
Methane
major constituent of biogas produced by castor cake anaerobic digestion by mixed culture from cow dung, 110, 32
Methanobacterium thermoautotrophicum
cyclic-2,3-diphospho-D-glycerate levels, inorganic phosphate role, 116, 1125
Methapyrilene
intoxication, effect on hexokinase and glucokinase activity in parenchymal and nonparenchymal cells (rat liver), 115, 1090
Methemoglobin
-ascorbic acid interaction, production of activated oxygen species, mechanism, 111, 980
complexes and subunits, Soret magnetic circular dichroism spectra, role in ferric heme spin states (human), 114, 318
Methemoglobin reductase
solubilization during reticulocyte maturation, ATP-dependent proteolysis role (rabbit), 116, 357
Methimazole
metabolite inhibiting microsomal N-hydroxylation of 2-amino-6-nitrotoluene (rat liver), 113, 433
Methionine
dependence in tumor cells (human), 117, 429
exogenous, effect on mRNA formation in 7-S storage protein β-subunit (cultured soybean cotyledons), 117, 658
^{35}S-labeled
short-lived proteins, degradation, stimulation by amino acids (rat hepatocytes), 117, 509
sulfur incorporation into biotin (Escherichia coli), 110, 243
synthesis from 5'-methylthioadenosine and 5'-methylthioinosine (human, murine lymphoblasts, human tissue extracts), 112, 391
Methionine-enkephalin (Met-enkephalin)
-containing peptide BAM22P, substrate for kallikreins from equine urine and porcine pancreas, kinetic constants, 112, 366
synthesis in striatum, stimulation by haloperidol or lithium chloride injections (rat), 113, 391
m-Methoxybenzamide
chondrocyte differentiation enhancement in limb bud cell culture (chicken), 111, 750
2-Methoxy-2,4-diphenyl-3(2H)-furanone
-dipeptide chromophoric reaction, chirooptical properties, 114, 433
8-Methoxypsoralen
and uv irradiation, differential inhibition of DNA, RNA, and protein synthesis (L1210 cells), 112, 965
3-Methylcholanthrene
induction of
aryl hydrocarbon hydroxylase (rat fetal hepatic microsomes), 113, 59
cytochrome P-450, high spin form isolation and characterization (rat liver), 111, 504
p-nitrophenol UDPglucuronyltransferase activity, comparison with ethanol induction (rabbit hepatic microsomes), 111, 219
Methylcyclohexenone
double bond reduction by microorganisms (Clostridium sp., Streptomyces strains), 110, 908
5-Methylcytosine
absence in satellite DNA from

sperm (bovine, murine), 113, 695
[^{3}H]cisMethyldioxolane
regulators, effect on high-affinity agonist binding sites (rat cerebellum, cerbral cortex, heart), 116, 284
β-γ-Methylene-ATP
inhibition of exocytosis-like interaction between adrenal medullary plasma membranes and chromaffin granules, role of protein phosphorylation inhibition (bovine), 110, 55
4-Methyleneglutamine
synthesis from 4-methyleneglutamic acid and ammonia, catalysis by amide synthetase (germinating peanuts), 111, 484
4-Methyleneglutamine synthetase
amide synthetase, purification from germinating peanuts, 111, 484
N^5-Methyl-N^5-formyl-2,5,6-tri-amino-4-hydroxypyrimidine
carcinogen-DNA adduct, identification (rat liver), 110, 625
4-O-Methyl-D-glucuronic acid
specific binding by soybean agglutinin, 111, 798
4-O-Methyl-D-glucurono-L-rhamnan
produced by Rhizobium japonicum strains, specific binding by soybean agglutinin, 111, 798
γ-Methylglutamic acid
diastereoisomeric in synthetic pentapeptides, microsomal vitamin K-dependent carboxylation substrates (rat), 113, 454
Methylglyoxal bis(guanylhydrazone)
polyamine biosynthesis inhibition causing melanoma cell differentiation (murine Cloudman S91), 113, 18
7-Methylguanine
-tryptophan systems, stacking interactions, mRNA model, 115, 849
3-Methylindole
free radical generation in NADPH-dependent microsomal system, ESP (caprine lung), 114, 168
Methylisobutylxanthine
inhibition of tumor promoter-induced interleukin 2 production by thymocytes (mouse), 114, 93
Methyl methane sulfonate
-damaged DNA, DNA synthesis and thymidylate synthase inhibition by 3-aminobenzamide, β-lapachone, and aphidicolin (human), 117, 30
N-Methyl-N'-nitro-N-nitrosoguanidine
DNA break induction, detection by nick translation (human fibroblasts), 111, 383
effect on deoxynucleoside triphosphate pools (Chinese hamster V79 cells), 114, 458
Methylnitrosourea
alkylation of DNA and poly(dG-dC)·poly(dG-dC) in B and Z forms, 116, 682
O-Methylsterigmatocystin
conversion from sterigmatocystin in cell-free system (Aspergillus parasiticus mutant), 116, 1114
5-Methyltetrahydrofolate
intestinal transport, cAMP effect (rat jejunum), 115, 756
5'-Methylthioadenosine
metabolism to methionine, effect on cell proliferation (human, murine lymphoblasts), 112, 391
1-Methyl-2-thioimidazole
metabolism, iodide peroxidase and dimethylaniline monooxygenase roles (porcine thyroid), 116, 449
5'-Methylthioinosine
metabolism to methionine, effect on cell proliferation (human, murine lymphoblasts), 112, 391
Methyltransferase I
inactivation by GTP, effect on S-adenosyl-L-methionine-mediated methylation of phosphatidylethanolamine (rat hepatic plasma membrane), 114, 425
Methyltransferase II
stimulation by GTP, effect on S-adenosyl-L-methionine-mediated methylation of phosphatidylethanolamine (rat hepatic plasma membrane), 114, 425
4-Methylumbelliferyl-α-D-N-acetylneuraminic acid
neuramindases, genetically different forms in sialidosis, galactosialidosis, and sialolipidosis (human leukocytes), 117, 470
O-(4-Methylumbelliferyl)-glycosides
fluorescence, effects of several solvents and amino acids, 110, 926
Metyparone
inhibition of aflatoxin B_1 uptake and binding by isolated hepatocytes (rat), 110, 668
Mevalonate
sole carbon source for soil bacteria, isoprenoid synthesis, 110, 187
Mg-ATP
dissociation constant at millimolar ATP Levels, ^{31}P NMR and optical absorbance spectroscopy (perfused, ischemic heart muscle), 117, 210
induction of erythrocyte membrane

shape changes, phosphorylation and ATP binding roles (human), 112, 384
phenol 2-monooxygenase regulation, pH effect (rat liver microsomes), 116, 966
Micrococcal nuclease
digestion of chromatin DNA, transcription effect (HeLa cell nuclei), 116, 312
α_1-Microglobulin
isolation and characterization (rat urine), 116, 180
neutral microprotein isolation and characterization (guinea pig, human, rabbit), 117, 202
Microsomal enzymes
inhibitors, effect on aflatoxin B_1-induced cytotoxicity and RNA synthesis inhibition (rat hepatocytes), 115, 15
Microsomes
benzo[a]pyrene hydroxylase characterization (Aspergillus ochraceus), 113, 497
cerebral cortex, keratan sulfate-like glycoconjugate binding (rat), 111, 28
cytochrome P-450 immunochemical specificity (tulip bulbs), 115, 46
differentiation induction by retinol, mechanism (embryonal carcinoma cells), 114, 593
epidermal, aryl hydrocarbon hydroxylase metabolizing benzo[a]pyrene, inhibition by ellagic acid (rat), 114, 388
hepatic
2-amino-6-nitrotoluene N-hydroxylation, inhibition by methimazole metabolite (rat), 113, 433
bilirubin diglucuronide formation, intact tetrapyrrole affinity and thin layer chromatography (rat), 117, 406
electron transport proteins, alloxan reduction (porcine), 114, 578
enzyme-induced aziridine formation from 2-chloroethylaminobenzoquinone derivatives (rat), 110, 220
injected and in vivo synthesized dolichol distribution (rat), 115, 917
oxygen consumption stimulation by organic hydroperoxides, catalysis by cytochrome P-450 (rat), 110, 646
phenacetin mutagenicity increase by deacetylation, activity in hamster and rat, 110, 746
vitamin K-dependent carboxylation, diastereoisomeric γ-methylglutamic acid-containing pentapeptide substrates (rat), 113, 454
oxidation of hydroxyl radical scavenging agents and ethanol, EDTA and Fe effects (rat liver), 116, 765
pulmonary
1,1-dichloroethylene-induced reduction of cytochrome P-450 level and related monooxygenase activities (mouse), 110, 675
3-methylindole-induced free radical generation, EPR (caprine), 114, 168
renal
25-hydroxyvitamin D_3 conversion to unidentified metabolite and 25,26-dihydroxyvitamin D_3 (rat), 110, 766
$NaHCO_3$ incorporation inhibition in vitamin D deficiency (rat), 113, 294
Microtubules
assembly
from active subunits, inhibition by denaturated tubulin (porcine brain), 110, 463
by incubation with GTP, disassembly by calmodulin-dependent protein kinase (rat brain), 110, 287
Microvitellogenin
purification and properties, juvenile hormone role in appearance and uptake (Manduca sexta), 117, 643
Milk
colony stimulating factor isolation (human), 114, 797
Minichromosomes
uv-irradiated, substrates for DNA repair endonucleases (simian virus 40), 113, 309
Misonidazole
reduced to hydroxylamine state, reaction with glutathione to form stable conjugates, 112, 1013
Mitochondria
adrenal cortex, correlation between NADPH-dependent lipid peroxidation and cytochrome P-450 degradation (bovine), 110, 559
ATP-stimulated Ca^{2+} accumulation (adrenal medulla), 117, 245
-bindable and nonbindable hexokinase, hydrophobicity difference (rat brain), 115, 1101
cardiac
adenosine release, role of adenine nucleotide translocase and ATP/ADP ratio (rat), 113, 990

calmodulin-binding protein from matrix, isolation and properties (bovine), 113, 633
hepatic
5-aminolaevulinate synthase translocation, inhibition by hemin (chicken), 115, 700
Ca^{2+} transport, chronic ethanol feeding and acetaldehyde metabolism effects (rat), 117, 169
deenergized by Ca^{2+} and phosphate, membrane potential restoration by ADP or ATP with Mg^{2+} (rat), 111, 792
dicarboxylate transport system, reconstitution by incorporation of inner membrane Triton extract into liposomes (rat), 113, 205
incubated with glutamate dehydrogenase precursor synthesized in cell-free system, enzyme maturation (rat), 110, 499
protein release in vitro, stimulation by cytosolic proteins synthesized in cell-free system (rat), 113, 199
uncoupling by ionophorous fraction from human uremic plasma and normal urine (rat), 111, 326
pre-5-aminolaevulinate synthase transfer, inhibition by hemin (chick embryo liver), 117, 344
protein phosphorylation in vitro, inhibition by dichloroacetate and AMP (rat brain, heart, liver), 111, 1054
rRNA genes, resemblance to interferon-induction-specific sequence cDNA clones, 114, 670
yeast
inner membrane hydrophobic protein 30K, comparison with cytochrome b-c_1 complex, 110, 945
tribenzylphosphate inhibitory effects on phosphate active transport and oligomycin-sensitive ATP synthesis, mechanism (Saccharomyces cerevisiae), 113, 751
Mitomycin C
CHO cell sensitivity, increase after pretreatment with dibutyryl cAMP, decrease after post-treatment, 111, 247
effect on deoxynucleoside triphosphate pools (Chinese hamster V79 cells), 114, 458
-modified DNA: bleomycin and DNase 1 nucleotide sequence cleavage, 117, 916
Mossbauer spectroscopy
Fe-bleomycin complexes, 110, 827
Molibdenum cofactor
oxidation product from nitrate reductase (Escherichia coli) and xanthine oxidase (bovine milk), identification as thieno[3,2-g]-pterine derivative, 111, 537
Molybdate
effect on
estrogen receptor activation mechanisms (rabbit, rat uterine tissue), 115, 685
progesterone receptors (chick oviduct), 114, 479
Monamine oxidase, see Amine oxidase (flavin-containing)
Monobutyryl cAMP
inhibition of Na^+,K^+-ATPase (hamster sperm homogenate), 112, 132; erratum, 114, 431
Monoclonal antibodies
A2B5, binding to gangliosides (bovine brain, human erythrocytes), 116, 836
to Δ^6-acyl-CoA desaturase: Δ^6-, Δ^9-, and Δ^5-desaturase effects (rat hepatic microsomes), 110, 36
to adenylate cyclase from Neurospora crassa, inactivation of lower eukaryotic organism adenylate cyclase, 113, 778
-bleomycin conjugate, production using dextran T-40, antigen-targeting cytotoxicity (murine anti-HLA IgG_1), 115, 1009
to calf uterus cytoplasmic estrogen receptor, binding to nuclear receptor in murine uterus, 114, 107
to drug-resistant tumor cell plasma membrane, 230-kilodalton protein identification (mouse), 114, 969
with high affinity for 1,25-dihydroxycholecalciferol, vitamin D_3 metabolite identification, 112, 431
to human acetylcholine receptor, cross-reactivity with murine acetylcholine receptor, 113, 1
IB9 to sialosylα2$\rightarrow$6galactosyl residue, detection of human cancer-associated gangliosides, 113, 791
to N^6-(Δ^2-isopentenyl)adenosine and N^6-(4-hydroxy-3-methyl-but-2-enyl)adenosine in tRNA, characterization (bovine, murine), 114, 791
to leucine-enkephalin, production and characterization (murine hybridoma), 113, 757
to β-lipotropin, antigenic determi-

nant (mouse), 116, 527
myosin light-chain kinase native form identification (chicken gizzard), 115, 855
to quail skeletal muscle myosin subunits, prepation and characterization, 113, 407
-specific cytochrome P-450 isozymes, detection and purification by immunoadsorption (murine hybridoma cells), 116, 859
Monocytes
macrophages, from 1α,25-dihydroxyvitamin D_3-induced promyelocytic leukemia-cell differentiation (human), 117, 86
Monokines
resident macrophage, effect on sheep erythrocyte immune response in macrophage-depleted cultures (mice), 114, 721
Mononucleotides
active hydrogen content, fast atom bombardment mass spectrometry after H-D exchange, 112, 126
Monooxygenase
carbon monoxide-sensitive, oxidation of di- and trimethylamine in cell-free extracts (Candida boidinii microsomes), 113, 900
cytochrome P-450 dependent
fatty acid, barbiturate-induced
barbiturate structure and inducer activity (Bacillus megaterium), 116, 843
characterization (Bacillus megaterium), 116, 843
neonatal phenobarbital administration effect (adult rat liver), 114, 1132
Mucus
gastric, hydrogen ion diffusion, mucus glycoprotein, serum albumin, and IgA roles (canine), 115, 1053
Multiplication stimulating activity
effect on $tRNA^{lys}$ modifications (BALB/C 3T3 cells), 115, 598
Murine erythroleukemia cells
membrane tyrosine phosphorylation, stimulation by dimethyl sulfoxide, 112, 413

Muscarinic receptors, see Acetylcholine receptors, muscarinic
Muscles
electrical stimulation-induced fast to slow fiber transformation, correlation between myosin isozymes, light chain, and corresponding mRNAs (rabbit), 113, 325
fibre type IIM, specific protein identification (feline), 113, 519
Muscular dystrophy
collagen type III increased proportion in skeletal muscle (chicken), 111, 933
Mutagenicity
activation mechanism in Ames' tester strains, 116, 141
2-hydroxyamino-6-methyldipyrido-[1,2-a:3',2'-d]imidazole, effect in Salmonella typhimurium TA98/1,8-DNP_6-deficient strain, 116, 141
of phenacetin, deacetylation effect (hamster hepatic microsomes), 110, 746
pyrolysis-produced heterocyclic amines, ultimate forms (Salmonella typhimurium TA98/1.8-DNP_6), 114, 626
Mutants
compactin-resistant, insulin receptor level alteration and endocytosis activity (Chinese hamster), 117, 13
drug resistant induction by 5-fluorodeoxyuridine in presence of deoxycytidine (Chinese hamster), 110, 573
hemoglobin Stanleyville II, fiber formation inhibition in sickle cells (human), 111, 8
induction by DNA crosslinks after uv-irradiation (Deinococcus radiodurans), 112, 458
learning-defective dunce, larval brain containing one 3':5'-cyclic-nucleotide phosphodiesterase isozyme (Drosophila melanogaster), 111, 652
proton-translocating ATPase defective in δ subunit of F_1 and b subunit of F_0, genetic complementation and recombination tests (Escherichia coli), 111, 143

RNA processing, isolation, effect on RNase P (Escherichia coli), 114, 690
tfm (testicular feminization), absence of androgen receptors with high affinity to dihydrotestosterone in neonatal brain (rat), 111, 717
β-thalassemic, DNA nucleotide sequence changes (Algerian patients), 113, 269
twitcher mouse with galactosylceramidase deficiency, abnormal accumulation of galactosylceramide in kidney, 110, 940

visual in norpA gene, reduced phosphorylation of photoreceptor phospholipids in retinular cell membrane (Drosophila melanogaster), 111, 567
Mycobacterium fortuitum
linear lipopeptide fortuitin, NMR, 113, 121
Mycoplasma
hybridoma contamination, effect on reverse transcriptase activity estimation (mouse), 112, 265
Myelin
deterioration, induction by superoxide radical in vitro (human brain), 117, 141
proteolipids, synthesis in cell-free brain mRNA-dependent system (rat), 110, 432
Myelin basic protein
degradation by cathepsin B, suppression by cerebrocystatin (rat brain), 112, 1000
Myelin proteins
degradation initiated by maple syrup urine disease metabolites (rat brain), 114, 440
Myeloperoxidase
isozymes, distribution in azurophilic granule neutrophil subpopulations (human), 114, 296
Myoblasts
differentiation in vitro, alteration in purine nucleotide metabolism (rat), 116, 507
Myocytes
cardiac
elemental content in nuclei, cytoplasm, and mitochondria-enriched cytoplasm in normal and Snell dwarf mice, 114, 234
nimodipine binding site density in isolated cells, subcellular fractions (rat), 113, 185
Myosin
aortic, phosphorylation and interaction with actin, modulation by spontaneously active phosphatase (bovine), 111, 906
heavy chain, embryonic heterogenity, peptide mapping with sodium lauryl sulphate (rat skeletal muscle), 116, 793
heavy and light chain subunits, cross-reactivity with monoclonal antibodies (quail skeletal muscle), 113, 407
isoenzyme and light chain changes, correlation with translatable mRNAs in fast- to slow-transforming muscles (rabbit), 113, 325
Myosin light-chain kinase
Ca^{2+}-dependent, conversion to Ca^{2+}-independent form by limited proteolysis with α-chymotrypsin (rabbit skeletal muscle), 110, 701
-calmodulin complex, dissociation with mastorpans, kinetics, 114, 50
native form, identification by monoclonal antibodies (chicken gizzard), 115, 855
Myristoyl coenzyme A
inhibition of DNA polymerases α and γ (sea urchin eggs), 110, 902

N

NAD
dose-dependent effect on F_1-ATPase activity, mechanism (bovine heart), 113, 273
levels during ischemic injury, effect of nicotinic acid (murine renal cells), 113, 996
metabolism, role of trigonelline demethylating enzyme (porcine liver), 113, 569
NADH:Nitrate reductase, see Nitrate reductase (NADPH)
NADH semidehydroascorbate reductase
-calmodulin, interactions in clathrin-coated vesicles (rat liver), 115, 952
$NADP^+$
H_2O_2-mediated conversion from NADPH, catalysis by heme-undecapeptide from cytochrome c, 113, 710
NADPH
H_2O_2-mediated oxidation to $NADP^+$, catalysis by heme-undecapeptide from cytochrome c, 113, 710
and mercuric reductase, reaction kinetics stopped-flow study (Pseudomonas aeruginosa), 117, 231
NADPH-cytochrome reductase
cytoplasmic, in 2-octaprenylphenol hydroxylation to ubiquinone 8 (Escherichia coli), 111, 830
stearoyl-CoA desaturation (Tetrahymena microsomes), 115, 456
NADPH cytochrome c reductase, see NADPH-cytochrome reductase
NAD(P)H dehydrogenase (quinone)
daunorubicin-induced activity increase in neonatal beating heart cells in culture (rat), 110, 364
high activity in 9L tumor cells (rat), 111, 346

possible role in bioactivation of antitumor quinone, 3-bromomethylmenadione, 111, 346
NADPH oxidase
Mg^{2+} requirement in polymorphonuclear leukocytes (guinea pig), 115, 261
Nafazatrom
oxidation by oxidizing radicals, ESR and pulse radiolysis, 115, 800
Nafenopin
-binding protein, detection and peroxisome proliferation induction (rat liver cytosol), 116, 388
Nalidixic acid
DNA gyrase resistance to in Pseudomonas aeruginosa and Escherichia coli, 110, 694
Naloxone
binding sites and endogenous opioids (Bufo viridis oocytes), 117, 718
Naphthalene-1-acetic acid
electrochemical response induction in auxin receptor from maize leaves reconstituted in bilayer lipid membranes, 110, 300
Naproxen
effects on arachidonic acid metabolism via lipoxygenase and cyclooxygenase pathways (rat neutrophils from reverse passive Arthus reaction pleural exudates), 112, 586
Narasin acid
solvent polarity-dependent conformational equilibrium, NMR, 113, 832
Natural killer cell activity
enhancement by
leukotriene B_4, herpesvirus-infected cell target (human lymphocytes), 113, 531
recombinant interferon γ, similarity to natural interferon γ (human lymphocytes), 111, 525
Neocarzinostatin
highly strained ether ring in chromophore, reaction with mercaptan and sodium borohydride, NMR, 113, 538
potentially lethal fibroblast damage, DNA repair defective in ataxia-telangiectasia (human skin), 110, 483
α-Neo-endorphin
and dynorphin A and rimorphin, detection in hypothalamus (human), 113, 30
Nerve growth factor
amidolytic activity, effects of antithrombin III, α_1-proteinase inhibitor, and heparin, 113, 108
receptors, binding constants (chicken, human, rat), 115, 368
-treated PC12 cells, effect on nuclei sensitivity to micrococcal nuclease, 113, 24
Nerves
crustacean fiber, Co^{2+} and Mn^{2+} uptake in resting state and during potassium depolarization, radioisotope and NMR (Collinectes sapidus), 111, 560
end membranes, see Synaptic membranes
Neural cell adhesion molecule (N-CAM)
structural similarity to brain cell surface protein (BSP-2) (murine brain), 112, 482
Neuraminidase
4-methylumbelliferyl-α-D-N-acetylneuraminic acid, genetically different forms in sialidosis, galactosialidosis, and sialolipidosis (human leukocytes), 117, 470
-treated erythrocytes, effect on hemagglutination by various Escherichia coli strains (human), 111, 456
Neuraminyl α2-3 galactosides
binding by Escherichia coli strains, assay with neuraminidase-treated human erythrocytes, 111, 456
Neurite
outgrowth
fibroblast growth factor effect on PC12 cells (rat), 114, 1189
stimulation by gangliosides (neurohybrid clone SB21B1 cells), 116, 974
Neuroblastoma
clone N1E-115, tetanus toxin effect on Ca spikes, 115, 788
Neuromedin B
isolation and amino acid sequence (porcine spinal cord), 114, 541
Neuromedin K
isolation and amino acid sequence (porcine spinal cord), 114, 533
Neurons
in cell culture, glycosyltransferase surface activities (chicken embryo), 113, 446
nuclear triiodothyronine receptors, neuronal growth correlation (chicken embryo), 112, 221
Neurospora crassa
orotidine-5'-phosphate decarboxylase gene segment, transformation of Aspergillus nidulans to prototrophy, 112, 284
Neurotensin
degradation by endo-oligopetidase A

and proline-endopeptidase (rabbit brain), 116, 1151
hypothalamic content in vivo, effects of thyroxine and 6-propylthiouracil (rat), 113, 248
inhibition of thyrotropin-releasing hormone-induced thyrotropin release by pituitary gland in vitro (rat), 113, 248
secretion from hypothalamus in vitro, stimulation by triiodothyronin (rat), 113, 248
Neurotoxins
paralytic shellfish poisoning, enzymatic transformation (Prototheca staminea), 114, 465
quasi-molecular ions, detection by ^{127}I-plasma desorption mass spectroscopy (Naja naja siamensis venom), 110, 519
Neurotransmitters
storage in nerve microsacs, ^{19}F NMR with ring-fluorinated dopamine and norepinephrine (guinea pig brain striata), 110, 740
Neutral protease
Ca^{2+}-activated from muscle, inhibition by plasma α_1- and α_2-thiol proteinase inhibitors (human), 110, 256
Neutron diffraction
monitor for absolute stereochemistry in fumarate to malate transformation by fumarate hydratase, 115, 1048
Neutrophils
activation by phorbol 12-myristate 13-acetate, effect on intracellular free Ca (rabbit peritoneum), 114, 638
arachidonic acid
metabolism via lypoxygenase and cyclooxygenase, differential effects of anti-inflammatory drugs (rat reverse passive Arthus reaction pleural exudates), 112, 586
release from platelet-activating factor after stimulation by Ca ionophore A32187 (rabbit), 113, 72
azurophilic granule subpopulations, association with distinct forms of myeloperoxidase (human), 114, 296
catalytic components of NADPH-dependent O_2^- generating oxidoreductase (human), 110, 873
degranulation by platelet-activating factor, potentiation by 5-L-hydroxy-6,8,11,14-eicosatetraenoic acid (human), 111, 1
incubated with dihomo-γ-linolenic acid, leukotriene production (human), 114, 855
intracellular free Ca^{2+} increase after stimulation with chemotactic factors (human, rabbit), 113, 44
leukotriene B_4 and eicosapentaenoic acid-derived leukotriene B_5 chemotactic and degranulating activities (human), 117, 282
Mg^{2+} requirement for NADPH oxidase activity (guinea pig), 115, 261
NADPH-dependent O_2^- generating oxidoreductase, catalytic activity dependent upon Ca^{2+} and Mg^{2+} (human), 110, 973
particulate fraction, phospholipid-sensitive Ca^{2+}- dependent protein kinase and substrates (human), 111, 847
superoxide radical production induced by
arachidonic acid, effects of prostaglandins E_1 and I_2 (human), 113, 506
formyl-methionyl-leucyl-phenylalanine, effects of prostaglandins E_1 and I_2 (human), 113, 506
phorbol myristate acetate, effects of prostaglandins E_1 and I_2 (human), 113, 506
phorbol myristate acetate inhibition by chloromethyl ketones (human), 112, 671
pseudo-inhibition by soybean-derived polypeptides (human), 117, 22
synthetic chemotactic peptide-stimulated decrease in phosphatidylinositol 4,5-biphosphate and phosphatidylinositol 4-monophosphate (rabbit), 112, 957
thiol protease, iC3b-forming, isolation (guinea pig peritoneum), 117, 413
Nick translation
with Escherichia coli DNA polymerase, carcinogen-induced DNA break detection (human fibroblasts), 111, 383
Nickel(III)
-substrate interaction in carbon monoxide dehydrogenase, nickel(III)-carbon species formation, EPR spectra (Acetobacterium woodii, Clostridium thermoaceticum), 115, 658
-sulfhydral-containing peptide complexes and hydrogenase chromophore, ESR, 115, 878

Nickel ions
calcineurin activation (bovine brain), 114, 955
environment in urease and model compounds, X-ray absorption spectra, 112, 279
substitutions after Zn, effect on aminopeptidase activity (Aeromonas), 114, 646
Nicotinamide
effect on phytohemmagglutin-induced lymphocyte proliferation (human), 116, 428
enhancement of chondrocyte differentiation in limb bud cell culture (chicken), 111, 750
Nicotinic acid
effect on DNA stability during ischemic injury (mouse), 113, 996
Niemann-Pick disease
bone marrow transplantation, decrease in sphingomyelin and cholesterol accumulation in spleen (mouse), 113, 605
Nimodipine
binding to cardiac myocytes and subcellular fractions (rat), 113, 185
negative iontropic action, dilitazem potentiation (canine, rat heart), 114, 922
Nitrate reductase (NADPH)
dose-depending effect on F_1-ATPase activity, mechanism (bovine heart), 113, 273
ferric citrate reduction (squash cotyledon), 114, 1182
fluorescent oxidation product of molybdenum cofactor, identification as thieno[2,3-g]pterine derivative (Escherichia coli), 111, 537
from spinach leaf and root, immunochemical characterization, 113, 733
Nitrendipine receptor
molecular size determination by radiation inactivation analysis (rat brain synaptic membranes, rabbit skeletal muscle transverse tubule membranes), 111, 878
Nitrite
and oxygen electron flow distribution, carbonyl cyanide m-chlorophenylhydrazone effect (Paracoccus dentrificans), 117, 252
reaction with binuclear Cu site of T2D laccase, preparation of Met-NO_2^- derivatives, EPR (Rhus vernicifera), 112, 729
7-Nitrobenz(a)anthracene
stereoselective metabolism to 3,4- and 8,9-trans-dihydriols (rat liver microsomes), 115, 123
7-Nitrobenz(a)anthracene trans-3,4-dihydrodiol
metabolism of 7-nitrobenz(a)-anthracene (rat liver microsomes), 115, 123
7-Nitrobenz(a)anthracene trans-8,9-dihydrodiol
metabolism of 7-nitrobenz(a)-anthracene (rat liver microsomes), 115, 123
1-Nitrobenzo(a)pyrene
vicinal 7,8,9,10-dihydrodiol-epoxide metabolic formation (rat liver microsomes), 117, 541
Nitrobenzylamide
production from peptides containing C-terminal nitrobenzylamine after hydrolysis by angiotensin converting enzyme (human kidney), 110, 654
S-(4-Nitrobenzyl)glutathione
sequential enzyme-catalyzed metabolism from 4-nitrotoluene (rat hepatocytes), 114, 500
Nitrobenzylthioinosine
-insensitive uridine transport component in human lymphoblastoid and murine leukemia cells, 110, 417
Nitrogenase
inhibition by NH_4^+ in wild and glutamine synthetase-deficient strains (Anabaena cycadeae), 111, 180
Nitrogen fixation
connection with
glutamine synthetase regulated by divalent cations (Anabaena cylindrica), 114, 206
sym-homospermidine accumulation in cyanobacteria, 112, 606
p-Nitrophenylcarbamyl
in amino terminal of 3' end pentanucleotide from amino acyl-tRNA, peptidyltransferase affinity labeling (Saccharomyces cerevisiae ribosomes), 113, 941
4-Nitroquinoline 1-oxide
DNA break induction, detection by nick translation (human fibroblasts), 111, 383
4-Nitrotoluene
sequential enzyme-catalyzed metabolism to S-(4-nitrobenzyl)-glutathione (rat hepatocytes), 114, 500
Nitrous oxide
vitamin B_{12} inactivation, effect on purine synthesis folate-dependent transformylases (rat liver), 112, 327

Nitzschia alba
organic extract, ionophoretic activity toward silicate, purification and properties, 114, 365
Nuclear magnetic resonance
two-dimensional single quantum correlation spectroscopy and two-dimensional double quantum spectroscopy, polymyxin B, 117, 486
Noradrenalin, see Norepinephrine
Noradrenalin N-methyltransferase
purification and separation from protein carboxymethyltransferase (bovine adrenal medulla), 112, 1061
2'-Nor-2'-deoxyguanosine
and acyclovir, uptake and phosphorylation in tissue culture, in vitro viral and cellular DNA polymerase inhibition kinetics (rabbit kidney), 116, 360
Norepinephrine
-induced Ca^{2+} accumulation, leucine enkephalin antagonism (rat atria), 117, 536
inhibition of insulin binding to adipocytes (rat), 112, 972
2-Nor-leukotriene
analogs, effects on LTD_4, LTC_4, and LTE_4 (guinea pig), 117, 732
Novobiocin
effect on X-ray-induced DNA repair during reconstitution (L1210 cells), 112, 1077
Nuclear magnetic resonance (NMR)
^{13}C
HC-toxin structure (Helminthosporium carbonum), 111, 398; 113, 10
highly strained ether ring in neocarzinostatin chromophore, reaction with mercaptan and sodium borohydride, 113, 538
lipid bilayer dynamics, rhodopsin-lipid interactions (bovine retina), 114, 1048
^{43}Ca, Ca^{2+}-concanavalin A solutions, 115, 22
Cu-surrounding in plantacyanin (cucumber), 117, 385
derivatives of glycolipid antigen from pancreatic carcinoma (human), 110, 383
^{19}F
disposition of 6-fluorodopamine and 6-fluoronorepinephrine in striata-region nerve microsacs (guinea pig brain), 110, 740
8-fluoro-8-demethylriboflavin interaction with riboflavin-binding protein (hen egg white), 110, 406
^{1}H
cholecystokinin fragment CCK_{27-33}, 114, 705
dipeptidase assay in intact erythrocytes and lysates (human), 110, 305
fortuitin 400 MHz spectrum in pyridine-d_5 (Mycobacterium fortuitum), 113, 121
α-D-galactosyltransferase activity (calf thymus), 110, 124
HC-toxin structure (Helminthosporium carbonum), 111, 398; 113, 10
highly strained ether ring in neocarzinostatin chromophore, reaction with mercaptan and sodium borohydride, 113, 538
laccase relaxation, assignment to different Cu types (Rhus vernificera), 111, 824
narasin acid solvent polarity-dependent conformational equilibrium, 113, 832
protein two-dimensional double quantum spectra, spin system identification, 113, 854
proton exchange between octanol and water, acceleration by non-steroidal anti-inflammatory drugs, 113, 745
two-dimensional correlated spectroscopy
improved resonance with double quantum filtering, 117, 479
proton-proton spin-spin coupling constants in proteins, 113, 967
^{2}H
dioleoyl phosphatidic acid polymorphic preferences, 111, 675
isotope fractionation in conversion of mono- and disaccharides to alcohols, 111, 890
^{31}P
adriamycin cardiotoxicity detection (perfused rat heart), 110, 339
dioleoyl phosphatidic acid polymorphic preferences, 111, 675
DNA, effects of meso-tetra(4-N-methylpyridyl)porphine and Zn^{2+} and Ni^{2+} derivatives, 113, 148
phosphocreatine deuterium-induced signal splitting, 114, 1117
pyridoxal 5'-phosphate binding to tryptophan synthase (Escherichia coli), 111, 817
spin-spin relaxation analysis of breast tissue, effect of storage time and temperature (human), 112, 991

water proton spectra from crustacean nerve fibers in resting state and during potassium depolarization, Co^{2+} and Mn^{2+} uptake (Collinectes sapidus), 111, 560,
^{67}Zn, Zn^{2+}-concanavalin A solutions, 115, 22

Nuclease
2',5'-A_n-dependent, activation by 2',5'-A_4 tetramer analog to hydrolyze vesicular stomatitis virus mRNA, 111, 205; erratum, 114, 1200
in hybridoma supernatants, degradation of reverse transcriptase high-molecular-weight products (mouse), 112, 265
micrococcal, digestion of PC12 cell nuclei, decrease after cell treatment with nerve growth factor, 113, 24

Nuclease S1
inhibition by adenovirus-specific DNA-binding protein, 110, 443
site cleavage within supercoiled plasmid containing 5'-flanking sequences of human β-globin gene, protection by high-mobility-group proteins HMG1 and HMG2 (Aspergillus oryzae), 112, 547

Nuclei
binding of
Alu sequences (human HeLa cells), 117, 378
monoclonal antibodies to calf uterus cytoplasmic estrogen receptor (murine uterus), 114, 107
chromatin solubility
increase after in vitro or in vivo treatment with triiodothyronine and angiotensin (rat liver), 110, 61
inhibition by proteolytic inhibitors (rabbit thymus), 110, 216
dexamethasone-receptor complex associated with RNA, isolation and properties (HeLa cells), 113, 876
gonadotropin, plasma membrane receptors (rat ovary), 111, 127
matrix, high-molecular mass phosphoprotein extraction, identification of 110,000-dalton species (rat liver), 114, 183
from nerve growth factor-treated PC12 cells, resistance to digestion by micrococcal nuclease, 113, 24
neuronal, triiodothyronine receptor increase during brain development (chicken embryo), 112, 221
promegestone localization in chromatin fraction of cultured hepatoma cells, 110, 719
thymocyte, Triton X-100-resistant glucocorticoid receptors, preferential solubilization by deoxyribonuclease I (rat), 111, 760

Nucleosidediphosphatase
-substrate interactions with deoxyribonucleoside diphosphates, ribonucleoside diphosphates, and phosphorylated B vitamins (rat hepatocyte Golgi fraction), 113, 178; erratum, 114, 1200

Nucleoside-5'-monophosphate
formation from 2-aminopyrimidine and ribose-5-phosphate aqueous reaction, 117, 93

Nucleosomes
DNA-binding proteins resistant to dissociation by sodium dodecyl sulfate (chicken erythrocyte nuclei), 114, 99

5'-Nucleotidase
Mg^{2+}-activated on exterior side of erythrocyte membrane, properties (rat), 112, 407

Nucleotides
binding process to heavy meromyosin active site (rabbit), 115, 312
cyclic, see Cyclic nucleotides

Nucleotide sequences
actin genes from Drosophila melanogaster, homology with other species, 111, 67
cDNA clone for aldolase B (human), 117, 601
opsin cDNA clone (bovine), 116, 563
5-S ribosomal RNA from mushroom (Coprinus cinereus), 116, 148
$tRNA_m^{Met}$ (wheat germ), 114, 1161
promoter and NH_2-terminal signal peptide region of α-amylase gene (Bacillus subtilis), 112, 678
$tRNA^{Leu}$ from Bacillus stearothermophilus, 112, 578

O

6,9,12-Octadecatrienoic acid
ω6-oxygenation by lipoxygenase (human platelets), 117, 593

Octanol
proton exchange with water, acceleration by nonsteroidal anti-inflammatory drugs, NMR, 113, 745

2-Octaprenylphenol
hydroxylation to ubiquinone 8 by membrane-bound cytochrome o and cytoplasmic NADPH cytochrome c

reductase (Escherichia coli), 111, 830
Octitol
and heptitol components, identification in lens (human, Octodon degu), 116, 988
Octyl-Sepharose
-rhodanese apolar interaction, 111, 595
Oleate
binding to hepatic sinusoidal plasma membranes in vitro (rat), 112, 88
2',5'-Olidoadenylate synthetase
binding protein activity, temperature effect (mammalian extracts), 117, 57
Oligoadenylic acid (2',5'-A)
2',5'-A_4 tetramer analog synthesized from cordycepin 5'- triphosphate in rabbit reticulocyte lysate, protein synthesis inhibition, 111, 205; erratum, 114, 1200
Oligomycin
interaction with proton-translocating ATPase, kinetics (bovine cardiac mitochondria), 111, 333
Oligosaccharides
asparagine-linked in Fc region of immunoglobulin D, structure and location (human), 110, 181; erratum, 112, 794
glucosyl residue transfer from α-D-glucosyl fluoride, catalysis by α-glucan phosphorylases, 111, 530
O-glycosidically linked of poly-N-acetyllactosamine type in leukocyte common antigen, differences in B and T cells (human), 110, 424
released from glycopeptides by glycopeptidase acting on β-aspartyl-glucosamine linkages, identification, 112, 155
Oocytes
cumulus-egg complexes, caudal epididymal sperm forward mobility stimulation (bovine), 115, 777
Opiate receptors
binding profile, peptide E and β-endorphin (rat brain membrane), 114, 1084
δ, binding of synthetic peptide deltakephalin (rat brain membranes), 111, 390
Opioids
receptor binding properties on cerebellar and brain membranes (rabbit), 111, 1096
Opsin
cDNA clone, isolation and nucleotide sequence (bovine), 116, 563
Organophosphates
pesticide fenitrothion, degradation by phosphatase from Alcaligenes NC_5, 110, 412
Ornithine decarboxylase
GTP-insensitive, spermine synthesis (Acetobacteria), 114, 779
inhibition by
α-difluoromethylornithine, differentiation induction in embryonal carcinoma cells (mouse), 114, 410
(2R,5R)-6-heptyne-2,5-diamine (rat), 116, 237
interferons (human fibroblast cells), 114, 950
stimulation by
hyperoxia (rat lungs), 113, 491
luteinizing hormone, testosterone production stimulation comparison (rat testicular cells), 112, 496
Orthophosphate
role in α-glucan phosphorylase-catalyzed transfer of glucosyl residue from α-D-glucosyl fluoride to oligosaccharides, 111, 530
Orthovanadate
in ATP preparations, induction of muscarinic binding site loss (rat corpus striatum), 110, 567
Ca transport stimulation in plasma membrane (wheat protoplasts), 113, 171
induction of muscarinic binding site loss (rat corpus striatum), 110, 567
γ-Oryzanol
and superoxide generated by cytochrome P-450 model system, reaction kinetics, 115, 1002
Ouabain
binding sites on small muscle biopsies, determination by vanadate-facilitated [^{3}H]ouabain binding to Na^+,K^+-ATPase (rat), 111, 319
Ouabain receptors
in skeletal muscle plasma membranes during purification (rabbit), 112, 521
Ovoinhibitor
immunological cross-reactivity with ovomucoid (chicken egg white), 110, 75
Ovomucoid
immunological cross-reactivity with ovoinhibitor (chicken egg white), 110, 75

Oxalate
effect on pyruvate, orthophosphate dikinase activation-inactivation by adenylate energy charge (Zea mays chloroplasts), 115, 673
Oxamate
effect on pyruvate, orthophosphate dikinase activation-inactivation by adenylate energy charge (Zea mays chloroplasts), 115, 673
Oxidation
ascorbic acid, role of bicyclic ring formation, 115, 531
Oxidative phosphorylation
uncoupling by dimethyl sulfoxide in vivo and dimethyl sulfide in vitro (rat hepatic mitochondria), 110, 325
Oxidoreductase
coupled with luciferase, concentration effect on bioluminescence (Vibrio harveyi), 111, 266
NADPH-dependent O_2^- generating, Ca^{2+} and Mg^{2+} requirement (human neutrophils), 110, 973
delineation of components in phorbol myristic acetate-stimulated neutrophils (human), 110, 873
4-Oxo-5-hydroxyvalerate dehydrogenase
catalyzing 4,5-dioxovalerate formation, purification of two isozymes (rat liver), 112, 986
2-Oxoisovalerate dehydrogenase (lipoamide)
active unphosphorylated form in heart, liver, and kidney, effects of fasting, diabetes, and protein starvation (rat), 111, 74
12-Oxo-phytodienoic acid
converted from linoleic acid by lipoxygenase-catalyzed reaction, jasmonic acid formation (Vicia faba pericarp), 111, 470
Oxygen
affinity to hemoglobin-inulin conjugate, use as blood substitute (rat), 113, 513
consumption by microsomes with organic hydroperoxides, cytochrome P-450 role (rat liver), 110, 646
evolution
from inside-out thylakoid vesicles, inhibition by Mn^{2+} and surface protein removal by EDTA washing (pea chloroplasts), 110, 545
in photosystem II thylakoid particles, reversible inhibition by NaCl, 23,000-dalton protein role, 113, 738
-induced lung injury, effect on hyaluronidase activity (rat), 117, 71
and nitrite electron flow distribution, carbonyl cyanide m-chlorophenylhydrazone effect (Paracoccus dentrificans), 117, 252
reactive, production, arachidonic acid metabolism (rat peritoneal macrophage), 114, 549
requirement for Cu(II)-induced hemolysis (rabbit erythrocytes), 115, 680
singlet
generation by
photochemical system or in Phanerochaete chrysosporium, 111, 200
sensitized monofunctional and bifunctional psoralens, biological activities, 112, 638
$^1\Delta_g$ molecular, quenching by L-ascorbic acid in aqueous media, 115, 932
role in hyaluronic acid degradation (human), 115, 894
toxicity
of active species, membrane unsaturation fatty acid independence (Escherichia coli), 113, 301
polyamine metabolism stimulation in lungs (rat), 113, 491
Oxytocin
binding to myoepithelial cell membranes from mammary tissue, estrogenic-compound effects (rat), 112, 717
[Ile^8]-Oxytocin
identification (Macropus fuliginosus posterior pituitary gland), 116, 258

P

Palmitic acid
conversion from trans-2-hexadecanoyl-CoA by enoyl-CoA reductases (rat hepatic microsomes), 113, 659
incorporation into various phospholipids, effect of all-trans-retinoic acid (guinea pig peritoneal granulocytes), 114, 261
Palmitoyl-CoA desaturase
microsomal, changes in ergosterol-replaced Tetrahymena pyriformis cells, temperature effects, 113, 96
Palmitoyl coenzyme A
inhibition of DNA polymerases α and γ (sea urchin eggs), 110, 902

Pancreas
acinar cell culture, epidermal growth factor specific binding (rat), 111, 1066
Pancreatic islets
B cells
dibutyryl cAMP-induced Ca^{2} influx and Ca^{2+}-dependent membrane potential (mouse), 112, 614
purification, fluorescence-activated cell sorting (rat), 114, 835
Pancreatic stone proteins
inhibition of calcium carbonate precipitation from supersaturated solutions (human), 110, 69
Papain
active site substrate conformation, resonance Raman spectra comparison with chymopapain, ficin, and bromelain, 117, 725
Parathyroid hormone
[Asn^{76}], solution synthesis and characterization (human), 114, 493
Parvovirus
ssDNA replication to unit-length dsDNA product by DNA polymerase γ (bovine), 117, 580
Peanut agglutinin
binding to intestinal microvillus membranes, decrease during postnatal development (rat), 113, 400; erratum, 116, 355
D-Penicillamine
Cu-chelating, plasma ferroxidase decrease without anemia induction (rat), 113, 127
Pentanucleotides
3'-terminal from p-nitrophenyl-carbamyl-amino acyl-tRNA, lack of covalent binding to peptidyltransferase (Saccharomyces cerevisiae ribosomes), 113, 941
Pentapeptides
containing diastereoisomeric γ-methylglutamic acid, substrates for vitamin K-dependent microsomal carboxylation (rat), 113, 454
Pentasaccharides
blood group Sd^{2} active, from Hamm-Horsfall urinary glycoprotein, isolation and structure (human), 115, 625
Pepsin
immunoglobulin λ chain digestion in urea, fragment isolation and characterization, 111, 89
modification by photoaffinity reagents 1,2-epoxy-3-(4'-azido-2'nitrophenoxy)propane and p-azidophenacyl bromide (porcine), 111, 630
Peptidase
enkephalin-degrading, distribution (murine brain neuronal, glial cells), 115, 423
Peptides
antibiotic, trichorzianine A1, ^{1}H NMR spectra (Trichoderma harzianum), 116, 1
atrial muscle, amino acid sequence (rat), 117, 859
from bovine, human, and rat serum albumins, spontaneous formation of intra- and interspecies hybrid molecules, 114, 20
with C-termianl D-alanine, substrate for porcine pituitary amidating enzyme, 117, 289
with C-terminal nitrobenzylamine, hydrolysis by angiotensin converting enzyme to nitrobenzylamide (human kidney), 110, 654
E, opiate receptor binding, comparision with β-endorphin (rat brain membrane), 114, 1084
-hemin complexes, thiol-containing cytochrome P-450 models (bovine), 115, 590
hypothalamic luteinizing hormone-releasing hormone synthesis, precursor characterization (human, mouse, rat), 117, 872
IgG tuftsin-containing fragments, synthesis and biological activity (mouse), 115, 193
non-opioid, proenkephalin-derived, amino acid sequence (bovine adrenal gland), 113, 229
sperm activating, purification, action, and amino acid sequence (Anthocidaris crassispina egg jelly), 117, 147
sulfhydral-containing, -Ni(III) complexes and hydrogenase Ni(III) chromophore, ESR, 115, 878
synthetic, N-terminal murine γ-interferon, antibody production and characterization, 117, 866
triiodothyronine-containing from thyroglobulin, amino acid sequence (porcine), 112, 206
Peptidoglycans
linkage to poly(galactosylglycerol phosphate) by glucosylβ(1→4)N-acetylglucosamine (Bacillus coagulans cell wall), 111, 312
Peptidyl-puromycin
synthesis catalyzed by peptidyltransferase, inhibition by

sparsomycin analog (Escherichia coli), 114, 1
Peptidyltransferase
lack of affinity labeling with 3'-terminal pentanucleotide from p-nitrophenylcarbamyl-amino acyl-tRNA (Saccharomyces cerevisiae ribosomes), 113, 941
peptidyl-puromycin synthesis, inhibition by sparsomycin analog (Escherichia coli polysomes), 114, 1
Peroxidase
-activated hypoiodous acid in tyrosine iodination, 116, 639
-catalyzed reactions, hydroxamic acid effect, 116, 916
thyroid, iodide-dependent catalytic activity (porcine), 112, 475
Peroxisomes
proliferation induction and nafenopin-binding protein (rat liver cytosol), 116, 388
Pertussis toxin
effect on
basal- and forskolin-stimulated adenylate cyclase inhibition by GTP or guanyl-5'-yl imido-diphosphate (rat adipocytes), 116, 651
inhibition by somatostatin of forskolin- and isoproterenol-stimulated cAMP accumulation (murine anterior pituitary tumor cells), 115, 794
regulation of insulin-activated cAMP phosphodiesterase (3T3-L1 adipocytes), 116, 593
islet-activating protein, D_2 dopamine receptor affinity decrease, membrane protein ADP-ribosylation (bovine brain), 115, 325
Pesticides
organophosphorous fenitrothion, degradation by phosphatase from Alcaligenes NC_5, 110, 412
pH
effect on phenol 2-monooxygenase regulation by Mg-ATP (rat liver microsomes), 116, 966
intracellular, effects of phorbol esters, platelet-derived growth factor, vasopressin, and serum (Swiss 3T3 cells), 116, 931
intralysosomal, relation to cystine accumulation (normal, cystinotic human fibroblasts), 116, 154
low, induction of fusion in small unilamellar phospholipid vesicles, 110, 15
Phagocytosis
selective, senescent and in vitro aged erythrocytes by macrophages, receptor identification (rat liver), 115, 551
Phanerochaete chrysosporium
lignin model compound degradation, lack of $^1O_2$ involvement, 111, 200
Phenacetin
mutagenicity to Salmonella typhimurium, metabolic activation by hepatic microsomes (hamster, rat), 110, 746
Phenanthrene
intercalative binding to DNA, fluorescence and photoelectron study, 112, 1
plasmid pKG2-dependent oxidation (Beijerinckia sp.), 111, 939
o-Phenanthroline
-mediated DNA polymerase 1 inhibition (Escherichia coli), 115, 567
Phenobarbital
cytochrome P-450-dependent monooxygenase increase after neonatal administration (adult rat liver), 114, 1132
induction of p-nitrophenol UDP-glucuronyltransferase activity, comparison with ethanol induction (rabbit hepatic microsomes), 111, 219
Phenol-epoxides
metabolites of polycyclic aromatic hydrocarbons, chemical rearrangement to quinone-methides, 117, 129
Phenol 2-monooxygenase
regulation by Mg-ATP, pH effect (rat liver microsomes), 116, 966
Phenothiazines
displacement from phospholipid binding sites by cholesterol, 114, 1001
solubility in erythrocyte membrane, photoaffinity labeling (human), 116, 469
Phenylalanine
stimulation of phenylalanine hydroxylase limited proteolysis by chymotrypsin, 110, 919
Phenylalanine hydroxylase, see Phenylalanine 4-monooxygenase
Phenylalanine 4-monooxygenase
limited proteolysis by chymotrypsin, phenylalanine and tetrahydrobiopterin effects (rat liver), 110, 919
regulation in vivo by glucocorticoids (rat liver), 115, 965
1-Phenyl-1-aminomethylene
oxygenation to 2,3-dihydroxy-2-

phenylpropylamine by dopamine β-hydroxylase, enzyme inactivation (bovine adrenals), 110, 161
Phenylbutazone
proton exchange acceleration between octanol and water, anti-inflammatory activity correlation, 113, 745
Phenylethanolamine N-methyltransferase, see Noradrenaline N-methyltransferase
Phenylglyoxal
inactivation of γ-glutamyl-transferase, protection by glutathione (rat kidney), 112, 564
inhibitory effect on chloride and sulfate ion transport across erythrocyte membranes (human), 110, 616
Phenylhydrazine
and bovine plasma or lentil seedling Cu-amine oxidase, reaction mechanism and stoichiometry, 115, 841
Phenylhydrazine hydrochloride
effect on 34,000-dalton inhibitor of Ca^{2+}-dependent cysteine proteinase (rat liver cytosol), 115, 715
Phorbol 12,13-dibutyrate
-stimulated intracellular pH increase (Swiss 3T3 cells), 116, 931
Phorbol esters
inhibition of 12-O-tetradecanoylphorbol-13-acetate binding to sphingomyelin, 112, 709
Phorbol ester receptors
cytosolic, comparison with membrane-bound receptor properties (mouse), 111, 340
Phorbol myristate acetate
superoxide radical induction in neutrophils, effects of prostaglandins E_1 and I_1 (human), 113, 506
Phorbol 12-myristate 13-acetate
neutrophil activation, effect on intracellular free Ca (rabbit peritoneum), 114, 638
Phosphatase
organophosphate-hydrolysing, isolation from bacterium Alcaligenes NC_5 by Cibacron 3GA-Sepharose affinity chromatography, 110, 412
spontaneously active aortic, effects on myosin phosphorylation and actin-myosin interaction (bovine), 111, 906
Phosphates
and Ca^{2+}, induction of mitochondrial membrane potential collapse, prevention by ADP or ATP with Mg^{2+} (rat liver), 111, 792
-dependent ruthenium red-insensitive Ca^{2+} uptake (mung bean mitochondria), 114, 1176
inorganic, role in cyclic-2,3-diphospho-D-glycerate levels in Methanobacterium thermoautotrophicum, 116, 1125
transport
across amnion and visceral yolk sac in maternal-to-fetal direction in vitro (guinea pig), 110, 438
active in mitochondria, inhibition by tribenzylphospate (Saccharomyces cerevisiae), 113, 751
Phosphatidic acid
stimulation of autophosphorylation of cAMP-dependent protein kinase catalytic unit (bovine heart), 113, 916
turnover, stimulation by prostaglandin $F_{2\alpha}$ (rat luteal cells), 116, 39
Phosphatidylcholine
bilayers, hydrolysis by phospholipase A or C, diacylglycerol and cell stimulation roles (human, rat), 117, 196
conversion from phosphatidylethanolamine via transmethylation
increase in alcoholism (rat myocardium), 111, 710
cytosolic inhibitors (rat liver), 112, 108
Phosphatidylethanolamine
S-adenosyl-L-methionine-mediated methylation, regulation by GTP (rat hepatic plasma membrane), 114, 425
methylation to phosphatidylcholine S-adenosyl-L-methionine-mediated, inhibition by cytosolic inhibitors (rat liver), 112, 108
increase in alcoholism (rat myocardium), 111, 710
Phosphatidylglycerol
biosynthesis, acyl transferase role (canine lung microsomes), 116, 23
Phosphatidylinositol
bilayers, hydrolysis by phospholipase A or C, diacylglycerol and cell stimulation roles (human, rat), 117, 196
-containing liposomes, induction of human or murine tumor cell cytotoxicity (plant), 114, 863
myo-inositol incorporation with CMP, Mn^{2+}-dependent activity (rat brain synaptosomes), 112, 817

stimulation of autophosphorylation of cAMP-dependent protein kinase catalytic unit (bovine heart), 113, 916
synthesis
and degradation in embryonic cell line, inhibition by dexamethasone (human fibroblasts), 110, 200
de novo in activated mast cells, Ca^{2+} uptake and histamine release (rat), 111, 581
turnover
glucose-stimulated, effects of insulin secretion inhibitors and stimulators (rat pancreatic islets), 112, 419
role in antigen-stimulated Ca^{2+}-influx and histamine release (rat mast cells), 117, 710
stimulation by prostaglandin $F_{2\alpha}$ (rat luteal cells), 116, 39
Phosphatidylinositol-4,5-bisphosphate
metabolism in platelets, thrombin effects (human), 110, 108
in neutrophils, rapid decrease by chemotactic peptide (rabbit), 112, 957
[^{32}P]phosphate labeling during ADP-induced platelet aggregation (rabbit), 113, 483
Phosphatidylinositol 4-monophosphate
in neutrophils, rapid decrease by chemotactic peptide (rabbit), 112, 957
Phosphatidylserine
effect on neutralized vesicular stomatitis virus binding to host cells (rabbit), 114, 774
requirement for 12-O-tetradecanoylphorbol-13-acetate binding by cytosolic protein (mouse), 111, 340
stimulation of autophosphorylation of cAMP-dependent protein kinase catalytic unit (bovine heart), 113, 916
synaptosomal, chronic ethanol consumption-induced increase (guinea pig), 113, 262
vesicles, effect on Na^+,K^+-ATPase activity (cultured BHK 21 cells), 115, 470
Phosphinic acid
MP-103, MP-104, and MP-105 derivatives as metabolites in bialophos biosynthesis (Streptomyces hygroscopicus SF-1293 mutant), 111, 1008
Phosphocreatine
^{31}P NMR, deuterium-induced signal splitting, 114, 1117
Phosphoenolpyruvate
-ATP counter-transport system in C_3 and C_4 chloroplasts (maize, pea), 116, 945
6-Phosphofructokinase
activation by AMP and fructose-2,6-bisphosphate, kinetics (Saccharomyces cerevisiae), 111, 294
during diabetes and fasting, stabilization by fructose 2,6-bisphosphate (rat liver), 113, 548
isozymes with high specific activities, purification (rat liver, muscle), 111, 462
response to variation in adenylate energy charge, NH_4^+ and AMP deaminase regulatory roles (permeabilized Saccharomyces cerevisiae), 112, 96
Phosphoinositides
metabolism in [^{3}H]glycerol- or [^{3}H]arachidonic acid-prelabeled platelets, thrombin effects (human), 110, 108
Phospholipase A
hydrolysis of phosphatidylcholine or phosphatidylinositol bilayers, diacylglycerol and cell stimulation roles (human, rat), 117, 196
Phospholipase A_2
modulation by calmodulin, prostaglandins, and cyclic nucleotides (snake venom), 115, 94
thrombin-activated, inhibition by cAMP (human platelets), 112, 693
Phospholipase C
activity in plasma membranes (lapine synovial cells), 115, 331
endogenous polyphosphoinositide cleavage, product identification (guinea pig synaptic membranes), 112, 919
hydrolysis of phosphatidylcholine or phosphatidylinositol bilayers, diacylglycerol and cell stimulation roles (human, rat), 117, 196
stimulation of human platelet and erythrocyte prothrombinase activity (Clostridium welchii), 117, 803
Phospholipid methyltransferase
myocardial, activity increase in alcoholism (rat), 111, 710
Phospholipids
acylation by incorporation of palmitic and arachidonic acids, all-trans-retinoic acid effects (guinea pig peritoneal granulocytes), 114, 261
binding sites, phenothiazine dis-

placement by cholesterol, 114, 1001
and Ca-activated protein kinase, isolation and characterization (murine lymphosarcoma cells), 116, 675
composition, ethanol effect (bovine HeLa cells), 114, 985
-dependent protein kinase, inhibition by quercetin (murine brain cytosol), 117, 444
hydrolysis, stimulation by mercuric chlorid as Ca-mimetic agent (murine fibroblasts), 110, 758
membrane, methylation, isoproterenol-induced adenylate cyclase, stimulation effect (myogenic cell lines), 114, 339
metabolism in activated mast cells, Ca^{2+} uptake and histamine release (rat), 111, 581
from mitochondrial-lysosomal fraction, activation of lysosomal cathepsin D (porcine adrenal cortex), 110, 934
photoreceptor in retinal cell membrane, reduced phosphorylation in visual mutants (Drosophila melanogaster), 111, 567
plasma membrane, linoleic acid incorporation, effect on ATPase activities and physical properties (rat liver), 117, 809
suspensions with Gramicidin A incorporated as channel structure, ir spectra, 114, 373
synthesis, bethanecol and sincalide stimulation effects (human, rat pancreas), 115, 771
vesicles, see Liposomes
Phosphomannosyl receptors
and Dictyostelium discoideum α-mannosidase, interactions (bovine liver), 116, 541
Phosphonofluoridates
inactivation of elastase and chymotrypsin, 112, 1085
Phosphoprotein phosphatase
activity in insulin receptors, phosphorylation reversibility (rat liver), 117, 885
ATP- and Mg-dependent interconversion, deinhibitor protein role (canine liver), 116, 349
inhibition by heat-labile protein from skeletal muscle (rabbit), 113, 439
inhibitor-2, heat stable, purification and characterization (rabbit reticulocytes), 114, 1089
interconversion, modulator protein role (rabbit skeletal muscle), 115, 871
latent, activity modulation by histone H1 and polylysine (bovine aortic smooth muscle), 117, 493
mammalian and yeast, stimulation by megamodulins from various sources, 114, 403
purified catalytic unit, inhibition by glycogen (rabbit muscle), 114, 148
stimulation by histone H1 (rabbit skeletal muscle), 117, 501
Phosphoproteins
Ca-binding, naturally occurring N - and N^{τ}-histidinoalanine crosslinks (Rangia cuneata extrapallial fluid), 114, 304
Ca^{2+} transport-ATPase intermediate (rabbit sarcoplasmic, rat endoplasmic reticulum), 114, 584
high-molecular mass in hepatic nuclear matrix, identification as 110,000-dalton species (rat), 114, 183
m, insulin-stimulated phosphorylation (rat adipose tissue), 117, 758
nuclear, topoisomerase I activity stimulated by phosphorylation in vitro (Novikoff hepatoma), 111, 897
pp 105, cellular localization (various species), 116, 106
Phosphoribosylaminoimidazolecarboxamide formyltransferase
stimulation by nitrous oxide-induced inactivation of vitamin B_{12} (rat liver), 112, 327
Phosphoribosylglycinamideformyltransferase
inhibition by nitrous oxide-induced inactivation of vitamin B_{12} (rat liver), 112, 327
Phosphorylase
a and b activities, anoxia and cyanide effects (rat hepatocytes), 115, 1033
Phosphorylase a
subtilisin-inactivated, binding of glucose and AMP with discontinued interaction between two binding sites, 113, 825
Phosphorylase kinase
purification and properties (bakers' yeast), 114, 331
Phosphorylase phosphatase
activation by heat-stable protein histone H1 (calf thymus, swine renal cortex), 116, 581
Phosphorylation
2'-nor-2'-deoxyguanosine and acy-

clovir in tissue culture (rabbit kidney), 116, 360
-dephosphorylatin mechanism, acetyl-CoA carboxylase regulation (chick liver), 116, 633
fibrinogen α-chain, interferon-enhanced platelet kinase activity (human), 117, 350
glycogen synthase by calmodulin-dependent protein kinase, substrate specificity (rabbit liver), 116, 412
insulin receptors
β-subunit, insulin-stimulated (human monocyte, monocyte-like cell lines), 115, 560
precursor, insulin-stimulated (rat liver), 116, 417
reversibility and protein phosphatase activity (rat liver), 117, 885
serine residues, insulin effect (human hepatoma cells), 116, 1129
multisite, τ proteins (rat brain), 115, 212
nuclear stress proteins characterization (rat myoblasts), 117, 682
plasma membrane glycoprotein, adriamycin resistance regulation (Chinese hamster lung cells), 115, 159
pyruvate kinase type M_2 (intact chicken liver), 115, 409
tyrosine, 12-O-tetradecanoyl-phorbol-13-acetate effect (chicken embryo fibroblasts), 115, 536

Phosphotransferase
hygromycin B, encoding gene, molecular cloning and expression in Streptomyces lividans (S. hygroscopicus), 117, 6

Phosphotyrosine
in membranes of murine erythroleukemia cells, increase by dimethyl sulfoxide, 112, 413

Photoaffinity labeling
α_1-adrenergic receptors by 4-amino-6,7-dimethoxy-2[4-[5(3-[^{125}I]-iodo-4-azidophenyl)pentanoyl]-1-piperazinyl]-quinazoline (rat cerebral cortex), 115, 946
dopamine-β-hydroxylase by bleomycin, 112, 273
erythrocyte membranes with 12-(4-azido 2-nitrophenoxy)stearoyl-(1-^{14}C)-glucosamine, staphylococcal α-toxin detection (rabbit), 111, 444
mammalian β-adrenergic receptors, heterogeneity changes by protease inhibitors (hamster, rat lung), 110, 504
reagents for pepsin and other carboxyl proteases, synthesis and properties, 111, 630

Photochemical system
riboflavin-light-O_2, degradation of lignin model compound, lack of singlet oxygen involvement, 111, 200

Photolabeling, see Photoaffinity labeling

Photophosphorylation
cyclic, induction by illumination of etioplasts in vitro and in vivo (cucumber cotyledon), 111, 740

Photosynthesis
C_4 regulation (Zea mays), 115, 53
inorganic carbon accumulation as protein carbamate (Euglena gracilis), 111, 544
membrane potential generation and respiratory components (Rhodopseudomonas capsulata), 113, 155

Photosystem I
development in plastids greening in vitro, in vivo comparison (cucumber cotyledons), 111, 740
initial electrochromic absorbance rise generation, inhibition by antimycin I (pea chloroplasts), 111, 619

Photosystem II
electron transport photoactivation, Ca^{2+} effect (dark-grown Picea abies chloroplasts), 116, 803
ferredoxin photoreduction, enhanced sensitivity to plastoquinone inhibitors (inside-out spinach chloroplast vesicles), 115, 722
inside-out thylakoid vesicles, Mn^{2+} removal by EDTA, effect on oxygen evolution (pea chloroplasts), 110, 545
oxygen evolution in thylakoid particles, reversible inhibition by NaCl washing, 23,000-dalton protein role, 113, 738

Phytochrome
effect on Ca transport in plasma membrane (wheat protoplasts), 113, 171

Phytohemagglutinins
-induced lymphocyte proliferation, nicotinamide or 3-aminobenzamide effects (human), 116, 428
and teleocidin, induction of interferon γ and interferon δ production by lymphocytes (human blood), 111, 498

Pisatin
accumulation increase by tomato proteinase inhibitor-inducing factor and chitosans (pea pods), 110, 194
Pituitary tumor
GH3, Ca^{2+} binding site assay, 111, 135
$MtTF_4$, growth inhibition by estradiol in vivo, effect on poly(A)-rich RNA translational activities (rat), 113, 462
Plantacyanin
Cu-surrounding, NMR spectra (cucumber), 117, 385
Plasma
C-peptidase immunoreactivity, increase by trypsin treatment in vitro (human), 111, 785
fasting and postheparin, rat chylomicron retinol and retinyl ester transfer in vitro (human), 115, 958
hypertension-associated protein in patients with essential hypertension, 111, 1015
normal and uremic, ionophorous fraction, partial purification (human), 111, 326
platelet-rich, protein kinase precipitation at pH 5, role in blood coagulation (human), 113, 370
thrombin activity, protein modulator (human), 116, 189
thromboxane B_2, Ca ionophore-induced increase, suppression by oral imidazo[1,5-a]pyridine-5-hexanoic acid (rat), 112, 899
T-kinin liberation by trypsin treatment (rat), 112, 701
vitellogenins I and II, differential responsiveness during primary and secondary estrogen stimulation (chicken), 112, 1049
Plasma membranes
alteration (murine drug-resistant tumor cells), 114, 969
diphenylhexatriene fluorescence polarization, differentiation inducer effects (murine Friend leukemia cells), 117, 294
insulin receptors (rat liver), 114, 1042
phospholipase C activity (lapine synovial cells), 115, 331
redox activity, adriamycin effect (simian virus-transformed liver, hepatoma cells), 116, 210
skeletal framework, DNA polymerase activity (rat hepatoma), 114, 571
vasopressin-receptor complex, solubilization (bovine kidney, rat liver), 116, 91
Plasmids
DNA, two-step gradient purification procedure (Escherichia coli), 117, 835
high-molecular-weight, spontaneous loss connected with biocidal potency decrease and acrystalliferous variant appearance (Bacillus thuringiensis var. israeliensis), 110, 477
pAGO, from Escherichia coli strain containing herpes simplex virus gene for thymidine kinase, gene transfer to murine cells enhanced by verapamil and diltiazem, 110, 783
pBR322
containing cDNA synthesized from total rat prostate poly(A)-RNA, colony hybridization selection (Escherichia coli), 111, 624
DNA interaction with metabolically activated carcinogen causing positive supercoiling and slower spontaneous relaxation, 114, 14
pKG2, coding for enzyme synthesis in polycyclic aromatic hydrocarbon degradation (Beijerinckia sp.), 111, 939
pSV2gpt and pNEO3, carrier DNA-free transformation of Chinese hamster cells, 110, 593
pUB110, cloning of α-amylase gene from Bacillus subtilis, 112, 678
recombinant coding for accumulatin of β-galactosidase or X90 promoter, cell bouyant density increase (Escherichia coli), 111, 104
supercoiled, containing 5' portion and flanking sequences of human β-globin gene, nuclease S1 sensitivity and protection by high-mobility-group proteins HMG1 and HMG2, 112, 547
Plasminogen activator
tissue-type, inhibition by conditioned medium from cultured vascular endothelial cells (human, porcine), 110, 392
Plastids
from etiolated cotyledons, photosynthetic membrane induction by illumination in vitro, in vivo greening comparison (cucumber), 111, 740
Plastocyanin
-cytochrome f covalently linked adduct, preparation with water-soluble carbodiimide (spinach, turnip), 116, 1000

Plastoquinone
inhibitors, enhanced sensitivity to ferredoxin photoreduction by photosystem II (inside-out spinach chloroplast vesicles), 115, 722
Platelet-activating factor
in amniotic fluid, newborn and adult urine (human), 113, 51
arachidonic acid release in neutrophils stimulated by ionophore A23187 (rabbit), 113, 72
conversion to metabolite independent from platelet aggregation (rabbit), 110, 890
inactivation by plasma acetylhydrolase with higher activity in hypertension (rat), 113, 666
neutrophil degranulation, potentiation by 5-L-hydroxy-6,8,11,14-eicosatetraenoic acid (human), 111, 1
Platelet-derived growth factor
effect on $tRNA^{lys}$ modifications (BALB/C 3T3 cells), 115, 598
induction of aortic smooth muscle cell migration, role of lipoxygenase arachidonic acid products (rat), 112, 866
-like growth factor, synthesis, homology with simian sarcoma virus transforming protein (human glioma, sarcoma cells), 117, 176
-stimulated intracellular pH increase (Swiss 3T3 cells), 116, 931
thrombin-released and freeze-thawed outdated concentrates, comparison (human), 116, 809
Platelets
α_2-adrenergic receptor, size determination (human), 116, 1070
aggregation
ADP-stimulated, inhibition by 4,4'-diisothiocyanostilbene-2,2' sulfonate (bovine), 111, 306
phosphatidylinositol-4,5-bisphosphate labeling with [^{32}P]phosphate (rabbit), 113, 483
by collagen from placenta of diabetic and normal subjects, collagen nonenzymatic glycosylation, 111, 602
prostaglandin H_2-induced, stereospecific inhibition by arachidonic acid lipoxygenase products (human), 112, 878
thrombin- or A23187-induced, inhibition by fibronection (human), 116, 135
cytoplasmic free Ca^{2+} concentration, 9,11-epithio-11, 12-methano-thromboxane A_2 effect (human), 117, 663
diadenosine 5',5'''-P^1,P^3-triphosphate, identification (human), 115, 253
diglyceride lipase activity, RHC 80267 effect (human), 116, 68
function, docosahexaenoic acid effect (human), 117, 549
imidazo[1,5-a]pyridine-5-hexanoic acid-induced thromboxane B_2 decrease and prostaglandin E_2 increase (human), 112, 899
phosphoinositide metabolism, thrombin effects (human), 110, 108
platelet-activating factor conversion to metabolite independent from induced aggregation (rabbit), 110, 890
selenium deficient, 12-hydroperoxy-tetraenoic acid formation, glutathione peroxidase and lipoxygenase pathway coupling (rat), 117, 183
serotonin secretion, synergistic functions of 12-O-tetradecanoylphorbol-13-acetate and ionophore A23187 (human), 112, 778
74,000-dalton protein isolation from solubilized membranes, inhibitory action on thrombin binding and serotonin secretion (human), 112, 228
thrombin-activated
cAMP inhibitory effects on serotonin secretion, Ca^{2+} uptake, and phospholipase A_2 (human), 112, 693
arachidonic acid release and diglyceride/monoglyceride lipase pathway inhibition (human), 113, 241
cytoplasmic Ca^{2+} increase, inhibition by cAMP production stimulators (human), 113, 598
polyphosphoinositide increase with release of N-acetyl-β-D-glucosaminidase (human), 110, 660
triphosphoinositide breakdown and dense body release (human), 116, 513
Platinum
-containing compounds, inhibitory effects on DNA synthesis in leukemia cells (L1210), 112, 555
Polyacrylamaide gel electrophoresis
^{3}H-labeled proteins and RNAs, distribution pattern recording by Linear Analyzer, 113, 703
nondenaturating with dithiothreitol, 1α,25-dihydroxyvitamin D_3

receptor second peak detection, 113, 687
Polyadenylation
mRNA, inhibition by gonadotropin-releasing hormone (rat prostate), 115, 451
Poly(ADP-ribose)
size and branching shape (calf thymus), 112, 102
synthesis inhibition by specific inhibitors, chondrocyte differentiation enhancement in limb bud cell culture (chicken), 111, 750
Poly(ADP-ribose) polymerase
role in phytohemagglutinin-induced lymphocyte proliferation, inhibition by nicotinamide or 3-aminobenzamide (human), 116, 428
Polyamines
biosynthesis inhibition
by antimetabolites, differentiation induction in melanoma cells (murine Cloudman S91), 113, 18
resulting in blockage of β-D-glucuronidase urinary secretion (mouse), 112, 770
depletion, inhibition of cellular differentiation (equine L6 myoblast), 114, 944
metabolism in lungs, stimulation by oxygen toxicity (rat), 113, 491
oxidized, cell sensitivity, role in glucocorticoid-induced cytostatic and cytolethal responses (human lymphoid cells), 115, 737
stimulation of cAMP-independent protein kinases, similarity to Co(III) hexaammine effect (rat liver, prostate), 112, 139
Poly(A)-poly(dA)
homopolymer, primer RNA removal by embryo ribonuclease H (chicken), 110, 470
Poly[d(A-T)]
binding of lac repressor headpiece, thermal denaturation (Escherichia coli), 110, 169
Polydeoxyribonucleotide synthetase
activity in fibroblast and lymphocyte crude extracts (Chinese hamster ovary, human), 116, 657
T4, stimulation by spermidine and spermine (Escherichia coli NM 989), 117, 217
Polyethylene glycol
elastase amino group modification, inhibitory effect on anti-elastase serum activity and binding (porcine pancreas), 111, 659
Poly(galactosylglycerol phosphate)
linkage to peptidoglycan by glucosyl-β(1→4)N-acetylglucosamine (Bacillus coagulans cell wall), 111, 312
Poly-L-glutamic acid
in Mg^{2+}, Ca^{2+}-dependent DNA unwinding (porcine thymus), 116, 217
Polylysine
latent phosphoprotein phosphatase activity modulation (bovine aortic smooth muscle), 117, 493
Poly(L-lysine)
colchicine-tubulin binding enhancement 113, 384
Polymyzin B
two-dimensional single quantum correlation, two-dimensional double quantum NMR spectra, 117, 486
Polynucleotides
poly(dG-dC)·poly(dG-dC), B and Z forms, alkylation by dimethylsulfate or methylnitrosourea, methylation by DNA (cytosine-5-)-methyltransferase, 116, 682
synthetic, binding of metabolically activated carcinogen (±)-7r,8t-dihydroxy-7,8,9,10-tetrahydrobenzo-[a]pyrene, base sequence selectivity, 114, 8
Polyoxotungstates
structure, relationship to DNA polymerase inhibition (Escherichia coli), 116, 223
Polypeptides
α-factor, high-molecular-weight precursor biosynthesis (Saccharomyces cerevisiae), 116, 822
antigenic of Sm and RNP antigens, purification and identification (goat liver), 114, 564
cytosolic, from hepatocyte nodules generated during liver carcinogenesis, electrophoretic pattern (rat), 117, 740
low-molecular-weight in lens nuclei during cataract development (human), 113, 65
pancreatic, crystallization (bovine), 116, 830
proline-rich, see Proline-rich proteins
prostate-specific coding by androsterone-dependent mRNA (rat), 111, 624
soybean-derived, pseudo-inhibition of neutrophil superoxide production (human), 117, 22
Polyphemin
teichoic acid-binding lectin, isolation and characterization

(horseshoe crab serum), 113, 611
Polyphosphoinositides
phosphodiesteratic breakdown, product identification (guinea pig synaptic membranes), 112, 919
in platelets, increase after thrombin stimulation, role in aggregation (human), 110, 660
Polyprenol
and pyrophosphate, monophosphate, and fatty acid esters, biosynthesis by soil bacteria grown on mevalonate, 110, 187
Polyribosomes
nuclear transcription in preblastoderm embryos (Drosophila melanogaster), 112, 851
Polysaccharides
sulfated, and α_1-proteinase inhibitor, effect on m_β-acrosin activity, 117, 319
Polysialosyl glycopeptides
structural similarity of brain cell surface protein (BSP-2) and neural cell adhesion molecule (N-CAM) (murine brain), 112, 482
Polysomes, see Polyribosomes
Porphyrins
biosynthesis in animals and plants, 4,5-dioxovalerate precursor, 112, 986
synthetic, disproportionation and recombination in matrix, fast atom bombardment mass spectrometry 111, 478
Postribosomal particles
hepatic, isolation and detection of serum albumin mRNA and protein factors required for translation (rabbit), 113, 868
Potassium ion
binding to elastase-inactivated carbamoyl-phosphate synthetase (ammonia) (rat liver), 117, 238
PPi:fructose 6-phosphate phosphotransferase, see Pyrophosphate-fructose-6-phosphate 1-phosphotransferase
Praseodymium ion
transport, enhancement by lasalocid and synthetic crown ether carboxylic acid, 117, 340
Prealbumin
purificiaton, peptide identification, and amino acid sequence (human amyloid fibril), 114, 657
Pregnancy
endogenous induction of epoxide hydrolase, benzo[a]-pyrene hydroxylase, and glutathione transferase in liver and lung (C57B1 and DBA/2 mice), 112, 313
Pregnenolone synthesis
mitochondrial, sterol carrier protein$_2$-stimulated (rat adrenal, hepatic, ovarian cytosol), 117, 702
Pre-phenoloxidase
activation by bacterial cell walls or β-1,3-glucans (silkworm hemolymph plasma), 113, 562
Preproenkephalin B
-derived endogenous opioid peptide, characterization (porcine pituitary), 117, 695
Proapolipoprotein A I
isolation and amino acid sequence, comparison with mature apolipoprotein A I (human plasma), 113, 626
in Tangier disease, isolation and amino acid sequence (human plasma), 113, 934
Proenkephalin
-derived non-opioid peptide, amino acid sequence (bovine adrenal gland), 113, 229
Progesterone
metabolism in adrenal microsomes (porcine), 111, 512
prolonged administration, uteroglobin synthesis regulation, progesterone and estrogen receptor conservation (immature rabbit uterus), 115, 1015
Progesterone receptors
conservation during prolonged progesterone administration (immature rabbit uterus), 115, 1015
molybdate and urea effects (chick oviduct), 114, 479
protein kinase activity of purified components (chicken oviduct), 113, 960
Progestin
production by luteal cells, estradiol deprivation effect, accumulation of cholesterol and cholesterol esters (pseudopregnant rabbit), 113, 1026
Proinsulin
protonated molecular species, detection by fast atom bombardment mass spectrometry (human), 110, 753
Prolactin
α-lactalbumin induction, selective enhancement by epidermal growth factor (rat mammary explant), 117, 524

ovine
binding to rabbit mammary membrane receptor, pH-dependent dissociation of complex, 111, 224
infusion, prolactin receptor down-regulation (female virgin rat liver, mammary gland, kidney), 116, 644
requirement for casein mRNA accumulation (rat), 116, 994
secretion by pituitary adenomatous cells, inhibition by dopamine (human), 112, 42
synthetic analog, 13 amino acid, radioimmunoassay (human), 115, 346
Prolactin receptors
down-regulation by ovine prolactin or human growth hormone infusions (female virgin rat kidney, liver, mammary gland), 116, 644
rabbit mammary, complex with ovine prolactin, pH-dependent dissociation, 111, 224
stimulation in vitro by aliphatic alcohol-induced membrane fluidization (rat ventral prostate), 113, 220
Proline endopeptidase
neurotensin degradation (rabbit brain), 116, 1151
Proline-rich proteins
bound to prostatic binding protein, multiple forms (rat), 111, 172
synthesis in vitro during mRNA translation from submandibular gland (human), 111, 239
Promegestone
localization in chromatin fraction of nuclei (cultured hepatoma cells), 110, 719
Promethazine
inhibition of synexin activity and cromaffin granule exocytosis (bovine adrenal medulla), 113, 908
Promyelocytic leukemia cells (HL60)
differentiation induced by retinoic acid and phorbolester, glycosyltransferase activity increase (human), 110, 348; erratum, 111, 775
1α,25-dihydroxyvitamin D_3-induced differentiation into monocyte-macrophages (human), 117, 86
maturation induced by 2-β-D-ribofuranosylselenazole-4-carboxamide (human), 115, 971
Pronase
thermophilic cytochrome oxidase proteolysis, effect on proton-pumping and oxidase activities, 113, 575
Prophages
induction in Vibrio cholera by furazolidone treatment, 112, 1106
Propranolol
inhibition of cholesterol ester synthesis (human fibroblasts), 112, 795
stimulation of cholesterol synthesis (human fibroblasts), 112, 795
Propylthiouracil
effect on neurotensin content in pituitary and hypothalamus in vivo (rat), 113, 248
Prostacyclin
biosynthesis
leukotrene C_4-stimulated, agonist-specific desensitization (human endothelial cells), 117, 780
vascular, extracellular ADP- and ATP-stimulated (rabbit aorta, pulmonary artery; rat aorta), 112, 284
Prostaglandin D_2
adenylate cyclase stimulation, effect on cytoplasmic Ca^{2+} decrease in thrombin-activated platelets (human), 113, 598
Prostaglandin E_1
adenylate cyclase stimulation, effect on cytoplasmic Ca^{2+} decrease in thrombin-activated platelets (human), 113, 598
inhibition of
neutrophil superoxide radical production activated by formyl-methionyl-leucylphenylalanine (human), 113, 506
tumor promoter-induced interleukin 2 producton by thymocytes (mouse), 114, 93
Prostaglandin E_2
in intact platelets, accumulation induction by imidazo[1,5-a]-pyridine-5-hexanoic acid (human), 112, 899
production, stimulation by fetal and adult urine substances (human amnion cells), 114, 1056
reversal of cortisol inhibitory effect on α-lactalbumin synthesis (murine mammary explants), 111, 1059
selective binding sites on peritoneal macrophages (rat), 114, 155
synthesis from arachidonic acid in erythrocytes (Opsanus tau), 110, 250
12-O-tetradecanoylphorbol-13-acetate-induced release from 3T3 rat cell variants with loss of mitogenic response, 111, 194

Prostaglandin F_2
reversal of cortisol inhibitory effect on α-lactalbumin synthesis (murine mammary explants), 111, 1059
Prostaglandin $F_{2\alpha}$
effect on insulin-stimulated protein synthesis (rabbit muscle), 116, 1084
stimulation of phosphatidic acid-phosphatidylinositol turnover (rat luteal cells), 116, 39
synthesis from arachidonic acid in erythrocytes (Opsanus tau), 110, 250
12-O-tetradecanoylphorbol-13-acetate-induced release from 3T3 rat cell variants with loss of mitogenic response, 111, 194
Prostaglandin H_2
platelet aggregation induction, stereospecific inhibition by arachidonic acid lipogenase products (human), 112, 878
Prostaglandin H synthase
mediation of carcinogenic arylamine reaction with tRNA and homopolyribonucleotides (ovine seminal vesicle microsomes), 111, 96
Prostaglandin I_2
inhibition of neutrophil superoxide radical production activated by formyl-methionyl-leucyl-phenylalanine (human), 113, 506
selective binding sites on peritoneal macrophages (rat), 114, 155
Prostaglandins
concentration changes during endochondral bone differentiation (rat tissue), 117, 746
and interferon, antiviral action (virus-infected murine cells), 116, 442
phospholipase A_2 modulation (snake venom), 115, 94
production by A23187-stimulated macrophages, inhibition by trifluoperazine and verapamil (rat), 114, 248
Prostaglandin synthase
inhibition by lecanoric acid analogs (ovine seminal vesicles), 110, 733
Prostatic binding protein
amino acid sequence homology with rabbit uterglobin (rat), 114, 325
binding to multiple forms of proline-rich polypeptide (rat), 111, 172
α_1-Proteinase inhibitor
effect on nerve growth factor and kallikrein amidolytic activities, 113, 108
Protease inhibitors
effects on β-adrenergic receptor heterogeneity in lung membranes (hamster, rat), 110, 504
Proteases
acid, vasoactive peptide generation from rat plasma kininogen (rodent Murphy-Sturm lymphosarcoma), 112, 621
Ca^{2+}-activated, effect on spectrin and band 3 protein (rat erythrocyte membrane), 117, 372
contaminating activity in spinach leaves, role in ferredoxin-$NADP^+$ reductase molecular heterogeneity, 110, 280
H4, -activated protein kinase, isolation and characterization (murine lymphosarcoma cells), 116, 675
insect serine endopeptidase, amino acid sequence, comparison with bovine chemotrypsin (Vespa orientalis larvae), 110, 1
insulin, see Insulin protease
low-Ca-requiring form, purification and characterization (porcine cardiac muscle), 111, 700
lymphocyte, strain-related activity (murine cell surface), 114, 600
-α_2-macroglobulin complex, binding and clearance (murine peritoneal macrophages), 114, 757
neutral, Ca^{2+}-activated, proteolysis of epidermal growth factor receptor (rat hepatic membrane), 113, 255
Staphylococcus aureus V-8, inactivation of synexin, 112, 147
Proteinase inhibitor-inducing factor
stimulation of pisatin synthesis in pea pods (tomato leaves), 110, 194
α_1-Proteinase inhibitor
and sulfated polysaccharides, effect on m_β-acrosin activity (human), 117, 319
Proteinase inhibitors
heat-stable, low-molecular-weight for lysosomal cysteine proteinases, inhibition of cathepsins B and H (human serum), 110, 449
synthesis, stimulation by proteinase inhibitor-inducing factor and chitosans (tomato leaves), 110, 194
Proteinases
Ca^{+2}-activated, vimentin degradation (calf lens), 116, 204
lysosomal cysteine, inhibition by human serum inhibitor, 110, 449
neutral, active against collagen type

I C-terminal crosslinking region (human gingival fibroblasts), 114, 1064
Protein carbamate
inorganic carbon accumulation during photosynthesis (Euglena gracilis), 111, 544
Protein carboxymethyltransferase, see Protein O-methyltransferase
Protein-disulfide reductase (glutathione)
in cultured fibroblasts, dependence on fetal calf serum and insulin (human skin), 111, 872
hepatic latent and nonlatent activity during perinatal development and liver regeneration (rat), 116, 909
Protein HC
neutral microprotein, isolation and characterization (guinea pig, human, rabbit), 117, 202
Protein kinase
activation by Ca/phospholipid or H4 protease, isolation and characterization (murine lymphosarcoma cells), 116, 675
activity
in platelets, interferon-enhanced, fibrinogen α-chain phosphorylation (human), 117, 350
of progesterone receptor purified components (chicken oviduct), 113, 960
ATP-citrate lyase, acetyl CoA carboxylase phosphorylation (rat adipose, liver), 117, 435
Ca-dependent, inhibition by quercetin (murine brain cytosol), 117, 444
Ca^{2+}/phospholipid-dependent activity, correlation with cell proliferation in Ca^{2+}-deficient medium (rat liver), 115, 383
calmodulin-dependent
glycogen synthase phosphorylation, substrate specificity (rabbit liver), 116, 412
microtubule disassembly with ATP and Ca^{2+} (rat brain), 110, 287
cAMP-dependent
acetyl CoA carboxylase phosphorylation (rat adipose tissue, liver), 117, 435
activation by forskolin in parotid cells (mouse), 111, 21
catalytic unit
autophosphorylation, stimulation by acidic phospholipids and sodium dodecyl sulfate (bovine heart), 113, 916
inhibitory effect on Na^+,K^+-ATPase (hamster sperm homogenate), 112, 132
phosphorylation stimulation of fructose-1,6-bisphosphatase in vitro (yeast), 115, 317
Type I regulatory subunit isozyme, detection within Type II isozyme chromatographic peak (murine epididymal fat), 112, 214
streptozotocin-induced diabetes effect on cAMP binding activity (rat liver), 117, 794
cAMP-independent
polymine-like effects of Co(III) hexaammine (rat liver, prostate), 112, 139
purification and characterization (AH-66 rat hepatoma cells), 113, 1010
SPK 380, histidine residue reversible self-phosphorylation (bovine adrenal cortex), 112, 884
tightly bound to DNA, characterization (rat liver nuclei), 117, 610
cGMP-dependent
from bovine lung, phosphorylation of high-mobility-group protein (calf thymus), 110, 378
stimulation of Na^+,K^+-ATPase (hamster sperm homogenate), 112, 132
phospholipid-dependent, inhibition by quercetin (murine brain cytosol), 117, 444
phospholipid-sensitive Ca^{2+}-dependent
high activity in neutrophil particulate fraction (human), 111, 847
stimulation by 12-O-tetradecanoylphorbol-13-acetate, effect on serotonin release (human platelets), 112, 778
precipitating from platelet-rich plasma at pH 5, role in blood coagulation (human), 113, 370
τ protein multisite phosphorylation (rat brain), 115, 212
stimulation of topoisomerase I isolated from Novikoff hepatoma, 111, 897
12-O-tetradecanoylphorbol-13-acetate-activated, Ca^{2+}- and phospholipid-dependent, retinal inhibition, 114, 1194
tyrosine
-specific, activity in purified Leydig cells (rat), 116, 400
in T lymphoma cells (human), 117, 843

Protein kinase C
inhibition by histones H3 and H4 (rat brain), 115, 1027
role in signal-induced lysosomal enzyme release (rabbit platelets, rat neutrophils), 116, 743
Protein O-methyltransferase
in crude lens extracts, characterization (bovine), 113, 418
separation from phenylethanolamine N-methyltransferase (bovine adrenal medulla), 112, 1061
Protein phosphatase, see Phosphoprotein phosphatase
Proteins
acidic
5'-terminal sequence, interaction with 18-S rRNA (murine whey), 116, 167
glial fibrillary, isolation and purification (bovine brain), 115, 58; erratum, 791
actin polymerization stimulator, isolation and purification (bovine thyroid plasma membrane), 111, 415
adenovirus type 2, trimeric nature of penton base and fiber, 110, 913
amyloid prealbumin variant, identification (amyloidotic polyneuropathy patient kidney), 116, 880
antiphospholipase, glucocorticoid-induced, characterization (rat), 117, 878
ATPase inhibitor, see ATPase inhibitor protein
band 3, degradation by Ca^{2+}-activated protease (rat erythrocyte membrane), 117, 372
benzodiazepine receptor, developmental changes, carboxylmethylation role (rat brain), 116, 1056
binding enterotoxin of Clostridium perfringens, isolation and identification (rabbit brush-border membrane), 112, 1099
Ca^{2+}-dependent in erythrocyte cytoplasm, increase of membrane Na^+,K^+-ATPase sensitivity to Ca^{2+} inhibition (human), 111, 970
calmodulin-binding, see Calmodulin-binding proteins
γ-carboxyglutamic acid-containing, purificationtion from demineralized organic bone matrix (bovine), 117, 765
chromatin, see Chromatin proteins
chromosomal, -DNA crosslinking by uv, γ radiation, and antitumor drugs (HeLa cells), 114, 767
coat of bacteriophage M13 (B protein), different conformation in filaments, I-forms, and spheroids, circular dichroism, 112, 349
corticosteroid-binding, intracellular, ketoconazole binding (Candida albicans), 117, 43
cytosolic, inhibition of S-adenosyl-L-methionine-mediated methylation of phosphatidylethanolamine (rat liver), 112, 108
cytochrome P-450_{LM_4} 12 α-hydroxylase activity (rabbit liver), 113, 212
precursor of δ-aminolevulinate synthase mRNA translation product (chicken embryo liver), 110, 23
synthesized in cell-free system, stimulation of protein release from isolated mitochondria (rat hepatocytes), 113, 199
12-O-tetradecanoylphorbol-13-acetate binding, dependence on Ca^{2+} and phospholipids (murine tissues), 111, 340
23,000-dalton in photosystem II thylakoid particles, role in oxygen evolution, 113, 738
74,000-dalton from platelet membranes, inhibition of thrombin binding and serotonin secretion in platelets (human), 112, 228
270,000-dalton in tetrodotoxin-binding component of Na^+ channel, affinity labeling in cross-linking study (Electrophorus electricus electroplax), 114, 126
deinhibitor, role in interconversion of ATP- and Mg-dependent protein phostatase (canine liver), 116, 349
DNA-binding, see DNA-binding proteins
electron transport, alloxan reduction (porcine liver microsomes), 114, 578
epididymal and seminal, radioimmunoassay and radioreceptor assay (canine, guinea pig, hamster, human, rabbit, rat), 114, 653
factor X coagulant, see Factor X coagulant proteins
fiber type IIM-specific in jaw-closer muscles, identification (feline), 113, 519
heat-labile inhibitor of protein phosphatase (rabbit skeletal muscle), 113, 439
helix-destabilizing, isolation from herpes simplex virus type 1-infected cells (hamster kidney), 116, 327
high-mobility-group, see High-mobility-group proteins

^{3}H-labeled, distribution pattern, 113, 703
hypertension-associated, isolation from plasma (essential hypertension patients), 111, 1015
iron-sulfur, see Iron-sulfur proteins
λ hypothetical and tail-fiber, sequence homology (bacteriophage T4), 115, 1061
lysosomal enzyme-binding, isolation by phosphomannan-Sepharose (Macaca radiata brain), 112, 398
membrane
ADP-ribosylation by pertussis toxin (bovine brain), 115, 325
epidermal growth factor-dependent phosphorylation in Rous sarcoma virus-transformed cells (rat), 113, 678
in inside-out thylakoid vesicles, removal by EDTA, effect on oxygen evolution (pea chloroplasts), 110, 545
methyl-accepting chemotaxis, serine and aspartate chemoreceptors, ion channel element selection (Escherichia coli, Salmonella typhimurium), 115, 648
microsomal hepatic, stimulation of cytochrome P-450$_{LM_4}$ 12 α-hydroxylase activity (rabbit), 113, 212
mitochondrial
inner membrane 30K hydrophobic, comparison with subunit 32K of cytochrome b-c$_1$ complex (yeast), 110, 945
release in vitro, stimulation by cytosolic proteins synthesized in cell-free system (rat hepatocytes), 113, 199
modulator, role in phosphoprotein phosphatase interconversion (rabbit skeletal muscle), 115, 871
τ, multisite phosphorylation (rat brain), 115, 212
myelin, see Myelin proteins
nafenopin-binding, detection and peroxisome proliferation induction (rat liver cytosol), 116, 388
neutral microprotein, isolation from protein HC and α$_1$-microglobulin, characterization (guinea pig, human, rabbit), 117, 202
nonhistone, ADP-ribosylation in HeLa cell cycle, 115, 938
nonmetallothionein, and cadmium accumulated from aquarium water (rainbow trout liver), 110, 584
NS of vesicular stomatitis virus, specific non-covalent binding of GDP, inhibition by ATP, 114, 138
nuclear, phosphorylation suppression by ADP-ribosylation (chicken liver), 113, 135
2',5'-oligoadenylate synthetase-binding, activity, temperature effect (mammalian extracts), 117, 57
osteocalcin-related, vitamin D-dependent γ-carboxylation (rat femoral bone, renal cortex), 113, 294
overproduction in Escherichia coli with recombinant plasmids, cell bouyant density increase, 111, 104
pancreatic stone, see Pancreatic stone proteins
PDC-109 from bovine seminal plasma, amino acid sequence, 113, 861
phosphorylation in chromaffin granules, role in exocytosis-like interaction with adrenal medullary plasma membranes (bovine), 110, 55
in plastids during greening in vitro and in vivo (cucumber cotyledon), 111, 740
prostatic binding, see Prostatic binding proteins
prostatic steroid-binding, see Prostatic binding proteins
proton-proton spin-spin coupling constants, measurements with two-dimensional correlated NMR spectroscopy, 113, 967
pyridoxal phosphate-binding, see Pyridoxal phosphate-binding proteins
pyruvate, orthophosphate dikinase regulating, isolation and characterization (maize leaves), 111, 288
recombinant-DNA products, primary structure, fast atom bombardment high field magnetic mass spectrometry, 117, 229
release by skin fibroblasts in culture, glycoprotein M_r 2000,000 detection (Huntington disease patients), 111, 690
retinoic acid-binding, intracellular detection, HPLC (human cultured cell, tumor cytosols), 116, 75
retinol binding, intracellular detection, HPLC (human cultured cell, tumor cytosols), 116, 75
riboflavin-binding, see Riboflavin-binding proteins
ribosomal from 50-S subunit, addition to 5-S RNA, effect on incorporation into 16-S, 23-S RNA complex (Escherichia coli), 114, 348
S100, brain-specific, synthesis in

colcemid-resistant mutant sublines sensitivity decrease to colcemid (rat glial cells), 112, 73
7-S storage, β-subunit, exogenous methionine effect on mRNA formation (cultured soybean cotyledons), 117, 658
S-100b, Zn^{2+} binding (human brain), 114, 1138; erratum, 115, 769
short-lived, [^{35}S]methionine-labeled, degradation, stimulation by amino acids (rat hepatocytes), 117, 509
spectrin-like synaptosomal component (rat cerebral cortex), 115, 437
spin system, identification by two-dimensional double quantum ^{1}H NMR spectroscopy, 113, 854
sterol-carrier, mitochondrial pregnenolone synthesis stimulation (rat adrenal, hepatic, ovarian cytosol), 117, 702
stress, 25,000 dalton, phosphorylation pattern (rat myoblasts), 117, 682
substrates of phospholipid-sensitive Ca^{2+}-dependent protein kinase in neutrophil particulate fraction (human), 111, 847
sulfhydryl, ~23,000-M_r, role in high O_2 partial pressure-activated protein synthesis (rabbit reticulocytes), 117, 135
synaptosome membrane, developmental spin label study (rat brain cortex), 117, 688
thrombin-stimulated phosphorylation DNA synthesis reinitiation hamster fibroblasts), 111, 1034
and serotonin release (human platelets), 111, 1034
thyroid hormone-binding, characterization in brain cytosol primary cultures (rat embryos), 116, 901
transforming, simian sarcoma virus, homology with platelet-derived growth factor-like growth factor (human glioma, sarcoma cells), 117, 176
vinculin-binding, high molecular weight, electroblot-overlay detection (various muscle, non-muscle tissues), 116, 1026
vitamin D-binding, carbohydrate chain, isolation and characterization (human), 117, 324
vitamin K-dependent, warfarin-induced accumulation (rat), 114, 991
Protein synthesis
hemin and allyl isopropyl acetamide effects (rat hepatocytes), 114, 612
high oxygen partial pressure-activated inhibitor, relationship to glutathione disulfide-induced inhibitor and to ~23,000-M_r-sulfyhdryl protein (rabbit reticulocytes), 117, 135
inhibition by
2',5'-A_4 tetramer analog enzymatically synthesized in rabbit reticulocyte lysate, 111, 205; erratum, 114, 1200
aminoglycoside antibiotics stimulating DNA synthesis (Escherichia coli), 112, 801
cycloheximide or purimycin, induction of histone mRNA increase in exponentially growing and synchronous G_1 HeLa cells, 114, 131
2,4-dinitrofluorobenzene and creatine phosphokinase (rat quarter diaphragm), 111, 884
D-galactosamine and ethanol, mutual potentiation (murine hepatocytes), 112, 361
8-methoxypsoralen with uv irradiation (L1210 cells), 112, 965
insulin-stimulated, prostaglandin $F_{2\alpha}$ (rabbit muscle), 116, 1084
initiation complex formation with initiation factor, GTP-dependent stimulation by UTP (Streptomyces aurefaciens), 114, 222
in nuclease-treated mRNA-dependent reticulocyte lysate, inhibition by dsRNA-like component of cytoplasmic mRNA from HeLa cells, 114, 41
pituitary, estradiol benzoate-induced changes (male rat), 116, 230
Protein synthesis inhibitors
antigenic determinants (barley, rye, wheat), 114, 190
Proteoliposomes
Ca^{2+} permeability, S-adenosylmethionine effect (chicken erythrocyte membrane proteins), 114, 1126
Proteolysis
ATP-dependent, role in methemoglobin reductase solubilization during reticulocyte maturation (rabbit), 116, 357
S-cyanylation and domain-specific antibodies, fibronectin domain structure identification (human pericellular matrix, plasma), 116, 534
Prothrombin
Ca effects on molecular states, reaction with bifunctional alkyla-

ting reagents (bovine), 111, 213
Prothrombinase
activity, stimulation by Clostridium welchii phospholipase c (human erythrocytes, platelets), 117, 803
kinetic parameters, physical significance, 114, 526
Proton exchange
octanol-water, acceleration by non-steroidal anti-inflammatory drugs, NMR, 113, 745
Protoporphyrin IX
Mg-dependent guanylate cyclase activation (rat liver plasma membranes), 116, 47
Protoporphyrinogen IX oxidase, see Protoporphyrinogen oxidase
Protoporphyrinogen oxidase
synthesis site and activity factor (rat liver), 116, 383
Pseudomonas aeruginosa
cytochrome c comparison with Desulfovibrio desulfuricans, 113, 519
DNA gyrase resistance to nalidixic acid, Escherichia coli comparison, 110, 694
Pseudomonas putida CR 1-1
enzyme catalyzing synthesis of D-cysteine-related amino acids, 111, 809
Pseudouridine
in 5-S RNA, modification with 4-bromomethyl-7-methoxycoumarin, melting behavior of corresponding segment (yeast), 114, 81
Psoralens
mono- and bifunctional, oxygen radical formation, role in biological activities, 112, 638
Pterins
reduced, tyrosine hydroxylase inactivation (rat), 117, 894
Pterobilin
conversion to sarpedobilin in larvae (Papilio sarpedon), 110, 779
Pteroylmonoglutamte
intestinal transport, cAMP effect (rat jejunum), 115, 756
Purine
analogs, DNA strand break induction (mouse), 115, 834
nucleotide metabolism, alteration during muscle differentiation in vitro (rat), 116, 507
-pyrimidine residues, alternating sequences, DNA forming potential (radish, wheat nuclear genomes), 116, 113
Puromycin
inactivation by acetylating enzyme from Streptomyces alboniger, 113, 772
Purple membranes
mobility characteristics, ^{13}C, ^{31}P, and ^{2}H NMR (Halobacterium halobium), 114, 713
Putrescine
accumulation, adenosylmethionine decarboxylase inhibition by 3-deasa-(±)aristeromycin (HeLa cells), 114, 505
hyperoxia-induced increase in lungs (rat), 113, 491
lysine decarboxylase inhibition (Escherichia coli induced, non-induced cells), 114, 882; erratum, 116, 355
microvascular, synthesis, blood-brain barrier breakdown mediation (rat cerebral cortex), 116, 1039
Pyridinoline
crosslink formation in nonmineralized bones (chicken), 113, 975
Pyridoxamine 5'-phosphate
aspartate aminotransferase activation, inhibitory potential of organic and inorganic phosphates and anionic compounds (porcine heart), 112, 629
binding to tryptophan synthase from Escherichia coli, ^{31}P NMR, 111, 817
Pyrolysis
-produced mutagenic and carcinogenic heterocyclic amines, ultimate forms (Salmonella typhimurium TA98/1.8-DNP$_6$), 114, 626
Pyridoxal phosphate-binding proteins
in liver and hepatoma cytosolic extracts, immunoblot detection (rat), 112, 61
Pyrimidine
analogs, DNA strand break induction (mouse), 115, 834
-purine residues, alternating sequences, -DNA forming potential (radish, wheat, nuclear genomes), 116, 113
Pyrophosphate
glycogen synthesis regulation (Escherichia coli), 115, 820
Pyrophosphate-fructose-6-phosphate 1-phosphotransferase
activation by fructose 2,6-bisphosphate contaminant in commercial fructose 6-phosphate (castor bean), 117, 37
Pyrrolidinylnaphthoquinone
formation from 4-chlorobutylamino-naphthoquinone (rat hepatocytes), 112, 356
Pyruvate
decarboxylation (rat perfused

skeletal muscle), 116, 456
effect on pyruvate, orthophosphate dikinase activation/inactivation by adenylate energy charge (Zea mays chloroplasts), 115, 673
stimulation of growth and attachment of melanoma cells, replacement by ferricyanide in serum-free media (human), 112, 183
Pyruvate dehydrogenase (lipomide)
α-subunit phosphorylation, inhibition by dichloroacetate and AMP (rat brain, heart, liver mitochondria), 111, 1054
Pyruvate dehydrogenase activator
release by liver particulate fraction, stimulation by insulin (rat), 112, 35
Pyruvate dehydrogenase inhibitor
generation by insulin, high fat diet and dexamethasone effects (rat liver), 117, 456
Pyruvate kinase
activity loss after limited proteolysis with cathepsin B, restoration by fructose 1,6-bisphosphate (rat liver), 110, 682
type M_2, phosphorylation (intact chicken liver), 115, 409
Pyruvate, orthophosphate dikinase
activation/inactivation, control of adenylate energy charge, pyruvate, oxamate, and oxalate effects (Zea mays chloroplasts), 115, 673
dark-light regulation by activation-inactivation catalyzing protein (maize leaves), 111, 288
regulation by ADP-dependent phosphorylation and dephosphorylation (Zea mays), 115, 53

Q

Quercetin
inhibition of Ca- and phospholipid-dependent protein kinases (murine brain cytosol), 117, 444
Quinone-methides
from chemical rearrangement of polycyclic aromatic hydrocarbon phenol-epoxide metabolites, 117, 129
Quinuclidinyl benzilate
binding to muscarinic acetylcholine receptors regulated by guanine nucleotides, Tris and choline effects (canine, frog, murine, rat heart), 113, 280
Quasi-molecular ions
from neurotoxin, detection by [^{127}I]plasma desorption mass spectroscopy (cobra venom), 110, 519
Quinidine
inhibition of ADP-stimulated vascular prostacyclin synthesis (rabbit aorta, pulmonary artery, rat aorta), 112, 284
Quinol dehydrogenase
catalytic component of NADPH-dependent oxidoreductase in stimulated and resting neutrophils (human), 110, 873
Quinuclidinyl benzilate
binding to muscarinic receptors
inhibition by ATP due to orthovanadate contamination (rat corpus striatum), 110, 567
stimulation by monovalent cations and guanide nucleotides, N-ethylmaleimide pretreatment effect (chicken heart), 111, 41; erratum, 112, 348

R

Radicals
oxidizing, nafazatrom oxidation, ESR and pulse radiolysis, 115, 800
Radioimmunoassay
epididymal and seminal proteins (canine, guinea pig, hamster, numan, rabbit, rat), 114, 653
leukotrienes (guinea pig lung), 117, 574
salivary gland glucagon as fictitious substance due to tracer-degrading activity resistant to protease inhibitors (rat), 113, 340
Radioiodination
glycoproteins, inhibitory effect on binding to immobilized lectins, 110, 103
thyroglobulin in vivo and in vitro, effect on amino acid sequence around tyrosine residue in N-terminal region (human), 114, 73
Radioreceptor assay
epididymal and seminal proteins (canine, guinea pig, hamster, human, rabbit, rat), 114, 653
Raman spectroscopy
electron transfer flavoprotein dehydrogenase structure (porcine hepatic mitochondria), 113, 784
low-frequency vibrations from Watson-Crick base-pairing in tRNA aqueous solution (Escherichia coli), 111, 120
purple intermediate in D-amino-acid oxidase, flavin detection (por-

cine kidney), 111, 588
resonance, bromelain, chymopapain, ficin, and papain active-site substrate conformations, comparison, 117, 725
Receptors, see specific receptors
Red dye No. 2
stimulation of carcinogenesis-linked aryl hydrocarbon hydroxylase and guanylate cyclase (rat liver), 111, 409
Renocortin
characterization (rat), 117, 878
Respiration
alteration resulting in lack of Na^+ pump in mutants sensitive to carbonylcyanide m-chlorophenylhydrazone (Vibrio alginolyticus), 114, 113
interconnection with photogenerated membrane potential measured by tetraphenylphosphonium ion redistribution (Rhodopseudomonas capsulata), 113, 155
Restriction endonuclease analysis
nucleotide sequence changes in DNA of Algerian patients with β-thalassemia, 113, 269
Reticulocytes
Fe uptake, NH_4Cl effect (rat), 113, 650
transferrin recycling, NH_4Cl effect (rat), 113, 650
Retinal
chromophore, carboxyl group localization (bacteriorhopsin), 114, 872; erratum, 115, 407
inhibition of 12-O-tetradecanoylphorbol-13-acetate activated, Ca^{2+}- and phospholipid-dependent protein kinase, 114, 1194
Retinoic acid
binding protein, intracellular detection, HPLC (human cultured cell, tumor cytosols), 116, 75
effect on HL60 cells, differentiation induction and glycosyltransferase activity increase (human), 110, 348; erratum, 111, 775
stimulation of collagen synthesis in corneal endothelial cell culture (rabbit), 114, 395
all-trans-Retinoic acid
effect on incorporation of palmitic and arachidonic acids into various phospholipids (guinea pig peritoneal granulocytes), 114, 261
Retinol
binding protein, intracellular detection, HPLC (human cultured cell, tumor cytosols), 116, 75
differentiation induction, mechanism (embryonal carcinoma cells), 114, 593
stimulation of collagen synthesis in corneal endothelial cell culture (rabbit), 114, 395
transfer in vitro through fasting- and postheparin human plasma (rat chylomicron), 115, 958
Retinyl esters
transfer in vitro through fasting- and postheparin human plasma (rat chylomicron), 115, 958
Retrovirus
reverse transcriptase decrease in hybridoma cell supernatants, role of mycoplasma contamination (mouse), 112, 265
Reverse phase evaporation
bacteriorhodopsin incorporation into large unilamellar liposomes, 111, 373
Reverse transcriptase, see DNA nucleotidylexotransferase
RHC 80267, see (1,6-Di(O-carbamoyl)-cyclohexanone oxime)hexane
Rheumatoid arthritis
acute, plasma α_1-antichymotrypsin amino terminal sequence different from normal (human), 111, 438
Rhizobium japonicum
strains producing 4-O-methyl-D-glucorono-L-rhamnan, agglutination by soybean lectin, 111, 798
Rhodanese, see Thiosulfate sulfurtransferase
Rhodopseudomonas capsulata
photogenerated membrane potential, interconnection with respiratory components, 113, 155
Rhodopsin
-lipid interactions, high-resolution solid-state ^{13}C NMR (bovine retina), 114, 1048
Riboflavin
deficiency and repletion, effect on H_2O_2 production and catalase biosynthesis (mammalian), 117, 788
Riboflavin-binding protein
interaction with 8-fluoro-8-demethylriboflavin, ^{19}F NMR study (hen egg white), 110, 406
2-β-D-Ribofuranosylselenazole-4-carboxamide
-induced maturation, human promyelocytic leukemia cell line, 115, 971
and 2-β-D-ribofuranosylthiazole, cytotoxicities (murine tumor cell culture), 115, 544
2-β-D-Ribofuranosylthiazole-4-carboxamide
and 2-β-D-ribofuranosylselenazole-

4-carboxamide, cytotoxicities (murine tumor cell culture), 115, 544
Ribonuclease A
inhibition by porcine ribonuclease inhibitors (bovine pancreatic), 114, 1154
second derivative Fourier transform infrared spectra (bovine), 115, 391
Ribonuclease H
removal of RNA primer from DNA in poly(A)-poly(dA) homopolymer (chicken embryo), 110, 470
Ribonuclease inhibitors
ribonuclease A inhibition (porcine liver, thyroid), 114, 1154
Ribonuclease P
RNA processing mutant effect (Escherichia coli), 114, 690
Ribonuclease T_1
binding of 8-bromoguanylic acids, absorption and circular dichroism spectroscopy, 114, 88
Ribonucleoproteins
11-S, requirement for lysosomal enzyme translocation across microsomal membranes (canine, porcine), 115, 275
vesicular stomatitis virus, virus production and release after microinjection (vero cells), 116, 1160
Ribonucleoside diphosphate
as substrates for nucleoside-diphosphatase, cluster analysis (rat hepatocyte Golgi fraction), 113, 178; erratum, 114, 1200
Ribonucleoside-diphosphate reductase
tyrosine free radical generation during incubation with dithiothreitol and iron in presence of air (calf thymus), 110, 859
Ribonucleotide reductase, see Ribonucleoside-diphosphate reductase
Ribonucleotides
androgen receptor binding characteristics (rat prostate), 114, 1147
incorporation into mRNA and not into DNA (permeabilized CHEF/18 cells), 115, 1022
Ribose-5-phosphate
and 2-aminopyrimidine aqueous reaction, nucleoside-5'-monophosphate formation, 117, 93
Ribosomes
membrane bound, α-amylase and α-glucosidase synthesis (Bacillus licheniformis), 114, 677
subunits
30-S and 70-S, initiation complex formation with initiation factor, GTP-dependent stimulation by UTP (Streptomyces aurefaciens), 114, 222
60-S, altered in dystrophic skeletal muscle (hamster), 115, 153
Ricinus communis toxin
binding to intestinal microvillus membranes, increase during postnatal development (rat), 113, 391
Rimorphin
detection in human hypothalamus together with α-neo-endorphin and dynorphin A, 113, 30
RNA
association with dexamethasone-receptor complex in nuclei (HeLa cells), 113, 876
double-stranded (dsRNA)
cucumber mosaic virus-associated, complimentary strand separation (infected tobacco tissue), 116, 1168
HeLa-cell mRNA protein synthesis inhibitor component in reticulocyte lystate, 114, 41
M1, reverse transcription, double-stranded cDNA synthesis (Saccharomyces cerevisiae), 114, 518; erratum, 115, 406
peanut stunt virus-associated, complimentary strand separation (infected tobacco tissue), 116, 1168
synthesis from poly I, poly C, and heat treatment, interferon α induction in human lymphocytes, 110, 851
^{3}H-labeled, distribution pattern in polyacrylamide gel, recording by new Linear Analyzer, 113, 703
messenger (mRNA)
from aged slices of sweet potato roots, cell-free synthesis of succinate dehydrogenase and mitochondrial F_1-ATPase, 113, 235
δ-aminolevulinate synthase from chicken embryo liver, enzyme precursor as primary translation product of, 110, 23
androgen-dependent from ventral prostate, cell-free translation (rat), 111, 624
α_1-antitrypsin detection (human leukocytes, liver), 116, 375
apolipoprotein A-I^+, coding for precursor protein, sequencing using cloned cDNA (human liver), 112, 257
casein
accumulation, insulin and

prolactin requirement (rat), 116, 994
42K, stimulation by hydrocortisone in mammary tissues from adrenalectomized virgin rats, 114, 380
25K, total hydrocortisone dependence of accumulation in mammary tissues from adrenalectomized virgin rats, 114, 380
from choriocarcinoma cells, direction of placental alkaline phosphatase biosynthesis in cell-free system, 111, 611
creatine kinase from canine myocardium, in vitro translation, 110, 967
cytoplasmic
from HeLa cells, dsRNA-like components that inhibit protein synthesis in reticulocyte lysate, 114, 41
nuclear precursors in glioma and fetal brain cells, comparison by hybridization with cDNA (human), 110, 96
ferritin, translatable levels in leaves with various Fe contents (Phaseolus vulgaris), 115, 463
formation, 7-S storage protein β-subunit, exogenous methionine effect (cultured soybean cotyledons), 117, 658
β-globin, long molecules among transcripts of 5' end (human bone marrow), 112, 1041
growth hormone, inhibition in pituitary tumor by estradiol treatment (rat), 113, 462
hepatic or enteric from different mouse strains, in vitro translation of multiple apolipoprotein A-I plasma isoforms, 114, 275
histone, increase by protein synthesis inhibition in exponentially growing and synchronous G_1 HeLa cells, 114, 131
from human submandibular gland, cell-free translation of proline-rich protein, 111, 239
interleukin 2, cloning (human tonsils), 115, 1040
α-lactalbumin
accumulation in mammary explants, inhibition by cortisol, reversal by prostaglandin E_2 or $F_{2\alpha}$ (mouse), 111, 1059
in epididymis (rat), 117, 306
malic enzyme, induction by fructose and insulin in diabetic liver (rat), 112, 176
methionine-enkephalin precursor, regulation by haloperidol and lithium in striatum, mechanisms (rat), 113, 391
myosin light chain and isozymes, changes during muscle transformation from fast to slow (rabbit), 113, 325
nonpolysomal, content and translational activity during cell cycle (mouse sarcoma-180 ascites), 113, 923
pituitary encoding precursors to lutropin and follitropin subunits, translation activity regulated by estrogen treatment in vivo (rat), 114, 65
polyadenylation inhibition by gonadotropin-releasing hormone (rat prostate), 115, 451
polysomal from rat liver, cytosolic protein synthesis in cell-free system, 113, 199
prolactin, stimulation in pituitary tumor by estradiol treatment (rat), 113, 462
ribonucleotide incorporation (permeabilized CHEF/18 cells), 115, 1022
sequences, recombinant DNA synthesized human and ovine growth hormone effects (hepatocyte culture), 115, 882
serum albumin, in hepatic postribosomal particles (rabbit), 113, 868
stacking-interaction model, 7-methylguanine-tryptophan systems, 115, 849
β subunit synthesis, regulation by RNA polymerase at level of translation (Escherichia coli), 113, 1018
5'-terminal sequence of whey acidic protein, 18-S rRNA 3'-end interaction sites (mouse), 116, 167
thyroglobulin nuclear and cytoplasmic thyroid cell fractions, thyrotropin post-transcriptional effect (porcine), 116, 54
total from rat brain, myelin proteolipid synthesis in cell-free system, 110, 432
translation product, identification by rabbit antibodies to glycogen synthase (rat liver), 117, 332
tubulin, accumulation, induction by gangliosides (neurohybrid clone SB21B1 cells), 116, 974
vesicular stomatitis virus, hydrolysis by 2', 5'-A_n-dependent nuclease activated by 2',5'-A_4

tetramer analog, 111, 205; erratum, 114, 1200
vitellogenin, estrogen-induced synthesis, inhibition by tamoxifen (chicken liver), 112, 425
newly synthesized in preblastoderm embryos, nuclear transcripts in polysomes (Drosophila melanogaster), 112, 851
poly(A)-rich, from pituitary tumor inhibited by estradiol, translational activities in comparison with untreated tumors (rat), 113, 462
primer, removal from DNA in poly(A)-poly(dA) homopolymer by ribonuclease H, 110, 470
processing mutant, isolation, effect on RNase P (Escherichia coli), 114, 690
5-S
incorporation into 16S·23S RNA complex after addition of 50S ribosomal proteins in certain combinations (Escherichia coli), 114, 348
partial melting of segment around pseudouridine modified with 4-bromomethyl-7-methoxycoumarin (yeast), 114, 81
16-S·23-S complex, incorporation of 50-S RNA after addition of 50-S ribosomal proteins in certain combinations (Escherichia coli), 114, 348
ribosomal (rRNA)
accumulation, cell cycle initiation signals (Swiss 3T3 cells), 117, 223
genes, resemble interferon-induction specific sequence cDNA clones (mitochondria), 114, 670
5-S nucleotide sequence (Coprinus cinereus), 116, 148
18-S, 3'-end, whey acidic protein mRNA 5'-terminal sequence interaction sites (mouse), 116, 167
transfer (tRNA)
aqueous solution, low-frequency vibrations from Watson-Crick base pairing (Escherichia coli), 111, 120
N^6 (Δ^2-isopentenyl)adenosine and N^6-(4-hydroxy-3-methyl-but-2-enyl)adenosine, monoclonal antibodies to, characterization (bovine, murine), 114, 791
leucyl-, p-nitrophenylcarbamyl derivative of pentanucleotide from, lack of affinity of 3'-terminal fragment to peptidyltransferase (Saccharomyces cerevisiae ribosomes), 113, 941
reaction with carcinogenic arylamines, mediation by prostaglandin H synthase, 111, 96
$tRNA^{Leu}$ primary structure (Bacillus stearothermophilus), 112, 578
$tRNA^{lys}$ modification reactions, competence and progression growth factor effects (BALB/C 3T3 cells), 115, 598
$tRNA_m^{Met}$, nucleotide sequence (wheat germ), 114, 1161
transformation of 4-thiouridine-5'-monophosphate to uridine-5'-monophosphate, induction by enzymatically generated excited molecules (Escherichia coli), 117, 923
RNA-DNA hybrid helix
cleavage at junction between RNA and DNA portion by ribonuclease H from chicken embryo, 110, 470
RNA polymerase
regulation of mRNA β-subunit synthesis at level of translation (Escherichia coli), 113, 1018
RNA synthesis
inhibition by
aflatoxin B_1, microsomal enzyme inhibitor effect (rat hepatocytes), 115, 15
cisplatin in vitro, adriamycin effect (Escherichia coli), 115, 577
8-methoxypsoralen in combination with uv irradiation (L1210 cells), 112, 965
stimulation by aminoglycoside antibiotics in absence of protein synthesis and guanosine polyphosphate production (Escherichia coli), 112, 801
Rous sarcoma virus
rat cell transformation, reduction of epidermal growth factor binding, 113, 678
temperature-sensitive mutant, effect on calmodulin and its receptor in transformed cells, 112, 647
Ruthenium red
-insensitive Ca^{2+} uptake, phosphate-dependent (mung bean mitochondria), 114, 1176

S

Saccharomyces cerevisiae
α-factor, high-molecular-weight precursor synthesis in vivo, 116, 822
oxygen-deprived culture, ergosterol sparing by cholesterol and other sterols lacking 24 β-methyl group, 112, 47
Salivary glands
parotid cells in vitro, secretion stimulation by forskolin (mouse), 111, 21
Salmonella typhimurium
aspartate chemoreceptor-methyl-accepting chemotaxis protein, ion channel element selection, 115, 648
benzo [a]pyrene-induced increase in revertant numbers, reduction by chalcone derivatives and L-ascorbic acid, 112, 833; erratum, 115, 406
Salmonella typhimurium TA98
TA98/1,8-DNP$_6$-deficient, proximate mutagen activation and DNA binding by acetyl-CoA-dependent enzyme, 116, 141
Sarcolemma
cardiac, adenylate cyclase inhibition, sodium fluoride effect (canine, rabbit, rat), 115, 583
Sarcoma-180 ascites cells
nonpolysomal mRNA content and translational activity during cell cycle (mouse), 113, 923
Sarcoma cells
platelet-derived growth factor-like growth factor, synthesis, homology with simian sarcoma virus transforming protein (human), 117, 176
Sarpedobilin
biosynthesis from pterobilin in larvae (Papilio sarpedon), 110, 779
Schizophyllum commune
cellulase, N-terminal sequence, homology with hen egg-white lysozyme active site, 116, 408
Schizosaccharomyces pombe
and Candida tropicalis, plasma membrane ATPase, antigenic relationship, 115, 1114
Scorpion toxin receptors
α and β, photoaffinity labeling, role in voltage-dependent Na^+ channels (rat brain), 115, 415
Secretin
cAMP accumulation induction in pancreatic adenocarcinoma cells during differentiation in culture (human), 111, 958
effects on glucose output and cyclic AMP (isolated perfused rat liver), 115, 743
in gastrointestinal tract during postnatal development (rat), 112, 891
inhibition of plasma growth hormone increase induced by human pancreatic growth hormone-releasing factor during anesthesia (rat), 112, 469
Selenium
-deficient platelets, 12-hydroperoxy-tetraenoic acid formation, glutathione peroxidase and lipoxygenase pathway coupling (rat), 117, 183
Seminal plasma
major protein PDC-109, amino acid sequencing (bovine), 113, 861
Sepiaterin reductase
effect on tetrahydro-sepiapterin intermediate in tetrahydrobiopterin biosynthesis (bovine adrenal medulla), 115, 888
Serine chemoreceptor
-methyl-accepting-chemotaxis protein, ion channel element selection (Escherichia coli), 115, 648
Serine hydroxymethyltransferase
sequence homology between prokaryotic, eukaryotic forms (rabbit liver, Escherichia coli), 116, 1007
Serotonin
adenylate cyclase activation, inhibition by aluminum chloride (Fasciola hepatica), 112, 911
secretion by human platelets, synergistic functions of 12-O-tetradecanoylphorbol-13-acetate and ionophore A23187, 112, 778
thrombin-induced release from human platelets
association with protein phosphorylation, 111, 1034
inhibition by cAMP, 112, 693
inhibition by 74,000-dalton protein isolated from platelet membranes, 112, 228
Serum
endotoxin-treated, specific β-endorphin binding sites on SC5b-9 complement complex (human), 113, 839
fetal calf, see Fetal calf serum
-stimulated intracellular pH increase (Swiss 3T3 cells), 116, 931

Serum albumin
decrease by cytokine preparation injection (rat) 112, 14
gene, structural integrity in congenital analbuminemia (human), 116, 817
hydrated powders, fluorescence lifetimes (bovine), 114, 901
intra- and interspecies hybrid molecules, spontaneous formation between peptide-fragment derivatives (bovine, human, rat), 114, 20
production, 5-azacytidine effects (neonatal rat liver), 116, 939
role in hydrogen ion diffusion by gastric mucus (canine), 115, 1053
synthesis in hepatic postribosomal particles after addition of ribosomal subunits and sources of energy (rabbit), 113, 868
Sialidosis
4-methylumbelliferyl-α-D-N-acetylneuraminic acid neuraminidases, genetically different forms (human leukocytes), 117, 470
Sialoside-globoside
teratocarcinoma cell glycolipid (human), 112, 935
Siba
synthetic nucleoside, inhibition of 1-aminocyclopropan-carboxylic acid synthesis (tomato fruit extracts), 113, 586
Sickle cell disease
hemoglobin Stanleyville II mutation, inhibition of fiber formation (human erythrocytes), 111, 8
Signal recognition particle, see Ribonucleoproteins, 11-S
Silicate
transmembrane transport induced by ionophore isolated from Nitzschia alba, 114, 365
Simian sarcoma virus
transforming protein, homology with platelet-derived growth factor-like growth factor (human glioma, sarcoma cells), 117, 176
Simian virus 40
uv-irradiated minichromosomes, as substrates for DNA repair endonucleases, 113, 309
Sincalide
-stimulated pancreas, effect on phospholipid synthesis (human, rat), 115, 771
Sinefungin
from Streptomyces griseolus, inhibition of 1-aminocyclopropane-carboxylic acid synthesis (tomato fruit extracts), 113, 586
S_1 Nuclease, see Nuclease S_1
Sodium bicarbonate
incorporation into renal cortex microsomes, blockage in vitamin D deficiency (rat), 113, 294
Sodium borohydride
reaction with highly strained ether ring in neocarzinostatin chromophore, NMR, 113, 538
Sodium chloride
thylakoid particle washing, effect on reversible O_2 evolution inhibition, role of 23,000-dalton protein, 113, 738
Sodium dodecyl sulfate
nucleosomal DNA-binding proteins, dissociation resistance (chicken erythrocyte nuclei), 114, 99
stimulation of autophosphorylation of cAMP-dependent protein kinase catalytic unit (bovine heart), 113, 916
Sodium fluoride
effect on membrane-bound adenylate cyclase activity (canine, rabbit, rat heart sarcolemma), 115, 583
Sodium ion
collagen production modulation (human fibroblast cell culture), 117, 313
effect on
high-affinity agonist binding sites of muscarinic receptor subtypes (rat cerebellum, cerebral cortex, heart), 116, 284
muscarinic acetylcholine receptor properties (bovine cerebral cortex), 112, 948
-glutathione cotransport system in renal basal-lateral vesicles (rat), 112, 55
-H^+ exchange, inhibition by ethylisopropyl-amiloride (various cell types), 116, 86
-induced Ca^{2+} release (Ehrlich ascites tumor mitochondria), 115, 430
permeability, induction by 15-O_5 macrocyclic polyether carriers in large unilamellar vesicles, 116, 981
regulation of somatostatin binding to pancreatic membranes (guinea pig), 115, 827
respiration-coupled extrusion, reduction in mutants isolated by sensitivity to carbonylcyanide m-chlorophenylhydrazone (Vibrio alginolyticus), 114, 113
stimulation of glucose transporter solubilization by Triton X-100 (porcine renal brush border), 112, 444

voltage-dependent Na^+ channel
α and β scorpion toxin receptor roles (rat brain), 115, 415
with high affinity to tetrodotoxin
changes during fetal and postnatal development (rat brain, cerebellum, skeletal muscle), 110, 894
role of 270,000-dalton protein (Electrophorus electricus electric organ), 114, 126

Sodium lauryl sulfate
silver strain, peptide mapping of myosin heavy-chain isoforms (rat skeletal muscle), 116, 793

Somatostatin
binding to pancreatic membranes, regulation by Ca^{2+}, K^+, and Na^+ (guinea pig), 115, 827
inhibition of
forskolin- and isoproterenol-stimulated cAMP accumulation, pertussis toxin effect (murine anterior pituitary tumor cells), 115, 794
insulin secretion, lack of effect on glucose-stimulated phosphatidylinositol turnover (rat pancreatic islets), 112, 419
relative proportions of three molecular forms in six brain areas, radioimmunoassay (rat), 112, 297

Somatotropin
^{125}I-labeled, binding to rat liver lactogenic sites, specificity (human), 115, 29

Soybean agglutinin
binding to intestinal microvillus membranes, increase during postnatal development (rat), 113, 400; erratum, 116, 355
specificity toward Rhizobium japonicum strains producing 4-O-methyl-D-glucurono-L-rhamnan, 111, 798

Sparsomycin
analog, peptidyltransferase inhibition, role of sulfoxide moiety, 114, 1

Spectrin
degradation by Ca^{2+}-activated protease (rat erythrocyte membrane), 117, 372
-like protein, synaptosomal component (rat cerebral cortex), 115, 437

Spectrin-actin complexes
crosslinking by band 4.1, effect on actin polymerization (human erythrocytes), 111, 360

Sperm
-activating peptides, purification, action, and amino acid sequence (Anthocidaris crassispina egg jelly), 117, 147
Ca^{2+} uptake, stimulation by calmodulin antagonists, mechanism (porcine), 114, 28
caudal epididymal, forward mobility, stimulation by cumulus oophorus-egg complexes (bovine), 115, 777
satellite DNA, undermethylation (bovine, mouse), 113, 695

Spermidine
auxotroph growth stimulation: sym-homospermidine, aminopropyl-cadaverine, and spermidine structural specificities (Escherichia coli), 117, 616
hyperoxia-induced delayed increase in lungs (rat), 113, 491
inhibition of
fructose-1,6-bisphosphatase (spinach chloroplasts), 115, 707
lysine decarboxylase (Escherichia coli), 114, 882; erratum, 116, 355
microvascular, synthesis, blood-brain barrier breakdown mediation (rat cerebral cortex), 116, 1039
stimulation of T4 polydeoxyribonucleotide synthetase, 117, 217
structural specificity in stimulating spermidine auxotroph growth (Escherichia coli), 117, 616

Spermine
fructose-1,6-bisphosphatase inhibition (spinach chloroplasts), 115, 707
hyperoxia-induced delayed increase in lungs (rat), 113, 491
microvascular, synthesis, blood-brain barrier breakdown mediation (rat cerebral cortex), 116, 1039
stimulation of T4 polydeoxyribo nucleotide synthetase, 117, 217

Sphigomyelin
accumulation in spleen, decrease after bone marrow transplantation (Niemann-Pick mouse), 113, 605
degradation by fibroblasts, strong inhibition by cholesterol and 7-dehydrocholesterol (human), 112, 860
vesicles, specific binding of 12-O-tetradecanoylphorbol-13-acetate, inhibition by phorbol esters, indole alkaloids, and polyacetates, 112, 709

Sphingomyelinase
decrease by cholesteral and 7-dehydrocholesterol, sphingomyelin degradation inhibition (human

fibroblasts), 112, 860
Staphylococcal α-toxin
insertion into erythrocyte membranes, detection by photolabeling (rabbit), 111, 444
Staphylococcus aureus
agglutination by polyphemin, 113, 611
Stearoyl coenzyme A
desaturation by NADPH-cytochrome reductase (Tetrahymena microsomes), 115, 456
Sterigmatocystin
conversion to O-methylsterigmatocystin and aflatoxin B_1 in cell-free system (Aspergillus parasiticus mutant), 116, 1114
Steroid 17 α-monooxygenase
activities as 17 α-hydroxylase and $C_{17,20}$-lyase, reaction with antibodies to testicular C_{21} side-chain cleavage P-450 (porcine adrenal microsomes), 111, 512
Steroidogenesis
adrenal, corticotropin-induced stimulation, elimination by γ_3-melanotropin antisera (rat), 110, 357
Steroids
interactions with lipid bilayers, fluorescence anisotropy, 113, 799
Sterols
-carrier protein$_2$, mitochondrial pregnenolone synthesis stimulation (rat adrenal, hepatic, ovarian cytosol), 117, 702
lacking 24 β-methyl group, ergosterol sparing in growth of oxygen-deprived Saccharomyces cerevisiae, 112, 47
Stopped-flow fluorescence
enzyme-substrate complexes of aminopeptidase, formation and breakdown (Aeromonas), 111, 946
Streptococcus
synthetic peptides coupled to tetanus toxoid, antibody immunogenicity and response specificity (murine), 117, 908
Streptococcus faecalis
non-viable cells containing antigenic glycans, immunization-induced anti-lactose antibody production (rabbit), 113, 555
Streptococcus mutans
enzyme, dextran branch formation in absence of sucrose, 115, 287
Streptomyuces alboniger
puromycin-producing, acetylation effects, 113, 772
Streptomyces aurefaciens
peptide chain initiation in presence of initiation factor, GTP-dependent stimulation by UTP, 114, 222
Streptomyces hygroscopicus
hygromycin B phosphotransferase gene, molecular cloning and expression in Streptomyces lividans, 117, 6
Streptomyces hygroscopicus SF-1293
herbicide bialophos biosynthesis, role of phosphinic acid derivatives MP-103, MP-104, and MP-105 produced by blocked mutant, 111, 1008
Streptomyces lividans
hygromycin B phosphotransferase gene from Streptomyces hygroscopicus, molecular cloning and expression, 117, 6
Streptozotocin
-induced diabetes, effect on regulatory subunit type 1 cAMP-dependent protein kinase cAMP binding activity (rat liver), 117, 794
Subcellular fractionation
cardiac myocytes, nimodipine binding site density comparison (rat), 113, 185
Substance P
aggregate properties, synthesis and purification, 114, 1109
hydrolysis by dipeptidyl carboxypeptidase (rat brain), 116, 735
Subtilin
precursor protein detection in vivo and conversion in vitro (Bacillus subtilis ATCC 6633), 116, 751
Subtilisin
phosphorylase a inactivation and breaking interaction between AMP and glucose binding sites, 113, 825
thermophilic cytochrome oxidase proteolysis, effect on proton-pumping and oxidase activities, 113, 575
Succinate dehydrogenase
flavoprotein subunit, mRNA-directed cell-free synthesis (sweet potato root), 113, 235
Succinate thiokinase, see Succinyl-CoA synthetase (ADP-forming)
Succinyl-CoA synthetase (ADP-forming)
affinity chromatography on Procion Red-agarose (cell-free extracts from bacteria, yeast, and porcine liver), 112, 1021
Succinyl-CoA synthetase (GDP-forming)
phosphorylation, inhibition by

dichloroacetate and AMP (rat brain, heart, liver, mitochondria), 111, 1054
Sugars
conversion to alcohols, isotope fractionation quantitation by ^2H NMR, 111, 890
Sulfate ion
effect on phenylglyoxal-sensitive sites in erythrocyte membrane (human), 110, 616
Sulfatide
stimulation of γ-aminobutyric acid binding to postsynaptic receptors (murine brain), 112, 827
Sulfhydral groups
-containing peptide-Ni(III) complexes and hydrogenase Ni(III) chromophore, ESR, 115, 878
inhibition by chloromethyl ketones causing reduction in superoxide radical production (human neutrophils), 112, 671
membrane, melphalan resistance (murine L1210 leukemia cells), 117, 670
Sulfotransferase
activity in cytosol fracton of salivary glands, kinetics with triglucosyl monoalkylmonoacylglycerol substrate (rat), 113, 817
Sulfur
elemental (S-8), adenylate kinase inhibition, 113, 348
incorportaion into biotin from cystine, methionine, and thiocystine (Escherichia coli), 110, 243
Superoxide dismutase
Cu, Zn-
affinity inactivation by HO_2^- (bovine liver), 116, 1107
chemically modified at all lysines, reduction of anion binding and anion inhibition (bovine erythrocytes), 111, 860
oxidative aging, electrophoretic variants: H_2O_2, ascorbate, Fe(III), and EDTA effects (bovine), 117, 677
inhibition of cytochrome c reduction by hydrogen peroxide (bovine), 111, 231
isozymes in normal mammary tissues and mammary tumors (rat), 113, 883
Mn-, saturation kinetics (Paracoccus denitrificans), 113, 114
Superoxide radicals
generation by cytochrome P-450 model system, α-tocopherol and γ-oryzanol reaction kinetics, 115, 1002
-induced myelin deterioration in vitro (human brain), 117, 141
production by neutrophils
induced by
formyl-methionyl-leucyl-phenylalanine, inhibition by prostaglandins E_1 and I_2 (human), 113, 506
phorbol myristate acetate or arachidonic acid, prostaglandin E_1, I_2 effects (human), 113, 506
phorbol myristate acetate, inhibition by chloromethyl ketones (human), 112, 671
pseudo-inhibition by soybean-derived polypeptides (human), 117, 22
production by sensitized monofunctional and bifunctional psoralens, 112, 638
Swainsonine
effect on macrophage receptor-mediated mannosyl-oligosaccharide uptake and degradation (rat lung), 116, 922
Syalyltransferase
stimulation by cytokine preparation injection (rat liver, serum), 112, 14
Synaptosomes
γ-aminobutyric acid binding, stimulation by sulfatide (murine brain), 112, 827
aminopeptidase activity in conversion of NH_2-terminus of adrenocorticotropin (rat brain), 111, 259
CDPdiacylglycerol-inositol 3-phosphatidyltransferase activity, stimulation by Mn^{2+} (rat brain), 112, 817
concanavalin A binding, low in intact vesicles, increase after solubilization by Triton X-100 (calf brain), 110, 804
glycine receptor increase by Triton X-100 treatment (rat spinal cord), 112, 809
γ-hydroxybutyrate high affinity binding (rat brain), 110, 262
irradiation inactivated, nitrendipine receptor size determination (rat brain), 111, 878
lipids and proteins, developmental spin label study (rat brain cortex), 117, 688
phosphatidylserine, chronic ethanol consumption-induced increase (guinea pig), 113, 262
phosphodiesteratic breakdown of endogenous polyphosphoinositides

(guinea pig brain), 112, 919
spectrin-like protein component, identification (rat cerebral cortex), 115, 437
Synexin
binding to chomaffin granules, Ca dependence and pH sensitivity (bovine liver), 114, 355
chromaffin granule aggregation induction and secretion, inhibition by phenothiazine drugs (bovine adrenal medulla), 113, 908
inactivation by Staphylococcus aureus V-8 protease and synexin-like protein (bovine adrenal medullary), 112, 147
-like protein enhancing Ca^{2+}-induced membrane aggregation, isolation and identification (bovine adrenal medullary, liver), 112, 147

T

Tamm-Horsfall urinary glycoprotein
blood group SD^2-active pentasaccharide, isolation and structure (human), 115, 625
Tamoxifen
inhibition of estrogen-induced vitellogenin mRNA synthesis (chicken liver), 112, 425
Tangier disease
proapolipoprotein A-I, isolation and amino acid sequencing (human plasma), 113, 934
TCDD, see 2,3,7,8-Tetrachlorodibenzo-p-dioxin
T cell growth factor, see also Interleukin 2
isolation and characterization (human Jurkat leukemia cell line), 117, 623
primate, purification, distinct molecular species, reverse phase HPLC (ape lymphocytes), 115, 762
Teichoic acid
binding to polyphemin isolated from horseshoe crab serum, 113, 611
inhibition of 12-O-tetradecanoylphorbol-13-acetate binding to sphingomyelin, 112, 709
with phytohemagglutinin, induction of interferons γ and δ production by lymphocytes (human blood), 111, 498
and 12-O-tetradecanoylphorbol-13-acetate, effect on insulin secretion (rat pancreatic islet), 117, 78
Temperature effects
on aldolase, activity of only two out of four binding sites at -13° (rabbit muscle), 110, 578
on ATPase structure, intrinsic tryptophan fluorescence changes (bovine cardiac submitochondrial particles), 111, 366
estradiol receptor binding capacity loss in vitro at 37°C, protection by treatment with dextran-coated charcoal (rat uterus), 110, 713
on fluorescence of 5S RNA modified with 4-bromomethyl-7-methoxycoumarin, partial melting detection (yeast), 114, 81
on low-frequency sound emissions by motile cultures (Tetrahymena thermophilia ciliate), 117, 190
on 2',5'-oligoadenylate synthetase-binding protein activity (mammalian extracts), 117, 57
palmitoyl-CoA desaturase increase after shift from 34° to 15°C, especially in ergosterol-replaced cells (Tetrahymena pyriformis), 113, 96
Teratocarcinoma
carbohydrate α-galactosyl residue, antigenic determinant (human ovarian germ cell tumor), 115, 268
glycolipids fucosyl-globoside and sialosyl-globoside, isolation and identification (human), 112, 935
Terbium ion (Tb^{3+})
binding to two receptors with different sensitivity to Ca^{2+} (GH3 pituitary tumor cells), 111, 135
Terminal deoxynucleotidyl transferase, see DNA nucleotidylexotransferase
Testosterone
α-D-glucuronidase induction in kidney, unaffected by polyamine synthesis inhibition (mouse), 112, 770
metabolism in
granulosa cell culture, androgen effects (rat), 113, 948
neonatal brain, comparison in normal male and tfm mutant (rat), 111, 717
production stimulation by luteinizing hormone, mechanism (rat testicular cells), 112, 496
Tetanus toxin
effect on Ca action potential spike (neuroblastoma clone N1E-115), 115, 788

2,3,7,8-Tetrachlorodibenzo-p-dioxin
7-ethoxycoumarin O-deethylase induction (human tumor-derived epithelial cells), 115, 611
oral administration, lipoperoxidation induction as possible cause of toxicity (rat liver), 111, 854
12-O-Tetradecanoylphorbol-13-acetate
binding to
soluble cytosolic protein, dependence on Ca^{2+} and phospholipid presence (murine tissues), 111, 340
sphingomyelin vesicles, inhibition by phorbol esters, indole alkaloids, and polyacetates, 112, 709
Ca^{2+}-dependent stimulation of hexose transport (murine 3T3 fibroblasts), 117, 637
-dependent carcinogenesis, inhibition by 1α,25-dihydroxyvitamin D_3 (murine skin), 116, 605
effect on
aldosterone secretion, angiotension II and ionophore A23187 comparison (porcine adrenal gland), 116, 555
HL60 cells, differentiation induction and glycosyltransferase activity increase (human), 110, 348; erratum, 111, 775
tyrosine phosphorylation (chicken embryo fibroblasts), 115, 536
and ionophore A23187, effect on insulin secretion, comparison with glucose (rat islet), 117, 448
stimulation of
arachidonic acid release from cultured cells, inhibition by lecanoric acid analogs, 110, 733
proliferation in lectin-treated thymocytes, inhibition by agents increasing cellular cAMP, mechanism (mouse), 114, 93
prostaglandin E_2, $F_{2\alpha}$, and arachidonic acid without mitogenesis induction (3T3 rat cell variants), 111, 194
serotonin release and phosphorylation of 20K and 40K proteins (human platelets), 112, 778
and teleocidin, effect on insulin secretion (rat pancreatic islet), 117, 78
Tetradecapeptides
synthetic, correspondence to amino acid sequence 31-44 of growth hormone, stimulation of glucose uptake by adipose tissues (rat), 110, 866
Tetrahydrobiopterin
biosynthesis, tetrahydro-sepiapterin intermediate, sepiaterin reductase effect (bovine adrenal medulla), 115, 888
inhibition of phenylalanine hydroxylase limited proteolysis by chymotrypsin, 110, 919
Tetrahydro-sepiapterin
intermediate in tetrahydrobiopterin biosynthesis, sepiaterin reductase effect (bovine adrenal medulla), 115, 888
Tetrahymena pyriformis
ergosterol-induced increase in palmitoyl-CoA desaturase activity, especially after temperature shift from 34° to 15° C, 113, 96
Tetrahymena thermophilia
cilate, motile cultures, temperature-dependent low frequency sound emissions, 117, 190
meso-Tetra(4-N-methylpyridyl)porphine
and Zn^{2+} and Ni^{2+} derivatives, interactions with DNA, NMR and viscometric studies, 113, 148
Tetraphenylphosphonium ion
light-dependent uptake, oxygen-induced inhibition as probe of interaction between photosynthetic and respiratory components in membrane system (Rhodopseudomonas capsulata), 113, 155
Tetraphenylporphyrin
Co and Fe, -thiolate complex, superoxide generation, α-tocopherol and γ-oryzanol reaction kinetics, 115, 1002
Tetrapyrrole
bile pigment, affinity and thin layer chromatography (rat liver microsomes), 117, 406
Tetrodotoxin
binding to voltage-dependent Na^+ channel
during fetal and postnatal development (rat brain, cerebellum, skeletal muscle), 110, 894
role of 270,000-dalton protein as binding site (Electrophorus electricus electric organ), 114, 126
Tetrodotoxin receptors
in skeletal muscle plasma membranes during purification (rabbit), 112, 521
Thalassemia
β-, detection by DNA restriction endonuclease analysis in Algerian patients, 113, 269
Theophylline
inhibitory effects on low-density lipoprotein binding and internalization, synthesis of choles-

terol and cholesteryl esters (human fibroblasts), 112, 795
Thermolysin
thermophilic cytochrome oxidase proteolysis without affecting proton-pumping and oxidase activities, 113, 575
Thiamin
H-D exchange reaction, indole ring and thiazolium ring stacking-interaction effect, 116, 486
Thiazolium ring
and indole ring, stacking interaction, effect on thiamin H-D exchange reaction, 116, 486
Thieno[2,3-g]pteridines
as molybdenum cofactor oxidation products, isolation from nitrate reductase (Escherichia coli) and xanthine oxidase (bovine milk), 111, 537
Thiocystine
^{35}S-labeled, sulfur incorporation into biotin (Escherichia coli), 110, 243
Thioglycolic acid ethyl ester
-Co and Fe tetraphenylporphyrin complexes, superoxide generation, α-tocopherol and γ-oryzanol reaction kinetics, 115, 1002
Thiol groups
free
in α-amylase sequence, localization (porcine pancreas), 110, 726
release by α_2-macroglobulin complexes with proteinases, localization near complex surface, 111, 964
Thiolactomycin
inhibition of Escherichia coli fatty acid synthesis, mechanism (Nocardia sp. No. 2-200), 115, 1108
Thiol protease
iC3b forming, isolation (guinea pig polymorphonuclear leukocytes), 117, 413
Thiol proteinase inhibitors
amino acid sequence (rat liver), 115, 902
α_1- and α_2-, from human plasma, inhibition of Ca^{2+}-activated neutral protease from muscle, 110, 256
Thiol-protein disulfide oxidoreductase, see Protein-disulfide reductase (glutathione)
Thiols
-containing peptide-hemin complexes, cytochrome P-450 models (bovine), 115, 590
Thioredoxins
fructose-1,6-bisphosphatase activation, inhibition by spermidine and spermine (spinach chloroplasts), 115, 707
f-type, amino acid sequence (spinach chloroplast), 115, 1
m-type, amino acid sequence (spinach chloroplast), 115, 1
Thiosulfate
intermediate in bisulfite reduction by Desulfotomaculum nigrificans cell extracts, 117, 530
Thiosulfate sulfurtransferase
apolar interaction with octyl substituted agarose gel (bovine liver), 111, 595
4-Thiouridine-5'-monophosphate
transformation to uridine-5'-monophosphate in tRNA, induction by enzymatically generated excited molecules (Escherichia coli), 117, 923
Thrombin
activity modulation by plasma protein (human), 116, 189
binding to platelets and serotonin secretion induction, inhibition by 74,000-dalton protein from platelet membranes (human), 112, 228
induction of 27,000-dalton protein phosphorylation in resting platelets (human) and lung fibroblasts (hamster), 111, 1034
platelet activation
arachidonic acid release, unaffected by diglyceride/monoglyceride lipase pathway inhibition (human), 113, 241
cAMP inhibitory effect (human), 112, 693
cytoplasmic Ca^{2+} increase, prevention by adenylate cyclase stimulators (human), 113, 598
effects on phosphoinositide metabolism (human), 110, 108
polyphosphoinositide increase, parallel release of N-acetyl-β-D-glucosaminidase (human), 110, 660
triphosphoinositide breakdown and dense body release (human), 116, 513
-released platelet-derived growth factor and freeze-thawed outdated concentrates, comparison (human), 116, 809
Thromboxane A_3
formation after eicosapentaenoic acid ingestion (human platelets), 116, 1091

Thromboxane B_2
Ca ionophore-induced formation, inhibition by imidazo[1,5-a]pyridine-5-hexanoic acid (human platelets), 112, 899
Thromboxane synthetase
inhibition by imidazo[1,5-a]pyridine-5-hexanoic acid in isolated platelets (human) and in vivo (rat), 112, 899
inhibitors, effect on virus replication in fibroblasts (human lung), 116, 264
Thylakoids
inside-out vesicles, washed by EDTA to remove Mn^{2+} and surface proteins, inhibition of oxygen evolution (pea chloroplasts), 110, 545
photosystem II particles, oxygen evolution reversible inhibition by NaCl washing, role of 23,000-dalton protein, 113, 738
Thymidine kinase
cytosolic in hepatoma, increased concentration in comparison with liver (rat), 111, 280
induction in thymidine kinase-deficient mouse L cells by DNA-mediated gene transfer, enhancement by verapamil and diltiazem, 110, 783
inhibition by 3-aminobenzamide, β-lapachone, and aphidicolin after methyl methane sulfonate DNA damage (human), 117, 30
Thymocytes
lectin-treated, inhibition of tumor promoter-induced proliferation by agents increasing cellular cAMP, mechanism (mouse), 114, 93
oxidized with $NaIO_4$ or galactose oxidase, surface glycoconjugate fluorescence labeling with Lucifer yellow CH (mouse), 112, 872
Thyroglobulin
interaction specificity with thyroid cells and membranes (mammalian), 114, 962
mRNA sequences in nucleus and cytoplasm, thyrotropin post-transcriptional effect (porcine), 116, 55
radioiodinated in vivo and in vitro, amino acid sequence around tyrosine residue in N-terminal region (human), 114, 73
triiodothyronine-containing peptide, isolation and amino acid sequencing (porcine), 112, 206
Thyroid peroxidase, see Iodide peroxidase
Thyroid-stimulating hormone (TSH), see Thyrotropin
Thyrotropin
effect on glycosaminoglycan synthesis in thyroid cell culture (porcine), 111, 353
interaction with membrane receptor glycoprotein component, fluorescence study (rat thyroid cells), 110, 48
post-transcriptional effect on nuclear and cytoplasmic thyroglobulin mRNA (porcine thyroid cells), 116, 55
release by pituitary fragments in vitro induced by thyrotropin-releasing hormone, inhibition by neurotensin (rat), 113, 248
Thyrotropin receptors
defective in 1-8 rat thyroid tumor line, function reconstitution by higher order gangliosides, 110, 772
glycoprotein component interaction with thyrotropin, fluorescence study (rat thyroid cells), 110, 48
Thyrotropin-releasing hormone
5-fluoroimidazole analog, synthesis and biological activity, 113, 581
thyrotropin release induction from pituitary fragments in vitro, inhibition by neurotensin (rat), 113, 248
Thyrotropin-releasing hormone receptors
biochemistry and autoradiography (rabbit spinal cord), 116, 669
Thyroxine
-binding protein, characterization in brain cytosol primary cultures (rat embryo), 116, 901
effect on neurotensin content in pituitary and hypothalamus in vivo (rat), 113, 248
Tiazole derivatives
AH 22216, gastric histamine H_2 receptor inhibition (HGT-1 cells), 116, 251
Tichorzianine A1
^1H NMR spectra (Trichoderma harzianum), 116, 1
α-Tocopherol
and superoxide generated by cytochrome P-450 model system, reaction kinetics, 115, 1002
Topoisomerase I
phosphorylation in vitro by protein kinase causing activity increase (Novikoff hepatoma), 111, 897
supercoiled DNA relaxation, inhibition by 2-6-dimethyl-9-hydroxyellipticinium (Trypanosoma cruzi), 117, 1

Topoisomerase II
purified from Pseudomonas aeruginosa, high resistance to nalidixic acid, 110, 694
Tosylamino-phenylethyl sulfonyl fluoride
inhibition of chromatin solubilization (rabbit thymus nuclei), 110, 216
Tosyl-lysine chloromethyl ketone
inhibition of chromatin solubilization (rabbit thymus nuclei), 110, 216
Toxicity
metal, and calmodulin inhibition in vitro (bovine brain), 115, 106
Toxins, see also Neurotoxins, specific toxins
from Helminthosporium carbonum, structure and conformation, 111, 398; 113, 10
Transferrin
recycling in reticulocytes, effect on NH_4Cl (rat), 113, 650
Transformation
Aspergillus nidulans from pyrimidine auxotrophy to phototrophy, induction by orotidine-5'-phosphate decarboxylase gene segment from Neurospora crassa, 112, 284
carrier DNA-free of Chinese hamster cells by plasmids pSV2gpt and pNEO3, 110, 593
induction by Rous sarcoma virus temperature-sensitive mutant, role of calmodulin receptors, 112, 647
Triamcinolone acetonide
effect on androgen-stimulated production of androgen receptors (rat prostate, hamster ductus deferens clone tumor cells), 116, 1020
Tribenzylphosphate
inhibition of phosphate active transport and oligomycin-sensitive ATP synthesis (yeast mitochondria), 113, 751
Triethylenetetramine
Cu-chelating, plasma ferroxidase decrease without anemia induction (rat), 113, 127
Triethyltin bromide
in glutathione transferase, isozyme discrimination (rat liver), 114, 829
Trifluoperazine
inhibition of
A23187-induced production of prostaglandins and cAMP by macrophages, mechanism (rat), 114, 248
synexin activity and secretion by chromaffin granules (bovine adrenal medulla), 113, 908
stimulation of Ca^{2+} uptake by sperm, mechanism of calmodulin involvement (porcine), 114, 28
Triglucosyl monoalkylmonoacylglycerol
enzymatic sulfation, kinetics (rat salivary glands), 113, 817
Triglycerides
formation increase by high carbohydrate low fat diet (rat liver), 113, 888
Trigonelline
demethylation by cell-free extracts from
animals, plants, and microorganisms, 113, 569
porcine liver, enzyme characterization, 113, 569
Triiodothyronine
-binding protein, characterization in brain cytosol primary cultures (rat embryo), 116, 901
stimulation of
chromatin solubility in hepatic nuclei (rat), 110, 61
neurotensin release by hypothalamic fragements in vitro (rat), 113, 248
Triiodothyronine receptors
low level in glial nuclei during brain development (chicken embryo), 112, 221
number increase in neuronal nuclei during brain development (chicken embryo), 112, 221
Trimethionine
uptake inhibition by photoaffinity label, 4-azidobenzoyltrimethionine (Candida albicans), 110, 884
Trimethylamine
oxidation by microsomal carbon monoxide-sensitive monooxygenase in cell-free extracts (Candida boidinii), 113, 900
Tripeptides
synthetic with varied amino acid residues at positions 2 and 3, substrates for amidating enzyme from porcine pituitary, 112, 372
Triphosphoinositides
breakdown and dense body release in thrombin-activated platelets (human), 116, 513
thrombin-induced increase in platelets, time course (human), 110, 660
Tris
effect on guanine nucleotide regulation of quinuclidinyl benzilate binding to muscarinic

acetylcholine receptors (canine, frog, mouse, rat heart), 113, 280
Trithionate
intermediate in bisulfite reduction by Desulfotomaculum nigrificans cell extracts, 117, 530
Tritin
protein synthesis inhibitor from wheat, identical antigenic determinants with inhibitors from barley and rye, 114, 190
Triton X-100
solubilization of
crude synaptic membranes from spinal cord, glycine receptor enrichment (rat), 112, 809
glucose transporter, Na^+ effect (porcine renal brush border), 112, 444
synaptosomes, concanavalin A binding increase (calf brain), 110, 804
Tropomyosin
subunits α and β, different in fast and slow skeletal muscles (chicken), 110, 147
-troponin binding, Ca regulation (reconstituted thin filament), 114, 447
Troponin
β-cell, synthesis and biological activity, 114, 763
-tropomyosin binding, Ca regulation (reconstituted thin filament), 114, 447
Troponin C
Ca^{2+} binding, effect on enthalpy, entropy, and heat capacity (bovine heart), 114, 162
hydrophobic site localization with tryptic fragments (rabbit skeletal muscle), 115, 87
Tropomyosin
single form in fibre type IIM in jaw-closer muscles (feline), 113, 519
Trypanosoma equiperdum
surface glycoprotein C-terminal end, composition study, 114, 119
variant-specific surface antigens from clones, isolation and characterization, 110, 491
Trypsin
complex with α_2-macroglobulin, free thiol group release and localization, 111, 964
immobilized on collagen membrane, chromatin organization, 114, 1169
plasma treatment
C-peptidase immunoreactivity increase (human), 111, 785
T-kinin liberation (rat), 112, 701
thermophilic cytochrome oxidase proteolysis without affect on proton-pumping and oxidase activities, 113, 575
Tryptic peptides
collagen, pyridinoline crosslinks in nonmineralized (chicken), 113, 975
Tryptophan
fluorescence
in oligomycin-sensitive ATPase, temperature effects (bovine cardiac submitochondrial particles), 111, 366
quantum yield in enkephalin cyclic analogs, 114, 268
-7-methylguanine systems, stacking interactions, mRNA model, 115, 849
Tryptophan synthase
pyridoxal 5'-phosphate binding, ^{31}P NMR study (Escherichia coli), 111, 817
Tubulin
assembly, dapsone effect (bovine brain), 116, 128
bound to colchicine derivatives coupled to CNBr-Sepharose 4B, elution with sodium chloride (rat pancreas), 111, 253
coated vesicle major constituent (bovine brain), 115, 303
-colchicine binding
enhancement by poly(L-lysine), mechanism (caprine brain), 113, 384
at 5°C (bovine renal medulla), 116, 866
denaturated, inhibition of microtubule assembly from active subunits (porcine brain), 110, 463
mRNA accumulation, induction by gangliosides (neurohybrid clone SB2IB1 cells), 116, 974
Tumor cells, see also specific tumor cells
methionine dependence (human), 117, 429
retinoid-binding proteins, HPLC detection (human breasts, ovary, murine melanoma), 116, 75
Turpentine
acute inflammation induction, α-fetoprotein decrease and haptoglobulin increase in serum (newborn rats), 110, 796
Type IV glycogen storage disease
skin fibroblast glycogen branching enzyme, decrease of activity and sensitivity to anti-enzyme IgG antibodies (human), 111, 636

Tyrosine
fluorescence quantum yield in enkephalin cyclic analogs, 114, 268
free radicals, generation by ribonucleotide reductase incubated with dithiothreitol and Fe with air (calf thymus), 110, 859
iodination, mechanism, 116, 639
NBD-labeled residue in MF_1-ATPase, identification (bovine heart), 116, 599
phosphorylation
effect of 12-O-tetradecanoylphorbol-13-acetate (chicken embryo fibroblasts), 115, 536
in membranes from erythroleukemia cells, stimulation by dimethyl sulfoxide (mouse), 112, 413
-specific protein kinase, activity (purified rat Leydig cells), 116, 400
Tyrosine aminotransferase
in fetal liver, stimulation by 5-azacytidine (rat), 113, 645
Tyrosine hydroxylase, see Tyrosine 3-monooxygenase
Tyrosine 3-monooxygenase
inactivation by reduced pterins (rat), 117, 894

U

Ubiquinol-cytochrome c reductase
antimycin A-insensitive in chromatophores, purification and properties (Rhodopseudomonas sphaeroides), 112, 450
-cytochrome c interaction, role of carboxyl groups (bovine heart), 116, 272
Ubiquinone
azido derivatives, synthesis, biological activity, 113, 477
Ubiquinone-cytochrome c oxidoreductase, see Ubiquinol-cytochrome c reductase
Ubiquinone 8
conversion from 2-octaprenylphenol by hydroxylating system of membrane-bound cytochrome O and cytoplasmic cytochrome c reductase (Escherichia coli), 111, 830
UDP-glucose
in adenocarcinoma cells, decrease during glucose starvation (human), 110, 371
UDPglucuronosyltransferase
activity with p-nitrophenol substrate, induction by ethanol, comparison with phenobarbital and 3-methylcholanthrene induction (rabbit hepatic microsomes), 111, 219
stimulation by choline-deficient diet, mechanism (rat hepatic microsomes), 114, 418
Ultraviolet (uv)
-damaged simian virus 40 minichromosomes, DNA repair endonuclease activity, 113, 309
DNA-chromosomal protein crosslinking (HeLa cells), 114, 767
DNA photoproduct induction, comparison in developing forespores (Bacillus megaterium, B. subtilis), 113, 618
effect on deoxynucleoside triphosphate pools (Chinese hamster V79 cells), 114, 458
-induced changes in deoxynucleoside triphosphate pools, kinetics, effect on DNA synthesis measurements (Chinese hamster ovary), 116, 1064
inhibition of
DNA excision repair associated with cell membrane fluidity changes (Escherichia coli), 110, 609
replication, dTTP increase and dCTP decrease (Chinese hamster ovary cells), 114, 34
trimethionine uptake, irreversible, with photoaffinity label (Candida albicans) 110, 884
long wavelength, with 8-methoxypsoralen, differential inhibition of DNA, RNA, and protein synthesis (L1210 cells), 112, 965
-mediated SOS system induction, cellular ATP pool evolution (Escherichia coli), 117, 556
mutation induction by DNA crosslinks (Deinococcus radiodurans), 112, 458
Urea
effect on progesterone receptors (chick oviduct), 114, 479
Urease
nickel K edge, X-ray absorption spectra, comparison with model compounds (jack bean), 112, 279
Uremia
ionophorous fraction in plasma, normal urine comparison (human), 111, 326
Uridine-5'-monophosphate
from 4-thiouridine-5'-monophosphate in tRNA, induction by enzymatically generated excited molecules (Escherichia coli), 117, 923
Uridine transport
nitrobenzylthioinosine-insensitive component in lymphoblastoid and

leukemia cells (human, murine), 110, 417
Urine
platelet-activating factor in newborns and adults (human), 113, 51
Urokinase
interaction with Nα-benzoyl-L-arginine amide, effect on specific SS bond reduction (human), 112, 754
Uteroglobin
amino acid sequence, homology with rat prostatic binding protein (rabbit), 114, 325
synthesis, regulation during prolonged progesterone administration (immature rabbit uterus), 115, 1015
UTP (uridine 5'-triphosphate)
GTP-dependent stimulation of initiation complex formation with initiation factor (Streptomyces aurefaciens), 114, 222

V

Vacidin
and lipid vesicle interaction, circular dichroism spectroscopy, 116, 520
Valproic acid
effect on fatty acid oxidation (isolated rat hepatocytes), 115, 730
Vanadate
facilitation of [^{3}H]ouabain binding to Na^+,K^+-ATPase, ouabain binding site determination in small muscle biopsies (rat), 111, 319
insulin-like effect on adipocytes, stimulation of glycogen synthase and phosphorylation of 95,000-dalton insulin receptor subunit (rat), 113, 80
Vanadium ions
inhibition of Na^+, K^+-ATPase, and electrogenic (Na^+, K^+) pump, bleomycin effects (rat brain, skeletal muscle), 116, 783
Vasoactive intestinal peptide (VIP)
in brain and gastrointestinal tract during postnatal development, radioimmunoassay (rat), 112, 891
induction of cAMP accumulation in pancreatic adenocarcinoma cells during differentiation in culture (human), 111, 958
Vasoactive intestinal peptide receptors
cAMP response in pancreatic adenocarcinoma cells, increase during differentiation in culture (human), 111, 958
Vasoactive peptides
purification from Murphy-Sturm lymphosarcoma acid protease action on rat plasma kininogen, 112, 621
Vasopressin
-like hormones, multigene family (Macropus fuliginosus pituitary gland), 116, 258
-receptor complexes, ligand-stabilized, solubilization from plasma membrane (bovine kidney, rat liver), 116, 91
[Lys^8]Vasopressin
identification (Macropus fuliginosus posterior pituitary gland), 116, 258
[Phe^8]Vasopressin
identification (Macropus fuliginosus posterior pituitary gland), 116, 258
Verapamil
enhancement of plasmid DNA-mediated transformation of mouse cells by gene for herpes simplex virus thymidine kinase, 110, 783
inhibition of A23187-induced macrophage production of prostaglandins and cAMP, mechanism (rat), 114, 248
Vesicular stomatitis virus
HeLa cell infection, effect of microinjected human interferon β, 110, 155
neutralized, host cell binding, phosphatidylserine effect (rabbit), 114, 774
NS protein, specific noncovalent binding of GDP, inhibition by ATP, 114, 138
released from interferon-treated cells, low infectivity mechanism, glycoprotein deficiency role (human, murine), 117, 161
ribonucleoprotein, virus production and release after microinjection (vero cells), 116, 1160
Vibrio alginolyticus
mutants defective in respiration-coupled Na^+ pump, isolation, 114, 113
Vibrio cholera
furazolidone-induced prophage and filament formation, inhibition by chloramphenicol, 112, 1106
Vimentin
degradation by Ca^{+2}-activated proteinase (calf lens), 116, 204
Vinblastine
inhibition of mitochondrial aspartate aminotransferase precursor mat-

uration (chicken embryo fibroblast), 115, 144
Vincristine
inhibition of mitochondrial aspartate aminotransferase precursor maturation (chicken embryo fibroblast), 115, 144
Vinculin
-binding proteins, high molecular weight, electroblot-overlay detection (various muscle, nonmuscle tissues), 116, 1026
VIP, see Vasoactive intestinal peptide
Virus
infection, interferon and prostaglandins, antiviral action relationship (murine cells), 116, 442
Virus replication
effect of thromboxane synthetase inhibitors (human lung fibroblasts), 116, 264
Viscometry
DNA, effects of meso-tetra(4--N-methylpyridyl)porphine and Zn^{2+}, Ni^{2+} derivatives, 113, 148
Vitamin A
as retinol or retinoic acid, collagen synthesis stimulation in corneal epithelial cell culture (rabbit), 114, 395
Vitamin B
phosphorylated, substrate for nucleosidediphosphatase, cluster analysis (rat hepatocyte Golgi fraction), 113, 178; erratum, 114, 1200
Vitamin B_{12}
inactivation by nitrous oxide, effect on folate-dependent transformylases in purine synthesis (rat liver), 112, 327
Vitamin D
-binding proteins, carbohydrate chain, isolation and characterization (human), 117, 324
Vitamin D_3, see also Dihydroxyvitamin D_3
deficiency, γ-carboxyglutamic acid decrease in femoral bone and renal cortex (rat), 113, 294
metabolites
in epididymal tissues, 24,25-dihydroxyvitamin D_3 accumulation in causa region (rat), 113, 982
recognition by monoclonal antibody with high affinity to 1,25-dihydroxycholecalciferol, 112, 431
production in cultured fibroblasts and keratinocytes (human), 115, 444
Vitamin K
-dependent
carboxylation, diastereoisomeric γ-methylglutamic acid-containing pentapeptide substrates (rat hepatic microsomes), 113, 454
proteins, warfarin-induced accumulation (rat), 114, 991
Vitellogenin
estrogen-induced synthesis, inhibition by tamoxifen, vitellogenin mRNA synthesis correlation (chicken liver), 112, 425
forms I and II, differential responsiveness during primary and secondary estrogen stimulation (chicken liver, plasma), 112, 1049

W

Warfarin
-induced accumulation of vitamin K-dependent proteins (rat), 114, 991
Water
-lipid interface, mediation of ionophore conformational change, 114, 632
Water-oxidation system
photoactivation, Ca^{2+} effect (dark-grown Picea abies chloroplasts), 116, 803
Wheat germ agglutinin
binding to O-(4-methylumbelliferyl)-glycosides, effect on fluorescence, 110, 926
inhibition of Friend erythroleukemia cell differentiation induced by dimethyl sulfoxide, 110, 228
Whey acidic protein
mRNA 5'-terminal sequence, 18-S rRNA 3'-end interaction sites (mouse), 116, 167

X

Xanthine oxidase
acetaldehyde aerobic oxidation, leukotriene inactivation by generated hydroxyl radicals, 110, 266
fluorescent oxidation product of molybdenum cofactor, identification as thieno[2,3-g]pterine derivative (bovine milk), 111, 537

XCP, see Factor X coagulant protein
X-ray absorption edge spectroscopy
  Cu(I) determination in Cu complexes of T2D laccase (Rhus vernicifera), 112, 737
  in EXAFS
    region, binuclear Cu site in met T2D laccase and azide-bound derivative (Rhus vernicifera), 112, 737
    and XANES regions, Ni in urease and model compounds, comparison, 112, 279
X-ray diffraction
  molecular structure of protected analog of C-terminal dipeptide of gramicidin A, 112, 1056
X-ray microanalysis
  elemental content in myocyte nuclei, cytoplasm, and mitochondria-enriched cytoplasm, comparison between Snell dwarf and normal mice, 114, 234
X rays
  DNA repair induction, reconstitution phases (L1210 cells), 112, 1077

Z

Zinc ions
  binding, calmodulin and S100b protein (human brain), 114, 1138; erratum, 115, 769
  -concanavalin A solutions, ^{67}Zn NMR, 115, 22
  Cu(II) or Ni(II) substitution, effect on aminopeptidase activity (Aeromonas), 114, 646
  effect on methallothionein Stokes radius (rat liver), 114, 998
  noncompetitive inhibition of dinucleosidetetraphosphatase, reversal by EDTA, kinetics, 113, 717
Zymogens
  vitamin K-dependent plasma, β-hydroxyasparatic acid residue (bovine, human), 115, 8
Zymosan
  induction of lysosomal hexosaminidase secretion by macrophages, mannose-glycoprotein receptor role (mouse), 113, 192
